

Table of Contents

Preface and Conference Organization

Chapter 1: Metals and Alloys

Damage Identification of Low Carbon Steel under Tensile Based on Elastic Modulus Y.J. Xue, S.S. Liu, J.S. Li and F. Yang	3
Effect of Heat Treatment on Conductivity of Cu-1.0Cr-0.12Zr Alloy Y.Q. Qin, Y.C. Wu, X.M. Huang, Y. Wang, J.W. Cui, Y. Hong and Y.C. Zheng	7
Effect of the Solid-Solution Treatment on the Die-Casting Structures and Properties of Commercial RE-AZ91D Mg Alloy Z.C. Liu, Y. Li and J.J. Yang	13
Effects of Compound Treatment of Pulsed Magnetic Field and Mechanical Vibration on Solidified Structure of Mg₉₇Y₂Cu₁ Alloy H. Zhang, Q. Zhou and S. Zhang	17
Microstructure and Properties of Niobium Microalloyed Pipeline Steel in CSP and Steel Pipe Produced by ERW J.X. Gao, L.J. Li and S.J. Wei	23
Preparation of PMMA/PP/ PP-g-MAH Alloy S.Q. Jiang	30
Study on the Precipitation Sequence of Aged NCu30-4-2-1 Alloy by DSC Y.L. Ai, X.R. Shen, W.H. Chen and Y.H. Xie	35
The Application of Non-Linear Optimisation Algorithm to the Simulation of Nimonic Alloy 75 at Elevated Temperature Q.L. Zeng and Z.L. Zhan	39
The Determination of Solution Temperature for NCu30-4-2-1 Alloy S.Q. Huang, Y.L. Ai, W. He and X.R. Shen	45
Influence of Imidazoline Inhibitor on CO₂ Corrosion of N80 Steel in Annulus Zone of Pump Recovery Well Z.B. Hou, T.H. Li, X.W. Lv and B.G. Fu	49
Effect of Alternating Traveling Magnetic Field on the Removal of Inclusions from Aluminum Melt H.Z. Deng, Q.L. Li, D.G. Yang and W. Liu	55
Effect of Atmosphere Proportion and Nitriding Time on Plasma Nitriding of Duplex Stainless Steel W. Ye and X.S. Tong	61
Discussion on the Mechanism of Fe-Cr-Mo Electrodeposition W.X. Yu and S.Q. Zhou	65
Effect of Segregation Purification Process on Content of Impurity Elements in High Purity Aluminum Z.H. Jia, M.Z. Ma, L. Xu, D.C. Xie and Y.T. Zhao	71

Chapter 2: Composite Materials and Applications

Effect of Mg Content on Phase Structure and Electrical Properties of (Ba_{0.97}Ca_{0.03})(Ti_{0.96-x}Zr_{0.04}Mg_x)O₃ Ceramics G.L. Zhao, D.X. Zhao and S.M. Li	79
Effects of Different Sintering Temperature on the Microstructure and Piezoelectric Properties of Pb(Nb_{2/3}Zn_{1/3})_x(Zr₅₂Ti₄₈)_{1-x}O₃ Ceramics H. Wu and D.Y. Zheng	83
Fabrication of Pyrochlore Gd₂Zr₂O₇ by High Temperature Solid State Reaction L. Fan, Y. Xie and X.Y. Shu	87
Improved Curie Temperature of Li-Doped Lead-Free (K,Na)NbO₃ Ceramics Analysis R.Z. Zhang, W.P. Guo and G.L. Zhao	91

Improvement of Thermal Conductivity of Silicone by Carbon Nanotube Array (CNTA) L.K. Wu, J. Ying and L.T. Chen	96
<i>In Situ</i> Formation of Ti Matrix Composites Reinforced Nanometric TiC by Powder Metallurgy Technique C.M. Wang, S.Y. Gao, S.F. Xiao and Y.G. Chen	100
Microstructure and Reinforcing Mechanisms of Boron Carbide–Cerium Boride Porous Composites K.W. Peng, H.L. Ma, C.W. Gong, R. Chen and Z. Tan	104
Phase-Selective Synthesis of a Silicoaluminophosphate Molecular Sieve with 3-Aminopropyltriethoxysilane as the Silica Source Y.D. Bai, H.R. Zhang, P.W. Bai, H.Y. Liu, S.H. Han, W.S. Zhang, B. Wang, K. Yuan, D.H. Song and Y.Y. Luo	109
Preparation Cu-Doped Carbon Aerogels and their Adsorptive Desulfurization Performance S.M. Zhang, S.L. Jin, M.L. Jin, X. Shao and R. Zhang	112
Preparation of B₄C–CeB₆ Porous Composites by Hot Pressed Sintering K.W. Peng, H.L. Ma, C.W. Gong, Y. Wang and Z. Tan	120
Study on the Heat Shrinkable Property of Opaque COC/PETG Film X.G. Dong and S.J. Zhou	125
Syntactic Foam Prepared with Glass Hollow Spheres of Designed Size and Wall Thickness Ratio Z. Chen, Z.X. Huang and B.Y. Jiang	129
Synthesis and Characterization of Ni-Doped Carbon Aerogels N. Jiang, S.L. Jin, X. Shao, H.F. Zhang, Z.J. Li, S.M. Zhang, M.L. Jin and R. Zhang	133
The Effect of Compound Corrosion Inhibitor of Sodium Silicate in the Chlorine Dioxide Solution K.T. Wang, D.L. He, J.L. Gao, N. Gu and Q.L. Meng	137
The Effect of pH on the Fluorescence Properties of Thermally Stable CMC/Eu Complexes B. Wang, J. Ye and J. Xiong	141
Theoretical Analysis on Thermal Shock Resistance of Refractories T.F. Ma, X.F. Wang and L. Zhao	145
A Fundamental Study on Anchor Performance of CFRP Tendons with Compressed Anchor Sleeve W.T. Jung, M.S. Keum, S.Y. Choi, J.Y. Kang and J.S. Park	151
Analysis of Marine Fouling Microbial Communities Adhering to Carboxyl Modified MWCNTs-Filled PDMS Coating Surface during the Initial Stage of Biofouling Y. Sun, S. Liang and Z.Z. Zhang	155
SAPO-34 Zeolites Prepared Using Calcined-MCM-41 as Silica Source H.R. Zhang, H.Y. Liu, P.W. Bai, X. Tao, Y. Jiang, S.H. Han, B. Wang, W.S. Zhang, K. Yuan and Y. Guo	162
ZnO/SnO₂/Montmorillonite Composite for Inhibition of Cyanobacterial Bloom N. Gu, J.L. Gao, K.T. Wang, W.C. Dong and Y.L. Ma	166
Improvement of Interfacial Adhesion in PP/PS Blends Enhanced with Polyethylene-Polyamine Surface Treated Carbon Fiber J. Li	170
Growth of GaN Film on Graphene by HVPE S.Y. He, B. Cao, Q. Yu, L. Qi, C.H. Wang, Y. Xu, J.C. Zhang and Q. Sun	175
The Transformation of ZnO Nanostructures Prepared by Thermal Evaporation V. Mekla and U. Tippiarach	180
Transverse Magnetoelectric Effect in Nickel Zinc Ferrite-Lead Zirconate Titanate Layered Composites H.X. Cao, Q. Shi, J.Y. You, Y. Fang and H. Sun	184
Effect of Eu/Co Doping on the Resistive Switching Properties of BiFeO₃ Thin Films Y.D. Zhu, C. Hu and A.Y. Zuo	189
Preparation of One-Dimension Orthorhombic NaNbO₃ Long Rods by Combining Hydrothermal Method with Post-Heat Treatment D.Q. Zhang, F. Shi, J.Y. Cheng, X.Y. Yang and M.S. Cao	193
A High-Performance Lightweight Over-Strength UHMWPE UD Cloth Preparation X.H. Meng, G. Lu and W.F. Da	201

Molecular Dynamics Study of Confined Fluid in Graphene Nanopores K. Li, J.J. Sha, L. Liu, G.S. Wu, W. Si and Y.F. Chen	205
Effects of Substrate Temperature on the Properties of Cu(In,Ga)Se₂ Thin Films Prepared by Sputtering from a Quaternary Target Z.Y. Yang, L.D. Wang, R.X. Song, D.X. Zhang and W.D. Fei	209
Effects of Indenter Tips of Quasi-Static Indentation Damage of Foam Sandwich Composites A. Ahmed and L. Wei	215

Chapter 3: Chemical Materials, Bio-Materials and Energy Materials

<i>Angelica keiskei</i> Chalcone and its Effect on Microvessel Density and VEGF Expression of Mice Hepatocarcinoma Cells Z.C. Li, X.W. Li, J.P. Wang and J.Y. Zhong	223
Application Explores in Energy-Saving Materials of Water Supply and Sewerage Works P. Xun, S. Huang and N.B. Liu	230
Comparison of Hot Corrosion Behaviors of Plasma-Sprayed Segmented Structure and Conventional YSZ Thermal Barrier Coatings under a Fused Na₂SO₄-V₂O₅ Salt Film Y. Wang, Y.C. Meng, H. Suo and P. Wang	234
Effect of Beeswax, Palmitic Acid and Stearic Acid on Soybean Protein-Isolation/Carboxymethyl Cellulose Composite Films C. Zhang, X.F. Guo, Y. Ma and X.Y. Zhao	240
Influence of Surface Properties and Pore Structure of High Surface Activated Carbon on Adsorption Capacity of Dibenzothiophene Z.J. Li, S.L. Jin, S.M. Zhang, H.F. Zhang, N. Jiang, J.L. Cheng, X. Shao, M.L. Jin and R. Zhang	244
Investigate into Variation Cashmere Fibers with Raman Spectra L.W. Zhang, H.C. Liu, X.A. Yan, Y.H. Su and G.Q. Zhang	251
Preparation and Characterization of Ag-Deposited Silica-Coated Fe₃O₄ Magnetic Nanoparticles with Recycling Antibacterial Properties P. Xu, S. Wei, J. Yang, Y.X. Che, X.Y. Cao and R. Zhang	256
Preparation and Characterization of Amine-Modified Maleated Polypropylene Y. Ma, W.B. Liang and Y.L. Zhang	262
Research on Influence Factor of Scale in ASP Flooding Z.F. Hou	267
Research Status and Problem Analysis on Pineapple Leaf Crushing and Returning Technology L. Li, J. Zhang, Z.Q. Ou, Z.D. Cui, Y.L. Li, Y. Zhang and Z.Z. Yang	272
Study of Core-Shell Structure Poly(vinyl Acetate-Butyl Acrylate) Emulsion Particles Modification G. Li, T. Wang, X. Fu, T.M. Gao and M.F. Huang	277
Study of New Ultra-Temperature Polymer Fracturing Fluid Material S.P. Wang, X.Z. Zhao, B. Cai and S. Hua	283
Study on Hydrophilic Modification of Acrylic Yarn Y. Wang, Z.Q. Liu, K.Q. Liu, C.P. Zhang and Q.M. Wang	287
Synthesis and Optical Properties of D-A Type Organic Molecules Based on Fluorene and Carbazole Z.B. Tang, X.X. Sun and P.L. Zhang	291
Synthesis and Optical Properties of Donor-Acceptor Organic Conjugated Molecules Composed of Fluorene and Phenothiazine Z.B. Tang, X.X. Sun and P.L. Zhang	296
Synthesis and Spectral Analysis of Benzene-d₆ Y.Z. Guo, D.M. She, J. Ning and X.D. Mei	301
Synthesis of D-A Type Organic Molecules Based on Carbazole and Phenothiazine for Organic Light-Emitting Materials Z.B. Tang, X.X. Sun and P.L. Zhang	307
The Band Structures of Chemisorptions on Si (100) Surface J.F. Wu	311
The Density of States for Chemisorptions on Si (111) Surface J.F. Wu	315

Application of PCA Method to Characterize Strawberry L. Li, B. Li, Q. Zhang, L.Y. Gong and X.J. Meng	319
Preparation of Cerium Hydroxide by Green Synthesis and Characterization Z. Hu and H.L. Yu	324
Preparation, Characterization and UV Absorption of Phosphotungstic Acid Cerium H.L. Yu and Z. Hu	328
Resistive Switching Behavior in $\text{Pt/La}_{0.7}\text{Sr}_{0.3}\text{MnO}_3/\text{Nb}_{0.05}\text{Bi}_{0.95}\text{FeO}_3/\text{Nb:SrTiO}_3$ Ferroelectric Heterostructure Y.D. Zhu, C. Hu and A.Y. Zuo	333
Chemical Kinetic Studies on Polyurethane Formation of GAP and HTPB with IPDI by Using <i>In Situ</i> FT-IR Spectroscopy A. Tanver, M.H. Huang, Y.J. Luo and Z.H. Hei	337
Determination of Experimental Conditions of Preparation of Zeolites from Fly Ashes via Alkaline Fusion Followed by Hydrothermal Crystallization Y.X. Chen, C. Wan, X.L. Su, T. Zeng and S.Y. Rao	342
Raising Lipid Content Improve Moisture Barrier of Soybean Protein-Isolation/Carboxymethyl Cellulose Composite Films C. Zhang, X.F. Guo, Y. Ma and X.Y. Zhao	351
Research on Reducing the Degree of COD in Wastewater during Sizing Technology K.K. Lv, Y.C. Ji and D.F. You	355
Optimized Preparation of Capsaicin-Loaded Nanoparticles Gel by Box-Behnken Design M.L. Tang, L.H. Chen, D.S. Zhou, W.F. Zhu, Y.M. Guan and J.S. Li	359

Chapter 4: Building Materials and Construction Technology

Compressive Behavior of Steel Plate-Concrete Structures Using Cementless Concrete H.Y. Park and B.J. Choi	371
Flexural Behavior of Basalt Fiber Reinforced Ferrocement Composite with Fly Ash S. Chen, D. Eising and D.P. Xu	377
Investigation on Properties and Flow Degree of Rubberized Mortar under Dynamic Load in Metro J. Yu, H.B. Zhu and K.Z. Wang	382
Research on Large Partical Size and Porous Rubber Modified Asphalt Mixture Repairing Techniques Used in “White and Black” Pavement Z.P. Yao, Z.B. Chen, G.L. Zhang and M. Li	386
Strength Quality Research of Concrete Blended with Solar PV Cells S.C. Chen, R. Huang, H.M. Hsu, J.R. Chang and L.W. Teng	392
The Application of Paper Material in Transition Building after an Earthquake N.B. Liu, L.Y. Jiang, Z. Li and S. Huang	396
Study on the Stone Material of the Chinese Official Buildings in Early Ming Dynasty (about 1368-1424) X.Q. Sun and W. Chen	400
The Flexural Behavior of Bolted Steel-Concrete Composite Beam D.B. Kim and B.J. Choi	405
Uniaxial Compression Creep Prediction of Asphalt Mixture Using the Eshelby Equivalent Inclusion Method J. Wu	410

Chapter 5: Material Processing Technology

A Review of Numerical Models for Twin-Roll Casting J.J. Park	417
A Study Effect of Shooting 2 Balls in a Ball Swaging Process on Gram Load Parameter Using Finite Element Analysis P. Kheunkhieo and K. Tangchaichit	421
A Way to Reduce Machine Cutting Temperature Z.Q. Ma, Y.A. Chen, P.F. Zhao, T. Wang, C. Peng, L. Sun, Q. Cheng and J. Wei	427

Case Analysis on PTH Fracture Caused by Twin Copper X. He	431
Cyclic Oxidation Resistance of Hot-Dipping Aluminized GH169 J. Lou and C.X. Ruan	436
Design of Welded Pipe Forming Machine Based on Siemens S7-400 X.Z. Ge	441
Discovery of α-Fe₂O₃ in the Oxide Film on ELID Grinding Wheel J.C. Kuai	446
Effect of Chamfer Angle on the Stress Distribution in Weld-Boded Single Lap Aluminum Joint M. You, J.L. Li, P. Wang and Y.L. Zhao	450
Failure Analysis and Study on Heat Treatment Process of Grate Bars Used in Sintering Trolley A.M. Li, D. Ma, Q.F. Zheng, R.H. Chen, Q. Li, Z.J. Huang and Z.J. Zhang	454
Manufacturing Process of EP Matrix Composite Rapid Injection Mold and Application Case Y.D. Zhang, B. Zhang, Y.F. Yue and G. Yang	460
Moldflow-Based Optimization Design of Gating System in Injection Mold for Automobile Bumper B. Xu and Z.Y. Rui	465
Numerical Analysis of Multi-Layer on the Stress Distribution in Adhesively Bonded Single Lap Aluminum Joint M. You, Y.L. Zhao, J.L. Li and Y.Y. Li	471
Numerical Simulation of Tube-Plate Welding Structure with T-Shaped Sections R. Han, Y.G. Song, D.T. Zhang, R.F. Wang, Y.F. Zheng and L. Li	475
Prediction of GMA Welding Characteristic Parameter by Artificial Neural Network System I.S. Kim, J.H. Lee, J. Malekani and P.K.D.V. Yarlagadda	481
Recovery of Ti-6Al-4V Alloy Scrap by Hydrogenation and Hydride Sintering L. Pan, C.M. Wang, Y.G. Chen and S.F. Xiao	492
Research on Helical Milling Specialized Tool Based on Chip-Splitting Mechanism Q.L. Chen, X.M. Chen, Z.H. Duan and W.Y. Cun	497
The Influence of Technology Head Shift Speed, Abrasive Kind and Granularity on Technology Head Vibration during Hard-to-Machine Material Cutting L. Bicejova, S. Pavlenko and J. Maščenik	507
Water Jet Technology Head Vibration due to Water Pressure Change L. Bicejova and S. Pavlenko	511
Finite Element Analysis of Thin Strip Profile in Asymmetric Cold Rolling Considering Work Roll Crossing and Shifting A. Aljabri, Z.Y. Jiang and D.B. Wei	515
Finite Element Modeling of Quenching Process Coupled with Phase Transformation Effect Y.J. Sun, Q.C. Cui, C.M. Shi and S.H. Zhang	522
Microstructure of Laser <i>In Situ</i> Synthesized TiB_x+TiC Reinforced Composite Coatings J. Liang, C. Wang, S.Y. Chen, C.S. LIU and C.Y. Yang	526
The Expansion Forming Parameters of the Expandable Tubular Material W.Z. Shen, Y. Yang, C.F. Li, W.X. Yang and X. Jin	530
The Mechanic Properties of Thermoplastic Polyurethanes Elastomer Foam Molded Using Supercritical Fluid J.K. Wang and T. Xia	534
Wear and Morphology Investigation of Cr/WC-Ni Based Composite Coating by Laser Cladding Z.H. Dong and H.Y. Fan	538
Experimental Study on Orbital Drilling Force and Machining Quality of CFRP X.M. Chen, Q.L. Chen, F.T. He and X.F. Fan	542
The Technology Head Characteristic Frequency Reading and Research on Technology and Material Parametres Influence on AWJ Technology Manufacturing Systems Technology Head Reverberance L. Bicejova and S. Pavlenko	550

The Analysis of the Temperature Field of EDM Surface Strengthening Titanium with Mist Medium	
L.R. Cai, X.J. Hu and M. Li	554

Chapter 6: Materials Testing and Analysis, Materials Wear Resistance and Strength

Effect of AC Magnetic Field on Solidified Structure and Mechanical Properties of Mg₉₇Y₂Cu₁ Alloy	
S. Zhang, Q. Zhou and H. Zhang	561
Effect of Aging Process on Microstructure and Room Temperature Ductility of TB6 Titanium Alloy	
C. Ye, F. Zhao, F. Zhou, N. Li and J.S. Li	567
The Application of Fractal Theory in EDM Surface Strengthening TC4 Titanium Alloy	
M. Li, X.J. Hu and L.R. Cai	571
Cell Growth Morphology on Nano-Structured Surface Based on Wetting	
G. Qin, H.X. Li, M.D. Ma, J.J. Li and Y.F. Deng	575
Energy Concept of Hardness by the Kinetic Sphere Indentation	
P.M. Ogar, V.A. Tarasov and D.B. Gorokhov	579
Finite Element Analysis of a Steel Bracket	
X.L. Chen, Z. Tian and Y.P. Li	584
Mechanical Property Analysis of the Boom Considering Large Deformation Effect	
H.Y. Li and X.L. Li	588
Plasma Gear Manufacturing Thermal Aspects	
J. Maščeník, S. Pavlenko and L. Bicejova	592
Research on Improving Durability of the Motorcycle Brake Drum	
Q. Huang, L. Xiang and Z.L. He	596
Simulation on Wear-Resisting of Biomimetic Brake Disc/Pad Coupling System	
Y. Huang and S.N. Sun	601
Simulation of Rock Fractures by Monte Carlo Method	
J.Y. Li, G.X. Yuan, Y.M. Zhang and Z.Q. Huang	605
Study on the Magnetic Property Deterioration of Amorphous Cores	
J. Wang, S.L. Zhang and X.T. Fu	609
The Influence of Coating Thickness on the Relative Area of Tribounits Contact	
P.M. Ogar, V.A. Tarasov and D.B. Gorokhov	614
The Storage Length Evaluation of Rubber Sealing Components with Accelerated Thermal Ageing Tests	
K. Zhou, C.Z. Wang and B. Hu	619
Wear Modeling of Steel Surfaces to the Flow under Pressure of Melts Polymers with SGF	
V. Florescu, L. Capitanu and D. Rus	626
Analysis of New Heat Exchanger Performance in Phase Change Energy Storage	
Y. Qiu, X. Luo, Q.F. Yu, Y.F. Xu, C.B. Leng and M. Li	638
Effect of Composition on the Tribological Behaviors of Ceramic-Matrix Friction Materials	
F.H. Wang and Y. Liu	645
Stress Distribution Behavior of Spherical Plain Bearing Fabricated by TiAl-Based Composite Materials Based on the Finite Element Analysis	
J. Wang, L.Y. Yang, S.R. Wang, G.J. Xue and C.X. Zhou	649
Numerical Calculation and Analysis of Water-Lubricated Stern Bearing Considering Elastic Hydrodynamic	
G. Liu	653
Novel Multi-Stream Plate Exchanger under High Pressure-Structure and its Design Method	
Y.P. Qu, W.Q. Wang, Y. Liu and Z.Y. Xu	658
Researches on Lifetime Modeling of LED Luminaires	
H.J. Li, L. Nie, F. Huang and W.J. Xiang	662
Fire Hazard Research of Wire Joint	
D.Z. E and M. Zhang	666

Investigation on Microstructure and Wear Resistance of the New CrWMoV High-Alloy Wear Resistant Cast Iron	
Z.T. Wang and H.M. Gao	670
Wear Behavior and Microstructural Evolution during Dry Sliding Wear of AZ51 Magnesium Alloy	
Y.B. Wang, T.F. Su, M.L. Yin, X. Han, X.Y. Li, C. Liang and J. An	674

Chapter 7: Advanced Design and Advanced Manufacturing Technology

A Graphical Symbol for Machining Process Information Description Using Model-Based Definition Technology	
F.J. Tian, H.Q. Zhang, X.Y. Chen, H.Q. Zhou and D.J. Chen	681
Design and Experimental Analysis of Pepper Fruit Preprocessing Machine	
Y. Zhang, C. Ge, Y.L. Li, M.F. Li, W.Y. Luo and G.Y. Tan	687
Design on a Removable Catalyst Muffler	
Q. Huang, L. Xiang and Z.L. He	692
Multi-Dimensional Assembly Process Data Management Method Based on Workflow	
S.J. Ruan, J.H. Liu and C.B. Zhuang	696
Research on System Architecture and Fine-Grained Access Control Strategy of Collaborative Development Platform	
L. Liu, R.M. Nie, R.Y. Chen, P. Zhou and R.L. Jia	701
Parallel Machine Scheduling Problem with a Resumable Availability Constraint	
Q. Zhang and C.X. Luo	708
Study on the Design Factors Affecting the Operating Actions that Can Be Used Easily at the Design Stage	
L. Pan, H.J. Cho and J.I. Park	712
The Design of Electrical Equipment Fault Diagnosis System Based on Fuzzy Inference	
F.H. Zou and H. Zhang	716
The Research of BDAR under Conditions of Informationalization	
S.C. Tu, X.J. Gu, G.D. Wang, S. Wang and B. Qi	720
Influence of Running Shoes Made of Different Materials on Athletes' Sprint Speed	
Y. Zhang	724
A Cooling Vest for Construction Workers	
M. Wu, J. Dong, A. Zhao, W.C. Tang, W. Sher, G.W. Chen, S. Chen, Z.D. Qin, Y. Zhou and Y. Wang	728

Chapter 8: Dynamics

An Adjustable Inertia Balance Support for High-Speed Scanning Probe Microscope	
G.Y. Yan	735
Study on Dynamic Characteristics of the Bridge Crane Hoisting Mechanism Based on State-Space Method	
A. Liu, W. He, Z.K. Li and L. Cheng	739
The Vibration Model Establishment and Solution of Bending-Torsion-Axial-Swing Coupled the Helical Gear Transmission System Based on Lumped Parameter Approximation Method	
C. Li, B.C. Wang and J.F. Li	743
The Mechanical Properties Comparative Analysis for Socked and Non-Socketed Composite Pile	
H. Chen and K.S. Ma	748
Mathematical Simulation of Concrete Fatigue Strength under Cyclic Loading	
G.G. Kashevarova, Y.E. Kurbatov and R.V. Sevastyanov	751
The Study on Contact Angle of High-Speed Ball Screw	
X.H. Xu, W.C. Tang and Y.H. Wang	757

Chapter 9: Vibration, Sound, Noise Analysis and Control

Dynamic Response Analysis of Submarine Pipeline under Action of Current F. Lei, Y.L. Deng and X.H. Zhao	767
Dynamics Analysis and Parameter Optimization of New Vibration Platform Y.B. Liu, C.X. Yin and J.J. Ma	771
Optimization of Sound Source Model for the Simulation of High Speed Train Interior Noise Using Finite Element Method D. Wu and J.M. Ge	776
The Simulation and Accuracy Analysis of Sound Filed Reconstruction Based on Fourier Transform-Source Simulation Technique H.H. Jiang, Y.J. Wang and Y. Xiang	780
Vibration Test and Analysis of No-Tillage Planter on the Maize Stubble Surface Y.Q. Liu, M.Q. Zhao, F. Liu, S. Dong and X. Zhang	788
Vibration Analysis Based on the Mathematical Model of the Air-Suction Device Tillage Seeder Seeding X. Zhang, M.Q. Zhao, F. Liu, S. Dong and Y.Q. Liu	794
Experimental Research on Thermal-Vibration for Composite Trilaminated Wing Structure S.G. Zhao, Y.W. Wang, D.F. Wu, Y. Pu and L. Shang	799

Chapter 10: CAD / CAM / CAE and Applications

Dynamic Responses Analysis of Permeable Breakwater Subjected to Random Waves H. Ping	809
Flow Field Analysis and Simulation of Tank Cars Based on Secondary Development of FLUENT M.Q. Li, B. Wang, D.Y. Li and L. Li	813
Integrated Thermal-Structural Analysis of a Reflecting Optical System with All Metal Components B. Lv, G.L. Wang and Y. Yang	818
Research and Development of Rapid Design System for Modular Machine Tool Based on KBE L.Z. Zhou, Q. Gu and Q.Z. Li	822
Research on the Calculation of the Security of High Concrete Arch Dam Based on the Finite Element Method J.L. He, Y.H. Guo and X. Zhu	829
The Finite Element Modeling and Structure Analysis of Dust Removal Fan Q.P. Han and B. Peng	833
Turbine Blade CNC Machining Simulation Analysis Based on MATLAB and UG J.N. Yang, R.X. Bai, L.Q. Dong, Z.H. Liu and X.J. Jiao	837
Characteristic Performance Analysis of Traction Motor on EMU with Broken Bars Using FEM Y.X. Li, Y.F. Wang, X.L. Ge and Y. Lu	841
The Discussion of the Simulation Accuracy of the Vehicle Suspension Coupled Dynamics Model S.H. Liao, Y.H. Bao and S.D. Zhou	849
Parameterized Highway Tunnel Inner Contour Design with ObjectARX T. Peng, Q.F. Zhang and X.L. Wang	854
The Small Road Surface Shot Blasting Cleaning Machine Design C. Xue and Y. Hu	858
Decreasing Airflow Velocity in High Speed Hard Disk Drive by Using Spoiler W. Kankaew, K. Tangchaichit and J. Suriyawanakul	862
Deformation of Hard Disk Drive Media Caused by Thermal Stress and Induced Air Flow P. Padtha and K. Tangchaichit	866
Simulation and Numerical Analysis of Nondestructive Testing on Weld Cracks by Eddy Current Thermography L. Jiang, Z.P. Liu, X.L. Liu and G. Lu	874
Finite Element Analysis of Anchor Impacting the Buried SOFC Y.J. Wang, X.M. Fan, F. Yuan and H.B. Hao	881

Chapter 11: Mechatronics, Industrial Robots, Automation and Control Technologies

2-DOF Synchronous Control of 6PUS-UPU Parallel Manipulator K.J. Zheng, C. Wang and H. Zhou	889
Asymptotic Properties of Sampling Zero Dynamics for Nonlinear Systems in the Case of Time Delay and Relative Degree Two X.Y. Li, C. Zeng, T. Zhou, Y.J. Ren and Y.X. Li	893
PID Control of a Parallel Vibration Isolation System Based on Pneumatic Artificial Muscle Y.B. Liu, J.J. Ma and C.X. Yin	899
Study on Adaptive Fuzzy Control System of Settlement Technology X.P. Chen	904
Study on the Design of the Ventilation of Ship Engine Room Control System S. Ling	908
The Design of the Test Control System of Small Piston Aircraft Engine Y.P. Li and W. Li	912
A Semantic Gateway for Home Automation Networks S.Q. Hu, X.L. Zhang and W. Dang	916
Analysis and Control of the Fault in the Hydraulic System of Coal-Machinery L.X. Hou, J. Kong, F.G. Li, C.X. Ju and W. Xu	921
Quasi-Close Loop Control of NC Machine Tools Q.Q. Wang, Y.H. Feng and Y.L. Wang	927
Research Situation of Deicing Device of Transmission Line Deicing Robot F.Q. Wang, C.Z. Cao, J.D. Wang, N. Zhou, A.Q. Sun and Y.D. Guo	931
Study on Prediction of Chaotic Time Series Using Least Squares Support Vector Machines X.Y. Wang, G.F. Gao, Z. Qu and H.F. Pu	935
Manipulator Tactile Telepresence Research Based on one Type Pressure-Sensitive Sensor C.F. Wang, A.Y. Ji and J.J. Chen	939

Chapter 12: Measurement Technology, Instruments and Sensors, Monitoring, Detection Technologies and Methodologies

Design of Multi Parameter Water Quality Online Monitoring System Base on FPGA B.L. Yang, J.Y. Ye and Z.F. Cheng	945
Expert System Based on Fuzzy Rules for Monitoring and Diagnosis of Operation Conditions in Rotating Machines R.F.M. Marçal, K. Hatakeyama and D.J. Czelusniak	950
Properties of Films Characterized by Scanning Acoustic Microscope H.J. Yan, C.G. Xu, D.G. Xiao and Q. Lin	961
Research on the Secondary Compensation Method of the Screw Pitch Error Based on the Laser Interferometer X.L. Shi, H.L. Liu, H. Li and C. Liu	966
Study on Calibration and Test of Automotive Wheel Hub Detection System X.D. Yang, Y.Z. Men, L. Yu, J.G. Gao and H.B. Yu	970
A Skywave OTHR Adaptive Frequency Selection Method Based on Preliminary Criterion and Weighted Criterion S.H. Liu, X.G. Liu and Z.J. Sun	974
A Water-Solution Fluorescence Probe for H₂O₂ Based on Naphthalimide Derivative Y.M. Shen, S.M. Yang, L.C. Xi, W.Y. Cao, L.L. Zhou, Y. Yang, S.D. Feng, X.F. Peng, X.Y. Zhang, C.X. Zhang, J.L. Jin and Q.Y. Zhen	978
Method and Apparatus for Measuring the Strength of Weak Binding Coating Interface F. Wang and B.H. Wu	983
Moisture Resistance of the As-S-I Glasses A. Semencha, M.V. Kurushkin and V.A. Markov	987
Study on the Influence of the Waveguide Layer to the Far Field of GaN Based Laser Diode H. Liao, M.Z. Sun, J.J. Zhang, Y.W. Zhang, T. Fan, C.Y. Song and K. Yang	991

The Development of Initial Position End-of-Line Test System for PMSM Y.L. Cao and P. Cao	995
Study and Application of Machine Vision Technique for Quality Detection of Agricultural Products X.P. Mo and Z.G. Pan	999
Determination of the Whole Stiffness of Paper Plate S. Guo and D.Y. Huang	1003
Calibration Methods of Silicate Analyzer L. Wang and Y.F. Xu	1008

Chapter 13: Power, Electronics, Circuit Technology

Analysis of Operation of AVC System in Fuzhou Power Grid J.J. Xiong, W. He and H. He	1013
Analysis of the Influence of High-Speed Railway on Power Quality J.J. Xiong, W.B. Wang and W. He	1017
The Study of Characteristic Impedance of Conductive Transmission Line in FPC(Flexible Printed Circuit Board) Design and Process B. Li, Y.L. Liu, X.D. Zhang and Z.J. Pan	1021
Fault Diagnosis of Traction Inverter Based on Wavelet Analysis and Neural Network Y.F. Wang, W.M. Zhang, X.L. Ge and Y. Lu	1025
Optimized Design of Double-Loops Controller for Single-Phase Pulse Rectifier without LC Resonant Filter Circuit W.M. Zhang, Y.X. Li, X.L. Ge and Y. Lu	1031
Simulation of Distributed Photovoltaic Power Connecting to Grid Based on ETAP W.B. Wang and J.J. Xiong	1039
The Design of Semiconductor Laser Driver and Simulation Analysis of Constant Current Drive Circuit Based on Multisim 10 L.B. Wu	1043

Chapter 14: Computer Applications and Mathematical Modeling, Numerical Methods, Intelligent Algorithms and Optimization

A Higher-Dimensional Lie Algebra and 4×4 Discrete Soliton Hierarchy with Self-Consistent Sources L. Li	1051
A New 3×3 Discrete Soliton Hierarchy with Self-Consistent Sources L. Li	1055
A New Coupled Map Car-Following Model Considering the Synergy Effect of Ahead-Backward Vehicles T. Zhou, Y.X. Li, X.Y. Li and C. Zeng	1059
Construction of Compactly Supported Nonseparable Orthogonal Wavelet with Dilation 4 H.E. Yang	1064
Power Reduction Techniques in Cloud Data Centers L. Tang, Z.C. Cai, G.L. Chen and X.W. Li	1070
Research and Development of Components Technology Selection Database Based on the Network W. Wang, W.T. Lu, X.W. Liu, D.D. Jin and Q.L. Wang	1074
Research on the Frame System of Digital Library Mobile Cloud Service Platform M. Yao	1079
Study on Connectedness of Flexible Housing as an Application of Space Syntax J.H. Son, H.Y. Park and D.B. Kim	1083
Sybil Node Discovery Based on Group Location Information P. Lu, G.W. Zhang, X.B. Xu and F.C. Yang	1088
The Research on the Axis-Symmetric Development and Verification for the Positive Scheme Numerical Method J.L. Zhong and G.G. Le	1096

The Upper Bound of Primitive Exponent of a Class of Special Nonnegative Matrix Pairs M.J. Luo	1100
Ubiquitous Library Service System Architecture Research Based on Cloud Computing H. Hai	1104
Optimization of Multi-Depot Heterogeneous Incident Vehicle Routing Problem with Soft Time Windows Based on an Improved Ant Colony Optimization Y.L. Tang, Y.G. Cai and Q.J. Yang	1108
Watermarking Scheme Resilient to Geometrical Attacks Base Normalized Feature Area O.J. Lou, S.T. Tang and S.H. Li	1118
A Study on Static Water Resistance Prediction of Offshore Wind Turbine Installation Vessel L. Xin, C.H. Ng and S.L. Yang	1124
Contrastive Analysis on Parameter Identification of Unmanned Gliding-Hydrofoil Craft's Maneuverability Based on GA and PSO M.Y. Wang, H.T. Xu, S.L. Yang and Y. Chen	1129
Grillage Structural Optimization Based on Genetic Algorithm and Mechanical Direct Calculation X.N. Yao, Y.L. Zhou and X.S. Zhang	1135
Numerical Study of the Influence of Ambient Pressure on the Inerting Effect of an Aircraft Fuel Tank Inerting System D.J. Liu	1140
Quantitative Models for Complex Physical Systems J. Fu, J.Z. Wu, N. Zhou and H.Y. Tan	1144
Research on Triangularization of Parametric Surface Based on Surface Curvature W.M. Yang	1148
A Comparative Study on Single Display and Region-Based P300 Speller Paradigms for Brain-Computer Interface Q. Li, S. Liu, K. Cao, J. Li, K.Y. Shi and L.F. Wu	1153
Calculation of Elliptic Sphere Form Error Using a Differential Geometry Algorithm L. Zhang, C.H. Huang, L.L. Liu, X.H. Lu and J.X. Li	1158
Study on Mathematical Model of Cylindricity Error L.J. Chen and H.C. Wu	1162
Grey Relational Analysis and its C# Program in Analysis of Rigid Polyurethane Foam X.G. Zhao, Y. Zhou, J.Y. Zhao, X.Y. Yang and X. Zheng	1167

Chapter 15: Communication Technologies, Image, Video, Data Processing Technologies

A Scalability and Reliability Super Peer Construction Method in Unstructured Distributed System L. Gao	1173
Target Recognition and Tracking Algorithm without Training Samples: Sand-Table Algorithm J.Q. Li, C.G. Li and X.L. Tian	1177
The Design of Real-Time and High-Speed Video Processing Platform for Aerial UAV Based on DM642 M.Z. Wei and W.W. Tang	1186
Passive Wireless Communication Technology Applied in Green Building X.J. Feng	1190
Hadamard Transform Combined with PTS for PAPR Reduction in Direct-Detection Optical OFDM System H. Li, X. Zhang, L. Guo, Y.J. Liu, X.X. Gong and Y.F. Zhou	1194

Chapter 16: Industrial Engineering, Manufacturing Management, Production Quality

A Prescriptive Approach to Assign Weights to Customer Needs for System Design X.W. Zhang, S.R. Tong and K.Q. Wang	1201
A Sensitivity Analysis of Train Speed and its Effect on Railway Capacity B. Bevrani, R. Burdett and P.K.D.V. Yarlagadda	1208
Batch Picking Method for Bookstore Distribution Center Y.P. Wu	1213
Modern Technology Equipment Maintenance Process Management Z.Q. Ma, T. Wang, P.F. Zhao, C. Peng, Y.A. Chen, Z.C. Shu, L. Sun, Q. Cheng and J. Wei	1220
The Selection Method of Parts in Product Family Evolution H.L. Wang	1224
A Study on Approach Method of the Manufacturing Informatization for Semi-Companies M.H. Jung and J. Park	1229
Proposed Method for Sustainability Development of Consumable Goods P.T. Fernandes, O. Canciglieri and A.M. Oliveira Sant'Anna	1233
Thoughts on Product Development Oriented to Sustainability in Organizational Overview R.A. Mattioda, O. Canciglieri, P.T. Fernandes, J.L. Casela and A. Mazzi	1238
Study on Factors Effecting Wayfinding and its Impact on Hospitals M. Agarwal and P.K.D.V. Yarlagadda	1245
Maintenance of Hot Processing Apparatus in Steel Industries: Effects on Production Output R.A. dos Reis, R.F.M. Marçal and D.J. Czelusniak	1250
Alarm Rationalization Based on Process Mining Techniques R.E. Kondo, E. de Freitas Rocha Loures, E.A. Portela Santos and C.M.P. Braga	1258
Contemporary Lean Technology and Process Management Theory and System Q. Cheng, L. Sun, Z.Q. Ma, P.F. Zhao, C. Peng and J. Wei	1266
The Optimization and Countermeasures Research of Agricultural Products Quality and Safety Supervision Mode W.D. Xi, Q. Qiao and S.F. Sun	1271
Data Operation of Management Accounting in E-Commerce Enterprises H. Zhou, Y. Yu and R.Q. Li	1275
Enterprise Document Management Module's Design and Implementation Based on Workflow Technology Y.F. Chen	1279
