

Table of Contents

Research for a Flexible Production of Lightweight Space Frame Structures A. Klaus and M. Kleiner	1
Three-Dimensional Curved Profile Extrusion – First Results on the Influence of Gravity A. Klaus, D. Becker and M. Kleiner	5
Composite Extrusion – Determination of the Influencing Factors on the Positioning of the Reinforcing Elements M. Kleiner, A. Klaus and M. Schomäcker	13
Mechanical Properties of Compound-Extruded Aluminium-Matrix Profiles under Quasi-Static Loading Conditions K.A. Weidenmann, E. Kerscher, V. Schulze and D. Löh	23
Flying Cutting of Spatially Curved Extrusion Profiles C. Munzinger, J. Fleischer and G. Stengel	35
3D-Laser Processing of Spatially Curved Profiles J. Fleischer, S. Kies, C. Munzinger and R. Rilli	43
Analysis and Simulation of Cutting Technologies for Lightweight Frame Components K. Weinert, N. Hammer and J. Rautenberg	53
Laser Bifocal Hybrid Welding of Aluminum A. Trautmann and M.F. Zaeh	65
Investigation of the Influence of Process Parameters on the Structure and the Mechanical Properties of Joints Produced by Electromagnetic Compression V. Schulze, P. Barreiro and D. Löh	79
Joining by Forming of Lightweight Frame Structures W. Homberg, M. Marré, C. Beerwald and M. Kleiner	89
Seam Weld Positioning for Composite Extrusion M. Schikorra and M. Kleiner	101
In-Process Simulation of Multi-Axis Milling in the Production of Lightweight Structures E. Ungemach, S. Odendahl, M. Stautner and J. Mehn	111
Analysis of Cutting Technologies for Lightweight Frame Components K. Weinert, S. Grünert and M. Kersting	121
Structural Behavior of an EN AW-6060 Profile during and Immediately after Welding by a Laser-Laser-Hybrid System M.F. Zaeh and S. Roeren	133
Qualitative Knowledge and Manufacturing Considerations in Multidisciplinary Structural Optimization of Hybrid Material Structures M. Huber and H. Baier	143
Flexible and Intelligent Gripping Technology for Machining and Handling of Spatially Curved Extruded Aluminum Profiles G. Lanza, J. Fleischer and D. Ruch	153
Design and Optimization of an Innovative Machine Kinematics for Combined Handling and Machining J. Fleischer and J.P. Schmidt-Ewig	163
