Committees and Preface

Chapter 1: Physics and Technology

Single-Photon Detector Based on MOSFET Electrometer with Single-Electron Sensitivity H. Inokawa, W. Du, M. Kawai, H. Satoh, A. Ono and V. Singh	3
CZTS Monograin Powders and Thin Films E. Mellikov, D. Meissner, M. Altosaar, M. Kauk, J. Krustok, A. Öpik, O. Volobujeva, J. Iljina, K. Timmo, I. Klavina, J. Raudoja, M. Grossberg, T. Varema, K. Muska, M. Ganchev, S. Bereznev and M. Danilson	8
Defect and Structure Engineering – Submicron Technology and Inverse Nanotechnology for Photo- and Ionizing Radiation Detectors J.V. Vaitkus	14
Self-Organization Processes of Nanostructure Formation by Laser Radiation in Metal L. Fedorenko	18
Application of Titanium Dioxide Nanorods in DSC Using Hydrothermal Method M.K. Bin Ahmad and K. Murakami	24
Laser-Induced Modification of the Surface State and Optical Properties of CdTe Crystals L.V. Poperenko, D.V. Gnatyuk, V.A. Odarych, I.V. Yurgelevich, S.N. Levytskyi and T. Aoki	28
Laser-Induced Doping of CdTe Crystals in Different Environments V.A. Gnatyuk, S.N. Levytskyi, O.I. Vlasenko and T. Aoki	32
The Electrodynamic Human Motion Energy Converter with Planar Structure J. Blums, G. Terlecka and A. Vilumsone	36
Investigation of Textile Materials for Laser Light Beam Scanning I. Dabolina, A. Vilumsone and J. Blums	40
“Black Silicon” Formation by Nd:YAG Laser Radiation A. Medvid', P. Onufrijevs, E. Dauksta and V. Kyslyi	44
High-Resolution X-Ray Computed Tomography for Materials Research A. Egbert and O. Brunke	48
Separation of Particles Employing Travelling-Wave Electrokinetic Phenomena and Inclined Gravity M. Eguchi, T. Yamakawa and T. Yamakawa	52
Band Bending of <i>n</i>-GaP(001) and <i>p</i>-InP(001) Surfaces with and without Sulfur Treatment Studied by Photoemission (PES) and Inverse Photoemission Spectroscopy (IPES) K.Z. Liu, M. Shimomura and Y. Fukuda	56
Applications of High-Precise Three-Dimensional Measurement System T. Hashimoto, M. Kaneko, A. Rövid, H. Ohta, A. Fukuda, M. Aniya, N. Naito, H. Enomoto and P. Skvarca	62
A Novel Refrigerator Device Using Single-Electron Pump Applicable to SOI Wafers H. Ikeda and F. Salleh	66
Analysis of Electron Spin-Spin Interaction in Coupled Quantum Well T. Ito, W. Shichi, M. Ichida, H. Gotoh, H. Kamada and H. Ando	70
A New System for Real Time Measurement of Nano- and Micro Particles in Flowing Gas. Design and Calibration. R. Jabłoński and R. Nowak	74
Laser Marking in Digital Encoding of Surfaces K.D. Kanev, P.V. Gnatyuk and V.A. Gnatyuk	78
Magnetization Peculiarities of Defects in Silicon Produced by Ni⁺, Co⁺, Fe⁺ Ion Implantation A. Karabko, A. Dostanko, N. Lapchuk and P. Onufrijevs	82
Optical Characterization of MBE-Grown ZnO Epilayers M. Karaliunas, T. Serevicius, E. Kuokstis, S. Juršėnas, Š.Y. Ting, J.J. Huang and C.C. Yang	86
Modeling of Surface Structure Formation after Laser Irradiation J. Kaupuzs, S.E. Guseynov, J.S. Rimshans and A. Medvid'	90

Design of an Electrostatics Lens of the Micro-Column Microscopes Using a Multi-Gated FEA	
A. Koike, Y. Takagi, T. Fujino, T. Aoki, Y. Neo, H. Mimura, T. Yoshida, M. Nagao, K. Sakai and H. Murata	94
Color Calibration Method Based on Spectrally Reproduced Colors and its Application to XYZ-Type Digital Camera	
M. Kretkowski, R. Jabłoński and Y. Shimodaira	98
Point Defects Generation Kinetics in the Si-SiO₂ System and its Influence on the Interface Properties	
D. Kropman, T. Kärner, S. Dolgov, I. Heinmaa and C.A. Londos	102
Characterization of Resistivity of Sb₂S₃ Semiconductor Nanowires by Conductive AFM and <i>In Situ</i> Methods	
J. Bukins, G. Kunakova, P. Birjukovs, J. Prikulis, J. Varghese, J.D. Holmes and D. Ertz	106
Stimulated Emission from Wide-Gap Semiconductors	
E. Kuokstis	110
Kelvin Probe Force Microscope Measurement Uncertainty	
M. Ligowski, M. Tabe and R. Jabłoński	114
Direct Laser Writing of Refractive Index Micro-Structures in Lithium Niobate	
V. Mizeikis, V. Purlys, W. Inami and Y. Kawata	118
Memory Effects Based on Dopant Atoms in Nano-FETs	
D. Moraru, E. Hamid, J.C. Tarido, S. Miki, T. Mizuno and M. Tabe	122
Nanostructural Control of Pt Layer on Counter Electrode for Application to Dye-Sensitized Solar Cells	
K. Murakami, S. Fujiwara, D. Kobayashi, H. Ishihara and M. Shimomura	126
Influence of Laser Radiation on Optical Properties and Surface Structure of CdZnTe Crystal	
A. Mychko, A. Medvid', J. Barloti and Y. Naseka	130
Surface Functionalization of Graphene Layer-Encapsulated Magnetic Nanoparticles by Inductively Coupled Plasma	
M. Nagatsu, T.E. Saraswati and A. Ogino	134
Stable Emission Characteristics of Low Work Function Amorphous Carbon Coated Transfer Mold Nickel Field Emitter Arrays in Harsh Environment	
M. Nakamoto and J.H. Moon	138
Fabrication and Performance of Photocatalytic GaN Powders	
T. Nakano, M. Hamada and S. Fuke	142
Thermal Neutron Detection by CdTe Detector	
T. Nishioka, A. Miyake, S. Singh, H. Morii, H. Mimura and T. Aoki	146
Process Analysis of Laser Welding Method with Polybutyleneterephthalate (PBT)	
R. Okuizumi, S. Hirota, Y. Takagi, M. Sudoh and Y. Okano	150
High-Efficiency SOI Photodetector Utilizing Surface Plasmon Resonance in Gold Corrugated Structure	
A. Ono, H. Satoh and H. Inokawa	154
Decrease of Point Defect Concentration at a Surface of ZnO/Si Heterostructure by Powerful Laser Radiation	
P. Onufrijevs, A. Medvid', E. Dauksta and T. Trautnitz	158
Integration of Optical Fibres into Textile Products	
I. Parkova, A. Valishevskis, I. Ziemeles and A. Vilumsone	162
Dynamic Force Sensor for <i>In Situ</i> Studies of Nanometer Size Contacts with Controllable Gap Potential	
R. Poplauskas, P. Birjukovs, J. Prikulis, R. Lohmus and D. Ertz	166
Relaxation of Resonant Excitons in CdSe Nanocrystals: Simple Variational Calculation	
I. Pundyk, I. Dmitruk, M. Davydenko, V. Romanyuk and A. Kasuya	170
Mechanisms of Strong Photoluminescence from Si Nanocrystals	
T. Puritis, J. Kaupuzs and E. Dauksta	175
Coulomb-Coupled, Protein-Based Computing Arrays	
B. Rakos	181
Detection of the Nanostructures in ZnO Thin Films by Using Optical Methods	
M. Rakov, L.V. Poporenko and I.V. Yurglevich	185

Comparative Study of Photoluminescence in Silicon and Zinc Oxide Nanowires G.Y. Rudko and A.I. Klimovskaya	189
Development of Microclimate Regulatory Clothes I. Šahta, I. Baltina and J. Blums	193
Influence of Impurity Band on Seebeck Coefficient in Heavily-Doped Si F. Salleh and H. Ikeda	197
Investigation of Adhesion Materials for Gold Line-and-Space Surface Plasmon Antenna on SOI-MOS Photodiode H. Satoh, Y. Matsuo, H. Inokawa and A. Ono	201
Si-Based Single-Dopant Atom Devices M. Tabe, D. Moraru, A. Udhiarto, S. Miki, M. Anwar, Y. Kawai and T. Mizuno	205
Fabrication of the Field Emitter Array with a Built-in Suppressor Gate Y. Takagi, A. Koike, T. Fujino, T. Aoki, Y. Neo, H. Mimura, T. Nishi, T. Yoshida, M. Nagao, K. Sakai and H. Murata	209
Random Error in Intensity Spectrum Measured with THz-TDS - No Relation to the Intensity Fluctuation of Fs-Laser M. Takeda, S.R. Tripathi, M. Aoki and N. Hiromoto	213
Preparation and Evaluation of Novel Sugar Dendritic Gd-DTPA Complexes for MRI Contrast Agents and Phospha Sugars for Anti-Tumour Agents K. Kiyofuji, K. Tsunekawa, M. Yamashita, J. Yamashita, M. Fujie, K. Asai, T. Suyama, S. Ito, V.K. Reddy, M. Yamada, K. Ogawa, N. Ozaki, M. Sugiyama, M. Yamaoka, R. Makita, S. Nakamura, T. Aoki, G. Yu, K. Aoshima, N. Kamikage, Y. Takehara, H. Sakahara, H. Takayanagi, S. Laurent, C. Burtea, L. Vander Elst and R.N. Muller	217
Physics of Flexible Magnetic Filaments I. Javaitis and V. Zilgalve	221
P-N Junction Formation in ITO/p-Si Structure by Powerful Laser Radiation for Solar Cells Applications A. Medvid', P. Onufrijevs, E. Dauksta, J. Barloti, A.G. Ulyashin, I. Dmytruk and I. Pundyk	225

Chapter 2: Chemistry

Optical Properties of CaYAlO₄: Eu³⁺ Phosphors M. Bartic, H. Kominami, Y. Nakanishi and K. Hara	231
Sol-Gel Derived Ferrites: Synthesis and Characterization A. Gatelyte, D. Jasaitis, A. Beganskiene and A. Kareiva	235
Setting Properties of Brushite and Hydroxyapatite Compound Cements Z. Irbe, L. Vecbiskena and L. Berzina-Cimdina	239
Recycling of Carbon Fiber Reinforced Plastics Using Subcritical Water I. Okajima, M. Hiramatsu and T. Sako	243
Numerical Investigation of the Limiting Sliding Condition of Polyoxymethylene with Various Sliding Geometry Y. Takagi, A. Sone, K. Mizoguchi, Y. Okano, R. Okuizumi, M. Kada, S. Hirota and Y. Tajima	247
3D Cone Beam Radiodensitometry in Evaluation of Hydroxyapatite (HAP)/Tissue Hybrid after Maxillary Sinus Floor Elevation G. Salms, I. Salma, A. Skagers and J. Locs	251
Comparison of Biphasic Calcium Phosphate Bioceramics Fabricated Using Different Techniques K. Salma, Z. Irbe, D. Jakovlevs, N. Borodajenko and L. Berzina-Cimdina	255
Phase Transition in Niobophosphate Glass-Ceramic A. Stunda, N. Mironova-Ulmane, N. Borodajenko and L. Berzina-Cimdina	259
Effect of Cooling Conditions on Nano-Sized NiFe₂O₄ Electrical Properties A. Sutka, G. Mezinskis, S. Lagzdina and G. Bebris	263
Synthesis and Properties of New Glassy Molecular and Oligomer Azocompounds Suitable for Holographic Recordings K. Traskovskis, V. Kokars, A. Ozols and P. Augustovs	267
Synthesis of Red Luminescent Non Symmetric Styryl-4H-Pyran-4-Ylidene Fragment Containing Derivatives for Organic Light-Emitting Diodes E. Zarins, J. Jubels and V. Kokars	271

Nonlinear Optical Susceptibility of Tetragonal BaTiO₃ A. Gulbis	275
--	-----

Chapter 3: Biology and Medicine

Investigation of the Mechanism of Polar Excitations on Frog Sciatic Nerve by Optical Stimulation Y. Hirayama, S. Ishizuka, Z.L. Grigorievich, T. Yamakawa and T. Yamakawa	281
Medical Image Region Extraction and 3D Modeling Based on Approximating Curves K. Bolochko, A. Sisojevs, A. Glazs and A. Platkajis	285
Lidocaine Loaded Ca/P Scaffolds for Bone Regeneration and Local Drug Delivery D. Loca, J. Locs, J. Gulbis, I. Salma and L. Berzina-Cimdina	289
Development of Combined Treatment of Electro-Coagulation and Flocculation for Various Types of Wastewater S. Matsuda, T. Wada, A. Suzuki and T. Suzuki	293
Low Temperature Plasma Treatment for Immobilization of Biomaterials on Polymer Surface A. Ogino, S. Noguchi and M. Nagatsu	297
<i>Staphylococcus Epidermidis</i> and <i>Pseudomonas Aeruginosa</i> Adhesion Intensity on a TiO₂ Ceramic in an <i>in Vitro</i> Study A. Pavlova, A. Reinis, L. Berzina-Cimdina, J. Kroica, A. Burlakova and K. Rubenis	301
Gasification and Hydrogen Production from Waste Biomass with High Pressure Superheated Steam I. Okajima and T. Sako	305
Simultaneous Determination of Absorption Coefficients for Skin and Muscle Tissues Using Spatially Resolved Measurements H. Suzuki, M. Niwayama, T. Yamakawa, M. Ohkubo, R. Kime and T. Katsumura	309
Subdural Electrocorticogram Measurement with a Minimally-Invasive Procedure Using an SMA-Manipulated Microelectrode Array T. Yamakawa, T. Yamakawa, S. Aou, S. Ishizuka, M. Suzuki, M. Fujii and T. Aoki	313
Accurate and Fast Estimation of Optical Properties Using Optical Path Length and Spatially Resolved Reflectance Measurement T. Yamashita, M. Niwayama and T. Yamakawa	318
PMMA Wettability Caused by Ultraviolet Radiation Y. Dekhtyar, L. Lancere, N. Polyaka, A. Sudnikovich, F. Tyulkin and V. Valters	322

Chapter 4: Computer Science and Modeling

Multi-Camera Shooting Support System for Novices in a Compact Studio N. Nishio, Y. Deguchi, T. Sugiyama and Y. Takebayashi	329
On-Line Monitoring of Random Stocks of Divisible Productions in Interrelated Warehouses S.E. Guseynov	333
Teaching Assembler for Mechatronics Applications H.J. Hawłas	337
Sensory Device for Virtual Graffiti Creation R. Jabłoński and A. Borzym	341
Nodal Numerical 2D Helmholtz Equation: Truncation Analysis P. Morevs, J.S. Rimshans and S.E. Guseynov	345
Alarm System Design Based on Cause-Effect Model S. Onishi and K. Takeda	349
A Method of Conversion of some Coefficient Inverse Parabolic Problems to a Unified Type of Integral-Differential Equation S.E. Guseynov, J.S. Rimshans, J. Kaupuzs, A. Medvid' and D. Zaime	353
Cog Framework - 3D Visualization for Mobile Robot Teleoperation G. Sziebig, P. Zanaty, P. Korondi and B. Solvang	357
Telemanipulation without Physical Contact in the Intelligent Space B. Takarics, G. Sziebig and P. Korondi	362

Multiple-Camera Optical Glyph Tracking T. Pallos, G. Sziebig, P. Korondi and B. Solvang	367
Suitable Truncation of Room Impulse Response for Inverse Filter Design of Sound Reproduction System Y. Tatekura, Y. Honda and T. Nakai	372
Anytime Fuzzy Modeling A.R. Várkonyi-Kóczy	376
Propagator Method for Numerical Solution of Convective Fisher Equation D. Zaïme, J.S. Rimshans and S.E. Guseynov	387
