## Preface and Committees

## Chapter 1: Measure Control Technologies and Intelligent Systems

|                                                                                                                                                                                          |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Synthetics of ZnO Nanowires on GaN/Sapphire Substrate by Gold Catalyst</b><br>C.H. Xu, K. Leung and C. Surya                                                                          | 3  |
| <b>Discussion on Safety Management Mechanism of the LNG Carrier</b><br>Z.L. Jiao                                                                                                         | 7  |
| <b>Research and Designment of Untouched Phase-Detecting Sensor for High-Voltage Line</b><br>X. Ji, X.W. Zhang and J.N. Tang                                                              | 13 |
| <b>Research and Development of High Temperature Electrothermal Materials</b><br>Y.Y. Zhang, Y.G. Li, K. Zhang and Y. Tian                                                                | 17 |
| <b>Application of Modular Programming Based on Virtual Instruments in Industrial Measurement and Control System</b><br>Q.Q. Lu, W. Shao and C.L. Xia                                     | 23 |
| <b>Control of Automobile's Automatic Parking</b><br>H. Mei                                                                                                                               | 28 |
| <b>Surface Defect Inspection and Classification of Segment Magnet by Using Machine Vision Technique</b><br>H.H. Jiang and G.F. Yin                                                       | 32 |
| <b>A Micro-Resistance Measurement Based Design Approach of Digital Micro-Ohmmeter</b><br>J.H. Deng, W.J. Yan and Q. Yang                                                                 | 36 |
| <b>Development of Temperature Control System for Large-Scale Pre-Oxidation Furnace</b><br>K. Yu and B. Zhu                                                                               | 43 |
| <b>The Dynamic and Observed Pendulum Control System Based on Optimum Control</b><br>T. Zhang                                                                                             | 48 |
| <b><i>In Situ</i> Higher-Time Derivative of Temperature Sensors for Aerospace Heat Transfer</b><br>M.G. Huang, B.S. Elkins and J.I. Frankel                                              | 53 |
| <b>Study on On-Line Torque Telemeter System for Large Motor in Active Oilfield Service</b><br>J. Liu, W.S. Xiao and F.D. Wang                                                            | 59 |
| <b>Research of Thickness Dynamic Detection of Thin Sheets</b><br>J.B. He, Z.Y. Yang and W.J. Jiang                                                                                       | 63 |
| <b>The Intelligent Detection System of the Machineromless Elevator Based on WSN</b><br>Z.J. Chen, X. Liu, X.Q. Yan and R. Zhang                                                          | 67 |
| <b>A K-Means Clustering Algorithm Based on Enhanced Differential Evolution</b><br>L. Mao, H.J. Gong and X.Y. Liu                                                                         | 71 |
| <b>LonWorks Node Communicating on Twisted Pairs Based on Virtual Token</b><br>L. Xue and S. Yang                                                                                         | 76 |
| <b>An Angle Measuring System for Knife Blade Based on Laser and Electronic Clinometer</b><br>F.J. An, Y.J. Feng, Z.M. Tan, W.Q. Shi, Z.Y. Xiong, Y.Q. Li, C.Y. Huang and W.H. Wang       | 80 |
| <b>Design of an Innovative High-Torque Brake</b><br>Y.J. Shiao and C.Y. Chang                                                                                                            | 84 |
| <b>Calculation Method of Intumescent Coatings of Fire Protection for Concrete-Filled Hollow Structural Steel Columns</b><br>H.Z. Chen, Y.L. Wang, J.G. Liu, G.L. Wang, R.Q. Ma and W. Xu | 88 |
| <b>Optimization of Poly-Silicon Deposition Process for Semiconductor Bridge</b><br>Z.Y. Zhang, Y. Mei, Z.C. Feng, X.G. Li, J.G. Li and G.X. Hu                                           | 92 |
| <b>Inhibitive Performance of 1,4/1,6-Bis(<math>\alpha</math>-Alkyl Pyridinium ) Butane/Hexane Dibromide on A3 Steel</b><br>X.H. Jiang, L.M. Zhou, S.Z. Yao, M. Duan and X.Q. Hu          | 96 |

## Chapter 2: Transmission and Control of Fluid

|                                                                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study on Rotor's Tooth Profiles of Double Enveloping Cycloid Pump</b><br>C.Y. Li and B.K. Chen                                                                                         | 105 |
| <b>Research of the Pilot Operated Relief Valve for MRF System</b><br>X. Wu, Z.Y. Wu, X. Wang, J.T. Wang, C.Z. Wen and Q.H. Wang                                                           | 113 |
| <b>Enhancement of Fluid Mixing in a Double T-Shaped Micromixer by Periodic Disturbances of Pressure</b><br>H.C. Chiu and J.M. Chen                                                        | 118 |
| <b>Research on Structural Optimization of Oil Bit Screw Thread</b><br>B. Li and X. Wang                                                                                                   | 124 |
| <b>The Design and Experimental Study of Automatic Backwash Fiber Bundle Filter</b><br>Y.M. Zhou, C. Li, L.L. Xu, S.Y. Luo and C.J. Yi                                                     | 130 |
| <b>Effect of Mold Powder on Faint-Sliver Defect in Cold-Rolled Steel Sheet</b><br>G.R. Wu                                                                                                 | 134 |
| <b>Research on Non-Circular Planetary Gear Pump</b><br>Z.H. Luan and M. Ding                                                                                                              | 140 |
| <b>The Development of Automatic Switch Jet Element</b><br>Q.S. Xiong, F.J. Kong, J. Li, S.L. Liu and Y.S. Ye                                                                              | 144 |
| <b>Optimization of Structure and Calculation of Flow-Force on Poppet Valve under Converging Flow</b><br>S.J. Zheng and L. Quan                                                            | 148 |
| <b>The Boron Effect on Mechanical Properties of Aged 2024 Aluminum Alloy</b><br>N. Khatami, S. Mirdamadi and H. Razavizadeh                                                               | 152 |
| <b>The Application of Electrohydraulic Proportional Technology in Mill Loading System</b><br>X.B. Ji, X.Y. Qi, T.H. Song, A.J. Li and G.Y. Zuo                                            | 157 |
| <b>Research on Passive Control of Pressure Swing Adsorption System of Alternating Double Tank</b><br>K. Chen, X.W. Zeng and X.P. Qiu                                                      | 163 |
| <b>Research and Development of the Hydraulic Cylinder Control System on FIX</b><br>C.M. Wang, H. Li, S.Q. Zhou and C.H. Xie                                                               | 167 |
| <b>Boundary Element Inverse Analysis by Using Particle Swarm Optimization for Reinforced Concrete Corrosion Identification</b><br>S. Fonna, M. Ridha, S. Huzni, I. Israr and A.K. Ariffin | 171 |
| <b>Experimental Study of Self-Cleaning Plate Shell Heat Exchanger</b><br>Y.M. Zhou, C. Li, L.L. Xu, S.Y. Luo and C.J. Yi                                                                  | 176 |
| <b>Finite Element Analysis of TA15 Titanium Alloy Beam Hammer Forging Forming at Different Temperatures</b><br>Y. Tong                                                                    | 180 |
| <b>Effect of Annealing on Calcium Carbonate Morphology of Mollusk Shell</b><br>Z.C. Chang, C.B. Lin, J.S. Ho and C.K. Shao                                                                | 184 |
| <b>A Study on the Impact of Different Tumbler Inlet Conditions on the Clothes Dryer's Tumbler Efficiency</b><br>Y.L. Wu, K.H. Chien, K.S. Yang and C.C. Lo                                | 188 |

### **Chapter 3: Embedded System**

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Development of a Three Dimensional Displacement Platform</b><br>X. Li and S.H. Wang                                                                 | 195 |
| <b>The Mechanical Properties of Gray Cast Iron and Metallographic Structure Effect on the Chip Shape</b><br>X.B. Huang, Y.G. Ye, X.Q. Shen and X. Chang    | 200 |
| <b>Steady Rheological Properties and Microstructure of Polycarbonate/Highly Branched Polystyrene Blends</b><br>A.Y. Li, J.Y. Chang, X.B. Zuo and R.X. Yuan | 204 |
| <b>Simulation Study of Air Entrapment of Melt Flow inside the Shot Sleeve in Die Casting Processes</b><br>S.S. Dou                                         | 210 |

|                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effects of Finish-Rolling Reduction on Microstructure and Mechanical Properties for C-Si-Mn Hot Rolled Dual-Phase Steel</b> | 215 |
| B.B. Sun, Z.W. Jia and H.M. Zhang                                                                                              |     |
| <b>Design of Embedded Monitored Control System for Ultrasonic Reaction Kettle</b>                                              | 219 |
| B.Q. Wang and L.L. Yang                                                                                                        |     |
| <b>Impellent Tramcar Machine Hydraulic and Electrical Control System</b>                                                       | 223 |
| Y.J. Jia, G.Z. Cheng and Y.J. Dai                                                                                              |     |
| <b>Building Pore-Networks via Maximal Inscribed Spheres</b>                                                                    | 227 |
| J.X. Xie, Q.Z. Teng and Y.C. Liu                                                                                               |     |
| <b>Construction of Ore Slurry Pipeline of Bayan Obo</b>                                                                        | 234 |
| J.Q. Tan                                                                                                                       |     |
| <b>Development of Air Hammer with Self-Propelled Round Bit and the Contact Analysis of the Key Components</b>                  | 243 |
| C. He, L.X. Han, X.B. Chen and L. Chen                                                                                         |     |
| <b>Implementation of Lean Manufacturing in Saudi Manufacturing Organisations: An Empirical Study</b>                           | 250 |
| M.A. Karim, M. Aljuhani, R. Duplock and P. Yarlagadda                                                                          |     |

## Chapter 4: NEMS/MEMS Technology and Equipment

|                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------|-----|
| <b>The Steady State Rheological Behavior of Semisolid AlSi6Mg2 Alloy</b>                                   | 257 |
| H.C. Luo, S.P. Chen, Q. Nie, E.S. Xu and L.P. Ju                                                           |     |
| <b>Study of Electroless Plating Ni-B Composite Coating and its Properties</b>                              | 261 |
| H. Yang, S. Qiu, Y.F. Lu, X.L. Yin and Z.X. Liu                                                            |     |
| <b>Study on Catalytic Combustion of Hydrogen inside Micro Tube</b>                                         | 265 |
| J.J. Chen, Q. Wang, J.F. Pan and Z.X. He                                                                   |     |
| <b>Design and Analysis of 7-DOF Fiber Placement Machine</b>                                                | 271 |
| D.W. Xun, C.J. Luo, K. He and R. Du                                                                        |     |
| <b>Numerical Study on Three-Dimensional Wall Effects of Flat Micro Nozzle</b>                              | 276 |
| J.J. Tong, J.W. Cen and J.L. Xu                                                                            |     |
| <b>Efficiency Improvement of Solar Cell with ZnO Nanotip Array Prepared by Aqueous Solution Deposition</b> | 283 |
| M.K. Lee, N.R. Cheng, C.H. Fan and C.F. Yen                                                                |     |
| <b>Effect of the Chloride Content on the Rust Layers of 09CuPCrNi</b>                                      | 287 |
| Z.F. Wang, L.X. Wu, Y.Q. Sun, R.D. Han and Z.H. Yao                                                        |     |
| <b>Effect of Temperature on the Performance of AlTiC Metal Alloys</b>                                      | 291 |
| Y.F. Wang and R. Li                                                                                        |     |
| <b>Ant Colony Algorithm: A New Method Choosing Torsion Bar Diameter</b>                                    | 295 |
| P.Y. Rao                                                                                                   |     |
