

Preface

Those volumes contain papers contributed to 2011 International Conference on Chemical, Material and Metallurgical Engineering (ICCMME 2011) held on 23-25 December 2011 in Beihai, China. The objective of the conference is to provide a platform for professionals, academicians and researchers to exchange views, findings, ideas and experiences on chemical, material and metallurgical engineering. Each paper had undergone the careful peer-review before it is selected for publications in those volumes.

We wish to thank all the authors for their papers and presentations in this conference and all reviewers for their efforts to review the papers as well as the sponsors. We are grateful to all the invited speakers who came to share their knowledge with us. We would also like to thank the members of the committee for their efforts in making the conference a complete success.
