## Preface

|                                                                                                                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Hydrogen Fluoride Adsorption Ability of some Inorganic Compounds</b><br>C.X. Li, S.J. He, D.Y. Jiang and Q. Li                                                                                          | 1  |
| <b>Influence of Salt Aid on Combustion Synthesis of Nanocrystalline CeO<sub>2</sub> Powders</b><br>Y. Zhang, A. Chen, H.R. Wang, Z.S. Li and Y.P. Shen                                                     | 5  |
| <b>Preparation and Properties of the ZnO Nanopowder with Chemical Liquid-Phase Method</b><br>Z.Z. Yi, B. Wang, F.R. Zhai and Z.P. Xie                                                                      | 9  |
| <b>Preparation of SiO<sub>2</sub> Encapsulated ZnO Nanopowders by Sol-Gel Method</b><br>Y.X. Wang, J. Sun and X.Y. Li                                                                                      | 13 |
| <b>Preparation of Flower-Like ZnO Micro-Sphere Powders and their Surface Wettability Modification</b><br>B. Li, C.S. Liu, Y.B. Qi, D.C. Cao and Y. Wan                                                     | 17 |
| <b>Preparation of ZnO Nanopowders by One-Step Hydrothermal Synthesis</b><br>Y.X. Wang, J. Sun and X.Y. Li                                                                                                  | 21 |
| <b>Preparation of Nano-TiO<sub>2</sub> in Inverse Micro-Emulsion System with Compound Surfactant</b><br>W.Y. Gao, X.X. Jia, M.H. Niu, N.L. Tang and Z.Q. Hu                                                | 25 |
| <b>Effect of TiCl<sub>4</sub> Concentration and Acidity on Size and Phase of TiO<sub>2</sub> Nanopowders Prepared by Non-Hydrolytic Sol-Gel Method</b><br>J. Sun, Y.X. Wang and X.Y. Li                    | 32 |
| <b>Preparation of TiO<sub>2</sub> Nanopowders by Solvothermal Synthesis</b><br>J. Sun, Y.X. Wang and X.Y. Li                                                                                               | 36 |
| <b>Solvothermal Synthesis and Photocatalysis of SnO<sub>2</sub> Nanocrystal Microspheres</b><br>H. Liu, X.N. Dong, G.J. Li, X.F. Wang and Z.F. Zhu                                                         | 40 |
| <b>Hydrothermal Synthesis of Walnut-Like <math>\alpha</math>-Ni(OH)<sub>2</sub> Architectures and their <i>In Situ</i> Thermal Convention to NiO</b><br>Z.R. Suo, H. Liu and N. Wei                        | 44 |
| <b>Preparation and Photoluminescence of In<sub>2</sub>O<sub>3</sub> Nanofibers by Electrospinning</b><br>Y.W. Hu, H.R. He and Y.M. Ma                                                                      | 49 |
| <b>Fabrication of Porous Structured SnO<sub>2</sub>/In<sub>2</sub>O<sub>3</sub> Composite by Solid-Phase Reactive Sintering</b><br>X.L. Zhou, J.C. Cao, J. Hu, Y.Y. Peng, J. Yu, Y. Cao and J.C. Chen      | 53 |
| <b>Preparation of ZrO<sub>2</sub> Spherical Nanoparticles Used for Photonic Crystal</b><br>X.Q. Wang, M. Wang, X.Y. Zhu and M.Y. Li                                                                        | 57 |
| <b>Synthesis and Characterization of 3Y-TZP by Gel Solid-State Method</b><br>X.B. Wu, D.Z. Sun, D.Y. Jiang, H.F. Xu, D.X. Huang and B. Xu                                                                  | 61 |
| <b>Preparation and Characterization of Porous Acicular Mullite Ceramics</b><br>M.H. Luo, J.E. Zhou, Y.Q. Wang, D.L. Wang and S.L. Wang                                                                     | 65 |
| <b>Synthesis of Platelet Alumina Powders</b><br>Y.Y. Liang, D.M. Chen and J.F. Tong                                                                                                                        | 69 |
| <b>Low-Temperature Combustion Synthesis of Cordierite Powder and its Characteristic</b><br>Y. He, J.M. Guo, Z.L. Huang, G.Y. Liu, F.R. Zhai, R.M. Xiao, L.D. Sun and H.P. Zhou                             | 73 |
| <b>Synthesis of SrTiO<sub>3</sub> Powders by Gel Solid State Reaction Method</b><br>J.F. Tong, L. Wang and D.M. Chen                                                                                       | 78 |
| <b>Preparation and Characterization of Monodispersed BaTiO<sub>3</sub> Nanocrystals Using One-Step Solvothermal Method</b><br>H. Zhang, X.H. Wang, Z.B. Tian, C.F. Zhong, Y.C. Zhang, C.K. Sun and L.T. Li | 82 |
| <b>Barium Zirconium Titanate Powders Prepared by Sol-Gel Method</b><br>X.L. Deng, D.J. Guo, W. Cai and C.L. Fu                                                                                             | 86 |
| <b>Preparation of Zn<sub>3</sub>Nb<sub>2</sub>O<sub>8</sub> by Chemical Co-Precipitation</b><br>Y.M. Ding, J.Q. Dai, J.B. Xia, W.G. Chen and Z.G. Hu                                                       | 90 |
| <b>Preparation of ZnNb<sub>2</sub>O<sub>6</sub> Powders by Molten Salt Method</b><br>D.B. Zhang, G.Y. Gan, J.K. Yan, Z.W. Chen, J.H. Du and J.H. Yi                                                        | 94 |
| <b>Synthesis of Multiferroic BiFeO<sub>3</sub> Powders by Sol-Gel Auto-Combustion</b><br>X.W. Qi, H.J. Xu, X.Y. Zhang and J.Q. Qi                                                                          | 99 |

|                                                                                                                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Synthesis and Photocatalytic Properties of Bi<sub>2</sub>Ti<sub>2</sub>O<sub>7</sub> Nano-Powders</b><br>X.L. Su and Y.C. Zhang                                                                                                                           | 103 |
| <b>Preparation of LiMn<sub>2</sub>O<sub>4</sub> by a Solution Combustion Synthesis Using Acetic Salts and Acetic Acid as Starting Materials</b><br>B.S. Wang, J.M. Guo, D.W. Guo, G.Y. Liu and L.L. Zhang                                                    | 107 |
| <b>Preparation of Lithium Orthosilicate Ceramic Pebbles by Molten Spray Method Process</b><br>Y.F. Huang, H. Tang, J. Li, J. Hu, X.Q. Zhu, W.J. Zhang, L. Shen and L.X. Qing                                                                                 | 111 |
| <b>Preparation and Characteristics of Pr<sub>1.2</sub>Sr<sub>0.8</sub>NiO<sub>4</sub>-Sm<sub>0.2</sub>Ce<sub>0.8</sub>O<sub>1.9</sub> Composite Powders for Solid Oxide Fuel Cell Cathode Applications</b><br>J.F. Yang, J.G. Cheng, Q.M. Jiang and J.F. Gao | 116 |
| <b>Preparation of Lanthanum Molybdate Powers by Sol-Gel</b><br>Z.Y. Fei and J.H. Gong                                                                                                                                                                        | 121 |
| <b>Fabrication of Bi-2223 Powders Using Sol-Gel Method</b><br>M.Y. Li, X.Y. Wang, C.L. Ye and F.L. Xue                                                                                                                                                       | 125 |
| <b>Preparation and Characterization of Fused Silica Micro-Powders and Ceramics</b><br>J.Y. Niu, Z.W. Chen, L. Feng, Z.M. Li and M. Tan                                                                                                                       | 129 |
| <b>Properties of SnO-B<sub>2</sub>O<sub>3</sub>-SiO<sub>2</sub> Lead-Free Glass Powder</b><br>H. Zhu, G.Y. Gan, J.K. Yan, J.H. Du, J.H. Yi, J.M. Zhang and D.B. Zhang                                                                                        | 133 |
| <b>Characterization of Ultrafine Glassy Powder for Al-Si-Ca-P-O-F Polynary System by Sol-Gel Method</b><br>G.C. Yuan, Z.H. Zhu, X.M. Ni and Z.Y. Ling                                                                                                        | 138 |
| <b>Bismuth Ferrite Nanopowders Prepared by Sol-Gel</b><br>C.L. Fu, M. Huo, W. Cai and X.L. Deng                                                                                                                                                              | 142 |
| <b>Technological Conditions and Magnetic Properties of Y-Type Hexaferrite Prepared by Chemical Co-Precipitation Method</b><br>W.G. Chen, J.Q. Dai, J.B. Xia, Y.M. Ding and Z.G. Hu                                                                           | 146 |
| <b>Preparation and Surface Modification of Fe<sub>3</sub>O<sub>4</sub> Nano-Magnetic Powders</b><br>Z.L. Zhang, D. Shi, D.C. Li, H. Qi and Y.F. Shangguan                                                                                                    | 150 |
| <b>Experimental Study of Property of Magnetic Nanoparticle Prepared in Different Temperatures</b><br>F. Wang, D.C. Li, M. Zhang and Z.L. Zhang                                                                                                               | 155 |
| <b>Synthesis, Characterization and the Growth Formation of Spindle-Like CdS Nanostructures</b><br>S.L. Liu, Q.Q. Shi, J.B. Tong, S. Li and M.M. Li                                                                                                           | 159 |
| <b>Hydrothermal Synthesis, Photoluminescence Property and Superhydrophobicity of In(OH)<sub>3</sub></b><br>Y.W. Hu, H.R. He and Y.M. Ma                                                                                                                      | 163 |
| <b>Preparing Fluorhydroxyapatite by Aqueous Precipitation Method</b><br>Q.X. Zhu, W.H. Jiang, H.D. Wang and C. Shao                                                                                                                                          | 167 |
| <b>Experimental Study on Transition Heat Adjustment of CaCl<sub>2</sub>·6H<sub>2</sub>O</b><br>X.Q. Zhu, J.M. Liu, J. Hu, W. Chi, N. Li, H.M. Gu and X.X. Yi                                                                                                 | 171 |
| <b>Fabrication of Spherical Thermal-Conductive Silicon Nitride Powder</b><br>N. Zhong, X.S. Ning, K.X. Chen and M.M. Peng                                                                                                                                    | 175 |
| <b>Porous Silicon Nitride Prepared by Cold Isostatic Pressure</b><br>F. Gao, J. Liu and C.H. Wang                                                                                                                                                            | 179 |
| <b>Fabrication of Aluminium Nitride by Electrophoretic Deposition</b><br>H.L. Zhang, J. Li, G.H. Zhou and S.W. Wang                                                                                                                                          | 183 |
| <b>Phase Assembly of Ti<sub>2</sub>SnC Powders</b><br>C.L. Guan, G.Q. Liu and Y.C. Shan                                                                                                                                                                      | 187 |
| <b>Preparation and Performance Characterization of Active Coal Gangue Powder (ACGP) Used for Cement Admixture</b><br>X.G. Yu, H.C. Hu, H.K. Huang, Y. Zhang and D.J. Li                                                                                      | 191 |
| <b>Effect of Bentonite on Properties of Fly Ash-Based Porous Ceramics</b><br>X.R. Liu, L. Xiong and A.Y. Chen                                                                                                                                                | 195 |
| <b>Preparation and Characterization of Meso-Porous Alumina Spheres</b><br>Q.B. Chang, X. Wang, J.E. Zhou and Y.Q. Wang                                                                                                                                       | 199 |
| <b>Preparation of Highly Permeable Al<sub>2</sub>O<sub>3</sub> Hollow Fiber Membrane via Phase Inversion Method with Ethanol as External Coagulant</b><br>X.Z. Zhang, J.E. Zhou, Y.H. Jiang and J. Zhang                                                     | 203 |

|                                                                                                                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Preparation and Characterization of Porous Alumina Insulation Materials by Gel-Foaming</b><br>L. Zhang, J.H. Du, G.Y. Gan, J.K. Yan and J.H. Yi                                                                                         | 207 |
| <b>Synthesis, Characterization and Optical Property of Uniform Bi<sub>2</sub>S<sub>3</sub> Nanorods</b><br>S.L. Liu, Q.Q. Shi, J.B. Tong, S. Li and M.M. Liu                                                                               | 211 |
