

Table of Contents

Preface, Committees and Sponsors

Chapter 1: Manufacturing and Design Science

Research of Parts' Clustering Method for the Multi-Design Objective D.L. Wang, J.Y. Li and W.S. Xu	3
Optimization of 3D Pocket Machining Using Multiple Tools M.R. Yu, Y.J. Zhang and D. Zhang	7
Thermal Response Analysis and FE Modeling of Weapon Y.J. Zhao, X.J. Li, Y.H. Wu and X. Cheng	11
A New Design Method for Converting Wave Energy to Electricity B.D. Lou, X.J. Zhao, J.R. Gao, Z.Y. Yang, Y.Q. Zhang and H. Huang	15
The Influence of Induction Heating to Reheating Temperature Axial Distribution Y.X. Jia and C.Z. Wang	19
Anti-Counterfeiting Jingdezhen Ceramic Decal Manufacturing Technique Based on Digital Watermarking Method J.X. Wang and L. Fu	23
Surface Integrity of Sintered NdFeB Permanent Magnet after EDM L. Li, Z.W. Niu, F.S. Yin and Y.Y. Liu	27
Study on Platform Based on Windchill L. Gao and X.J. Meng	31
An Overview of the Sheet Metal CNC Incremental Forming Toolpath Generation H. Zhu, W.W. Lin and J.L. Bai	35
Reliability Optimization Design of Mechanical Parts Based on Global Optimization L.F. Li, Z.M. He and Y.X. Luo	40
The Study on Dynamic Simulation of the Roller Gear Indexing Cam Y.S. Liu and W. He	44
A New Method for Optimal Configuration of FMS Based on Machining Features X.N. Cai and Y.J. Zhang	48
Application of RFID System in Manufacturing Production Control H. Tan	52
Recovering Obliterated Engraved Vehicle Identification Number on Vehicle Frame Surfaces by Etching Technique Y. Jin	56
The Research on Modeling of Agile Manufacturing Cell H. Wang and X.S. Men	61
Numerical Simulation of GMAW Process Based on Level Set Method L.J. Sui, Z.W. Xu and L. Wang	65
On Multi-Ring-Degree Interactive Display of Products Based on Virtools Platform F. Guo, H.F. Sheng and A.M. Pang	69
Preliminary Research on Manufacturing Technology of Thin Bamboo Veneer Consolidated Composite Floor N. Hu, X.J. Li, Y.Q. Wu, X.G. Li and Z.C. Xue	74
Research on Modular Division Method of CNC Machine Tool Z.Q. Sheng, Z.X. Zhu, X.D. Shi and C.B. Zhang	78
Motion Simulation and Analysis of the Biped Robot Y. Xu, S.Y. Duan and Y.C. Lei	82
Study on the Key Technologies for Clouding Manufacturing Based on Virtualization Technology S.Y. Fu, S.C. Gong and Z. Chen	86
Influence of Injection Velocity on Morphology and Fraction of Solid Phase During Thixomolding Process X.P. Cui, H.Y. Xu, H.F. Liu, T. Zhang and Y.B. Liu	90

The Design and Simulation of Space Surface Based on Reverse Engineering D.Q. Gao, H. Lin, Z.F. Shi and J.M. Yi	95
Application of Pro/E in the Design of the Controllable Start Planet Gear Reducer L. Li and C. Zhang	99
Application and Management of Modular Fixture Parts Library Based on SolidWorks G.P. Lu, L.T. Wang and S. Lu	103
The Applied Analysis of Virtual Technology in Modern Manufacturing Industry M.H. Liao	107
Looking Green Manufacturing Processes in the Machinery Manufacturing J. Liu	111
Study on Key Factors of Numerical Simulation on Automotive Panel Forming Q. Wang	115
Investigation into Normal Pressure during Electrorheological Fluid-Assisted Polishing Y.W. Zhao, L. Zhang and Z. Yang	119
48"600lb Full-Welded Ball Valve Ultimate Bearing Capacity Optimal Design C.L. Mo, S.P. Du and X.W. Tang	123
The Development of the Application Program Based on Pro/E C.Y. Zhou and L.T. Wang	127
Three-Dimensional Numerical Computation for Temperature Field and Insulator of Cold Regions Tunnel J.X. Lai, C. Liu and G.L. Zhang	132
Numerical Simulation of Glass Bottle Forming Process D.C. Zhang, K.J. Zhu, S.H. Yin and Y.J. Zhu	136
Design of the Automated Packaging Systems with the Phthalic Anhydride Products H.J. Yang and W.G. Guan	140
Simulation of Aluminum Electrolysis by Non-Grid-Connection Wind Power W.D. Gu and Z.L. Du	144
The Application of Thermal Depleting Technology on the Resin Matrix Composite Damage Analysis S. Wang, W.F. Zhang, M.Y. Yang and Y. Chen	148
Effect of Scanning Methods on Residual Stress Distribution during Direct Laser Metal Deposition Shaping Y. Kong, W.J. Liu and Y.C. Wang	152
Research and Exploit on the Integrated System of Plastic Mold CAD/CAE Y.P. Lu, L.Q. Wu and M. Chen	159
Modeling and Simulation of Airdrop Process with Parachute for Complex Terrain and Wind Disturbance X.Y. Hu and J. Yao	163
Fluid-Solid Coupling Numerical Simulation for Tunnel in Fracture Zone Based on 2D-FLAC Software J.X. Lai, H.B. Fan and F. Zhou	167
The Application of the Tension Online Detection and Control Technology X.F. Wang, X.Q. Ren and W.Y. Li	171
Effect of Different Nutrient Components on Polysaccharide and Biomass Production from <i>Fomitopsis pinicola</i> Karst L.M. Hao, Z. Li, A.L. Zhao, W.L. Chen and Z.T. Wang	174
Development of Hydrosopic and Fast-Dry Sportswear Fabrics P. Liu and Y.J. Liu	178
Research and Development of the Generation Method of Clothing Process Diagram Based on CAPP Integration System L.N. Yang	182
Research and Development of CNC Machine Simulating System Q.X. Deng and W.Z. Chen	186
Research on Pretreatment Process and Product Detection in Enzymatic Hydrolysis of Lignocellulosic Biomass J.J. Zhao, H.Y. Yang, B. Li and F.M. Chen	190
Research of Implementation Method for Ramp Simulation of Rail Vehicle X.G. Wang, J. Su, X.B. Li, X.N. Cao and H.T. Liu	194

Influences of Mould's Shape on Heat Transfer in Hot Forming Process K.L. Xu, Z.W. Tan and S.Y. Hu	198
The Green Manufacturing - The Development Trend of Machinery Manufacturing Industry in the 21st Century Y. Huang	202
Study on Implementation Technology of the Hydraulic System of Certain Engineering Equipment X.X. Liu	206
A Designing of the Manufacturing Facility for Disposing of Greenhouse Gases G.F. Cao and W.W. Yu	211
Surface Design of Molding Tool for Composite Component Based on Reverse Engineering D.W. Wu, X.F. Ding and G. Tong	215
Effects of Technical Parameters on Process Stability and Microstructure during Continuous Rheo-Extrusion Process of 6201 Alloy Wire R.G. Guan, Z.Y. Zhao, C. Lian, R.Z. Chao and C.M. Liu	219
Design and Knitting Technology of Maifan Stone Fiber Knitted Fabrics L.M. Shang, J.G. Meng and C.L. Ren	223
Design and Realization of FIR Band-Pass Digital Filter Based on MATLAB S. Ren, X. Zhao, J. Jiang and D.J. Zhao	228
Design of the Key Units Fire Electronic Plans System Based on Virtual Reality Technology Q.H. Pei	232
Research of DSP Virtual Laboratory Based on LabVIEW F.H. Huang and Y. Li	236
Smart Car Design and Implement Based on SCM AT89C55 Application X.Z. Li, J.L. Zhang, W.S. Zou and Y.M. Kang	241

Chapter 2: Materials Science and Engineering

A Comparative Study of the Effects of Sulfate Reducing Bacteria on Corrosion of Carbon Steel Q235 under Simulated Disbonded Coating with Different Width of Aperture P. Zhao, J.X. Yang, P.P. Zhu, C. Sun and J. Xu	247
A New Characteristic Index BT of the Humidity Controlling Material in a Greenhouse Space and its Theoretical Basis C.L. Li, W. Chen, Z.Y. Li and F.L. Wei	251
A Novel Feasible Purifying Strategy for Nano-Sized Calcium Phosphate Based Biomaterials W. Zhou and J. Zheng	258
Adsorption and Removal of Congo Red Dye from Aqueous Solution by Using Nano-Fe₃O₄ Z.X. Tang, Y. Chen, J. Xue and S. Yue	262
A Method of Recycling Waste Solution of Copper Plating Using Cyanidation in Laboratory L. Shi and D.S. Zhu	266
A Study on the Test of Rubber Crumb Modified Asphalt Mixture Road Performance X.C. Wang, Y. Li, L. Fu and Y.P. Wang	270
A Synthesized Process of Acidic Tin-Plating Waste Solution in Laboratory L. Shi and D.S. Zhu	276
A Repeated Loading Triaxial Test Study on Resilient Modulus of Graded Crushed Stone S.Y. Wang and Z.G. Luo	280
Aloe Fiber and Pure Yarn Research on Performance J.G. Meng, X.T. Feng and J. Bai	284
Analysis of Cyanazine and Atrazine in Cucumber by Pseudo Imprinted Solid-Phase Extraction Coupled with Liquid Chromatography H.Y. Yan, Z.W. Li, J.Y. Zhang and C.Q. He	289
Analysis of Heat Dissipation and the Energy Conservation in Cast Iron Dryer Head of Paper Machine H.Y. Lv and X.X. Bian	293
Application of Orthogonal Test in Numerical Simulation of Aluminum Sheet Forming Z.W. Tan, K.L. Xu and S.Y. Hu	297
Based on Immune Genetic Algorithm of Alloy Heat Research S. Zhang and L. Meng	301

Bending of Thermoviscoelastic Functionally Graded Materials Beams M.L. Wang and G.F. Wei	305
The Wearability Test and Comprehensive Evaluation of Knitted Fabric Made of Luminous Fiber X.N. Gao, J.G. Meng and J.C. Yu	309
Case Study for Test Tool of Chloride in Swimming Pool with Method of Effective Evaluation of Multiprocess Performance Analysis W.S. Ou, S.T. Hu, Y.S. Chang and Y.K. Zhao	314
CO₂ Capture by Polyethylenimine-Silica Mesoporous Hybrid X. Fu	318
Compression Failure Analysis of Adhesively Stiffened Composite Panels C.L. Zhang, P.R. Jia, L. Li and G.Q. Jiao	322
Study on the Function of Steel Tube Concrete in the Fire Prevention D.S. Zhu and S. Lei	326
Study on Material of Computer Aluminum-Magnesium Alloy Casing M.H. Liao	330
Metal-Modulated Growth of Au Nanoparticles by Electropolymerized 8-Hydroxyquinoline Films H.C. Pan, W.H. Liu, X.P. Li, Y.B. Ren and S.H. Liu	334
Simulation of Proton Irradiation Damage for Fe-Ni Magnetic Alloy B. Cao and T.R. Yang	338
Effects of the Parameters of Sloping Plate Process on Microstructures of A2017 Alloy R.G. Guan, Z.Y. Zhao, C. Lian, R.Z. Chao and C.M. Liu	342
Synthesis and Characterization of Cobalt Nanoparticles by Cobalt-Acetate X. Yang and H.P. Shao	346
Fabrication and Study of P-Type ZnO Films by RF Magnetron Sputtering of ZnO: In₂O₃ Powder Together with the N-Implantation M. Nan, C.Y. Kong, G.P. Qin and H.B. Ruan	350
Interpretation of the Wood Drum of the Wa Nationality from a Symbolic Semiotic Perspective W.J. Li, R.B. Hu, X. Ye, N. Li and Y. Chen	354
Film Morphology and Film-Forming Ability of Supramolecular Compound Self-Assembled with Amino Polysiloxane Emulsion and Carboxyl Polysiloxane Emulsion L.X. Huang, Q.F. An, J. Men and Q.J. Wang	358
Stress Analysis in Ceramic Inlays Restored Premolars L. Sandu, F. Topală and S. Porojan	363
Research on Water Cut of Silicon Steel Plate G.W. Liu	367
Measurement of SiC Particle Size Based on Ultrasonic Attenuation Spectrum Y.Y. Fan, Z.Y. Qiu, S.W. Li and F.M. Liu	370
Solidification Path Calculations of Al-Cu-Si Alloys in Al-Rich Corner W.G. Zhao, X.C. Ye, W.J. Liu and M.C. Gu	374
Studies on the Microstructure and Properties of TiO₂/(Ag) Thin Films F. Gao, X.Y. Liu, L.Y. Zheng, M.X. Li and R.J. Jiang	378
The Effects of Machined Workpiece Surface Integrity on the Fatigue Life of TC21 Titanium Alloy D.X. Du, D.X. Liu, Y.F. Sun, J.G. Tang and X.H. Zhang	382
Calculation and Plot of Predominance Area Phase Diagram for Cu-S-O Ternary System S.Y. Li, Y. Hu, G. Xie and J.H. Li	390
Study on Reaming High-Precision Thin Hole in Hardened Steel by Ultrasonic Vibration Reamer J.Z. Zhang, T. Li and Y. Zhang	396
The Study on TiAl Based Alloy Blade Casting Structure by Bottom Pouring Vacuum Casting X.C. Ye, W.G. Zhao, W.J. Liu, S.Q. Tang and Z.F. Fang	400
Research on the Microstructure and Mechanical Properties of ZGMn13Cr2 Strengthened by Nano-SiC Master Alloys H.W. Yu, W.Y. Wang, J.P. Xie, P.G. Zhou, Y. Li, J.X. Wang and X.H. Shao	404

Microstructural Evolution of <i>In Situ</i> (Fe,Cr)₇C₃ Particles Reinforced Iron Matrix Composites	408
L.B. Niu, J.L. Tian and X.G. Wang	
The Chemical Compositions of the Lipid Extracted from Fermented Mycelium of <i>Grifola frondosa</i>	412
B.Q. Wang, Z.P. Xu and C.L. Yang	
Microstructure and Properties of Cast Iron Using Chromizing Process	416
G.D. Zhang, H.M. Cao and J.F. Xu	
Fracture Mechanics Study on Porosity Zirconia/hydroxyapatite Coating Obtained through Microarc Oxidation on Medical Titanium Alloy Surface	420
F.B. Wang, J. Yu and S.C. Di	
Glucose Biosensor Based on Immobilization of Glucose Oxidase on Silica Nanoparticles Modified Au Electrode	424
Y.Y. Sun, S. Zhao and Q.X. Ren	
Residual Stresses Distributions within Thin-Walled Ceramic-Metal Seal	428
G.L. Zhang, L. Shi and D.Z. Jin	
Research and Design on a New Roll of Material Conveying Composite Regulating Machine System	432
J.X. Liu	
Mechanism of Zinc Phosphating Solution at Low Temperature	437
Z.M. Chen, P. Lu and Y. Jia	
Mechanical Properties of SUS301L Stainless Steel Welded Joints for Railway Vehicles	441
L. Zhan and C.Y. Shi	
Effects of pH on Properties of Soy Protein Isolate/Guar Gum Composite Films	446
C.X. Sui, L.Z. Jiang and G.P. Yu	
Structures, Stabilities and Electronic Properties of Phenyl Silsesquioxanes Si₂nO_{3n}Ph_{2n} (n=1-5): A DFT Study	450
S.Y. Yu, Z.M. Chen, C.G. Zhang and Y.F. Ma	
Deflection and Resonance Frequency Shift of a Microcantilever Induced by Chemisorption: Oxygen on Si(100)	455
J.Q. Zhang, G.Y. Huang, X.Q. Feng and S.W. Yu	
Morphology and Phases of Ni-S Powders Synthesized by Chemical Route	459
Z.Q. Ma and K.G. Liu	
Effects of Rare Earth Addition on the Inclusions and Mechanical Properties of 2205 Duplex Stainless Steel	463
X. Liu and L.M. Wang	
Study of the Metallographic of Nickel-Titanium Alloy Material by Using Electrochemical Polish Method	469
J.S. Fu, Q. Wang, J.N. Liu, Z.L. Cong and S.L. Yin	
Dumbbell Test Method for Evaluation of the Early Age Cracking Property of Concrete Material by Stress Risers	473
Y. Liu, Z.G. Luo and J. Cao	
The Reaction between Alkali Vapor and the Theoretical Composition MgAl₂O₄	477
Y.Q. Liu, Y. Li, S.S. Hong, G.D. Ma, Y. Gao, B. Li, R.L. Wen, Z.M. Qian and J.H. Huang	
Property Research on Cooling-Mica Fiber and Yarn	482
B.X. Liu, J.G. Meng and W.T. Li	
The Reaction Mechanism between Aluminum-Magnesia-Spinel Composite Material and RH Slag	486
G.D. Ma, Y. Li, Y. Gao, S.S. Hong, Y.Q. Liu, W.B. Xia, Z.M. Qian and J.H. Huang	
Computing Method Investigation and Verification of Gas-Solid Combustion in Magnesium-Aluminum Based Propellant Ducted Rocket	490
W. Wang, J. Li, K. Zhang and Y. Liu	
Thermal Behavior, Mechanical Properties and Microstructure of Polypropylene Composites Filled by Calcium Carbonate Whiskers	494
Z.L. Jiang, Q.J. Sun, Y.R. Zhang and L. Li	
Development of Coolsmart Functional Knitted Fabrics	498
L.Q. Feng and Y.J. Liu	
Preparation of <i>In Situ</i> Al₃TiP/Al-Based Composite Coating	503
L.B. Niu, C. Yuan and D.M. Cao	

Phases and Thermoelectric Properties of Bulk NiSb₂ and Composite of NiSb₂ and CoSb₃ Prepared by Sintering K.G. Liu, N.J. Ji and Z.Q. Ma	507
Development and Application of Series Re-Calibration Samples of Copper and Copper Alloy Y.H. Li and H.B. Yuan	511
Influence of Surface Properties on the Viscosity of Titanium Dioxide Slurry Z.Q. Luo and J.Q. Du	516
Research on the Performance of the Germanium Fiber and Yarn J. Yang and Y.J. Liu	520
Research of Alloy Orb on Wavelet S. Zhang and L. Meng	525
The Important Influencing Factors of Coefficient of Friction Testing on Metallic Sheet and Strip H. Xue, R.F. Li, H.C. Zhu and W.J. Peng	529
Investigation on the Alkali Resistance Property of Theoretical Composition Magnesia Alumina Spinel Bricks S.S. Hong, Y. Li, Y.Q. Liu, Y. Gao, G.D. Ma, J.B. Li, Z.M. Qian and J.H. Huang	533
Studies on Properties of Outlast Air-Conditioning Fiber and Blended Yarn C.X. Zhao, J.G. Meng and C.Z. Zhi	538
Determination of Chitosan Oligosaccharide Content by Acetylacetone Spectrophotometry Method Z.P. Xu, C.L. Yang, X.Q. Zhang, X.Z. Wang and B.S. Huang	543
Self-Cleaning Method for Large Solar Cell Array Based on Travelling-Wave Dielectrophoretic Force G.F. He, C.D. Zhou and Z.L. Li	548
Preparation and Properties of Cu-10Sn Alloy Infiltrated 316L Stainless Steel Composites X. Yang, Y.L. Bai, M. Xu and S.J. Guo	552
Numerical Simulation and Thermal Analysis in Milling of Titanium Alloy B. Li	556
Preparation by Spark Plasma Sintering and Investigation of Inert Anode for Aluminum Electrolysis G.D. Zhang, Z.M. He, J.Q. Zhang and F.J. Zhang	560
Deposition of Transparent AlN Thin Film on SiALON Substrate by Reactive Magnetron Sputtering Y.C. Shan, F. Zhu, C.L. Guan, J.J. Xu, L. Wang and X.G. Han	564
Effect of Matching Performance on J-Integral of Inhomogeneous Welded Joints B. He and H.C. Zhang	568
Investigation on Al-Al₂O₃-MgO·Al₂O₃ Composites Refractory Performance for RH Degasser Y. Gao, Y. Li, G.D. Ma, S.S. Hong, Y.Q. Liu, J.J. Zhang, Z.M. Qian and J.H. Huang	572
Effect of some Key Factors on the Strength of Recycled Concrete X.B. Zhang and Z. Fang	576
Optimization of Sapanwood Pigment Dyeing Process for Organic Cotton Knitted Fabric S. Zhao and Z.W. Luo	582
The Characteristics of Infrared Spectra of Kenaf Fiber and its Composite Material Z.X. Wu, T. Sun, H.F. Wen and T. Zhang	586
Temper-Resistance of Cr-W-Mo-V High Carbon Medium Alloy Steel and its Hardness Forecast Y.Q. Ma, Y.M. Dai, Y.F. Liang and X.J. Zhang	591
Effects of Thermal Gradient and Solidification Time on Porosity Content of A201 Aluminum Alloy Castings Y.S. Kuo	597
Research of Friction and Wear Performance of Large Truck's Brake Drum W.Y. WANG, G. Lu, J.P. Xie and J.X. Wang	601
Technique of Extrusion Forming and Design of Die for Guiding Cylinder X.R. Xin, C.S. He, X.C. Liu and K. Liang	606
The Properties of MgO-C Materials with Different Graphite Size Distributions G.Q. Liu, H.X. Li, J.S. Yang, J.B. Yu, W.G. Yang, T.F. Ma and F. Qian	611

Feasibility to Fabricate the 45° Slant with Anisotropic Silicon Etching in NaOH Solution A. Limcharoen, C. Pakpum and P. Limsuwan	615
Effects of Annealing Temperature on Optical Properties of Bi_{3.4}Nd_{0.6}Ti₃O₁₂ Films by RF Magnetron Sputtering Method Y. Zou, Q.X. Liu, Y.P. Jiang and X.G. Tang	620
The Influence on Proton Conductivity and Methanol Permeability of SiO₂/PVA-PAMPS Composite Membrane C.H. Yuan, G.B. Guo and S.L. An	625
The Degradation of Methyl Orange with NiO/γ-Al₂O₃ Photocatalyst by Plasma-Assisted Preparation D.Y. Xie, Q.R. Li, H.Y. Xiao, H.X. Lu and R.R. Wang	629
Detection Methods of Roller Pressure to Design the Chromatism of Dyed Fabrics Y.J. Tan, C.N. Liu and Y. Zhao	633
Study on Synthesis of Ni-S Powders Synthesized by Hydrothermal Co-Reduction Y.X. Cai and K.G. Liu	637
Properties Test and Analysis of Aloe Fiber Knitted Fabric X.T. Feng, J.G. Meng and J. Bai	641
Preparation and Characterization of Activated Carbon Fiber Supported Nano-TiO₂ X.L. Guo, X.D. Wang and D.P. Ben	646
Relationship between Surface Froth Features and Flotation Indexes in the Flotation of a Sulphide Copper Ore G.C. He, J.N. Feng, Y.P. Wu, H.M. Xiang and M.C. Qi	650
Effect on Inclusion and Microstructure of Ultra-Low S and Low P Steels with Vacuum Treatment H.C. Wang, Z.Y. Liao, S.J. Wang, Y. Zhou, B.G. Wu and Y.C. Dong	654
Adsorption Characteristics of Pb(II) from Aqueous Solution onto Na-Bentonite/Poly AMPS Composite H.Y. Xiao, K.S. Gao and Q.R. Li	658
Effect of Ir Addition on Grain Size and Mechanical Properties of Au-Ag-Cu-Pd-Pt Procelain Fused Metal C.H. Chen, J.X. Fu and W.S. Hwang	662
Finite Element Analysis to Ceramic Ball Pure Rolling Contact Stresses J.L. Zhou, W.N. Zhu, G.Q. Wu and Y.S. Ren	667
Performance Study of Jutecell Fiber and Yarn J.J. Li, J.G. Meng and N. Li	671
The Formation Process of Black Trivalent Chromium Conversion Coating on Zn Electrodeposit H.P. Liu, S.F. Bi, X.G. Teng and Y.C. Yu	676
Research on Mining Machinery Gear Materials C.X. Gao, C. Wang and X.H. Ren	680
First-Principles Study on the Structural, Electronic and Elastic Properties of Alloyed Austenite with Co and Ni Z.Q. Lv, Z.P. Shi and Y. Li	684
Direct Observation of Hydroxyapatite Nanoparticles <i>In Vivo</i> W. Zhou and J. Zheng	688
Effects of Working Pressure on the Microstructure and Properties of ZnO Thin Films Prepared by DC Magnetron Sputtering F. Gao, X.Y. Liu, L.Y. Zheng, M.X. Li and R.J. Jiang	692
The Analysis of the Interface States of Low-Density Materials in the Forming Process Q.L. Wang, Y.D. Zheng, X. Liang, Y. Ling, K. Qiao, Y.L. Kang and G.M. Zhu	696
Research on Properties of Automobile Lubricant Containing Nano-Ceramic Additives Y.H. Zhao, X.L. Dai and J.X. Zhang	700
Effect of N⁺ Ion Beam Exposure on the Secondary Structure of Horseradish Peroxidase Q. Xu	705
Research Development of Residual Stress Determination with Generalized Stress Increment Testing Method H. Xue, R. Ge, H.C. Zhu, W.J. Peng and R.F. Li	709
Ultrasonic Fatigue Tests on a High Strength Steel for Welded Structure W.J. Peng, B.W. Qiu, R.F. Li and H. Xue	714

Experimental Research on Ultrasonic Vibration Turning of Finish Machining Technology L. Zhu and Y.F. Nan	718
Finite Element Analysis of Flexural Strength for Helical Gear of Automotive Transmission F. Xie, J.H. Wang and Y.C. Wang	723
Simulation Research on Acoustic Emission Signal of Tank Corrosion Y. Yu and Y. Yu	727
Study on Engine Kinematics and Dynamics Simulation Based on COSMOSMotion X.X. Liu, M. Chen and A.H. Tang	731
Design and Analysis of Triaxial MEMS High Measure Range Accelerometer Y.B. Shi, R. Zhao, J. Liu and K.J. Li	735
Improvement and Experimental Research on High-Pressure Gear Pump Based on Volumetric Efficiency P. Bai	739
Fluid Analysis of Impeller Wheel Wave Energy Detector System S.M. Wang and F.X. Zhang	743
Development of a New Ring Inflatable Flotation Machine L.L. Yang, W.Y. Ning and Y.Q. Zhao	748
Robot Kinematics and Dynamics Analysis Based on Virtual Prototyping Technology Z.M. Wang and X. Zhou	752
Synthesis and Characterization of Hierarchical ZSM-48 Zeolite X.L. Liu, X.J. Wang, Y. Wang, Y.J. Gong and T. Dou	756
Influence of Material Continuity of Functionally Graded Coating on Interface Crack C.Q. Sun, H. Wei and H. Gao	760
The Super-Thin Rod Cylindrical Honing Technology Research L. Zhu and L. Pan	764
Flow Field Analysis and Numerical Simulation for Pipe with Tee on Fluid-Structure Coupling Z.B. Liu, F. Luo, T. Zeng and H. Wu	768
Magnetic Memory Testing and Intensity Failure Analysis of Fractured Bolt of Cylinder Head on Hydrogen Gas Compressor J.H. Yu	772
Design of Cross Slide Safety Devices in Engine Lathe Y.Z. Xu, Q.Y. He and W.X. Hu	776
Reliability-Based Assessment of the Effect of Climatic Conditions and CO₂ Emissions on the Corrosion of RC Structures Subjected to Carbonation J.L. Liu and Z. Fang	780
The Analyze of Shear Force Calculation Model of Drum Type Linear Blade Flying Shear Y.G. Li, Q. Ye, G.P. Wang and F. Fan	785
Analysis of Influence to the Connect and Seal Ability of Tubing Connection of Inner Pressures Y.H. Dou, Y.P. Cao, F.X. Zhang and X.T. Yang	790
Structural Optimization of a Novel Coaxial Magnetic Gear Y.K. Man, S. Zhang, Y.S. Zhang, W.S. Hao, J.F. Zhang and H. Li	794
Numerical Simulation and Research of Far Infrared Sterilization Tunnel S.H. Zhang and M.W. Wan	798
Based on the ANSYS of Small and Deep Hole a Bit Cutting Transient Dynamic Study P. Wei, J. Han and H.L. Geng	802
The Dynamic Strength Analysis the Key Parts of Body of RG Y.J. Zhao, X.M. Huang, S.G. Li and C. Xu	805
Calculating Method about the Normal Clearance Magnitude of the Water Pump Shroud by the Boundary-Layers Theory L.H. Li and X.L. Li	809
Vibration of a Misaligned Rotor System with Asymmetric Shaft Stiffness S. Feng, H.P. Geng, S.M. Qi and L. Yu	813
Steel-Cylinder Yielding Analysis of PCCP with Broken Wires R. You and H.B. Gong	819
Research on Throttle Optimal Control of Flipper Jack for Hydraulic Support C.Q. Jia, W. Li and L. Yu	824

Analysis on Affecting Factors of General Heat Exchange Efficiency of Target-Type Impacting Air Washer by an Orthogonal Experiment Method S.Q. Yan, J.C. Li, X. Huang and L. Wen	828
Research on Influences of the Coarse Aggregate Size on the Cracks of the Reinforced Beam H.Q. Sun and J. Ding	832
Performance Model Construction and Optimal Design for High-Precision Balance Sensor J.T. Li and W. Guo	837
Multi-Fields Simulation Model for Micro-Machined Capacitive Accelerometer Q. Dai, B. Xu, J.X. Yu, G. Jiang, D.L. Song and Y. Cai	842
Finite Element Analysis of Anti-Reflective Crack for Geosynthetic in Asphalt Overlay of Airport Runway Z.G. Luo, Y. Liu, S.Y. Wang and B. Diao	847
Topology Optimization Design on Vibration and Noise of Circular Saw Blades T. Yao, G.L. Duan and X.L. Yin	851
Research on the Special Load Deflection of the Annular Throttle Slice of Shock Absorber Y.J. Chen, G.H. Zheng, H.J. Ju, J.J. Guo and X.L. Han	855
Dynamic Characteristics Design of the Grinding Machine Bed K. Wang, G.M. Song and X.W. Sun	859
Numerical Simulation Analysis of the Effect of Sheet Property on Forming Safety Margin of Drawing Panel J.J. Guan, Z.J. Wang and Y.H. Zhang	863
Design a Two-Harmonics Transmission Mechanism with Roller Chain Y.F. Wu, H. Liu and Y.G. Shi	867
Optimal Design of a Vehicular Charged-Air Cooler Based on Numerical Simulation of Thermal-Hydraulic Performances B.L. Xiao, W.M. Wu, Q.Q. Lu, X.L. Yu and G.D. Lu	872
The Finite Element Analysis of Rotor Contact Strength for a High-Speed Traction Motor H.Y. Xiang, D.M. Hu, C.J. Leng and Y.J. Gong	876
Comparative Analysis of Parabolic and Hyperbolic Flexure Hinges Using Closed-Form Equations J.F. Hu, W.J. Xie, P. Li and X.F. Cui	880
The Design of Impact Resistance of Missile Recorder Protective Shell X.H. Ma, C.L. Li, J. Liu and T. Sun	884
Role of Ion Transport in the Actuation of Cellulose Based EAPap L.J. Zhao	888
Multi-Jack Single-Drive Semi-Flexible Nozzle Mechanism Design and Simulation C.G. Yu, Z.H. Chen and X.T. Nie	892
Study of the Loading Arms of the Side-Crane Used for Container X.M. Feng, J.Q. Zhan and L.S. Li	896
Force Model and Simulation Analysis about Two-Ring Speed Reducer L.F. Li, Z.M. He and Y.X. Luo	900
The Process Optimization of the First Ball Bonding for Copper Wire W. Zhang, K. Wang and C.Q. Wang	905
Orientation Schemes Choice for Aquatic Inserting Piles Based on Gray Relation Analysis Y.J. Hou and L.F. Wu	909
Kinematic Forward Solution Analysis of the 3-PRS Parallel Robot J.J. Huang, J.L. Kang and J.W. Zhao	913
The Finite Element Analysis of Static Strength of Workover Derrick by Truck Z. Liu, K. Yao, D. Wu, D. Li, J.Y. Fu and J.X. Wu	918
Kinematics and Luffing Moment of Lemniscate Type Crane with Boom Driving K.Q. Li and J.N. Li	923
Design and Analysis of Automotive Generator Stator Windings Based on Ansoft H.P. Huang and C.W. Yang	927
Research and Development of High Efficiency & Energy Saving Series, High-Voltage & Flame Proof Three Phase Asynchronous Motor for Fan R.Z. Zong and Y.J. Qiu	931
Profile Processing of Scroll Compressor and its Error Analysis R.H. Hu, Q.F. Liu and H.G. Song	937

Research on Multi-Point Spraying of Central Air-Conditioning System S.Q. Yan and X.W. Wang	941
Calculation of Initial Ejection Force in Basin Type Insulator Epoxy Injection Mould X.R. Zhang, Q.H. Shi and W. Wu	945
The Forward Solution of Kinematics About 5-DOF Dispensing Manipulator G.C. Ren, Y.F. Wang, Q. Ye and B. Chen	949
Analysis on the Structural Reliability of Solid Rocket Motor Grains B. Long, X.L. Chang, B. Jian and J.W. Lai	953
FEM Analysis of RSW and LBW Implementation on Side Wall Penal Assembly of Stainless Steel Railway Vehicles W.Q. Wang, C.S. Wang and F.X. Tan	958
Thermal Optimization on High-Power LED Street-Lighting Driver with Micro Heat Pipe C. Chen, L.S. Lu and Q.G. Fu	962
The Research on Calculation Method of Pump Efficiency Q. Li and X.D. Yin	968
Shock Mechanics Model and Characteristic Analysis of Polyurethane Isolator with Displacement Restrictor Z.Q. Lv and L.H. Shu	972
Antibacterial Functional Fabrics Development and Research on its Performance Y.J. Liu, P. Liu and A.Q. Hou	978
Analysis of Electromagnetic Compatibility about Air-Power-Off of Aircraft Power System G.Q. Sun, G. Guo, Y.B. Yang, D.P. Yang and J.F. Zhang	983
Study on Pipeline Transportation Experiment of Paste Filling Material J.X. Liu, W.J. Guo and Z.D. Yin	987
Study on Fatigue Crack Behavior in Welded Structure of DSS 2205 Z.X. Wang, Z.L. Wang and X. Zhang	991
Treatment Methods for Over Reinforcement of Coupling Beam in High-Rise Building Structure Design X.P. Zhu, L.P. Wen and J.W. Li	995
On Influence of Change in Anodic Surface Micro-Topography on Electric Current Field in Electrochemical Finishing A. Xieeryazidan and A. Kader	1002
Electrical Insulation Property of Silicone Rubber Tube in High Elevations G.M. Li, C. Li, Y.S. Xu, Q.H. Yan, S.Q. Zhang, Y. Chen, X.P. Xu, J.C. Xu and Y.N. Li	1006
Study on Spatial Mechanical Characteristic of High-Speed Railway Ballastless Slab Track on Subgrade Q.Y. Xu and B. Li	1010
Calculation and Analysis of Drive Torque of Axial Magnetic Drive Mechanism Q. Xu, S.Q. Mei and G.Y. Li	1016
Research about the Wearability of Coconut Carbon Fiber Knitted Fabric M.M. Guo, J.G. Meng and Y.H. Han	1020
Temperature Field Analysis on the Hydrodynamic Retarder of Heavy Vehicle Z. Yuan, W.X. Ma, W. Cai, L.D. Fan and J.J. Song	1025
The Modal Analysis of the Ceramic Ball's Rolling Contact Fatigue Tester's Drive Shaft J.L. Zhou, W.M. Zuo, Y.J. Li, Y.S. Ren and W.N. Zhu	1029
The Color Recognition of Jet Fuel Silver Corrosion Images Based on Color Difference Formula L.P. Tong, B. Peng and Y.W. Fei	1033
Study and Simulation of the Model about High-Speed Maglev Drive Needles X.G. Wu, L.X. Kong, L. Zhu, J. Fu and Y.M. Yang	1037
Based on the Deep Hole Processing System Resonance Test Design of the Device L.Y. Shu and L.Z. Feng	1041
Research of Test Method for the Bogie Rotary Torque X.G. Wang, H.B. Qiu, J. Su, X.N. Cao and H.G. Wang	1045
Research of Test Method for the Natural Vibration Frequency of Bogie X.G. Wang, Z. Ji, J. Su, X.N. Cao and M.M. Li	1050
The Using of Insulated Fiber Bragg Grating Temperature Sensor in 35kV Switch Cabinet Y.F. Chen, C. Li, Y.S. Xu, Q.H. Yan, S.Q. Zhang, Y. Chen, X.P. Xu, J.C. Xu and Y.N. Li	1055

The Relationship among Fiber Fineness, Moisture Regain and Resistance Y.H. Ren	1061
Numerical Study on the Spectrum Control Based on the Chaos Synchronization Technology Y. Liu, J. Sun and J.J. Lou	1065
Electric Vehicle Tire Slip Identification Method Based on Self-Adaptive Kalman Filter S.J. Zhou, J.Q. Long, J.Y. Xia and Z.G. Su	1070
Experiment Research and Analysis of Transmission Error of Gears J.H. Cheng, M. Liang and F.L. Fan	1074
Correlated and Coherent Analysis Based on Vibration Data of Fatigue Life Test Rig for Ball with Three Point Contact J.L. Zhou, Y.J. Li, W.M. Zuo, W.N. Zhu and R.S. Ren	1078
Experimental Study of Thermal Contact Conductance Across Solid/Solid Interface Z.R. Wang, J. Yang, Y. Chen and W.F. Zhang	1082
Influence of Material Properties on Modal Characteristics for Fluid-Structure Coupled Vibration System L. Zhu, C.Y. Zhu, D.Y. Xu and G.A. Tang	1086
Research of Embedded Precision Internal Grinding Flexible Open CNC System O. Xie, C.X. Lu and Y.Z. Wu	1090
The Study on Rubber's Constitutive Model about Parameters Identification and the Effect of Fitting Error W.T. Wang and W.B. Shang Guan	1094
The Forward Kinematics Solution of Track Irregularity Simulator X.N. Cao, Y.M. Liu, Z.J. Lai, W.C. Guo and C. Sun	1100
Seismic Response Analysis of Container Crane S.Q. Lu, H.B. Xiao and P. Deng	1104
Study on the Combination of Multilayer Piezoelectric Seismometer Y.M. Xing and S.H. Liu	1108
Experimental Research on Compression Strength of Recycled F. Yu, C.B. Yin and M. Jiang	1112
Application Analysis of the Fuel Viscosity and Temperature Control System Based on the Sliding Mode Theory Z.Z. Liu, D.S. Chang and X.J. Liu	1116
The Correction of Face Gear Tooth Flank Deviation N. Zhao, S.W. Hou, H. Guo and H. Gao	1120
Lasing Action in Dual-Doped Organic Microcavity with Cascade Energy Transfer X.K. Zhao, Q.W. Zhao and X.F. Shen	1125
Experimental Study the Vibro-Acoustic Performance of a Double Glazed Window Q.B. Mao	1129
Knowledge Acquisition of Spindle Bearings Fault Based on Rough Sets X.Z. Xie, R.Z. Zhao, L. Yang and Y.P. Yao	1133
Studies on Properties of the Coconut Carbon Fiber and Yarn J.G. Meng, M.M. Guo and Y.H. Han	1137
Fracture Energy of Refractories F. Qian, H.X. Li, G.Q. Liu, W.G. Yang, J.S. Yang, J.B. Yu and T.F. Ma	1142
Torque Calibration Device for Hydraulic Tubing Tongs and its Experiment F.X. Zhang, Y.B. Li, X.T. Yang and Y.H. Dou	1146
Optimization Design on the Processing Technic of Shot Blasting Machine Fender Apron X.Z. Wang and X.R. Song	1150
Studies on Prediction Method of Multi-Transform Domains and Non-Linear Fault Trend Oriented to Wind Turbine X.L. Xu, Z.L. Jiang and Y.B. Zuo	1154
Study on the Error of Four-Position North Seeking System Based on the Single Axis Fiber Optic Gyroscope K.K. Duan, D.H. Li and R.Z. Pei	1158
Influence of Crosswind to Automobile Interior Aerodynamic Noise Y.Z. He and Z.G. Yang	1164
Design of 20m3 Liquefied Petroleum Gas Tank J.H. Liu	1169

Burst Strength Prediction of OCTG Y.X. Sun, Y.H. Lin, B.G. Yi, L.X. Han and X.F. Yang	1173
Comparative Study of Two Kinds of Test Methods of Marine Outboard Engine Crankshaft Bending Fatigue Reliability Z.W. Wang and Q.Y. Yu	1177
An External-Electrode Flat-Panel Lamp for LCD Back-Lighting Q.G. Wang, X.H. Cang, S.M. Wang, J.P. Li and W.X. Chen	1182
Analysis of Permethrin in Cole by Dispersive Solid Phase Extraction F.X. Qiao and M.G. Wang	1186
Coupled Inductor Design of Contactless Power Transfer System S. Gao	1190
Design and Implementation Intelligent Car Wiper Based on LIN Bus H. He, P.P. Yang, Z.H. Zhang and X. Su	1194
Design of High Precision Multi-Channel Synchronizer Signal Generator L.M. Chang, Q.G. Zhang and X.Y. Lv	1198
Design of Wireless Intelligent Electronics Card Four-Element Rectangular Micro-Strip Antenna Array Z. Yue	1203
Electrostatic Attachment of Ferrocene Monolayer to a Gold Electrode for Use as Ascorbic Acid Sensor S.X. Zhang	1208
Noise Reduction for a Given Vehicle Based on Sound Intensity Measurement Method Z.X. Liu and Y.W. Shi	1212
Study on the Surface Metallization of Aramid Fibers L. Li and X.Y. Hu	1216
Research on Calculating Methods of Jacking Force with High Temperature Closure for Continuous Rigid-Frame Bridge C.B. Yin, F. Yu and M. Jiang	1220
Time Effect of Vacuum Treatment on Activity Index of Horseradish Peroxidase Q. Xu	1225

Chapter 3: Measuring Technology and Mechatronics

A Simulation Method of Three-Dimensional Shape Measurement System Based on Texture Mapping and Ray-Tracing Algorithm D. Zhang, Y.J. Zhang and M.R. Yu	1231
A Study on UCAV Targets Assignment Based on Consensus Uncertain Detecting Information X. Chen and Z.Y. Lu	1235
Adaptive Control Based on Neural Network for Ship Steering Autopilot G.S. Hu	1239
An Eddy Current Sensor Array to Detect Defects on a Metal Surface C.H. Yu, X.B. Jiang and D.P. Zhang	1243
Analysis of Subsidence Monitoring of the Saline Soft Soil Ground in Qarham Salt Lake District J.Y. Liu, J.H. Liu and B. Ding	1247
Anti-Swing Control of Container Crane Based on CMAC-PID Controller Y.L. Su, X.H. Wang and J.M. Xiao	1256
Application of Transient Rayleigh Wave for Highway Testing of Compaction Grouting in Subgrade Reinforcement W. Xu, S.W. Du and X.C. Wang	1260
Calibration Method of 3D Body Measurement System Using Stripe Grating Projection X.X. Huang, Q. Tan, Y.M. Xia, Z.Y. Liu and L. Cai	1265
Calibration of Large Scale Coordinate Measuring System Based on Scanning Laser Plane D.B. Lao, W.H. Zhou, Z.L. Zhang, X.Y. Yang and J.G. Zhu	1270
Control Strategy of Coiling Tension Based on RBF-NN Inverse System C.W. Duan and C. Zhang	1276

3D Body Measurement System Based on Structured Light Z.Y. Li, Z.Y. Liu, B.T. Wang and X.X. Huang	1280
A Method of Film Retroreflection Index Calculated by Reflectance Spectrum Y. Yang, C.Z. Zhu, Y.Y. Bai and W. Li	1284
A New Method for Measuring the Thickness of Tin Coating Layer on the Mobile Phone Case G.Y. Li, X.B. Shen and R. Li	1288
A Novel Coal Water Content Measurement Method on Conveyor Belt X.Z. Cheng, J.M. Li, Q. Li, M.Y. Cao and L. Rai	1292
A Simple Wireless Mesh Network for Auto Meter Reading X. Zeng and S.K. Yu	1298
Airport Damage Assessment Based on Uncertain Information X. Chen, M. Liu and L. Li	1301
An Airplane Fuel Measurement System by Using Optic Fiber Sensors C.H. Yu, C. Zhang and Z.X. Zhang	1306
An Experimental Study of Systematic Errors in ADC-Based Instruments Y.J. Jiang	1310
Arterial Stiffness Index Measurement Based on the Oscillometry N.Q. Zhou	1314
Design and Fabrication of Vibration Measurement Device for Completion Tubing Strings in High Pressure Gas Well F.X. Zhang, X.H. Ji, X.T. Yang and Y.H. Dou	1318
Design of a New Fault Detection System for Auto-Loader Z.S. Zhang, P.F. Li, J.J. Huang and T. Li	1322
Design of Active Structural Acoustic Control System Using Volume Displacement Sensors and Uniform Force Actuators Q.B. Mao and W. Zhang	1326
Design of Mine Production Safety Monitoring System Y.K. Wang, Y.X. Shi and H.M. Fan	1330
Design of Subway Intelligent Environment Monitoring System Based on ZigBee B. Jia, Z.M. Liu and J.Y. Wei	1334
Design of the Power Parameter Measurement System Based on SOPC Z.Y. Tong and J.K. Mao	1338
Digital Control System Design of Carving Machine Based on DSP Z.J. Ni, L. Fang and M.J. Chen	1343
Discussion of Problems of Measurement Carbon on the Inner Surface of Inner Grooved Copper Tube by Infrared Absorption Method H.B. Yuan and Y.H. Li	1347
Double Closed-Loop Controller Design of Brushless DC Torque Motor Based on RBF Neural Network D.H. Li, Z.X. Chen and S. Zhai	1351
Dynamic Model Identification of Marine Electric Propulsion System Q. Wu, H. Xiong, G.W. Meng and L.B. Zhou	1357
EMI Soft-Sensing and Filter Based on Wavelet Applied in Underground Monitoring System F.Y. Ma	1360
Experimental Measurement and Analysis of Pulse Transmission Source of GPR H. Xu and G.R. Wu	1365
Research on Measuring Method of the Thickness of Quartz Bulb Shell Based on Hall Effect R.K. He and H. Meng	1369
Model Predictive Control of Flight Arrival Interval D.P. Yang, P.B. Sun and K.Q. Hua	1375
Parameter Measurement and Analysis System of Multi-Phase Electric Machine Using Labview-Based Virtual Instrument Y.Q. Rang, Q. Wu, G.W. Meng and Z.Q. Yang	1381
The Design of the Network Weighing Monitoring System Based on Embedded Controller G.L. Zhou, C.B. Hu and Y.Z. Wang	1385
Robust Fault Detection for Network-Based System with Time-Varying Bounded Delay L.M. Chen	1389

FBG Displacement Sensor Application Research on Geology Security Monitoring of Substation	1393
C. Shen, C. Li, Y.S. Xu, Q.H. Yan, S.Q. Zhang, Y. Chen, X.P. Xu, X.C. Xu and Y.N. Li	
Time-Domain Forecast Based on the Real Ship Sway Data	1397
A.G. Shi, B. Zhou, B. Liu, Z.C. Wang and C. Li	
Study on the Calibration Method for Orthogonal 3D Scanning Probe System Based on the Linear Calibration Matrix	1401
P. Wan, J.J. Guo and B.Z. Li	
Long-Distance Methanol Monitoring System Based on GSM	1408
X.M. Jiang and Y.N. Rui	
Family Use Wireless Router Typical Fault Analysis Research	1412
H.S. Peng	
Measuring of Nanometer Oxide Powders	1416
Z. Ye, J. Xie and X.H. Xie	
Vision Based Eccentricity Measurement of Auto-Hub and its Simulation	1420
F.L. Zhang, R. Han, Y. Peng and L. Wang	
Quantitative Analysis of the Sesame Oil Purity by Similarity of Chromatographic Fingerprint	1424
X.Q. Li and X.L. Miao	
Prediction of Yarn Quality by Support Vector Machine	1429
R.Q. Zhang, J.Q. Li, Y. He and H. Jiang	
The Standardization of Industrial Meters and its Implementation	1433
J.P. Zhang and J. Lu	
Review of 3D Shape Measurement Using Fringe Projection Techniques	1437
M.R. Yu, Y.J. Zhang and D. Zhang	
Transmission Design of the Ultrasonic Flow Measurement Based on the Correlation Method	1441
H. Xu, Z.T. Yan, Y. Wang and S.W. Gao	
Realization of Miniature Air Data System Based on Silicon Micro Pressure Sensor	1445
L.M. Chang, X.B. Yu and L.J. Zhang	
Study on Mine Railway Intelligent Transportation Digital System Design	1450
Z.Y. Li and X.F. Wang	
Measurement Techniques Study of Universal Tool Microscope	1454
X.F. Tan, C.X. Xu, R.W. Shi, W.J. Guo, T. Mao and C.Y. Hu	
Robust H_{∞} Filtering for Stochastic Networked Control System with Nonlinearities and Missing Measurements	1458
J. Cheng, H. Zhu, Y.P. Zhang and Y. Zeng	
Measurement and Application of Radiant Energy	1463
L. Wang and H. Wang	
Sensor Deployment Optimization Based on Simulation of Gas Distribution in Underground Fully Mechanized Coal Face	1468
F.Y. Ma	
Signal Detection for Process with Unknown Distribution	1472
S.F. Yang and B. C. Arnold	
Multi-Channel Probe for Industrial Ethernet Measurement	1476
Z. Liu, J. Huan and X. Hu	
Theoretical Analysis for Sensitivity Enhancement in Broad-Band Thermal Lens Microscope	1480
M.Q. Liu and M. Franko	
The Design and Development of a PEMFC Testing System	1484
H. Zhang, D.J. Yang, B. Li, F.J. Wang and J.X. Ma	
Fault Detection Filter for Markov Jump Systems	1488
Y.C. Ding, H. Zhu, S.M. Zhong and Y.P. Zhang	
Improvement of the C650 Lathe Electrical Control Circuit	1493
G.X. Zhang and C.Z. Yao	
Which Parameters Should Be Used to Represent a Typical Breath Flow	1497
Z.H. He, Y.H. Du and Z.H. Ma	
The Processing of the Defects Images of Knitted Fabrics	1501
J.J. Wei and Y.J. Liu	

Study on Machinery Vibration Data Acquisition Node Based on Wireless Sensor Network W. Xue, X.M. Dong and X.F. Li	1505
The Faults Analysis of HPTACCV Fuel Leakage on CFM56-5B Engine L.Z. Ao	1510
Wireless Sensor Node Deployment Research H.S. Peng	1514
Testing System Development of Outdoor Fitness Equipment F. Zhang and T.J. Wang	1518
The Measurement and Analysis on the Coal Slime Yield Stress J. Gao, X.D. Hao, Z.N. Wang, N. Li and M. Wu	1522
Yaw-Angle Control Channel of Subminiature Unmanned Helicopter Based on ADRC H. Wang, Y. Peng and W.Q. Wu	1527
The Design of Remote Device Monitoring System Based on WINCC and GPRS G. Li, Z.Q. Miao and X.L. Bu	1532
Online Parameter Identification of Synchronous Machine under Small Disturbance H. Xiong, G.W. Meng, S.G. Jiao and L.B. Zhou	1536
A PD Robust Controller Design and Simulation Based on Two-Link Manipulator under Given Upper Bound Disturbance J.Y. Wang and Y.X. Zhuang	1540
Failure Diagnosis of Hydraulic Motor in Amphibious Assault Vehicles Based on Support Vector Machine (SVM) L.H. Yi, Y.C. Dong, Z.W. Qi, X.Y. Wang, G.H. Fan, R.H. Ma and P. Chen	1545
Gear Fault Diagnosis Based on Wavelet Transform G.J. Tang, J. Wu and Z.R. Wang	1550
Research on Operation Sequence Based on Freedom Constraints of Workpiece T.J. Wu, H.B. Wu and H.B. Wang	1554
Research on Optimization of Filling Path Algorithm in Rapid Prototyping Technology L.R. Fan, C. Ren and Y.Q. Cao	1558
Design of Riveting Deformation Detective Element Based on Displacement Sensor Y. Xu, L. Wang and Y. Zhao	1562
Research on Control Chart Limits of Angle Y. Zheng, J. Zhang and A.N. Wang	1566
The Research & Modeling of Area Navigation System Simulation S. Guan and P.B. Sun	1569
Simulation and Analysis of the Radiated Acoustic Field Measurement of the Underwater Vehicle Based on NAH S.C. Ding, L.N. Zhou, J.J. Lou and S.J. Zhu	1575
Design of Electronic Control System of High-Grade Textile Machine Based on CAN Bus H.S. Yu, S.H. Zhang, X.K. Ji and X.J. Liu	1580
The Design of Welding Control System for Intersection of T-Tube's Seam Welding Based on the Multi-Axis H.S. Liu, J.P. Zhou and Y. Xu	1584
An Improved Device of Detecting True and False Coin C.H. Yu, X.F. Tian and D.P. Zhang	1589
Based on the Fractal Technology of Harmonic Detection Method in Power System Y.H. Li, T.D. Yu and S.L. Li	1593
Study on Corrosion Acoustic Emission Separation Based on Blind Source Separation Y. Yu and X. Zhou	1597
Use of NIR Spectroscopy Combined with Recognition Methods for the Identification of Black Teas from Different Regions J.M. Ning, S.P. Wang, Z.Z. Zhang and X.C. Wan	1601
Research on the Supplementary Analysis System Based on CPS Standard H.T. Tao and L.L. Ji	1605
Combustion Control Strategy Based on Radiation Energy Signal in Furnace of Supercharged Boiler G.Y. Zhou, G. Su, F. Du and Z.G. Li	1609
Measuring Model of Dynamic Contact Force Z.G. Sun, X.D. Li and W.D. Wang	1614

The Study of Fuzzy Pid Control to AC Servo System A.Q. Xu and J. Wu	1619
Analysis of Metal Magnetic Memory Testing Technology G.M. Lin, H.Y. Lin and K. Dong	1623
Optimization Strategy of Boiler Send-Guide-Air Automatic Control Scheme P.L. Wu and Y.B. Liu	1627
A New System of Failure Warning and Monitoring Control System for Gas Turbine Compressor (GTC)/Auxiliary Power Unit (APU) of Aircrafts and a Sample Study M.C. Kushan, Z.X. Peng and S.Z. Peng	1633
Study on Fault Diagnosis System Based on IOT and Vector Spectrum X.M. Dong, W.S. Hao and J. Han	1639
Embedded Multi-Parameter Monitoring System for Submersible Electric Pump F. Liu and Q. Li	1642
Adaptive Sliding Mode Controller Designs for Fault-Tolerant Control Systems with Sensor Failures and State Time-Delays S.Q. Sun and X.B. Li	1647
Research on Wireless Vibration Monitoring System for Devices in the Engine Room G.Y. Zhang and S. Wu	1651
Application of Ground Penetrating Radar for Quality Detection of Tunnel Lining F. Wang, S.H. He, J. Liu and F.L. Qi	1655
Faults Detection Logic Updating of Fuel Metering Valve on Aero-Engine L.Z. Ao	1660
The Application of TeeChart Control in UHV DC Converter Switch Test System T.C. Wang, J.F. Zheng and H.Y. Wang	1664
Robust Controller for Ship Dynamic Positioning Based on H_{∞} X.H. Wang, X.H. Wang and J.M. Xiao	1668
On-Line Monitoring of Charge Unit by Using Fiber Bragg Grating Temperature Sensors Z. Yang, X.P. Xu, C. Li, Y. Chen, J.C. Xu, Y.N. Li, Y.S. Xu, Q.H. Yan and S.Q. Zhan	1672
Measurement of Loads on Well Testing Tubing Strings and Stress Analysis Y.P. Cao, F.X. Zhang, R. Chen and Y.H. Dou	1679
Design of a Real-Time Device Monitoring Rubber Materials Compression Stress L.J. Fu, W.F. Zhang, M.Y. Yang and M.L. Ding	1683
Research on Galvanized Layer Detection and Quality Control System of Tower Materials H. Wang, H.X. Jin and J.T. Fang	1687
Ultrasonic Inspection on Concrete Internal Defects of Complex Joints of Steel Reinforced Concrete (SRC) Structure Principle and Application L. Liu, Q. Wang, K. Guo, Y. Xu and S.L. Jia	1691
The Photoelectric Detection System Design of Conductive Film Loophole K. Huang	1695
