

Table of Contents

Preface, Committees and Reviewers

Chapter 1: Technology of Materials and Chemistry

The Pollution Caused by Building Materials and the Strategy to Control it L. Han	3
Application of Composite Materials in Ball Sports Equipments C.W. Huang	7
Based on the Main Factor Mathematical Method to Study on the Structure and Performance of Automobile Engine Oil Filter Materials J.Y. Feng, J.C. Zhang, H. Zhang and D.X. Yang	11
Based on a Linear Regression Method to Study the Fiber Diameter of Car Engine Oil Filter Materials J.Y. Feng, J.C. Zhang, H. Zhang and D.X. Yang	16
The Effect of Impurity Atoms on the Structural and Electronic Properties of Au₃ Clusters D.M. Li, Z.H. Xiong and Q.X. Wan	21
Researches on Fractal Features of Graphite Porous Materials Q. Liu, Y.F. Hu and Q.L. Wang	25
Research of Simultaneous Measurement of Temperature and Strain of Fiber Optic Cable Material X.J. Zhang and H.T. Guo	30
On the Characteristics of Acoustic Wire with Different Materials in the Music Playback F. Guo	34
Effects of Bias on the Bonding Structure and Mechanical Property of a-C:H Films Deposited by MFPUMST H. Jiang, H.Y. Dai and N.K. Huang	38
Magnetoresistance of Nanostructured Sr₂FeMoO₆/CeO₂ Composites X.H. Li, D. Li and D.W. Xiao	44
Synthesis and Characterization of Ni/CNTs Electrodes and their Supercapacitors Performance F. Liu, Q.Q. Li, S.H. Zhang, C. Ma, Q.Z. Ren, X.Y. Tao, J.P. Cheng and X.B. Zhang	48
Photonic Bandgap Properties of Photonic Crystal Fibers with the Triangular Nonair-Silica Structures Z.Y. Song, X.D. Liu and J.X. Niu	52
Synthesis and Characterization of Novel Biological Active Material with Aroyl Urea W.X. Fan, Z.F. Li and Z. Zhang	56
Adsorption of Hydrogen Molecule on the Intrinsic and Al-Doped Graphene: A First Principle Study Y.L. He, D.X. Liu, Y. Qu and Z. Yao	61
Reducibility of La₂Mo_{2-χ}Ga_{χ}O_{9-δ} Oxide-Ion Conductors D. Li and X.H. Li	65
Correlation between Slurry Pore Former Content and Electrochemical Performance of Solid Oxide Fuel Cells with an Aqueous Tape Casted Anode B.X. Hou and C.C. Wang	69
Research on Nano Materials Tennis Rackets Z.X. Zhu	75
Density Functional Theory Study of Ti_nO_{2n-m} Clusters (n=1-4, m=0,1) D.M. Li, Z.H. Xiong and Q.X. Wan	79
Study of the Application of Architectural Acoustic Materials in Sports Venues X.H. Zhou	83

Chapter 2: Mechanical Engineering and Manufacturing Technology

Applied Research on Main Steam Temperature Control Based on Internal Model Control J. Li, W.W. Li, P. Qi and Q.B. Yu	91
Mathematical Model of Three-Phase Boost Converter Z. Zhang and W.M. Tong	96
Geometric Error Analysis for Millimeter-Scale Machine Tool J.J. Li, X.B. Li, J.A. Liu and K.X. Wei	101
Investigation on the Electromagnetic Interference of Four-Circuit Transmission Lines X.Y. Zhuang, Y.M. Li and J. Ma	106
Design and Application of New Testing Slots in the Tracking Control System Y. Yu, X.H. Liu and S.Q. Shang	112
Material and Dynamics Analysis of Low-Temperature Superheater Pipe Bulging Accident in Utility Boiler Z. Yue and Y.S. Zhang	117
Study on Anti-Supporting Ceiling Construction Method L. Li and X.R. Zhang	123
The Design and Application of the Ultra-Thick Abrasion Resistant Flux-Cored Wire J.S. Sun, E.L. Jiao, H.M. Wang and Y.Q. Sun	127
The Process Simulation Complex of Cell Phone Casing Model Injection Molding H.G. Liu, J.P. Ke and H. Yu	132
Research on the Issue of LED's Cooling Based on Heat Conduction Equations Z.Q. Huang, P.Y. Quan and Y.Q. Pan	137
Green Construction Concept in Assessment System for Green Building M.Q. Zhu	142
Design and Simulation Placement Optimization Problem of Multi-Surface Reflector of Street Lamps Y.E. Chen, Y.K. Zhou and P.X. Qu	147
How to Realize the Residential Building for Low Carbon Construction & Sustainable Development L.F. Shen and T.P. Song	152
Experimental Study on the Oxygen-Enriched Co-Combustion of Sewage Sludge and Coal in CFB H.Z. Liu and X.F. Lu	157
Hydraulic Riveting Machine Hydraulic System Design in Automobile Beam Production Line H.G. Liu, R.X. Li and X.Y. Liu	162
Mechanical and Electrical Control of Hydraulic Impactor J.S. Chen	167
Design and Research of Hydraulic Station of Hydraulic Tire Curing Press R. Li	172
Method for Pre-Estimating Dynamically the Optimum of Extremum Value Control System Based on Least Squares G.Q. Li, Y.Q. Liu and W.J. Liu	176
Working Principle and Performance of Wire Electrical Discharge Machining C.S. Xu	180

Chapter 3: Mechanics, Mechatronics and Modeling

The Research and Realization of Image Collection and Compression Technology in Embedded System X.M. Qi	187
The Non-Equidistant New Information GRM(1,1) and its Application Y.X. Luo, D.G. Liao and X.Y. Che	191
Forward Displacement Analysis of 5SPS-1CCS Parallel Manipulator Based on Hyper-Chaotic Newton Method Y.X. Luo and B. Zeng	196
Application of Fuzzy Support Vector Machine in Chalky Rice Identification X. Li, S.B. Gao and Y.Q. Chen	202

Long Jump Technique Based on the Method of Mechanical Analysis W.M. Sun, B. Gao and W.S. Zhang	208
The Application of 3D Scanner on Whole Body in 3D Clothing Design J.X. Zhang	212
Characteristic Analysis and Optimization of CNC Machine Tool Spindle Based on Finite Element Method Z.Q. Sheng, S.L. Dai, Y.C. Liu and H.T. Fan	217
The Development of Stamping Mold Frame Based on VBA in Auto CAD W.H. Jia and X.H. Li	222
An Approach of Signal Analysis Based on High-Order Spline Interpolation J.J. Li, X.B. Li, H. You and C. Liu	226
Mechanical Analysis of Water Cellar Structure J.D. Huo, Q. Zhang, H.T. Peng, J. Wang and X.F. Peng	231
Numerical Simulation Research on the Influence of Tailings Surcharge Load at Open-Pit Mine C.M. Zhou and D.J. Zhang	237
The Force Analysis on the Shaft of Electric Vehicle Based on Unigraphics T.F. Wang	242
Research on the Flight Status of Badminton Based on the Method of Mechanics Analysis X.L. Xie and K. Jiang	246
Mechanics Transmission and Analysis of the Stress Measurement and Control System of the Fracture Traumatic Cross-Section J.M. Zhu, X.R. Li and H.W. Li	252
Displacement Analysis of Nine-Link Barranov Truss Based on Hyper-Chaotic Least Square Method Y.X. Luo and Q.Y. Liu	260
Grey New Information Unbiased GOM(1,1) Model Based on Opposite-Direction Accumulated Generating and its Application Y.X. Luo and D.G. Liao	265
A Novel Algorithm to Calculating Spatial Impulse Responses Based on Annular Planar Transducers Y.Q. Li and C. Yuan	269
Forward Displacement Analysis of 6-SPS Mechanism Based on Hyper-Chaos Neural Network Mathematical Programming Y.X. Luo, Z.M. He and X. Song	274
Features and Applications of Tennis Racket Y. Yu, H.L. Zhang and S.P. Jing	279
Grey Unbiased GOM(1,1) Model Based on Inverse Accumulated Generating Operation and its Application Y.X. Luo, D.G. Liao and X.Y. Che	284
