## Chapter 1: Mineral Prospecting and Exploration

|                                                                                                                                                                    |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>A Preliminary Study on Sedimentary Mode of Putaohua Oil Layer in the East of Sanzhao Depression</b><br>L. Cong, S.Z. Ma, Y. Sun and R.B. Li                     | 3   |
| <b>Analysis on Basic Conditions and Main Control Factors of Accumulation in Eastern Area of Yishan Slope of Ordos Basin</b><br>B.H. Shi, J. Wang and Y. Zhang      | 10  |
| <b>Andesite Geochemistry Features of Late Triassic Tumugou Formation, in Zhongdian, Yunnan Province</b><br>J.G. Huang, R.S. Han, R. Tao and Z.Q. Li                | 16  |
| <b>Characteristics and Origin of Calcareous Interbeds of Chang 6 Member in Jiyuan Oilfield</b><br>Z.D. Bao, Y.C. Qi, C.J. Feng, Y.J. Zhao, X.Q. Zhao and L. Li     | 24  |
| <b>Comparison and Application of High Prestress and Intensive Support System in Close, Soft and Cracked Roadway Support</b><br>B. Hu, H.P. Kang and J. Lin         | 29  |
| <b>Current Situation, Countermeasure and Research that Develop the Comprehensive Utilization of Resources in Xinjiang</b><br>D.M. Zhao and M. Li                   | 36  |
| <b>Early Cambrian Seismic Events and Their Tectonic Significance in Western Zhejiang</b><br>F.S. Guo, Z.B. Yan and L.Q. Chen                                       | 42  |
| <b>Effects of Microbial Degradation over Heavy Oil and Oilfield Test</b><br>Z.Y. Jiang, T.S. Zhang, X.H. Chen and G.Z. Lan                                         | 49  |
| <b>Characteristics of "Three Zones" during Underground Coal Gasification</b><br>H.T. Liu, H. Yao, K. Yao, F. Chen and G.Q. Luo                                     | 56  |
| <b>Migration Law of Mesozoic Qaidam Basin Depocenters</b><br>P.L. Wang, D.W. Lv, H.Y. Liu, X. Zheng and Y.L. Lv                                                    | 63  |
| <b>Research and Design of Mine Water Warehouse Level Measurement and Control System</b><br>X.K. Zhang                                                              | 67  |
| <b>Study on the Ore-Controlling Structure of Yanglin'ao Tungsten Deposit and the Mineralization Prediction, Hunan Province</b><br>Y.J. Xu, P. Zheng and M.X. Huang | 73  |
| <b>The Reservoir Plane Heterogeneity Characteristics of the Number 2 of the Shanxi Formation in Changbei Gas Field, Ordos Basin, China</b><br>Q.L. Wei and L. Xiao | 81  |
| <b>Diagenesis and Controlling Factors of Kalashayi Clastic Reservoir in South of Tahe Oilfield</b><br>Y.S. Wu, D.K. Zhong, N.S. Qiu and K.N. Liu                   | 85  |
| <b>The Petroleum System of Northern Kashi Sag in Tarim Basin and Exploration Direction</b><br>Y.Z. Hu, P.R. Zhao and Y.H. Lv                                       | 89  |
| <b>Wave Equation Simulation by Finite-Element Method with Perfectly Matched Layer</b><br>H.W. Guo, S.X. Wang, N.C. Guo and W. Chen                                 | 96  |
| <b>Zeku County Longquna-Donggerina Gold Deposit Geologic Feature and Metallogenic Regularities</b><br>H. Jing, Z.R. Yang and D.Q. Zhang                            | 101 |
| <b>A Survey of Paragenetic and Associated Resources in Lignite of China</b><br>X.H. Fu, W.Q. Liang, X.S. Zhao and J.J. Tian                                        | 106 |
| <b>Choice and Application of Governance Mode of Mining Subsidence Areas in Cities</b><br>G.W. Zhang, L.J. Wang, J. Fang and X.K. Cao                               | 111 |
| <b>Research on Periodically Change of Airflow Temperature in Mine</b><br>Y.L. Yao                                                                                  | 118 |

|                                                                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Accumulated Conditions of Shale Gas in the Middle-Low Palaeozoic, Yangtze Platform, China</b>                                                                                           |     |
| H.Y. Hu, Z.D. He and B.C. Chen                                                                                                                                                             | 122 |
| <b>Geochemical Characteristics and Genesis of Volcanic Rocks from Zhangjiakou Formation in the Chaoyang Basin, Western Liaoning</b>                                                        |     |
| Y.D. Peng and D.H. Xing                                                                                                                                                                    | 126 |
| <b>Geological Features of Fuxin Gold Deposit</b>                                                                                                                                           |     |
| X. Wang, Z.X. Yang and J.L. Jiang                                                                                                                                                          | 130 |
| <b>Hydrocarbon Accumulation Characteristics and its Main Controlling Factors in Lithologic Reservoirs Area: Example of Fuyu Oil Layer in the Southern Fuxin Uplift of Songliao Basin</b>   |     |
| Y. Sun, C. Chen, S.Z. Ma and B.Q. Yan                                                                                                                                                      | 134 |
| <b>Initial Analysis on Tectonic and Magmatism of Xinqiao Mining Area in Tongling of Anhui Province</b>                                                                                     |     |
| X. Wei, W.G. Zhang, X.K. Yang and H.J. He                                                                                                                                                  | 140 |
| <b>Mesozoic Intrusive Rocks Characteristics and Comparative between the West Hubei-Jiangxi and the East Jiangsu-Anhui</b>                                                                  |     |
| C.X. Qu, X.K. Yang, H.J. He and H.Y. Song                                                                                                                                                  | 144 |
| <b>Numerical Modeling of Mud Invasion Profile Based on the Well Logging with the Shallow Depth of Investigation</b>                                                                        |     |
| Y.Z. Zhang and X.Y. Miao                                                                                                                                                                   | 148 |
| <b>On the Forward Simulation of the Geophysical Characteristics in Fractured Reservoirs</b>                                                                                                |     |
| X.J. Xie, X.L. Wang and Y.F. Cheng                                                                                                                                                         | 152 |
| <b>Pb Isotopic Geochemistry of Carbonate-Hosted Pb-Zn Deposits, NW Guizhou Pb-Zn Metallogenic District, China</b>                                                                          |     |
| S.H. Chen, H.M. Cheng and T.C. He                                                                                                                                                          | 160 |
| <b>Petrological and Rock Chemical Characteristics of Ore-Bearing Rock of Xinshan Area in Kafang, Gejiu, Yunnan</b>                                                                         |     |
| J.J. Zhao, W.X. Fang, M.J. Ma and Y.Q. Guo                                                                                                                                                 | 166 |
| <b>Prediction of Sand Thickness Using Seismic Attributes Based on BP-Neural Network</b>                                                                                                    |     |
| F. Gao                                                                                                                                                                                     | 180 |
| <b>REE Characteristic of Hydrothermal Calcite in Langdu Skarn Copper Deposit</b>                                                                                                           |     |
| T. Ren, R.S. Han and Y.Z. Hu                                                                                                                                                               | 184 |
| <b>Regional Seal as Key Controlled Elements of Petroleum Accumulation in the Rift Basin</b>                                                                                                |     |
| H.Y. Hu, Z. Zhao, S. Lu and H.Z. Xiao                                                                                                                                                      | 190 |
| <b>Separability of PI<sub>3</sub> in X Block of Daqing Oilfield</b>                                                                                                                        |     |
| H.Q. Kang, L. Wang, Z.S. Shen and B.Q. Yan                                                                                                                                                 | 194 |
| <b>Spatial Distribution of Thin Interbeds in Point Bars of Meandering Channels: Case Study of Block X in Daqing Oilfield</b>                                                               |     |
| B.Q. Yan, X.L. Tian, H.Q. Kang and L. Wang                                                                                                                                                 | 199 |
| <b>Stable Isotope and REE Geological and Geochemical Characteristics of the Calcite in the Fankou Zinc-Lead Deposit, Guangdong Province, China</b>                                         |     |
| Y. Han, J.B. Wang, X.Y. Zhu and N.N. Guo                                                                                                                                                   | 205 |
| <b>Stochastic Simulation Study on Development of Reservoir Fracture - Taking the Third Segment of Wumishan Formation in Renqiu Buried Hill as an Example</b>                               |     |
| J. Li, J. Li, H.G. Zhou, L.F. Wang and H. Liu                                                                                                                                              | 213 |
| <b>Study on Flow Units and Residual Oil Distribution of Lower S<sub>2</sub> Formation in Wen-X Fault Block, Wenliu Oilfield</b>                                                            |     |
| M.A. Tang, B.L. Sun and H.Y. Xu                                                                                                                                                            | 217 |
| <b>Study on the Demand, Present Situation and Development Countermeasure of Uranium Resources in China</b>                                                                                 |     |
| B.Q. Hu and Y. Wang                                                                                                                                                                        | 221 |
| <b>The Characteristics of Palaeogeomorphology in Ek<sub>1</sub> and the Lower Part of Es<sub>4</sub> of the Paleogene in Dongying Depression and its Significance to Petroleum Geology</b> |     |
| L.A. Liu and J.B. Han                                                                                                                                                                      | 226 |
| <b>The Mineralization Theories and Techniques of Exploration for the Crisis Mines, a Case Study at the Shiyingtang Gold Deposit in Xinjiang</b>                                            |     |
| Q. Li                                                                                                                                                                                      | 231 |

|                                                                                                                                                                                   |     |

## **Chapter 2: Mining Engineering and Coal Mining**

|                                                                                                                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Analysis of Influence Characteristics on Slope Stability of Underground Mining in Slope Outer Zone</b><br>S.G. Sun, H. Yang, Z.B. Zhang, T.W. Zhang and C.S. Wang                                                              | 255 |
| <b>Application of Safety Appraisalment of Blasting Operation in Coal Face of Blasting Mining</b><br>X.S. Wang and T. Rong                                                                                                         | 261 |
| <b>Base Level Cycle and Coal-Accumulation of Lower Member of Shanxi Formation of Permian in Northeast Part Ordos Basin</b><br>J.W. Liang, R.G. Wang and Z.J. Liu                                                                  | 266 |
| <b>Determination of Strata Displacement Angles under Subcritical Mining</b><br>H.B. Chai, Y.F. Zou and S.Y. Li                                                                                                                    | 274 |
| <b>Discovery of Yaguila Pb-Zn Polymetallic Deposit in Tibet: A Successful Case of Geochemical Prospecting</b><br>X. Du, C.H. Yan, J.K. Chen and X.F. Li                                                                           | 278 |
| <b>Dust Simulation and Application of Forced and Exhausted Mixed Ventilation System in Half Coal-Rock Fully-Mechanized Excavation Face</b><br>G. Zhou, W. Nie, W.M. Cheng, D.M. Wang, Y.B. Yu and J.L. Yang                       | 285 |
| <b>Evaluating Water Coning Control for Horizontal Well in Bottom-Water Sandstone Reservoirs by Numerical Method</b><br>R. Wang, K. Zhang, Y.G. Duan and T.K. Cao                                                                  | 292 |
| <b>Experiment Study of Mechanical and Gas Seepage Characteristics of Containing-Gas Coal in the Process of Unloading Confining Pressure</b><br>T. Deng, J.X. Tang and J. Chen                                                     | 297 |
| <b>Fiber Optic Temperature and Gas Concentration Sensor for Mine Goaf Area Inner Detecting</b><br>Y.B. Wei, X.Y. Wang, M. Xin, T.Y. Liu and C. Wang                                                                               | 302 |
| <b>High and Steep Slope Stability Analysis Induced by Goaf Based on 3D Fast Lagrangian Analysis of Continua</b><br>Q. Yu, S. Zeng, Z.J. Zhang and B. Sun                                                                          | 306 |
| <b>Numerical Research on Anisotropy Mechanical Parameters of Fractured Rock Mass</b><br>P.F. Sun, T.H. Yang, Q.L. Yu and W. Shen                                                                                                  | 310 |
| <b>Numerical Simulation and Backfilling Materials Research on Coal Spontaneous Combustion of Thick Seam Large-Scale Top-Caving Region in Resources Conformity Coal Mine</b><br>B. Tan, Y.G. Jiang, C.N. He, J. Chang and Y.Q. Luo | 317 |
| <b>Once More on the Relation of the Roof Collapse in the Stope of a Mine and the Universal Gravitation Effect</b><br>L.M. Zhang, K.J. Zhang and F.S. Chen                                                                         | 321 |
| <b>Research on Rapid Excavation Technology of Roadway in Coal Seam with the Risk of Coal and Gas Outburst</b><br>S.T. Hu, B.S. Nie, M.J. Liu, Y.W. Liu, X.C. Li and J.H. Guo                                                      | 325 |
| <b>Residual Subsidence Prediction of Abandoned Mine Goaf Based on Wavelet Support Vector Machines</b><br>Z.S. Wang and K.Z. Deng                                                                                                  | 330 |
| <b>Rock Slope Fuzzy Stochastic Damage Study</b><br>Y.J. Wang and W.H. Zhang                                                                                                                                                       | 337 |
| <b>Stowing Mining Technology in the Northwest Ecologically Fragile Areas</b><br>P.L. Liu, H.X. Zhang, F. Cui, B.S. Yan and K. Zhu                                                                                                 | 341 |

|                                                                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Study of Sealing Technology of Downward &amp; Permeable Borehole</b><br>Z.X. Hu                                                                                                             | 351 |
| <b>Study on Correlative Income of Mining Resources in China</b><br>H.B. Ren and Y.L. Fan                                                                                                       | 355 |
| <b>Study on the Truss Support Technology for Coal Side in a Soft Broken Coal Roadway Under High Stress</b><br>S.Y. Dong, Q.T. Duan, F.L. He, Q. Li and H.J. Jiang                              | 360 |
| <b>Temperature-Rising Desorption of CBM</b><br>D.M. Ma, Y.B. Lin and W. Ma                                                                                                                     | 364 |
| <b>The Effects of Structural Characteristics of Low Seepage Sandstone Uranium Ore Rock on Permeability</b><br>S. Zeng, K.X. Tan, X.M. Du and C.G. Li                                           | 371 |
| <b>The Influence of Fault Dip Angle on the Floor Fault Activation</b><br>H.L. Li, H.B. Bai, B.H. Yao, C. Yang and X.Q. Wei                                                                     | 375 |
| <b>The Parameter Optimization and Field Application of Truss Cable Support System in a Thick Fragmental Coal Seam Roadway</b><br>X.K. Zhang, H.J. Jiang, F.L. He and M.Y. Weng                 | 382 |
| <b>The Study on Gas Drainage to Gob with Long Bore-Holes at ChangPing Coalmine</b><br>J. Liu, L. Wang and X.Y. Xin                                                                             | 387 |
| <b>Visualization of Mining Monitoring Is the Development Direction of Coal Mine Safety Production</b><br>Y.L. Li, C.K. Zhang, J.Y. Liu and J. Li                                               | 391 |
| <b>Analysis on Instability of Surrounding Rock in Gob-Side Entry Retaining with the Character of Soft Rock Composite Roof</b><br>D.C. Yang, M.Z. Gao, Y.H. Cheng, W. Sheng and J.S. Chen       | 396 |
| <b>Calculation of Settlement and Inclination of Gravity Foundation in Coral Sands Based on Transfer Matrix Method</b><br>P. Yang, Z.Q. Cheng and H.B. Jiang                                    | 404 |
| <b>Causative Mechanism of the Continental Margin Polymetallic Nodules from the South China Sea and its Resource Effects</b><br>Z.G. Zhang, C.S. Liu, L.F. Gao, Y. Zhang, G.Y. Shi and P. Zhang | 408 |
| <b>Construction of Digital Mine and Key Technologies</b><br>H. Lin, P. Liu, W. Li, L.P. Zhang and Y.Z. Ji                                                                                      | 413 |
| <b>Current Situation and Prospect of Coal Backfill Mining Technology</b><br>W.Y. Lv and Z.H. Zhang                                                                                             | 421 |
| <b>Evaluation Method of Coal Mine Safety Based on Evidence Theory</b><br>G. Xu, Y. Ding and T.J. Zhang                                                                                         | 426 |
| <b>Experimental Study on the Impact of Temperature on Coal Electric Parameter</b><br>X.C. Li, W.B. Liu, B.S. Nie, Z.J. Li, Y.J. Wang and L. Li                                                 | 431 |
| <b>Geohazard Forecasting in Mining Area Based on Grey Model</b><br>F. Ding, L.Y. Shao, Z.B. Li and F.L. Zhang                                                                                  | 436 |
| <b>Hydrogeological Structure Model of the Aquifer in Wushan Mine Based on GMS</b><br>X. Zhang, Z.H. Chen and S.W. Yu                                                                           | 441 |
| <b>Numerical Research on the Floor Heave Control of Deep Roadway in Coal Mining</b><br>F.K. Xiao, C.J. Zhang, L.W. Gao and Y.Y. Yue                                                            | 446 |
| <b>Numerical Study on Shocking Coal Seam of Multi-Points Explosion with High-Pressure Gas</b><br>K. Gao, J.R. Wang and B.S. Jia                                                                | 450 |
| <b>Practice and Simple Analysis of Forced Roof Caving Technology Using Pre-Splitting and Blasting Methods</b><br>C.M. Li                                                                       | 455 |
| <b>Research on the Dynamic Deformation Characteristics of Tailings Silt in Zhuziqing Tailings Dam</b><br>J.B. Xie, W.L. Liu, L.H. Shi, G.H. Zhang and J. Zhang                                 | 459 |
| <b>Stress Shell Mechanical Mechanism of Fully-Mechanized Face Enhancing the Upper Limit for Coal Mining and Risk Analysis of Support Break-Off</b><br>J.L. Hou and Y. Sun                      | 466 |
| <b>Study on Surrounding Rock Pre-Stressed Crossed Anchor Control Technology in Roadway with Large Mining Depth</b><br>X.G. Zheng, Q.J. Zhan and B. Wang                                        | 471 |

|                                                                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>The Application of Bolt-Mesh-Anchor Combined Support in Soft Rock Roadway</b><br>G.H. Wang and Z. Wang                                                                            | 476 |
| <b>The Influence of Mining Height on the Height of Water Flowing Fractured Zone</b><br>M. Zhang and J.G. Ning                                                                        | 481 |
| <b>The Numerical Simulation for Seepage Rule of Coal-Bed Methane with Hydraulic Cutting Seam Mining Based on Matlab</b><br>X.L. Yang, Y.L. Zhang and C.Z. Ren                        | 485 |
| <b>The Research Progress of Coal and Gas Co-Mining</b><br>L.M. Ying, J. Chen, C. Du, L.X. Pang and Y.J. Wen                                                                          | 489 |

| <b>Sustainable Development, Environmental Pollution and Social Management around Poyang Lake</b><br>C. Yu and L.W. Li                                          | 3762 |

## **Chapter 16: Computer-Aided Design/Engineering and Other Related Topics**

|                                                                                                                                                                                   |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Simulation-Based Study on the Relationship between the Car Queue Pass Time and the Distance between Cars after the Light Turns Green</b><br>Z.C. Bian, D.F. Chang and Y. Jiang | 3769 |
| <b>Template Matching Based on Polar Coordinate</b><br>X.J. Miao and X.F. Li                                                                                                       | 3774 |
| <b>The Study on the Communication of the Double-Robot Polishing System by the C/S Mode</b><br>J. Ji, M. Yu, X. An and Y.H. Zhang                                                  | 3778 |
| <b>Marking and Evaluating Index of Scientific Research Nurturing Teaching in Universities</b><br>W.J. Yang, G.J. Zhang, T.T. Zhang and S. Yuan                                    | 3782 |
| <b>A New Ubiquitous Service Platform for IOT (USPIOT) Implementation Based on SOA</b><br>J.M. Bao, J.P. Wang and Y.K. Sun                                                         | 3788 |
| <b>Adaptive Neural Network for Image Edge Detection</b><br>W.T. Zhang and S.G. Huang                                                                                              | 3792 |
| <b>An Improved Image Retrievaling Method Based on Moment Invariants</b><br>C. Wu and P. Zhao                                                                                      | 3797 |
| <b>Comparison Theorem for any Solutions of Backward Stochastic Differential Equations and its Application</b><br>S.Y. Li, W.J. Gao and J.H. Wang                                  | 3801 |
| <b>Comparisons of Cloud Computing Models and Technologies</b><br>Y. Hu                                                                                                            | 3805 |
| <b>Fuzzy Synchronization of Chaotic Systems Based on Genetic Algorithm</b><br>X.H. Wang, D. Ao and Z.Q. Wu                                                                        | 3809 |
| <b>Information Technology-Based Smart Energy System</b><br>Q.D. Feng and H.Y. Wu                                                                                                  | 3815 |

|                                                                                                                                                                               |      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Research on Intelligent Inspection Machine Based on Linear CCD</b><br>J.F. Zhang, Z.Q. Lu, Z. Wang, Q.K. Yuan and G.K. Wang                                                | 3819 |
| <b>Three-Step Method with Fifth-Order Convergence for Nonlinear Equation</b><br>L. Sun, L. Fang and Y. Wang                                                                   | 3824 |
| <b>A Maximum Loss Minimization Model for Portfolio Selection Based on the CVaR Measurement</b><br>C. Wang and Z.G. Zhang                                                      | 3828 |
| <b>An Arithmetical Function and the Divisor Product Sequences</b><br>M.S. Yang and Y.J. Tu                                                                                    | 3834 |
| <b>An Interpolation FFT Algorithm with High Accuracy</b><br>S.M. Liu, H.W. Shi, Y. Jiang, X. Min and G.Y. Chen                                                                | 3838 |
| <b>Binary Sort Tree Visualization Demonstration System Design and Realization</b><br>X.B. Yang and B.Z. Chen                                                                  | 3845 |
| <b>Design and Realization Based on SAR Image Target Model Base</b><br>G. Yang, X.J. Wang, J.F. Zhang, X. Li, S.B. Wang, Y. Ye and T. Tong                                     | 3849 |
| <b>Research on Construction of the Mutually Supportive Network Using a Spring-Water Spots</b><br>R. Nanba and M. Takahashi                                                    | 3853 |
| <b>Study of Teaching Assessment Based on BP Neural Network</b><br>W.J. Yang, Y.J. Zhou and S. Yuan                                                                            | 3861 |
| <b>Text Classification Combined an Improved CHI and Category Relevance Factor</b><br>P.Y. Zhang                                                                               | 3866 |
| <b>Base on SIFT-Harris Operator of the Document Image Matching Method</b><br>Y.H. Cheng and X.W. Han                                                                          | 3870 |
| <b>Analysis of the Development of Contemporary Industrial Design</b><br>H. Li, Y.J. Li, X.G. Rui and Y. Zhang                                                                 | 3875 |
| <b>Study of Application of “Green” Design Concept to Fashion Design</b><br>Y.M. Cui, S. Pan and X.L. Meng                                                                     | 3880 |
| <b>Weighted-Correct Empirical likelihood for Linear EV Models</b><br>Y.Y. Jiang and X.F. Zhu                                                                                  | 3884 |
| <b>Integrated Evaluation of Ship Maneuverability Based on the Method of Maximizing Deviation</b><br>J.F. Qu, Y. Bi and W.B. Xiao                                              | 3888 |
| <b>Mechanical Property Analysis of the Frame of Papermachine Dry Section Based on Finite Element Method</b><br>S.L. Hou, H.Y. Yang and X.B. Su                                | 3896 |
| <b>3D Reconstruction of <i>Jatropha curcas</i> L. Root Based on Image</b><br>K.N. Liu, Q.L. Yang, Y.J. Sun, Z.Y. Ge and Y. Zhang                                              | 3900 |
| <b>Design of Small-Scale Radial Inflow Turbine Integrated into Organic Rankine Cycle</b><br>H. Wang, X.L. Ma and X.L. Wei                                                     | 3907 |
| <b>Using Transfer-Entropy TOPSIS and BP Neural Networks Model to early Warning of External Environments of Life Cycle Asset Management</b><br>Q.Y. Yan, X.Y. Wang and S.Q. He | 3914 |
