

PREFACE

2012 International Conference on Environment Materials and Environment Management (EMEM 2012) is launched by Information Technology & Industrial Engineering Research Center. EMEM 2012 is a forum for presentation of new research results of environment materials and environment management. The forum aims to bring together researchers, developers, and users from around the world in both industry and academia for sharing state-of-art results, for exploring new areas of research and development, and to discuss emerging issues facing environment materials and environment management. This conference will be held on August 4, 2012 in Wuhan, China. The book title of this conference is “Environment Science and Materials Engineering”.

In this conference, we had received about 400 submissions from 5 countries and regions. Each of the papers was reviewed carefully by two famous specialists in this field. After received the revised papers on the basis of the specialists' advice, finally we collected about 230 papers into the proceedings. In addition to the regular publications of the papers, we have also invited several specialists and scholars in this field to make keynote speech at the conference.

We would like to take this opportunity to express our thanks to the individuals and organizations for their efforts to serve the conference. We'd like to extend our thanks to members of academic committee for their effort to the conference; especially, we'd like to thank to members of organizing committee for their hard working; finally, we would like to express our appreciations to the participants of this conference.
