## Preface and Organizing Committees

## Chapter 1: Advanced Material Science and Technology

|                                                                                                                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Investigation on Size Effect of Cantilever Carbon Nanotube</b><br>Y.J. Liang and Q. Han                                                                                                                               | 3   |
| <b>Preparation, Characterization and Visible-Light Photocatalytic Properties of BiOCl/BiOI Nanocomposites</b><br>K.J. Huang, H.G. Liu, F.L. Yuan and C.S. Xie                                                            | 10  |
| <b>Self-Assembled Combination of Graphene with Au Nanoparticle-Doped Copper-Hexacyanoferrate Multilayer for Sensitive Detection of Hydrazine</b><br>D.J. Zhao, F. Yan, Y.F. Xuan, X.P. Dong and F.N. Xi                  | 18  |
| <b>Unipolar Resistive Switching Behavior Study in <math>\text{Cu}_x\text{O}</math> Thin Films at Different Annealing Temperatures</b><br>Y. Li, G.Y. Zhao and F. Shi                                                     | 24  |
| <b>Bacterial Cellulose: The Nano-Scalar Cellulose Morphology for the Material of Transparent Regenerated Membrane</b><br>C.C. Chen, D.G. Li, Q.Y. Deng, Y.M. Wang and D.L. Lin                                           | 30  |
| <b>Different Activities of Osteoblast and Bacteria on a Nanostructured Titanium Surface for Dental Implant</b><br>Y.H. Zheng, J.B. Li, X.Y. Liu and J. Sun                                                               | 39  |
| <b>The Localized Mode and its Photoluminescence Characteristics of the Nematic-Liquid-Crystal-Filled One Dimensional Photonic Crystal</b><br>B.X. Li, Y.M. Xie and C.X. Zeng                                             | 45  |
| <b>Preparation and Hydrogen Storage Kinetics of Nanocrystalline and Amorphous <math>\text{Mg}_{20}\text{Ni}_8\text{M}_2</math> (M=Cu, Co) Alloys</b><br>Y.H. Zhang, T. Yang, H.W. Shang, G.F. Zhang, X. Li and D.L. Zhao | 50  |
| <b>The Preparation of PAN Composite <math>\text{TiO}_2</math> Nano-ACF and the Conditions Study</b><br>Y.B. Wu, Y.C. Yan, T. Lou and T.B. Song                                                                           | 58  |
| <b>Application of Induction Heating to Boriding</b><br>Y. Iwabuchi and I. Kobayashi                                                                                                                                      | 64  |
| <b>High-Temperature Brazing Molybdenum</b><br>C.C. Lin, C.H. Lee, R.K. Shiue and H.J. Shy                                                                                                                                | 69  |
| <b>HVOF Coating of <math>\mu\text{-WC}</math>-Metal Powder and Laser Heat-Treatment of the Coating for the Improvement of Turbo Shaft Material</b><br>T.Y. Cho, Y.K. Joo, J.H. Yoon, H.G. Chun and S.H. Zhang            | 74  |
| <b>Preparation and Properties of cis-1,4-Polybutadiene Rubber/OMMT/AT Nanocomposites</b><br>Z. Gu, G.J. Song and W.S. Liu                                                                                                | 80  |
| <b>Enzymatic Production of <math>\gamma</math>-Aminobutyric Acid Using Rice Bran</b><br>Y.G. Lü, H. Zhang and H.Y. Yao                                                                                                   | 85  |
| <b>Response and Biochemical Alteration of <i>Vibrio parahaemolyticus</i> to Chlorine-Containing Disinfectants</b><br>X.C. Gao, Y.W. Sun, X.H. Sun, Y. Zhao and C.C. Liu                                                  | 92  |
| <b>A Direct Method to Evaluate the Tensile Strength of Polyolefin Fiber Cement-Based Composites</b><br>T.Y. Han, W.T. Lin, A. Cheng and C.C. Huang                                                                       | 99  |
| <b>Preparation of Buoyant Adsorbent for the Removal of Heavy Metal Ions in Rainwater Runoff: Characteristics of Manganese – Dioxide – Coated Polypropylene Granules</b><br>D.S. Rhee and S. Mavlyankariev                | 103 |
| <b>Influence of Metakaolin on the Efflorescence of Cement-Based Composites Using Matlab Image Analysis</b><br>T.L. Weng, W.T. Lin and P.C. Chen                                                                          | 107 |

|                                                                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Investigation of the Dynamic Response of Functionally Graded Materials Using Smoothed Particle Hydrodynamics</b><br>G.M. Rong and H. Kisu                                                             | 111 |
| <b>Effect of Fiber Length on Impact Resistance of Fiber Cement-Based Composites Containing Silica Fume</b><br>W.T. Lin, T.Y. Han, Y.C. Wu and C.C. Huang                                                 | 117 |
| <b>Magnetic-Field-Dependent Effect on the Synthesis of Cu<sub>2</sub>O Crystals</b><br>C.C. Kong, S.D. Sun, Z.B. Sun, B.J. Ding and Z.M. Yang                                                            | 121 |
| <b>Effect of Fe<sub>2</sub>O<sub>3</sub> on the Physical Property of Geopolymer Paste</b><br>S.C. Choi and W.K. Lee                                                                                      | 126 |
| <b>Influence of Different Buffer Layer on Intense Pulsed Field Emission of Carbon Nanotubes</b><br>H.L. Ma, X.Y. Zhang, S.Z. Qiao, R. Zhang, F.G. Zeng and L.S. Xia                                      | 130 |
| <b>Damping Properties of SBR Modified Cement Pastes</b><br>Z.L. Zhang and P.M. Wang                                                                                                                      | 135 |
| <b>New Metallic Detergents for Lubricating Oils</b><br>Y.G. Shi, S. Wang, Z.C. Li, L. Mei and P. Sun                                                                                                     | 141 |
| <b>Modeling and Calculation of Electron Transmission Coefficient from Printed CNT Film to Vacuum</b><br>Y.L. Zhang, W.Q. Yang, H.L. Ma and F.G. Zeng                                                     | 145 |
| <b>Observation of High Speed Glass Bottle Fracture Behaviors by Underwater Shockwave</b><br>K. Nagata, H. Sakamoto, Y. Ohbuchi, H. Kuramae and E. Nakamachi                                              | 151 |
| <b>Purification of HgI<sub>2</sub> Crystals from Physical Vapor Transport for Application as Radiation Detectors</b><br>J.F.T. Martins, R.A. dos Santos, F.E. da Costa, C.H. de Mesquita and M.M. Hamada | 156 |
| <b>The Preparation and Characteristics of Chitosan-Acetaminophen Drug-Loading Microspheres</b><br>H.R. Zhou, J.Y. Zhang and H. Jiang                                                                     | 161 |
| <b>Study on Preparation of Obsidian Slag Cleanser for Molten Iron</b><br>G.Z. Zhang, Y.J. Zhang and X.G. Liu                                                                                             | 166 |
| <b>Research on NPM Used in Flame Retardant Epoxy Potting</b><br>H.R. Zhou, H.C. Yang, A. Sun and S. Zhao                                                                                                 | 172 |
| <b>Comparative Studies on Field Emission Properties of Diamond and Diamond /Ti Films</b><br>X.Y. Zhang, H.L. Ma, Y.M. Zhao, N. Yao, F.G. Zeng and B.L. Zhang                                             | 177 |
| <b>Effect of Different Metal Composite Layer on Field Emission Properties of Diamond Film</b><br>X.Y. Zhang, H.L. Ma, Y.M. Zhao, N. Yao and F.G. Zeng                                                    | 181 |
| <b>Multifunctional Finishing of Ramie Fabric Using Titanium Dioxide Nanoparticles</b><br>G.H. Zheng, F.L. Ji and J.H. Ren                                                                                | 185 |
| <b>Study on Influence of Mineral Aggregate Gradations and Spatial Distribution on Performance of Asphalt Mixture</b><br>T. Li                                                                            | 191 |
| <b>Mechanical Properties of Glass-Fiber Polyester Reinforced Composites Filled with Nanometer Al<sub>2</sub>O<sub>3</sub> Particles</b><br>F. Alavi and A. Ashrafi                                       | 199 |
| <b>The Defect Modes Property Controlled by Temperature in One Dimensional Photonic Crystal with Liquid Crystal Defect Layer</b><br>X.X. Yin, Y.M. Xie, H.Z. Wang and R.L. Xiao                           | 206 |
| <b>Preparation and Research of Iatric Fiber with Far Infrared Ray Radiation Function</b><br>X.F. Yao, J.P. Wang, D.P. Li and T.T. He                                                                     | 210 |
| <b>Fabrication Applications of GRIN Materials</b><br>Y.L. Li, B.W. Hu, Z.Q. He, M.R. Zhang, J.M. Huo and S.L. Yao                                                                                        | 215 |
| <b>Reactive Sputtering Deposition of Gd-Doped AlN Thin Film</b><br>R. Wu, D. Pan, J.K. Jian and J. Li                                                                                                    | 221 |
| <b>Influence of Microstructure and Precipitates on the Strength of Container Steel</b><br>J.Y. Ma, W. Liang, R.D. Han, Y. Guan and Z.J. Deng                                                             | 225 |
| <b>Low-Pressure Nitriding According to the FineLPN Technology in Multi-Purpose Vacuum Furnaces</b><br>P. Kula, P. Robert, W. Emilia, B. Januszewicz and R. Adam                                          | 230 |

|                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Kinetics on the Leaching of Polyphenol from <i>Arctium lappal</i> Root</b><br>J. Li, C. Deng, P. Zhao, N. Wang and L. Wang | 235 |
|-------------------------------------------------------------------------------------------------------------------------------|-----|

## Chapter 2: Advanced Mechanical Science

|                                                                                                                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Feature Selection of Sudden Failure Based on Affinity Propagation Clustering</b><br>L.M. Li and Z.S. Wang                                                                                                  | 241 |
| <b>Factor Affecting Corrosion Behavior of Weldment of S30400 Stainless Steel in Cold Region</b><br>T. Takahashi, Y. Iwabuchi and K. Ishitsuka                                                                 | 247 |
| <b>The Influence of Nonlinear Factors of Mechanical Transmission on the NC Machining Accuracy</b><br>F.R. Zhang                                                                                               | 254 |
| <b>Theoretical Basis and Technology Development of the Combined Process of Asymmetric Rolling and Plastic Bending</b><br>M. Sverdlik, A. Pesin and D.O. Pustovoytov                                           | 259 |
| <b>The Effect of Parameters of Laser Processing on the Morphology of Glaze Cladding</b><br>J.W. Fan, Z.Q. Jiao, X.P. Li, H.J. Zhao, Z.G. Zhang, Z.J. Zhang, R.J. Zhang, Y. Liu and X.L. Zhang                 | 265 |
| <b>Durability Analysis of the Reduction Gear for High Speed Train Considering Driving Histories</b><br>C.S. Kim and G.H. Kang                                                                                 | 269 |
| <b>Modelling of Fischer-Tropsch Synthesis in a Fluidized Bed Reactor</b><br>M. Kazemeini, R. Maleki and M. Fattahi                                                                                            | 274 |
| <b>A Case Retrieval Method in Case-Based Fixture Design</b><br>Y. He, F.P. Zhang, Z.C. Sun, B. Gao and J. Han                                                                                                 | 282 |
| <b>Modeling and Matching Technology of Manufacturing Resources Based on Semantic</b><br>B. Gao, Y. Yan and F.P. Zhang                                                                                         | 288 |
| <b>A Study of the Cutting Temperatures in Milling Stainless Steels Using Chamfered Main Cutting Edge Sharp Worn Tools</b><br>C.S. Chang                                                                       | 295 |
| <b>A Semi-Analytical 3-D Solution for Bending Under Tension</b><br>S. Alexandrov, E. Lyamina and L.H. Lang                                                                                                    | 302 |
| <b>Effect of Intensive Plastic Deformation Near Frictional Interfaces on Ductile Fracture</b><br>S. Alexandrov, D. Vilotic, E. Lyamina and Y.R. Jeng                                                          | 306 |
| <b>The Effect of Porous Block Pavement with Rainwater Storage on Heat Island Mitigation</b><br>R.H. Kim, J.B. Park, J.S. Mun and W.N. Baek                                                                    | 310 |
| <b>Phase Microscopy Method of Micro-Nano Sized Bubbles Based on Hilbert Phase Microscopy (HPM)</b><br>Y.W. Wang, Y.Y. Xu, X.L. Zhu, S.W. Jiang, Y.J. Chen, X.F. Shang, W.F. Jin, C.H. Lv, M. Bu and Y.Z. Chen | 316 |
| <b>Research of System Identification for Ni/MH Battery State of Charge Based on a Short Sequence and Multi-Sample Process</b><br>J.X. Long, L.M. Yu and S. Chen                                               | 322 |
| <b>A Low Frequency Permanent Magnet Passive Vibration Isolator</b><br>Q. Li, D.F. Xu, J.C. Hu and L. Hao                                                                                                      | 328 |
| <b>Experimental Research on Measuring Two-Dimensional Stress Field Using Digital Holographic Photo-Elastic Method</b><br>B. Gong, W. Xu, C. Wang, X.F. Qian, Y.P. Zhang, L.M. Zhang and D.T. Ouyang           | 337 |
| <b>Investigation of Exhaust Gas Temperature Correction Methods for the Change of Air Inlet Temperature</b><br>Z.N. Zhao, J.J. Wang, Z.Z. Zhao and Q.F. Zhang                                                  | 342 |
| <b>Study on Measuring Perpendicularity Based-On Non-Diffracting Beam as the References</b><br>X.B. Zhang, K. Zhang and H. Lu                                                                                  | 349 |
| <b>Focusing Properties of the Visible Light Wave through Plasmonic Lenses with Subwavelength Chirped Slits</b><br>D. Feng, C.X. Zhang and Y.H. Yang                                                           | 356 |

## Chapter 3: Advanced Information Technology

|                                                                                                                                                              |     |
