

Table of Contents

Preface, Conference Organization and Committees

Chapter 1: Geological and Geotechnical Engineering

Numerical Study of the Rock Fragmentation by Three TBM Cutters Y. Wang and Z.Z. Liang	3
Energy Variation Characteristics of Exploding Ground Motion within Typical Loess Field of China J.J. Sun, L.M. Wang and W.T. Tian	8
Influence of Matric Suction on the Stability of Unsaturated Slope X.H. Hu, S.G. Cheng and Z.W. Yu	18
The Effects of Fines on Post Liquefaction Strength and Deformation Characteristics of Sand Y.L. Wang and Y. Wang	23
Application of Improved Gray Correlation Analysis Model to the Estimation of Country Rock Stability J.S. Lei, L. Bao, L. Wen and J.F. Chen	28
Application of NMR in the Study of Shale Gas Reservoir W. Guo, W. Xiong and S.S. Gao	33
Research on Similar Material of Physical Model for Bai Jiabao Landslide Y.H. Yang and S.G. Cheng	37
Research and Application on Laws of Consolidation Time Calculate in Saturated Soft Clay Soil by Using Vacuum-Surcharge Combined Preloading Method P.B. Xu, S.Q. Lu and J.T. Zhang	42
The Review of Experimental Studies on Non-Coaxial Soil Behaviour Using HCA Y.Y. Cai, J. Yu, L.T. Yang and K. Mu	46
Comparative Analysis of Single Belled Wedge Pile with Conventional Piles under Lateral Load G.Q. Kong, X.L. Tan, Z.W. Deng and Z.R. Jin	50
Study of Dynamic Coordinates Time Function in Mine Subsidence Y. Guo, G.Y. Zhu, X.L. Jiang and M. Dou	56
Fracture Characteristics of High Pressure Granite under Unloading Condition Y.H. Lv, X.T. Feng and B. Yan	61
Calculation and Analysis of Rock Stress State near the Bit W. Li, T. Yan, S.Q. Li, L. Zhang and X.H. Xu	65
The Study on Key Issues of Slope Instability during Turning Open-Pit into Underground Mining S.G. Sun, H. Yang, C.S. Li, B.L. Zhang, A.W. Miao and M.Z. Wang	70
Experimental Comparison Study of Stress Sensitivity at Different Levels of Permeability Core Y.C. Xue, L.S. Cheng and C. Li	76
Influence of Underground Mining on Failure Mode and Stability of Counter-Tilt Slope in Surface Mines D. Wang, L.Z. Cao, C.D. Piao and R.C. Bai	80
Study on the Regularity of Surface Movement and Deformation in Long Coal Face with Large Mining Height Z.Q. Xiong, J. He and L.L. Zhao	86
Study on the Treatment Measures of Expansive Rock Slope E.P. Zhao and X.B. Jia	92
Study on the Impact of Cyclic Wetting and Drying on the Shear Strength of Stabilized Expansive Soils Y. Dong, W.Z. He and B.T. Wang	96
Analysis on Mesoscopic Dynamic of Soft Soil Foundation in the Pearl River Delta Region Based on the Vacuum Preloading Method J. Song, R.Y. Yue and P. Zhang	100

Model Test Based on Mechanical Characteristics of Slope Anchor and Water Influence C. Lin, X.W. Lei, Q.S. Meng and R.F. Zhou	105
Rheological Test and Research of Deep Clay X. Zhou, M.G. Xiao, G.C. Sun and J. Cao	109
Impact Assessment on the Ore Body under the Tower Footing of 500kV Transmission Line C. Zhang, E.C. Yan, Y. Zhou and Y.J. Wang	115
Study on Foundation Structure for Comprehensive Power Generation of Offshore Renewable Energy N. Wang, D. Chen and Y.D. Liao	121
Stability Analysis of Unsaturated Soil Slopes under Rainfall Infiltration R.F. Zhou, X.W. Lei, Q.S. Meng and C. Lin	126
Studies of the Numerical Simulation of Sediment Scour for Wind Power Station in Intertidal Zone	130
Geological Characteristics and Waterflooding Strategy for Yuanshi Low Permeability Sandstone Reservoir W. Zhu and Z.J. Cao	134
Quantitative Study for the Impact of Fines Content on Soil Surface Cracking Y. Lu, N.S. Chen, L.Q. Lv and M.F. Deng	140
Stability and Seismic Behavior of Landslide with Deep Overburden Layer in Kala Hydropower Station, China Z. Li, J.D. He, H.Q. Xie and H.L. Yang	148
Geological Protection Project of the Longmen Grottoes in Luoyang Q.X. Liu, Y.H. Duan and J.Y. Deng	155
Influencing Factors and Prevention Measures of Erosion Damage for Highway Slope in Loess Area L. Hai and X.B. Zhu	161
Influencing Factors Analysis and Zonation Model Research of Landslides in Loess Region Z.Z. Zhang, Z.J. Wu, P. Wang, W.J. Yan and T. Chen	167
Discussion on the Geometric Methods to Calculating the Fault Complexity Coefficient J.G. Wang	175
Analysis of the Calculation Method of Active Earth Pressure of Unsaturated Expansive Soil J.S. Zhang	180
Testing Study on the Change Law about Internal Friction Angle of Geogrid Reinforced Clay under many Times Freezing-Thawing Cycles R.F. Zhao, Y.N. Mi and W. Gao	186
Numerical Analysis on Ground Displacement at Mined-Out Area of Yuecheng Reservoir Project S.W. Duan and X.E. Xu	194
Numerical Analysis of Passive Pile due to Excavation Y. Sun, Z.Y. Wang, Y.N. Chen and Y.S. Jiang	198
Influence of Perforation Parameter on Crack Initiation and Extending of Hydraulic Fracturing M.Z. Jiang, Y. Li, Y.M. Zhang, T.X. Jiang and M.X. Liu	202
On the Seepage Stability of a Tailing Dam in Wushan Copper Mine L. Song, Z.X. Yang, H. Wang, Z.H. Wang and H.Q. Zhang	207
Consolidation Properties of Dredger Fill over Liquid Limit under Different Back Pressure Levels Y. Shen and Z.Q. Fei	213
Experimental Investigation on Mechanical Properties of Soft Rock under Instantaneous Triaxial Compression Y. Wang and F. Liu	218
Numerical Simulation Method Ascertaining Slope Stabilization Anti-Slippery Pile's Basic Parameters W.J. Feng, X.D. Ju and Z.S. Zou	222
The Practice and Cognition of Tracing with Drilling in Fish Bone Horizontal Well K.C. Yu, Y. Zhu, X.X. Li and S.F. Zhang	226
Rock Mesoscopic Structural Plane, Mesoscopic Anisotropy and Mesoscopic Anisotropy Index H.N. Xu, J. Xu and Z.H. Li	230

The Affecting Factors of Soil-Reinforcement by Plant Roots Z.Y. Xia, W. Xiao, Y. Fang and Y.B. Wen	237
Study on Restrain Effect of Ground Grouting to the Vertical Additional Force of Shaft Lining H.Q. Liang and J.X. Wu	241
Stability Analysis Method to Underground Goafs in Opencast Mining Based on FEM F.B. Li, C.W. Lu and Y.F. Li	246
The Compression Behavior of Contaminated Clay under Coupled Temperature and Chemical Solution H.J. Lu, B.Z. Su, Q. Tao, Y.L. Guo, Y. Cao, C.C. Liu and N.J. Zhang	251
The Application Research on the Elastic-Flexible Anchor in the Retaining Wall L. Gao, Y. Shi and G.Q. Xu	255
Nonlinear Analysis of Foundation Settlement by Modified Secant Modulus Method R.P. Li	259
FEM Simulation of Earth Pressure on Geosynthetic-Reinforced Soil Retaining Wall under Variable Rate Loading F.L. Li and F.L. Peng	266
Stability Analysis of Unstable Rock after Strong Earthquake J.P. Pan, J.H. Tian and X.P. Liu	270
Additional Stress Distribution in DJM Pile Composite Foundation and Simplified Calculation Method F.D. He, G.J. Guo and J.Q. Wu	274
Numeric Analyses of Dynamic Crack of the Stabilizing Concrete Pile in a Sandy Slope without Underground Water R.J. Li, R. Yan and J.D. Liu	280
Deformation Pattern of Foundation Pit Excavation beside Silt Soil Railway Subgrade F.D. He, G.J. Guo and Y.N. Zang	284
Experimental Study on Creep Characteristics of Coal under Uniaxial Compression Y.J. Yang, M.F. Guo and D.W. Chen	290
The Application of the Ground Penetrating Radar in the Inspection of Gravel Pile Composite Foundation C.Z. Zhu and X.L. Zheng	294
Analysis of Safety and Risk Factors about the Tailings Dam in the Mental Mines H.Y. Ju, G.Q. Gao, Q.X. Li and J.H. Li	299
Research on Gradual Deformation and Fracture Mechanism of Landslide by Model Test Y.G. Wang, W.Z. Ren and W.Q. Ding	303
Experimental Research on Tailings Briquetting for Filling Mining Subsidence Area in Jinshandian Iron Mine C.F. Du, Y. Zuo, H.F. Li and S.P. Wang	310
Research on Pile Foundation of Transmission Tower Stability Analysis Based on Numerical Simulation in Karst Areas J.B. Zheng, H. Zhang, B.Q. Liu, G. Liu, Y.P. Fan, S. Hua and D.X. Jiang	316
Settlement Analysis of Single Large-Diameter and Super-Long Bored Piles in Cohesive Soils R.K. Zhang, M.L. Shi and J. Wang	320
Triaxial Test of Unsaturated Clay and the Engineering Application at the Naji Reservoir in Guangxi Province D.G. Ma, Z.K. Zhang and Y.Z. Wang	327
Analysis of One-Dimensional Thermal Consolidation of Saturated Soil with and without Thermo-Mechanical Coupling X. Shen and R.Q. Wu	335
The Evaluation of Surrounding Rock Stability around Underground Engineerings Based on Improved Extension Evaluation Method S.J. Zhang, G.Q. Qiu, W.B. Xie, X.L. Qi, Z.G. Ao and Y. Huang	339
Unconfined Compression Strength of Tianluoshan Relic Soils Solidified by Methyl Acrylic Acid Resin X.J. Chai, C.F. He, J.W. Yu, Y.S. Gao and C.X. Rao	343
Deformation Prediction of Slopes Based on Grey Verhulst Model Z. Qiang	347

Primary Study on Mechanism of Earthquake-Induced Differential Settlement of Buildings on Liquefiable Subsoil	352
F.C. Meng, X.M. Yuan and H. Xue	
Stability Analysis and Control Measures of the Kim-Yun-Mine Collapse	358
S.S. Zhang and Y.L. Wu	
Numerical Analysis on Effect of Rock Rheology on Fully-Grounded MFRP Bolt Stress	362
J. Li and B.L. Zheng	
Selection of Support Form and Water-Sealing Measure for Deep Excavation in Miscellaneous Interphase Distribution Strata	366
H. Yuan and P. Yuan	
Research on Mechanism of Consolidating the Saturated Soft Clay with the Application of Pile-Supported Composite Foundation	370
Z.H. Zhang	
Study on the Prediction Method for Brittle Failure of Hard Rock Based on Acoustic Emission Test	376
S.C. Xu, B.R. Chen and C.Y. Jin	
Study about the Relationship between the Local Precipitation and Landslide in Zhejiang Province in Recent Years	380
S.M. Zhang and S.J. Wang	
Analysis on Stability of Powerhouse Slope under the Operation Water Level Condition of Tianhuaban Hydropower Station	383
Y.C. Tang	
The Saturated - Unsaturated Seepage Analysis of Hualianshu Landslide on the Condition of Rainfall	387
Y. Hu and Q. Feng	
Structural Damage Detection of Unsaturated Soil Embankment Slope Based on Artificial Neural Network under the Rainfall Infiltration	391
Y.J. Wang, W.J. Si, Y.F. Gao and H. Zhou	
Moisture Migration Mechanism in Granite Residual Soil Embankment under the Combined Action of Rainfall and Capillary	395
Y. Que and X.Q. Yao	
Rapid Improvement Technique of Shallow Base in Super-Soft Foundation	401
P.S. Chen	
Analysis of Dynamic Response of Landslide Stability to Reservoir Water Level Fluctuation Using Numerical Simulation	407
W. Yi, Z.P. Meng, G.Q. Li and Z.W. Jin	
Study on Stability of Dayantang Landslide under the Engineering Disturbance and Rainfall	415
J.J. Zhou, H. Deng and H. Peng	
Comprehensive Effect of the Property Indexes on the Saturated Original Loess Liquefaction	419
Q. Wang, L.M. Wang, J. Wang, H.P. Ma and Y.Q. Su	
A σ^b Model for Predicting Shear Strength of Unsaturated Soils	425
J.Y. Chen and Y. Hai	
Unified Solution of Passive Earth Pressure for Unsaturated Soils	430
C.G. Zhang, D.H. Zhu, Z. Gao, G.W. Xue and Z. Li	
Research on Engineering Geology Properties of Residual Diorite in Jinan, Shandong Province, China	434
M. Shang, Q. Xu, S.C. Li and L.X. Zhang	
Fractal Description of Rock Mass Structure Representative Elementary Volume	439
T.T. Zhang, E.C. Yan, X.M. Hu and Y.B. Cao	
Research on Solid-Gas Coupling Dynamic Model for Loaded Coal Containing Gas	446
D.K. Wang, J.P. Wei, H.J. Qin and L. Wei	
Studies of Hard Interlayer's Influence on the Creep Deformation of Salt Rock Cavity	452
X.L. Huang and C. Yu	
Study on Test Cycle of Build-up Well Test in Low Permeability Reservoir	456
T.J. Liu, B.Y. Jiang, R. Liu and P.X. Diwu	
Pore Pressure Build-up of Silt Soft Clay under Dynamic Loading at Zhoushan Islands	460
Q. Shi, K. Zhou and Q. Li	
Slope Protection with Vegetation for Waste Dump at Guangyue Road in Shanghai	465
Y.W. Xu	

A Failure Model for Heterogeneous Nonlinear Anisotropic Geomaterials H.N. Ruan, D. Wang and J.W. Ju	472
Model Experimental Research of Double-Sided Reinforced Earth Retaining Wall J. Su and X.Q. Yang	482
The Influence of Dehumidifying Condition on Expansive Soil Engineering Properties X.W. Li, A.J. Wang and G.Z. Dai	487
Study on Instability Mechanism of Super-Deep Anchorage Foundation Pit Slope of Tertiary Strong Weathered Basalts Y. Ma, J. Cao, J.X. Shen, K.Y. Jiang and B.J. Zhang	493
Analysis on Deformation Failure Mechanism of Woshaxi Landslide in the Three Gorges Reservoir Area S.Q. Lu, Q.L. Yi and W. Yi	498
Experiment Study of the Soft Rock Materials Based on Rotary Penetration Test Q. Li and N. Li	502
Numerical Simulation of Vibration Compacting Process on Hydrous Embankment by Discrete Element Method B.T. Huang, X. Yuan, J. Zhou and D. Liu	506
Strength and Deformation Characteristics of Stabilized Silty Soil Z.R. Zhao and H.X. Yang	512
Ground Behaviors due to Seepage Force of Groundwater L.Y. Meng and H. Yamamoto	516
Study for Quantitative Analysis of Loess Microstructure Influence P.R. Song and C.M. Wang	522
Experimental Study of the Rotary Filling Piles with Large-Diameter under the Axial Load W.Q. Zhou and S.P. Ouyang	527
Research Status and Prospect of Strain Monitoring Method of Geotechnical Engineering J.C. Wu, X.L. Hu, M.J. Sun and S. Hua	532
Numerical Simulation of Stress Wave Propagation in Coal-Rock Combination Media D.J. Xue, H.W. Zhou, J.D. Liu and H.Y. Yi	542
Finite Element Analysis of Deformation Characteristic for Weak Interlayer Foundation X.Y. Liu, X.L. Du, J. Zhou and J.S. Sun	552
Analysis of the Shear Stress on Prestressed Anchor in Rock Mass Y.L. Pan, Y.H. Chen, Y.C. Ma, W.L. Chen and G.Q. Sheng	557
Pseudo-Dynamic Test Analysis of Rigid Pile Composite Foundation G.L. Sheng, D.H. Liu and P. Bao	561
Finite Element Analysis of Cushion Thickness and Ultimate Bearing Capacity of Lime Soil Pile Composite Foundation Z.S. Wei, Y.M. Zhang and D.H. Peng	565
A Multivariable Grey Model and its Application to Subgrade Settlement Prediction H.B. Liu, Y.M. Xiang and H.Z. Wang	570
Study on Three-Dimensional Fracture Persistence of a Jointed Rock Mass in a Dam Site in China X.M. Wang, L. Xia and Q.C. Yu	574
Geosynthetic-Encased Sand Column Behavior under Triaxial Test Simulation Y.S. Hong, C.S. Wu and C.S. Sun	581
Numerical Analysis on Loading History Correlation for Large Deformation Control within Deep Soft Rock Y. Yuan, X.C. Wang and X. Liu	585
Evolution Mechanism Study to the Loose-Fractured Rockmasses of Badong Group in Fengjie New Town L. Yang, H.Y. Peng, M.L. Zhou, J.G. Yang and M. Wu	589
Test Research on the Basic Properties of Soft Soil along the Yangtze River Anhui Province S. Wei, Q.Y. Zhang, J.G. Liu, L.H. Xu and Q. Chen	596
Influence of Groundwater Seepage during Foundation Pit Dewatering on Soil's Effective Stress H. Yuan and Y. Hong	600
Change of Soil Stress State around Foundation Pit due to Dewatering H. Yuan and Y. Hong	604

Finite Element Analysis of the Effect of Core Pile in Combined Composite Foundation S.D. Liu, W. Guo and X. Zheng	608
Research on the Axial Load Transmission Function of Cast-in-Place Pile in Xigeda Rock Stratum Z.F. Sun, H.L. Qu and X.X. Wu	612
Research and Exploration on Combined Support Technology in Deep Soft-Rock Roadway L.W. Ren, G.Y. Wang and L. Wang	616
Analyze of the Affection of Excavation Unloading of the Rock Mass of the Spillway Tunnel of a Hydropower Station on the Slope's Stability L.H. Wang and J.L. Bai	621
On the Calculation Method of Bearing Capacity of Combined-Pile Composite Foundation C.Z. Zhu	627
Study on Surrounding Rock Deformation Characteristics and Control Technology in Deep Soft Rock Roadway W.H. Zha and X.Z. Hua	631
Active Limit Equilibrium Method of the Stability Analysis for Soil Slopes Y. Huang, Z.L. Zhang and K.S. Jin	636
A Road Slope Stability Analysis A. Yu, J. Liu, D.D. Yang, H.F. Cao and X.P. Yang	642
Influence Analysis of Salt Resource Exploitation on Geological Environment in Huai'An Y. Zhang and Y.L. Wang	647

Chapter 2: Structural Engineering

Seismic Behavior of Reinforced Concrete Core Wall under Different Span-Depth Ratio of Coupling Beam P. Jia	653
Mechanics Simulation and Analysis of the Main Palaestra of the World University Games during the Unloading Process J. Zheng and J.P. Hao	657
3D Continuum Model for Nonlinear Dynamic Analysis of Wall-Frame Structures with Uniform Stiffness and Yield Strength K. Huang, L.H. Zou and J.M. Chen	662
Stress Analysis of Grain Steel Silo with Hole Q.F. Peng and F. Wang	666
Research on the Equivalent Mechanical Parameters for the Honeycomb Core Based on the Y Element Z.B. Deng, J.S. Zhao and L. Jiang	672
Research on Mechanical Analysis of Bulk Grain Storehouse Columns by Different Span and Different Height of Grain L. Huang and H. Zhang	677
The Improved Structure Design for the Joint of End Floor Beam and Main Longitudinal Girder in Certain Combined Platform Y.Q. Zeng, M.L. Wang, R.P. Zhang and X.J. Shen	682
The Overall Stability Calculation Method for Sway Frame W.F. Tian, J.P. Hao and C.L. Fan	686
Vertical Bearing Capacity Properties Study of Punched Cast-in-Place Pile Based on Field Test in Driving Analysis Test on Piles of a Thermal Power Plant L. He, S.J. Ding, Z.X. Feng and Z.W. Han	691
Study on Comprehensive Performance of the New-Type Steel-Encased Concrete Composite Beams Using FEM J.T. Jiang, X.L. Zhu, D.R. Du, K. Dong and S. Yang	697
Blasting Technology for Demolition of Large-Scale Steel Structure Buildings by Shaped Charge Cutter H.P. Ma, K. Yi, M.A. Zhou, M.C. Qiu and K.B. Li	702
Discussion on Effect Factors and Formula of Bearing Capacity of Reinforced Mixing Pile G.L. Sheng and Y.G. Zhang	708

Finite Element Analysis of Mass Concrete Temperature Crack Mechanism Z.H. Xu, D.W. Sun and H. Xiao	713
The Applied Research of Steel-Timber Combined Member to Steel Structure Residence F.T. Pan, T. Wu and L. Zhang	717
Experimental Study on Bond Behavior of Profiled Steel Sheet-Lightweight Aggregate Concrete Composite Slab Y.K. Zhang, Y.X. Han and Z.Z. Song	721
Analysis on Dynamic Failure of Steel Double-Layer Spherical Latticed Shell under Strong Earthquake Y. Li, H.W. Li and J. Liu	725
The Investigation of Stability Analysis of Tube and Coupler Scaffold H.Z. Li, Z. Liu and J.Y. Miao	730
Applied Study on Influence Lines of the Statically Determinate Plane Trusses Based on EXCEL M.B. Zhao	734
Theory of Temperature Dynamic Control in Arch Dams and its Application Y. Duan, X.H. Liu and X.L. Chang	738
Calculation of Temperature Rise of Mass Concrete and Modification of Formula Y.M. Hu and C. Liang	742
Nonlinear Analysis of Prestressed Cold-Formed U-Shaped Steel and Concrete Composite Beams J.J. Yu and L.G. Wang	749
Combination of Cable - Pole Grid Static Performance Analysis G.H. Qin, C.W. Huang and M. Ning	753
Experimental Study on the Flexural Property of GFRP I-Beam J.Y. Zheng, G.Y. Zhang, Y.H. Chen and S.Z. Li	757
Reliability Control of Quality of Reinforced Concrete Structure during Construction J.P. Wang, X.Y. Zhao and C.L. Li	761

Chapter 2: Structural Engineering

Timing Analysis on Rock-Bolted Crane Beam of the Underground Power House of Jinping II Hydropower Station J. Li, S.C. Xu and C.Y. Jin	769
Application Research on Concrete Filled Steel Tube Supports Supporting Technology in Stress Concentration Roadway G.L. Liu, J. Wang, H.B. Wang, X.S. He and X.B. Li	773
Parametric Study of Beam to Column Extended Endplate Connection in Fire M. Wang	779
Experimental Research on Bending-Torsion Characteristics of Steel-Concrete Composite Box Beams Y.L. Zhang, W. Ge and D.Y. Zhang	785
Practical Design Method of the Snow Load for the Low Rise Roof Structures F. Meng, F.H. Li, M. Gu and S.Z. Shen	791
A Displacement-Based Optimal Design Method of RC Frames Subjected to Minor Earthquakes G.T. Chen and D.M. Wei	795
The Nature Frequency of Point-Fixed Glass Facades and the Influencing Factors Study F. He, C.W. Huang and Z.P. Huo	800
Temperature Sensitivity Analysis of Massive Concrete Mixing with Slag Powder and Fly Ash F. Wang and C. Chen	804
Finite Element Analysis on the Steel Transmission Pole Y.H. Wang, W. Jiang and H. Wang	808
The Pushover Analysis of R.C Frames Based on SAP2000 J. Li and X.H. Yu	812
Study on Mechanical Properties of Iron Wire Cement Mortar Z.H. Liu, C.X. Liu, D.C. Huang and L. Wang	816

Split Rigidity Method for Analysis of Three-Way Double-Layer Space Grids Structure W.Y. Liu and W.F. Zhang	820
Analysis of Failure Mode and Ultimate Bearing Capacity of Steel Truss Coupling Beam H. Qiang, Z.H. Deng, L. Qian and D.X. Xu	824
A New Method to Estimate Ductility of L-Shaped CFT Columns with Binding Bars under Axial Compression Y.L. Long and J. Cai	828
Queries for the Calculations of the Shear Wall Stability X.L. Tong and F. Chen	832
Analysis of the Fire-Resistance of Beam String Structure F. Zhang	836
Study on the Ultimate Pullout Force of Prestressed Cable Based on Triple Shear Unified Yield Criterion X.Y. Luo and W.P. Liu	840
Finite Element Analysis of a Single-Layer Reticulated Dome and the Suspendome under Impact Loading L. Zheng	844
Design Study of Steel Structure Fire-Retardant Coatings under High Temperature (Fire) Conditions M.L. Ou, W.J. Cao, L.M. Jiang and H. Cao	849
Dynamic Nonlinear Analysis of an Out-of-Code Highrise Building K. Hu and G. Qu	860
Strength Analysis of Vessel Based on the Fluid Structure Interaction Method C. Liu, F.C. Li and Y. Yun	869
3-Dimensional Stress Analysis and Safety Assessment of the Underground Draft Tube X.S. Liu and B.H. Song	876
Theoretical Analysis of Natural Vibration Frequency for Unbonded Prestressed Concrete Beams F.G. Li and R. Li	882
Nonlinear Dynamic Analysis of the Damping Frame Structure System G. Hong, M. Li and Y.Z. Yang	886
Summary of Research on Concrete Filled Steel Tubular (CFST) Columns F.X. Yin, J.T. Zhang and P.B. Xu	891
A Measure to Imitate the Boundary Condition of Local Structure in Modal Analysis Y.C. Song, B. Yang and H.L. Yu	896
Study on Type Design of Multi-Circuit Transmission Line Tower Y.H. Wang, S.M. Meng and B. Tang	900
Dynamic Analysis of Steel-Concrete Composite Frames with Partial Interaction J. Xia, Z.Q. Shen and B. Chen	904
Test and Finite Element Analysis on Dynamic Characteristics of Trestle Wharf X.P. Sun, Z.Y. Zhu and B.H. Zhao	908
Analysis of Prestressing Loss on Construction of External Prestressed Wooden Buildings J.M. Zhang, J.L. Pan and H.B. Dong	914
Dynamic Response of the Glass Curtain Wall of the Cable Truss under Wind Loads R.F. Liu, C.W. Huang and Z.P. Huo	921
The Study on the Strengthening of Wind-Resistant for Transmission Tower in Coastal Areas Q. Xiao, Z. Li and X.H. Xu	925
The Impact of Aggregates Distribution on Concrete Failure M. Du, P. Gao and F.J. Chen	929
Inspection and Appraisal Method of a Wharf on Piles and Result Analysis L.Q. Wang, K.H. Jiang and C.H. Huang	933
In-Plane Dynamics of Multilayer A-Type U-Shaped Corrugated Structure Materials Y. Liu, D.Q. Sun, X.Y. Pan and G.H. Yao	937
Study on Mechanical Behavior Influence of the Hollow Ratio to the Cast-<i>In Situ</i> Concrete Hollow Slab with Two-Way Tube Fillers Z.Y. Jiang and Z.H. Luo	942

Experiment Study on Interfacial Normal Bond Strength of Concrete Filled Steel Tube Z.Y. Liu	947
Mechanical Property Study of Corroded Steel Beams Strengthened with Prestressed CFRP Sheets J.H. Huo and B. Pang	955
The Equal Projection Model and Application of Short Fiber Reinforced Concrete Y.R. Li, H.B. Jiang and Z.B. Kan	959
Equilibrium Paths of a Fractional Order Viscoelastic Two-Member Truss M.Q. Tang and Y.P. Li	963
Dynamic Behavior of Extra-High Building with Wind Load and Gravity Coupling Effect Z.Y. Zhong	969
Numerical Simulation Analysis of the Typical Reinforced-Concrete Wall-Beam Joint J.T. Jiang, Y. Liu, W.H. Wu, S. Yang and D.R. Du	973
Sliding Analysis on Steel Encased Concrete Composite Beams J.T. Jiang, Y.Y. Xue, K. Dong, D.R. Du and S. Yang	977
The Principle of Equivalent Center of Mass of FPB & Superstructure J.Y. Xia, H.X. Hao, X.L. Ning, Y.X. Hu, S.H. Li and X.Y. Leng	982
Study on Capacity of High-Strength Angle Struts Connected by Single Limb C.L. Fan, J.P. Hao and W.F. Tian	987
Discussions on Shape Determination of a New Space Beam-String-Structure with Outer Truss Torus Y.L. Yao and G.Y. Ma	993

Chapter 3: Reliability, Durability and Rehabilitation of Structures

Sensitivity Analysis of Durability Parameters of Concrete Structures Corroded by Chloride Ions L. Zeng, Y.C. Guo and Z. Zhao	999
K_c on Fatigue Crack Propagation Rate L.X. Gu, Z.Y. Xu and Z.F. Liu	1005
Reliability Study on Bolt Support Systems of Coal Roadway under Group Failure Modes Based on Maximal Entropy Principle F. Wang and T.J. Cui	1009
Durability Design of Tunnel Concrete Lining under Chloride Attack L.F. Yang, H. Bin and Y. Bo	1014
The Application Research on the Carbon Fiber Sheet Reinforcement Technique in the Frame Beamstrengthening L. Xu and W.Z. Gao	1018
On Analysis of Ancient Town Settlement along Sichuan Salt Road - Taking the Landscape Optimization and Updated Design of Xianshi Ancient Town, Zigong, Sichuan as an Example P.Y. Li and Y.C. Chen	1025
Kiln-Courtyard Residence in Western of HenanResearch of the Characteristics of Ancient Residences in Qiaozhuang Village Y.J. Hu	1029
The Application of Fuzzy Synthesis Evaluation Method on Assessing Bridge Durability F. Zheng, Y. Wang and P.Y. Zhang	1033
Fatigue Reliability Updating Evaluation of Hydraulic Steel Gate Based on Bayes Theorem K. Li	1038
The Properties of High Strength Bolt Connection Pairs with Hot-Dip Coating Y.L. Peng, G.X. Li, L. Hui and S.J. Xia	1042
The Effects of Two Anti-Corrosion Processing Mode on the against Slip Coefficient between Friction Surface of High-Strength Bolts Connection L. Hui, G.X. Li, Y.L. Peng and S.J. Xia	1046
Study on Rectification Plan of the Ancient Pagoda J.W. Zhang, G.L. Sheng and H. Yuan	1050
Evaluation of Reinforcement Effects for Earth Cliff of Jiaohe Ancient City Y.C. Shi, A.G. Wang, R.D. Qiu, M.Q. Hu, H.Z. Wang and K. Liu	1054

The Durability Failure of Pre-Damaged Concrete Induced by Mechanical Load F.Z. Zhu, F.X. Jiang, J. Shang and Z.H. Bi	1061
--	------

Chapter 4: Monitoring and Control of Structures

Distributed Landslide Monitoring by Wireless Sensor Nodes C. Hu, S.B. Zhang, S.Z. Xu and B. Xu	1069
Structural Damage Detection Based on Generalized Flexibility Matrix J. Li	1074
The Monitoring Technology Research about the Tunnel Blasting Vibration under the Complex Construction J.Q. Zhao, H.Y. Ju, J.H. Li and Y.P. Liu	1078
Structural Damage Identification Based on Moving Load and High-Order Spectrum Analysis B.Y. Wang	1082
Remote Video Surveillance Applications in Landslide Monitoring J. Yin, H.F. Wang, S.M. Wang and F. Xu	1086
To Realize the Detection and Control of Environment Temperature and Optical Intensity Based on AT89S52 T.X. Yang and S.L. Bi	1093
Optimal Sensor Configuration for Bridge Structures Following a Probabilistic Approach T. Yin, H.P. Zhu and D.Q. Li	1098
Application of Wavelet Packet Transform and Neural Network to Detect Damage of Elastic Thin Plate D.H. Xie and H.W. Tang	1105
The Application of Elastic Wave Reflection Method in the Pile Foundation Inspection J.S. Liu	1109
Modal Parameter Identification Method for Structural Health Monitoring Benchmark Model C. Li and L. Yu	1113
Optimal Sensor Placement Based on MAC and SPGA Algorithms Y.M. Fu and L. Yu	1118
The Design of Densely Measured Points Long-Term Monitoring System Based on Wireless Sensor Network X. Cheng, Z.H. Liu and W.C. Gao	1123
The Design of the Sewage Device in Seepage Monitoring Instrument for Dam Foundation H. Deng, Z.H. Zhang, J. Li, M. Yuan and F.Y. Wang	1128
Structural Identification of an Old Bridge by Multiple Reference Impact Test Method Y.J. Liao, Y. Zhou and P. Qin	1132
Study on Infrared Thermography Mosaic Algorithm Based on the Feature Point Detection and Registration J.T. Jiang, C. Song and J. An	1138
Research on the Optimization of Dam Foundation Seepage Control System J. Wang	1143
Construction Quality Control of Dynamic Compaction Method Treatment Collapsible Loess Foundation Z.R. Zhao and H.X. Yang	1149
The Rail Bridge Bearing Long-Term Online Monitoring and Analysis J. Liu	1153

Chapter 5: Tunnel, Subway and Underground Facilities

Analysis on Bolt Supporting Mechanism for Roadways Driving along next Goaf Based on Triaxial Compression Test S. Zhong, Y.J. Yang and M. Wang	1159
---	------

Mechanics Characteristic Analysis of Loess Metro Tunnel Structure in Soaking Surrounding Rock	1163
J.J. Zheng, L.J. Wu and R.G. Guo	
Study on Splitting Tensile Strength of Shotcret Layer of High Temperature Tunnel	1169
Y. Zhang, N. Li and H.B. Zhang	
Surrounding Rock Stability Analysis and Rock Burst Prediction of Underground Cavity in High <i>In Situ</i> Stress	1174
H.Y. Zang and G.D. Wang	
Numerical Simulation Analysis and Engineering Applications on the Double-Side-Wall Heading Step Bench Excavation of Large-Cross Section and Shallow Tunnel	1182
W.H. Li, D.J. Zhao and S.S. Zhou	
Water Jet Vacuum Dust Suppression Device Used to Tunnel Development	1188
L. Jian, H. Na, Y.W. Wu and L. Jin	
Energy-Saving Experimental Study on Reflective Material Auxiliary Tunnel Lighting Based on Visual Effect	1193
B. Liang, G.B. Pan, Y.H. Pi and W.Y. Li	
Illumination Energy Conservation Analysis of Reflective Material on the Tunnel Sidewall	1197
G.B. Pan, L.N. Shi, B. Liang and Y.H. Pi	
Research and Design Optimization of Canceling Setting Invert in Road Tunnel	1201
D.Q. Xu, J. Liu and Y. Sun	
Calculation of Underground Tunnels' Safety Factor Based on the Strength Reduction Technique	1206
C.P. Shi, X.T. Feng and Q. Jiang	
Mechanical Behaviour of Shallow Tunnel in Unsymmetrical Strata	1210
S.Y. Yang	
Design of Broad-Columns Joint and Analysis of Stress for Top-down Construction Method of Underground Engineering	1214
W.M. Xiang, X.C. Zheng, K.P. Shen and M. Zhou	
Seismic Analysis of Nuclear Project for Joint between Intake Tunnel and Circumfluence Groove	1219
J. Zhao, G.X. Wang and X.H. Lu	
Research on Collision of Metro Comprehensive Pipeline	1226
Q. Zhao, G.L. Bai, X.H. Hei and P.F. Zhang	
Numerical Simulation on the Influence of the Groundwater Flow Field during Tunnelling	1230
X.B. Kang, X.W. Hu and H.Q. Xie	
Effect of EPB Shield Tunneling on Adjacent High Speed Railway Viaduct	1234
Y. Xiang	
Research on Stability in Metro Tunnel Constructing with Shallow Buried Covered Excavation in Loose Sand Layers	1240
S.G. Li, W. Zhao, X.L. Cai, Y.F. Ma and L. Zhang	
Analysis of Fire Smoke Control System of under Construction Tunnel	1245
J.Y. Sun, Z. Fang and J.P. Yuan	
Risk Assessment of High-Speed Railway Tunnel Construction Based on Fuzzy Synthetic Evaluation	1251
L. Wu, L.G. Zhang, Y. Lai and J. Chen	
Research on Numerical Simulation of High Filling Culverts Foundation Failure Mode	1257
J.W. Cao, C.M. Sha, B. Liu and Y. Sun	
Research of Water Inflow Impact on Ecological Environment for Cimushan Tunnel	1263
X.G. Jin, H.W. Liu and S.X. Zhou	
Water Inflow Quantity Evaluation and Prediction for Cimushan Tunnel	1269
X.G. Jin, Y.J. Jin and H.F. Tang	
Study on the Methods of Advanced Geological Prediction of Double-Arch Highway Tunnel in Karst Area	1275
C.X. He, C.J. Lin and X. Yao	
Research about the Rationality of Neighborhood Tunnel Spacing	1280
B.W. Yang and S.S. Yang	
Studying the Three Dimensional Excavation Effect Affecting the Monitoring Displacement of Metro Station	1285
Z.P. Song, J. Liu and A.N. Jiang	

Controlling Technology Research of Deforming due to South-to-North Water Transfer Tunnel down Crossing Subway D.H. Li, Y. Liu, M.S. Wang and D.L. Zhang	1290
Forecast Geological Prediction for Fault and Water Gushing in Deep-Buried Super Long Tunnel Y. Jia, Y.L. Li and L. Huo	1294
Construction Schedules Simulation and Prediction of Water Conveyance Tunnel Based on Karst Geological Condition L. Bi, J.Q. Luo and D.W. Tong	1298
Safety Analysis of the Vertical Shaft and Corresponding Safety Measures H.L. Zhu, X.H. Liu and X.P. Yao	1302
Analysis on Damage Cause of Shield Tunnel Segments during Construction J.H. Zhou, D. Wu, S.H. Zhou and Y.X. Cui	1308
Experimental Study on the Technology of Middle Empty Hole in Parallel Hole Cut Blasting R.S. Yang, Y.L. Che, X. Tong, Y.L. Mi and L. Feng	1314
Quantitative Analysis of Several Influencing Factors on TBM Advance Speed C. Li, J. Tiedemann and H.W. Zhou	1318
Numerical Analysis of Underground Concrete Arch Structure Strengthened with Near-Surface Bonded CFRP Strips M.R. Jiang, F.N. Jin, S.L. Luo, H.L. Fan and B. Wang	1324
Significant Analysis of Soft Rock Tunnel Disaster-Causing Factors Based on Orthogonal Test J.P. Chen, Y. Xu, C.Q. Zuo and Y. Yi	1331
Numerical Analysis on Top Coal Caving of 2# Coal Seam in First Mine of Chagannaoer Q.H. Li, R.S. Yang and W.P. Shi	1338
Coefficients of Settlement and Lateral Displacement in Pile Group during Tunneling L. Wang and G. Zheng	1343
Study on the Existing Cavity-Disease Tunnel Influenced by Blasting Vibration of the Newly Built Tunnel B. Wang and W. Fu	1347

Chapter 6: Road and Railway Engineering

New Technologies for Highway Alignment under Complicated Environmental Conditions in Mountain Areas C.D. Gao	1353
An Analysis on Failure Pattern of CFG Pile-Net Composite Foundation of High-Speed Railway D.P. Jiang and B.L. Wang	1357
Several Related Factors on Highway Nondestructive Testing S.M. He	1363
Cement-Gravel Piles for Highway Soft Soil Settlement Treatment in Yunnan Province G.X. Wu, L. Zhang and L.J. Luo	1367
Study on Durability of High Bending Strength Pavement Concrete W.H. Guo	1372
Stress Characteristic Analysis of Repaving Asphalt Pavement Structure on Old Cement Road H.L. Mao, P.Z. Zhuang, Y.N. Zang and X.M. Yi	1377
Analysis of Equivalent Static Method for Subway Station L. Chen and D.J. Yang	1382
Experimental Analysis of Failure Modes and Pavement Strength Control Parameters to Existing Cement Concrete Pavement J.Y. Yuan, Y. Yu, T. Cheng, D.B. Zhang, Z.H. Wu and J. Xiang	1387
Poisson Log-Linear Regression Model for Rural Signalized Intersection Z.P. Ren	1391
Dynamic Response of Airport Concrete Pavement to Impact Loading J. Cai, L.N.Y. Wong and H.W. Yan	1395

The Study on Road Performance and Pavement Structure Analysis for the Base Layer Material Stabilized by SRX	1402
Y. Zhang, Y.L. Zhao and B.Y. Yu	
Experiment Data Analysis of Comparative Test Research on Expressway Asphalt and Asphalt Mixture	1407
Y.D. Hu, M.D. Xiong and T.T. Yu	
High-Grade Highway Safety Evaluation Method Based on Grey Clustering	1412
S.N. Hu	
Construction Technology of Airfield Pavement Gravelly Substructure under Saline Soil Condition	1416
C.G. He, Z.C. Li and T. Zhang	
Study on the Effect of Jet Grouting Pile Reinforcing Soft Soil Subgrade	1420
G.Y. Liu and B.L. Wang	
Protection and Utilization of Soil Seed Bank in Road Construction	1429
G.Z. Luo, J. Wang and J.S. Fu	
Numerical Simulation on Stress Transmission under Vehicle Load for Western Expressway	1435
C. Li, J.J. Zhang and L.P. Gao	
Mechanics Properties of the Lime-Fly Ash Stabilized Soil for Pavement Structures	1445
T. Cheng and K.Q. Yan	
Discussion on Overpass Pedestrian System in Downtown Area	1449
Y. Jiang and Z. Yang	
Prediction of Possible Speed and its Application in Highway Alignment Design	1456
Y.H. Fan and S.W. Yang	
Evaluation of Highway Alignment Safety Design Based on Operating Speed	1463
S.N. Hu, P. Qiu, Q.D. Fan and Z.H. Hu	
Research and Application of Anti-Rutting in the Asphalt Mixtures	1467
X.H. Yang	
Adaptability Analysis of Preventive Maintenance Measures for Asphalt Pavement	1471
Q.Z. Wang, S.Y. Liu, J.L. Liu and Y.G. Liang	
Application Study of Impact Compaction Technology in Wetness and Softness Loess Roadbed Treatment	1477
R.F. Song and D. Wang	
Finite Element Transient Analysis on the Highway Reflective Crack in Temperature Change	1482
S.Y. Yang	

Chapter 7: Bridge Engineering

Study on Transverse Linear Stiffness of Bridge Piers in a High-Speed Railway	1489
H. Li, H. Duan, X.Z. Li and C.S. Shan	
Stress Analysis of High Thin-Walled Box Girder Bridge in Chong He Bridge	1494
P.X. Wang, K.X. Yu and J. Di	
Shrinkage and Creep of Concrete on the Mechanical Properties of Cable-Stayed Bridge	1498
H.S. Gao and T.Y. Li	
Study on Fluid-Solid Coupling Analysis Method of Bridge Pier	1504
J.X. Yang, S.R. Zuo and Y.F. Huang	
The Experimental Study on Controlling the Hydration Heat Temperature Field of the Zhenyuling Bridge Pile Caps	1509
C.J. Lin, G.G. Fu and L.L. Guo	
Prestressed Concrete Continuous Girder Bridge Reinforcement Simulation Analysis and Carrying Capacity Assessment	1516
L. Yu, T.Z. Qiao, L.S. Bao and G.S. Zhu	
Stressing and Monitoring Techniques for Steel Tie Rods in Special-Shaped Inclined-Column Bridge	1522
S.J. Xi, T. Wan and Q.F. Zhan	
The Bridge Wind Tunnel Test Based on the Digital Image Correlation Method	1527
N. He, P.C. Zhai, Z.G. Li, Z.M. Fan and W.Q. Yuan	

Seismic Analysis of Long Span Double-Curved Arch Bridge Y. Zhang, X.F. Huang and B. Li	1532
--	------

Chapter 7: Bridge Engineering

The Application of Carbon Fiber Concrete in the Intelligent Bridge Reinforcement R. Lu and X.M. He	1539
Vessel-Bridge Collision Force Research on Ordinary Highway Bridge in Fujian Navigable River J.F. Lin, Y. Su and Y.T. Du	1543
Experimental Research on Concrete Shrinkage and Creep for Main Girder of Sutong Continuous Rigid-Frame Bridge Y.T. Zhang	1547
Analytical Solution for Vertical Dynamic Response of Railway Simply Supported Beam Bridge under Bidirectional Moving Loads W. Ye, X.Z. Li, H. Duan, C.S. Shan and X.H. Liu	1552
Fine Analysis for Bursting Damage of Bottom Plates in Closure Section of Continuous Rigid Frame Bridge X.D. Zuo, B. Ge and J.Y. Song	1557
Internal Force Calculation of Two-Way Curved Arch Bridge B.R. Huo, G.N. Yang and X.D. Zhang	1561
Study on Normal Section Bearing Capacity of Stone Arch Rib Enclosed by Reinforced Concrete J. Zhang and Y.J. Qian	1565
Dynamic Analysis for Steel Bridge Deck Thin Surfacing with Cracks X.Q. Xu, J.B. Wang and J.P. Chen	1569
Static and Dynamic Response Contrast Simulation of Long-Span Beam Bridge Subjected to Flowing Ice Z.P. Bai, X.D. Zhang and C.L. Han	1573
Wudu Bridge - The Structure Stress Numerical Analysis of Triangle Frame Hanging Continuous Beam Combination Bridge S.S. Zhou, W.H. Li and X.D. Chen	1577
Pre-Evaluation of Durability for Concrete Bridge X.Z. Zheng and J.F. Lin	1581
Application of the Influence Line on the Bridge Testing R.F. Zhang, X.M. Zhang and C.X. Qi	1586
Research on the Load Distribution Coefficient of Cable-Stayed Bridge with Long Cantilever Structure Based on Full-Scale Test X.Z. Li, H. Duan, H. Li, W. Ye and X.H. Liu	1590
Research on Base Frequency of Simple Supported Beam Footbridge T.T. Gao, Z. Li and Y. Shi	1595
Bridge Technology and Aesthetics of Chinese Poetry in Bridge Design Y. Li and L.L. Zhang	1600
Scaffold Design and Stability Design of Tangfangya Bridge Y.J. Xie	1604

Chapter 8: Seismic Engineering

Status of Seismic Isolation Research on Underground Structures Q.H. Wei and H.F. Sun	1611
Analysis on Dynamic Failure Behaviors of Steel Double-Layer Grids Supported by Circumjacent Steel Columns Used in a Gymnasium with the Function of Earthquake Victims Shelter under Disaster Earthquake X. Zhao, H.W. Li, J. Liu and Y. Ma	1616
Energy Response Spectra of Single-Mass Bi-Degrees of Freedom Systems for Hard Soil Site F. Wang, X.L. Li and T.H. Yi	1620

Experimental Study on Behavior of Interface between Coarse-Grained Soil and Gravel-Clay under Seismic Loading P. Liu and G. Yang	1624
The Mitigation Measures of Frequent Earthquake in the Construction of New Rural Area W. Liu, X.L. Zhang and P. Zou	1629
GB ASME & RCCM Analysis of Piping Design Comparison about Class 2 Components W.T. Bai and J.W. Dai	1634
Research on the Dynamic Response of Dam under Rare Earthquake through Dynamic Time-History Analysis Method Y.X. He, Y. Qiang and L. Li	1640
The Application of Mode-Superposition Response Spectrum Method in Seismic Calculation of the Boiler Steel Structure S.W. Li, W. Zhao and J.X. Jin	1645
Difference Analysis of Loess Seismic Subsidence between <i>In Situ</i> Experiment and Laboratory Test S.H. Xu, L.M. Wang and J.J. Sun	1652
The Effect of Site Condition on Ground Motion in Gansu Province during the Wenchun Ms8.0 Earthquake Z.J. Wu, L.M. Wang, P. Wang, H. Shi and T. Chen	1658
Effects of Overburden Thickness and Slope Grade of Loess Sites on the Amplification of Peak Acceleration T. Chen, W. Ma, Z.J. Wu, L.M. Wang and L.F. Zeng	1668
Experimental Study on Seismic of High-Strength Spiral Stirrups Prefabricated Column Encased by Steel Plate Hoop and Bolt Reinforcement X.C. Zheng, Q.N. Li, S.B. Pan and W.S. Jiang	1675
Test Research on Seismic Performance of Beam H.T. Wan and Y.Q. Yuan	1680
Research on Performance-Based Design Theory H.T. Wan and Q.M. Kong	1684
Identification Methods of Important Parameters for Near-Fault Pulse-Type Ground Motions M. Li, Q. Jin, Y. Liu, H. Yuan and Z.Z. Sun	1688
Forecasting Seismic Damage in Frame-Shear Wall Structure Based on Fuzzy Neural Network W. Jiang and B.X. Gu	1692
Effect of Ridge Topography on Earthquake Ground Motion G.D. Xu, Z.H. Zhou, J.S. Bo and W.H. Fang	1696
Analysis of Using Interlayer Seismic Isolation Technology in Storey-Adding Structure W. Guo, S.D. Liu, J.Y. Liu and R.H. Zhang	1702
Scientific Problems on Seismic Resistance of Bridge of Pile Foundation in Liquefiable Site L.H. Tian, G.F. Bai, B. Feng, L.Y. Wang and D.Z. Yang	1707
Earthquake Action of Cold Storage Structure J.M. Zhang and H.B. Dong	1713
Study on Critical Shear Wave Velocity of Saturated Loess Foundation Soil Liquefaction under Different Seismic Magnitudes Action P. Wang, L.M. Wang, Q. Wang and J. Wang	1720
The Spatial Distribution Characteristics of Seismic Induced Geo-Hazards and Ground Damage Classification in Baisha River H.J. Meng and J.P. Qiao	1727
Isolated Structures Research and Comparative with Traditional Seismic Structures M. Yao and T.Y. Li	1734
Seismic Evaluation and Strengthening on Teaching Building of Masonry Structure D.R. Du, Y.N. Wu and J.T. Jiang	1740
Research about Efficiency of Seismic Mitigation for the Dry Friction Plate-Spring Reverted System in High-Rise Building N. Ge, H.B. Chen and J.S. Hao	1745
Research about Rolling Friction Pendulum Seismic Isolation System on Ellipse Track J. Pan, N. Ge and L.T. Yao	1749

Earthquake and Underground Powerhouse: On the Aseismic Issues of Baihetan Underground Cavern Complex	1753
X.L. Leng, J.J. Liu, C. Zhen and S. Qian	
The Cable-Stayed Bridge with the T - Structure Collaborative System Bridge Seismic Response Analysis	1762
B.C. Yu, D.Y. Zhang, S.X. Gao and X.C. Tang	
Seismic Performance on Reinforced Concrete Frame Joints of Open Set Corner Floor	1766
H.B. Chen, N. Ge and Y.P. Zhang	
Hybrid Base Isolation System with Friction Sliders and Viscous Dampers in Parallel: Comparative Dynamic Nonlinear Analysis with Traditional Fixed Base Structure	1771
D. Cancellara and F. de Angelis	
The Effect of Structural Parameters on Seismic Behavior of Concrete-Filled Steel Tubular Frames with Buckling-Restrained Brace	1783
F.M. Ren, J.B. Zhang, Y. Zhou and X.L. Du	
Seismic Analysis and Comparison of Different Base Isolation Systems for a Multi-Storey RC Building with Irregularities in Plan	1788
D. Cancellara and F. de Angelis	
Seismic Performance Reliability Analysis of Frame Structure with Special-Shaped Columns	1800
Y. Liu and H.B. Liu	
Laboratory Study and Evaluation of the Loess Liquefaction under Random Seismic Loading	1805
J. Wang, L.M. Wang, H.P. Ma, Q. Wang, P. Wang and B. Fan	
Seismic Analysis of an Earth-Rock Dam on Thick Alluvial Deposit	1811
W.J. Cen, S. Wang, Z.X. Yang and H. Sun	
The Study on the Effects of Different Forms of Steel on Seismic Performance of Steel Reinforced High-Strength Concrete L-Shape Short Pier Shear Wall	1816
Y.S. Su, J.Y. Quan, W. Zhang and Y.B. Yang	
Development Law of Seismic Subsidence of Loess through <i>In Situ</i> Explosion Test	1822
Q. Wang, J.J. Sun and L.M. Wang	
Study on Seismic Reinforcement Measure of Mountain Tunnel Cavity	1830
T. Deng, S.L. Zhang and J.M. Yao	
Progress in the Seismic Strengthening of RC Frame Connections	1836
L.H. Wan, G.D. Zhao and L.L. Li	
Simulation of the Seismic Response of 2D Sedimentary Basin with Hybrid PSM/FDM Method	1840
W.J. Yan, Y.B. Wang and Y.C. Shi	
The Dynamic Response and Stability Analysis of Nuclear Power Station Water Intake Diversion Dike	1849
J. Zhao, L.Y. Deng and G.X. Wang	
Characteristic and Stability Analysis for Loess Seismic Landslide in Valley City	1856
W. Nai, L.M. Wang, Z.X. Yuan and W. Qian	
Failure Mechanisms of the Landslides Triggered by the 2008 Wenchuan Earthquake, China	1864
F.P. Cui, Y.P. Yin, R.L. Hu and J.Q. Yu	

Chapter 9: Hydraulic Engineering

A Method to Determine the Warning Value of the Opening of Concrete Dam Crack Based on the Analysis of Time-Effect and the Low Probability Method	1871
J. Jing	
Flood Influence Evaluation of Xiazhu Village Construction Land in Wuqing District in Tianjin City	1877
P. Yu, P. Feng and S.H. Sun	
Design and Application of Concrete Faced Rock-Fill Dam Numerical Simulation Analysis Program	1882
H.R. Li, F. Feng and Q. Wang	
A Simplified Analysis Method for the Validity of Pipeline Rock Armour Berm Protection Design	1888
W.B. Liu, R. Liu, G.M. Sun and S.W. Yan	

Finite Element Analysis of Unsteady Seepage Flow through the Earth Dam of Huangbizhuang Reservoir E.X. Du and J.H. Sun	1892
An Improvement of General Design Methods for Lock Castle Structures Z.H. Cao, J.J. Lian and X.Z. Liu	1897
Control of Artificial Recharge on Foundation Pit Deformation due to Dewatering H. Yuan and Y. Hong	1901
New Type of Spur Dike at the Exit of Diversion Channel: Courter-Arc Vertical Ladder Spur Dike S.B. Yue and M.J. Diao	1905
Temperature Induced Cracking Analysis for Lushui Pier Using LEFM J. Cheng, X.L. Chang and T.C. Li	1913
Analysis and Research on Dynamic Characteristics of Bulb Tubular Pumping Station Structure Y. Xiao and X.T. Ding	1917
Dynamic Stability and Reinforcement Effect Analyses of Dagangshan High Arch Dam Abutment Q. Yang, J.H. Zhang, J.D. Shao and M.L. Li	1922
The Research on the Relation between Flexibility Coefficient and Buckling Stability of High Arch Dam H. Li, Z.Z. Wang and X. She	1932
Stability Analysis to the Imports Slope of the Spillway Tunnel of a Hydropower Station R.H. Wang, J.L. Bai and Z.R. Jiang	1936
The Influence of Turbulence Model Selection and Leakage Considerations on CFD Simulation Results for a Centrifugal Pump H. Liu and H.C. Pan	1940
Applying the Method of Fuzzy Clustering to Study Leakage from Dyke Z.C. Fan and J. Sun	1945
Numerical Simulation of the Influence of Water Flow on Navigation and Optimization Scheme Selection of a Power Station J. Hu	1950
Study on Estimating Failure Probability of Earth-Rock Dams R.R. Sun, X.L. Wang, X.F. Ao and W.P. Guo	1957
Hydraulic Experimental Study on Nonmetallic Plastic Pipeline B.J. Liu, L. Zhang and C. Guan	1961
Study on the Gray Fuzzy Comprehensive Evaluation Model about Dam-Break Consequences X.L. Wang, Q.S. Wang, R.R. Sun and X.F. Ao	1965
Study on Stress of Closed Cut-Off Wall in Earth-Rock Dam Reinforcement under Different Engineering Conditions J.L. Gao and Y.X. Chen	1969
Study on Flow Velocity Field of Local Scour around the Pier Protected by the Sediment Storage Dam H.J. Zhao, D.X. Li and X.K. Wang	1975
Temperature Control Measures and Feedback Analysis in Rapid Construction of Guandi RCC Dam W. Zhou, X.Y. Jing and X.H. Liu	1979
Flood Risk Map Analysis Based on Dam-Break Simulation X.L. Wang, L. Zhou and R.R. Sun	1983
Influence of Hydraulic Factor of Vertical-Slot Fishway on Swimming Ability of Fish Z.M. Guo, G. Zhu, Y.J. Bie and M.J. Tang	1988
The Advances in Risk Analysis of Reservoir Operation Research Y. Ye, G.W. Ma and Y.B. Zhang	1993
Research on Influence of Sediments Mechanical Parameters of Seismic Arch Dams Y.Z. Yan, Z.M. Su and L. Wu	1998
The Normal Depth and Critical Depth of Special Cross-Section B.Q. Wei, Z.E. Wang, W.Q. Meng and Y. Liu	2003
Use of Prior Information for Calibration of River Roughness Y.F. Chen and C. Wang	2009

Hydraulic Experimental Study on Two Kinds of Nonmetallic Plastic Pipes B.J. Liu, C. Guan and Z.C. Zong	2014
The Analytical Solution of Hydrodynamic Pressure of Full Water Tunnel in the Horizontal Excitation J.Y. Liu and S.N. Sun	2018

Chapter 10: Water Supply and Drainage Engineering

The Application of Three Dimensional Drainage Flexible and Ecological Reinforced Construction in High-Speed Railway Station Roadbed A.H. Wang and H.S. He	2025
Simplified Technology for Modified Micro-Irrigation of Agricultural Sheds L. Yu and H. Peng	2030
Research on Urban Water Demand Prediction K.Y. Wan	2037
Research on Identification of Comprehensive Pipeline Headroom in Certain Area Q. Zhao, G.L. Bai, X.H. Hei and P.F. Zhang	2041
Magnetic Water Treatment to Inhibit Calcium Carbonate Scale Deposition in the Drainage System of an Old Tunnel in Seoul, South Korea E. Yee, J.W. Lee, D.S. Lim and B.S. Chun	2045
Characteristics of Combined Sewer Overflows in Nanjing and Selection of Intercepted Time Q. Feng and C.Y. Wu	2056
The Evaluation of the Water Quality of Shenwo Reservoir Based on Fuzzy Comprehensive Evaluation Method D. Liu, N. Hu, H.Y. Liu and A. Gong	2061
Numerical Simulation of Hydraulic Characteristics in a Tangential Vortex Dropshaft R.Y. Jia, S.F. Zhang and L. Hu	2066

Chapter 11: Heating, Gas Supply, Ventilation and Air Conditioning Works

Tests on High-Pressure Water Rotational Jetting Ventilation Cooling Characteristic Z.F. Ma, L. Chen and F.Q. Wang	2073
The Analysis on Energy Saving Reconstruction of a Grade III-A General Hospital in Wuhan Y.Y. Li, Z. Zhang, H.C. Li and C.Z. Zhang	2077
Optimal Model for HVAC Based on System Energy Input Ratio M. Qing and W. Hao	2082
Simulation Study on the Radiant Tube Transferring Characteristics for the Gas-Infrared Heated System D.Y. Zhang, W.D. Zhuang and K.Q. Gong	2086
The Effect of Ventilation Mixed Coefficient on Main Filter Efficiency Y.S. Fan, W. Xie, J.T. Li, L.Y. Li and H.X. Shi	2090
Lanzhou City Sewage Heat Utilization Measurement Analysis J. Zhang and M.L. Wang	2095
Research on the Simulation of Auxiliary Boiler System on Ships X.G. Song, N. Zhang and Q. Ma	2099
Simulation Based on CFD to Temperature and Flow Fields of Vertical Air Conditioner Operation Y. Tang, J.F. Wang, J. Xie, Z. Zhang and R. Liu	2106
Research on Energy-Saving of the Pebble Thermoregulation Greenhouse Y.L. Shi, M.D. Chen and F. Wang	2112
Study on Temperature Distribution Regularity of Pebble Thermoregulation Greenhouse Y.L. Shi and M.D. Chen	2116
The Influence of Heat and Moisture Transfer in Soil on the Performance of the Ground Heat Exchanger G.M. Shen, C.F. Lu and Y. Wang	2120

Comparing of Temperature Variation with Different Types Greenhouse Y.L. Shi, M.D. Chen and M. Li	2128
The Application of Catalytic Combustion in Natural Gas Power Generation X.X. Shi, M. Xiao and S.H. Zhang	2132
Characteristics of Gas Transport within Uniaxial Compression of Granite Sample C.G. Wang, C. Li, X. Hu and B. Li	2136
The Research of Building Air Permeability Based on Building Structural Tightness S. Cao, Z. Lou, L. Wang and M. Li	2142
Installation Design and Energy Conservation Analysis of Floor Radiant Cooling/Heating System with Solar Energy Q.F. Li, T. Li, W.D. Sun, Z.T. Zhou, C.C. Pan and L.F. Zhao	2146
Test and Analysis on Thermal Environment of Commercial Kitchen in China X.T. Hou, Z.H. Wang and A.G. Li	2154
Application of Finite Element Method of Composite Wall Insulation System T. Cheng and K.Q. Yan	2158
Numerical Simulation about the Effect Rules of Particles Concentration on Erosion of the Centrifugal Fan M. Dan	2162
Test on Characteristics of the High-Pressure Secondary Rotary Water Gas Jet Ventilation Z.F. Ma, P.G. Jin and F. Zhao	2167
The Heat Transfer Model of V Shaped Solar Flat-Plate Air Collector M.D. Chen and X.B. Liu	2171
Numerical Simulation on V Shaped Solar Flat-Plate Air Collector M.D. Chen and X.B. Liu	2175
Physical-Rule Based Adaptive Neuro-Fuzzy Inferential Sensor vs. GA-BP Based Prediction Model in Indoor Temperature Predicting L. Huang and Z.Y. Liao	2179
Improvement of Proximal Support Vector Machine and its Application to Enhance Antifreeze Heat Transfer Capability in Ground Source Heat Pump System J.H. Wang and M.F. Yan	2186
Numerical Simulation of Natural Ventilation in Typical Residential Layout J. Li	2192
A New Type Thermal Insulation Fireproofing Wallboard X.L. Wang and L. Wang	2197
The Coupled Heat Conduction & Advection Model for Ground Heat Exchanger and its Application for Utilizable Resource Amount Calculation in Soil R. Fan, Y. Gao and W.D. Long	2201

Chapter 12: Natural and Technogenic Disasters Prevention and Mitigation

Numerical Investigation of Fire Dynamic Behavior for a Commercial Building Basement C.S. Lin, C.C. Yu and S.C. Wang	2213
Experiment of the Mechanical Performance of Reinforced Ceramsite Lightweight Aggregate Concrete Beams after Fire J.M. Wang, N.J. Wang, L.L. Yuan and W.T. Jiang	2219
Gas Control in Special Soft Coal with Lower Permeability in Liangbei Coal Mine L.T. Cheng, Z.S. Zou, Q.B. Li and X.T. Zeng	2223
The Experimental Investigation of GBE-050 Safety Netting System P.F. Cheng, S.Y. Yan and G.H. Cui	2228
Advanced Alert and Warning Systems I. Turekova, Z. Turňová and M. Pastier	2232
Crack Detecting and Localizing Using Distributed Optical Fiber Sensing F. Lu, Z.F. Chen and Y.S. Guan	2237
A Study on the Occurrence Law of Coal Seam Gas in Shanxi G.W. Xue, H.F. Liu and J.L. Guo	2244

Full-Scale Experimental and Numerical Simulation of Fire in a High-Rise Residential Building	
J.T. Yang, Y. Yang and J. Liang	2251
Experimental Research of Three-Phase Foam Fire-Fighting Technology in 7312-2 Caving Face Prevention Goal of a Coal Mine	
L. Jian, M.M. Liu and Z.H. Xie	2257
Natural Dam Break Forecasting by Use of DamBrk Model	
C. Dang, N.N. Chu and Y. Ding	2262
Research on the Sensitivity of Rock Slope Stability to the Effect Factors under Blasting Disturbance	
P. Chen, M. Chen, J. Kong and Y. Liu	2267
On Analysis Economic Loss Appraisal Method for Geological Disasters	
S.G. Li, Q.L. Yi and J.J. Wu	2272
Research on Disaster Prevention Technology of Huizhou Traditional Architecture	
Q. Sun and S.T. Wang	2277
Horizontal Pillar Stability Evaluation and Instability Risk Prediction of Jinchuan No.2 Mine Area	
Z.H. Liu and Q. Gao	2281
Discussions on Zonal Disintegration around Tunnel in Deep Rock Mass	
P. Jia, T.H. Yang and C.M. Zhang	2285
The Application of BP Neural Network in the Research of the Landslide Stability	
P.L. Li, W.P. Tian and J.C. Li	2290
Finite Element Analysis of Fire Behavior of Steel Girders in Bridges	
Y.J. Liu, G.Y. Wang and Y.S. Song	2296
Study on Social Risk Evaluation Index System for Tailings Pond Dam-Break Based on the Vulnerability Theory	
G.D. Mei and Z.Z. Wu	2301
Study on Quantity Calculation and Influencing Simulation of Debris Flow Based on Three-Dimensional Remote Sensing System	
Y.L. Yin, B. Xu, M.W. Xie and X.Y. Liu	2309
Characteristics and Mechanics Analysis of Debris Flow Disaster in Xinjiang Arid Area	
L.Q. Lv, N.S. Chen, Y. Lu, Q. Huang, J. Li and Y.H. Zhu	2318
Experiment Study on the Relationship between the Height of Capping Layer and the Porosity of Broken Rocks	
C.F. Du and B. Li	2323

Chapter 13: Surveying Engineering, Cartography and Geographic Information System

3D Modeling of Building Based on CSG and SketchUp	
Y.B. Wang, M.X. Zheng and X.J. Li	2333
An Implementation of 3D Landslide Geological Modeling and Visualization	
T.Y. Jiang, L.L. Cui and J.H. Li	2338
Study on Highway Intelligent Travel Service Improvement Using Location-Based Service	
Z.N. Wang	2344

Chapter 13: Surveying Engineering, Cartography and Geographic Information System

A 3D Surface Data Model for Fast Visualization of 3DCM	
Q.G. Wang	2351
Three-Dimensional Slope Stability Analysis Methods Based on GIS Technology	
X.D. Pan, L.H. Yang, S.Y. Zhang, W. Pu and M. Sun	2356
Filtering LiDAR Data Using Binary Quadric Trend Surface and Morphological Approaches	
F. Li, X.M. Cui, L. Zhang, S.W. Shan and K.L. Song	2361
ArcGIS-Based the Dam of Three-Dimensional Modeling Technology	
T. Huang	2367

Application of GPS-RTK Technology in the Measurement of Discontinuity Traces Y.S. Zhang, R.Y. Li and F. Wen	2371
Establishment of Virtual Campus Based on ArcGIS C.L. Sa, G.X. Liu and M.L. Wang	2375
Design on Information Management System of Buildings Based on WebGIS F.X. Ouyang and X.C. Du	2379
The Service of Digital Measurable Images in Smart Jiuzhaigou Y. Bai, C. Xu and Z.F. Shao	2384
A Map Matching Algorithm Based on Curvature and Slope W.Y. Wu and C.L. Kang	2390
Research on City 3D Modeling and Application Based on Skyline J. Cui, D.L. Ma and F. Cai	2394
Three Dimensional Modeling of Buildings Using Three Dimensional Laser Scanning Data D.L. Ma, J. Cui and F. Cai	2398
Application of Fuzzy Least Squares Support Vector Machines in Landslide Deformation Prediction W. Chen, X. Xiao and J. Zhang	2402
Analysis of Landslide Surface Deformation Using Geographically Weighted Regression H.F. Huang, W. Yi, Q.L. Yi and G.D. Zhang	2406
A Summary of the Scientific Data and its Quality Evaluation C.L. Sun and R.P. Wang	2410
Evacuation Simulation Model for Large Hotel Based on GIS F. Cai, J. Cui, D.L. Ma and J. Li	2414
A Semi-Automatic Algorithm on Extracting Road Networks from Airborne LiDAR Data F. Li, X.M. Cui, D.B. Yuan, K.L. Hu and W.Y. Xu	2418

Chapter 14: Multi-Field Coupling Theory and its Applications

The Analysis Model of Coupling Heat Flux in Heavy Oil Reservoir and its Application J. Chen, Z.G. Wang, L. Zhang and W.Z. Yang	2425
Analysis of the Instantaneous Local Thermal Equilibrium Assumption for Heat Exchange between Rock Matrix and Fracture Water W. Lu and Y.Y. Xiang	2430
Study on Heating Zone and Producing Zone of Cyclic Steam Stimulation with Horizontal Well in Heavy Oil Reservoir S.J. Huang, P. Hu and Q. Li	2438
A Method to Determine the Optimal Water Injection Intensity Based on Oil Production Rate and Water Cut J.C. Zhang, Y. Jia and X.N. Cui	2442
Deformation Module Dynamic Inversion of Xietan Sewage Treatment Plant Slope when Exposed to Reservoir Water Level Fluctuation Based on Fluid-Solid Coupling Theory X.L. Wang, Z.H. Zhang, Q.C. Sun and S.J. Li	2446
Asphaltene Deposition Induced by Carbon Oxide and its Influence on Displacement Efficiency F.L. Zhao, J.R. Hou and S.J. Huang	2451
Block Element Method for Seepage/Stress Coupling in Fractured Rock Foundation of Gravity Dam D.S. Yin and W.X. Qing	2455
Mechanical Simulation Experiment of Coiled Tubing in Wells F. Guan, W.G. Ma and X.Z. Yi	2460
Research of Short-Leg Shear Wall Structure System Function in Multiple Coupled Field D. Kui	2464
Experimental Study of Improving the CO₂ Flooding Development Effect in Ultra-Low Permeability Reservoir L. Zhang, F.L. Zhao and J.R. Hou	2470
Study on Variation Regular Pattern of Development Indexes in Beierdong Block after Layer Recombination G.X. Qi, H.X. Zhang, M. Long, J. Qin and J.C. Zhang	2475

A Capillary Bundle Model Based on Aperture's Exponential Distribution and its Application in Porous Media's Mono Direct Percolation X.D. Ju, W.J. Feng, Y.J. Zhang and Z.S. Zou	2481
The Coupling Model of Wellbore Conduit Flow, Throttled Flow and Formation Seepage in Water Injection Wells B.J. Liu, H.X. Shi and Y.S. Cai	2486
Oil-Water Two Phase Flow Model Considering Threshold Pressure Gradient Y.K. Liu, S. Liang, X. Wan and Y. Xuan	2490
Discussion on the Disappearance of Transition Flow of Fractured Gas Reservoir with Pressure Transient Analysis Y.H. Su and X.H. Liu	2495
Research on the Discontinuous Deformation Analysis for Hydro-Mechanical Coupling Model of the Fractured Rock Masses X.S. Liu	2500
Numerical Analysis of Deformation and Stability of Rock Slope under Rainfall Condition B.H. Zhao and S.P. Zhang	2506
The Characteristics of Seepage Field and Numerical Analysis on the Stability of Reservoir Landslide X.S. Tang, Y.R. Zheng and Y.F. Wang	2512
The Salinization Problem of the Deep Groundwater Based on Multivariable Statistical Methods A.H. Wei, F.S. Ma, D.F. Yan and Y. Feng	2520
Modal Analysis of Multi-Span Pipes Conveying Fluid Based on Three Different FSI Methods T. Zhang, H.H. Ding, Y. Su and H. Chen	2525
Mesh Moving Scheme Based on Solving the Laplace Equation with Jacobian Stiffening Technique H.K. Wang and G.L. Yu	2529
Determination of Forchheimer Term in Porous Media Consisting of Obstacles of Different Sizes R.X. Liu, A. Nakayama and X.L. Haung	2537
The Research of Flood Pattern Completeness in the Thin and Poor Oil Layers of South West II Area X.H. Wu, K.P. Song, C. Dong, J.C. Zhang and J.F. Deng	2541
A Stochastic Finite Element Heterogeneous Multiscale Method for Seepage Field in Heterogeneous Ground Y.H. Xia	2545
Research on Coupling of Seepage and Stress Fields with Variable Modulus of Elasticity X.S. Sun, J.L. Li, S. Zhou and J.L. Bai	2552
Study on Seepage Properties of Zheng-Gang Large Landslide under Rainfall Condition Y. Zhang, B. Lu and H.K. Sun	2557
Stability Analysis of Deep Roadway Based on Coupled Thermo-Hydro-Mechanical Behaviors Q.F. Guo, F.H. Ren and Z.C. Zhang	2564
Research on Seepage Field of Underground Petroleum Storage Caverns in Fractured Rock Mass Y.P. Zhang, S. Yu and W.S. Zhu	2569
Treatment of Well Point during Numerical Analysis about Water Pumping H. Yuan and C. Yan	2574
Analysis on Coupling of Temperature Field and Stress Field for Tunnel Surrounding Rock in Cold Region H.M. Zhang, Y. Liang, C.G. Chen and H.B. Cao	2578
Numerical Research on the Heat Transfer Properties of Pulsating Flow around the Vibrating Tube X.T. Zheng, S.H. Nie, J. Yu, W. Lin and Q. Liu	2582
Sectional Optimization Study on Perforation Parameters of Horizontal Wells in DaQing Oilfield H.J. Zhang, Z.Z. Yang, P.J. Guan, G.P. Xu, L. Fu, H.Y. Li and L. Xu	2586

Research on Factors and Model of Water Production of Bottom Water Reservoir L. Zhang, Y.Z. Shi, C.H. Yan, X.X. Wu, P. Zhao and X.F. Shang	2590
Discuss on down-Hole Intelligent Intermittent Pumping Technology in Low Liquid Production Well B.M. Shen, D. Qi, H.T. Chi, L.Q. Ma, X.K. Liu, H.P. Qiao, J.F. Shen and J.Q. Zhu	2598
Experimental Study on Fluid-Solid Coupling Seepage Flow in Putaohua Reservoir Y. Zhao, K.P. Song and Y.F. Liu	2602
Fracture Zonation for Overlying Strata in Underground Mining of Shallow Coal Seam G.W. Fan, D.S. Zhang and L. Zhou	2607
Determining Informational Entropy of KARST Spring Hydrology Based on Wavelet Transform Y. Wang, L.C. Shu, C.P. Lu, R.R. Zhang and H. Ping	2612
The Research of Layer System Adjustment Methods in DQY103 Block of the Low Permeability Reservoirs T.J. Yang, C.L. Liu, C.Q. Fu, J.T. Zhang and H.J. Yin	2616
The Sediment Group Evaluation Index System of Extra High Water-Cut Stage in Waterflooding Oilfield Reservoir L.J. Wang and Q.G. Duan	2620
Simulation for Gas-Membrane Interaction of Folded Membrane Tubes during Inflation J.Z. Wei, R.Q. Ma, H.F. Tan and X.W. Du	2627
Numerical Simulation Study on Diamond-Shape Inverted Nine-Spot Well Pattern S.P. Wang, R.Z. Yu and Y.A. Bian	2632
Features of Coal Pore & Fracture in Chuandong and their Relationship with Extra-Low Permeability F. Mao, J.X. Tang, J.J. Peng and Z.Q. Li	2636
The Study of Combined Mining Technology at Thin Coal Seam with Hard Limestone Floor Y.S. Shen and L.J. Zeng	2640
The Research of Liquid Producing Capacity Variation Law in Water Controlled Reservoir C. Fu and B. Huang	2644

Chapter 15: Applied and Computational Mechanics

Stability Analyses of a Moving Rectangular Plate by the Element Free Galerkin Method Y. Wang and Z.M. Wang	2651
Calculation of the Tension of Coastal Shore-to-Ship Transmission Cableway Z.D. Tan, Z.F. Du, J. Zhang, C. He and W.G. Wu	2655
Solving the Deflection Equations of Thick Plate under Concentrated Load D. Zhang	2659
Analysis about Efficiency of Floor Isolation System Consisting of RFPS System and Dish Spring N. Ge, H.B. Chen and C.Y. Yu	2664
Numerical Study on Mechanical Response of Steel Wire Wound Reinforced Rubber Flexible Pipe under Internal Pressure F. Gu, H.X. Wang and L. Sun	2668
Mechanical Analysis and Stability Design of Extrusion Forming Machine of Thorn Pile W.C. Wu, J.G. Gou, J.H. Jiang, X.C. Xue and J.L. Shao	2672
On the Investigation of Flow around the Square Cylinder Based on Different LES Models Z. Liu	2676
A Numerical Study on Shock Wave Characteristics for the Underwater Explosion W. Ju, Y. Liu and J. Ding	2680
The Boundary Negative Slippage of Fluid Flowing in Hydrophilic Micro-Channels F.Q. Song and L. Yu	2684
Study on Collision Damage Behavior of Ship Y.S. Lü and Z.Y. Mei	2689
Bifurcation Analysis in a Lotka-Volterra Model with Delay C.J. Xu	2693
Calculation of Interface Slips in SRC Members by Energy Method X.H. Hu and P.H. Yang	2697

Studies of the Buckling Propagation of Deep-Sea Pipeline with Local Defect	2701
Bifurcation Phenomena of Secondary Flows in Curved Duct of Square Cross-Section L. Xue	2706
Semi Analytical Solutions of Elastic-Plastic Contact between Two Surfaces H.L. Tian	2710
A Hybrid Finite Volume Meshless Method and its Application to Elasto-Plastic Problems J.Q. Zhang	2714
The Analysis and Inspection Technology of Product Assembly Properties for Virtual Assembly Based on Assembly Force X.X. Chen, Z. Wang and G.H. Dai	2719
Plastic Deformation Theory Application in Finite Element Analysis W.S. Lin	2723
A Comparative Study of the Methods for Calculation of Journal Bearing Elastohydrodynamic Lubrication J.Y. Zhang, S.K. Han, S.F. Zhang and Y.W. Zhang	2727
Extension of Material Derivative Concept in Fluid Mechanics F.X. Liu	2731
Velocity Distribution of Viscoelastic Fluid Axial Flowing in Eccentric Annulus Based on the Upper-Convected Maxwell Model X.S. Han, F.M. Li and B.J. Liu	2736
Research Review on Bearing Capacity Behavior of Pile Foundation under Lateral Load J.W. Zhang, H. Yuan and S.H. Zhang	2740
Causes Analysis of Eccentric Wear of Sucker Rod in Produced Fluid with Polymer B.J. Liu, C.X. Fan and H. Du	2744
The Finite Element Method for Mechanics Analysis of Joints in pin Coupling of Beam Structures Y.J. Xia	2748
Nonlinear Buckling Behavior of Cylindrical Shells of Uniform Thickness under Wind Load L. Chen, Y.L. Peng, L. Wan and H.B. Li	2753
Dynamic Response of a Poroelastic Half-Space with Semi-Permeable Surface Subjected to Time-Harmonic Vertical Load X. Luo, X.W. Zeng and L.Q. Tang	2757
Analysis of a New Adjustable Mixer Base on Large Eddy Simulation X. Nie, L.X. Ding, B. Guo, L.B. Chen and H.C. Pan	2763

Chapter 16: Noise and Vibration Control

Study on the Effect of Resistance Sliding Key Chamber Blasting Construction of a Hydropower Station on Adjacent Buildings H.F. Deng, Q. Luo, X.F. Yuan and M. Zhu	2773
Oscillatory Behavior in a System of Coupled Van Der Pol-Duffing Oscillators with Delays Y.H. Lin and C.H. Feng	2777
Experimental Investigation on Damping Effect of NOPD Slender Cables L. Zhao, D. Shen and T.J. Ma	2783
Evaluation of a Rail-Damper for the Vibration Reduction and Noise Suppress for Railway Q. Xue, F.Y. Sun and J.L. Wu	2788
Analysis on Impact Factor Spectrum for a Continuous Bridge under Normal Traffic Flow Z.Q. Fei and T. Wang	2792
Reliability Analysis of Turbine Generator Units Spindle System with Vibration Fault Tree Z.J. Li, Y. Liu, H. Long and Y.L. Zhang	2797
Dynamic Response of an Elastic-Supported Bridge Beam Subjected to Velocity-Varied Moving Loads F.L. Mei and G.L. Li	2802
Analysis and Comparison Research of Airport Noise Metrics Y.H. Wang, F. Xia and T. Xu	2808
Study on Sub-Span Oscillation of Bundle Conductor for Transmission Line D.L. Zhu and C. Ma	2815

The Practical-Analytical Solutions of the Wind Turbine Tower System's Natural Vibration Properties	
Q. Cao, C.Y. Fan and Q. Wang	2819
Prediction on Sound Insulation to a Single-Leaf Wall	
X.F. Huang, Z.X. Yang and Y. Yang	2824
Prediction on the Sound Insulation of a Double -Leaf Lightweight Panels	
X.F. Huang, Y. Yang and Z.X. Yang	2828
The Structural Refinement and Vibration Analysis of Apparatus Based on Inertia Benchmark for Measuring Road Roughness	
J.L. Xue, H.Y. Wang and B.S. Chi	2832
Experimental Research on the Heat Transfer Characteristics of Electrorheological Fluid Shock Absorber	
R. Wang, Y.C. Wang, C.Q. Feng and F. Zhou	2836

Chapter 17: Computer Applications in Industry and Civil Engineering

Research on Influence Factors of Strata Classification Based on Fuzzy Cluster Analysis and Fuzzy Pattern Recognition	
S.Y. Liu and L.N. Chen	2843
Research of Ship-Bridge Collision early Warning on the Basis of Fuzzy Neural Networks	
X.H. Yang and X. Zhou	2847
Analyzing the Influence of Road Reflection Crack on Pavement Structure under Transportation Loads through ANSYS	
D.D. Li and S.S. Zhou	2853
Design and Implementation of 2-3-Dimension Transformation for Last with Rhino Developer Platform	
J.C. Jin and C. Wang	2858
Research on Visualization of 3D Modeling of Hydropower Project Based on NURBS	
P. Yue, Z.J. Miao and D.H. Zhong	2863
Modal Analysis of a Simple Supported Beam Steel Bridge Based on ANSYS	
D.L. Wang, T. Li and C.Y. Wang	2867
Prediction of Mine Accidents Based on Fractal Theory	
Y.F. Chen and Q.X. Sun	2871
Wavelet Estimation Method for Short-Term Prediction of Deep Pit Settlement	
J. Guo, N.H. Lin and Q.M. Yang	2876
A Parallel Algorithm for Stiffness Matrix Decomposition Using Threadpool Method	
J.T. Chen, M. Xiao and H.B. Liu	2880
Information Flow Molding Technology of GBIM	
M.Y. Yang, S.Y. Chen and J.Y. Xu	2886
Research on 3D Dredged Soil Visualization Analysis of Qinhuangdao Harbor Project	
Z.J. Miao, D.H. Zhong, M.C. Li and W. Gao	2893
Research on Constructing 3D Geological Model of the Construction Layers in Daxing New City Area of Beijing	
X. Huang, G. Chen and Z.L. Li	2897
Study on the Method of Generating Digital Elevation Topographic Map in the MATLAB	
M. Wang, Z.W. Yu, C.M. Guo and C.H. Sun	2902
Numerical Simulation Analysis of Soil Nailing Wall Based on FLAC during the Excavation of the Foundation Pit	
C.W. Chen	2906
Simulation Research of PV Module in Islanded Operation State	
W.J. Li, X.H. Wang, S.X. Ma and J. Wang	2915
Initial Prestress Optimization of Tensegrity Structures Based on Fish-Swarm Algorithm	
C.Q. Liu, R. Liang and W.X. Shi	2922
Web-Based 3D Visualization of Dam Safety Monitoring	
B.P. Wu, B. Cui and D.H. Zhong	2927
Study and Application of Slope Displacement Time Series Forecast Based on CO-WLSSVM	
F. Xu and K. Wang	2932

Application Study of Landscape Design Based on Visual Authenticity and Intellectual Authenticity	
C. Liu and X.S. Yang	2936
The Finite Element Analysis of Truss Beam Structure Based on ANSYS	
L. Xia	2939
The Fuzzy Matter-Element Comprehensive Evaluation Model for Erosion Stability of Geocell Protection of Slope and its Application	
G.Y. Wang and J.W. Zhao	2945
3D Digitalization Modeling for Visualization of Dam Construction Process	
C.J. Zhao, H.W. Zhou, Y.H. Zhou and C.Y. Wang	2951

Chapter 18: Engineering Management

Risk Study on Underground Construction Using Reliability Theory	
M. Li and J.L. Wang	2959
Influence Analysis to Beneficial Period and Pricing of Hydraulic Project Based on Risk Allocation	
B. Yan and Q.H. Zhao	2963
Analytical Analyses of a Failure Department Project in Northern Ireland	
Y. Zhuang, X.Y. Cui and H.L. Liu	2968
Application of Fuzzy Comprehensive Evaluation Method Considering Risk Factors in Project Schedule Management	
Q.L. Yi, J.J. Wu and T.F. Dai	2976
Research on the Commercial Environment of China's High-Tech Districts: The Integration of City Function and Innovation Function	
C.L. Wang, X. Wang and M.M. Ma	2982
Research on Management Information System for Construction Consultant in Hydropower Project Based on Process Control	
R. Wang, D.H. Zhong and J.P. Zhou	2986
Economic Applicability Evaluation of the Method of Replacement with Gobi Desert in Tibetan Areas	
J. Liu and J. Pan	2990
Energy Efficient Building Cost Control Research Based on Whole Life Cycle	
Y.P. Wang, W.G. Qiao and H. Fang	2994
Management Mode of Super Large Scale Project - Case as Chongqing Public Rental Housing	
C.G. Zheng, D.X. Yuan, Q.Y. Yang, X.C. Zhang and S.C. Li	2998
A Quality Cost Evaluation Model of Construction Enterprises Based on Unascertained Method	
C.Y. Gao, J.G. Niu and X.Q. Xing	3002
Study on the Selection of Subcontractors Based on Fuzzy Comprehensive Evaluation	
Y. Feng and K. Bin	3006
Quality Cost Forecast of the Construction Enterprise Based on SVR Model	
J.G. Niu, C.Y. Gao and X.Q. Xing	3011
Cross-Sea Bridge Construction Contract Management Research	
L.L. Yang, H.S. Qiu and C. Wang	3015
Application of Oppression Construction Method in Soft Soil of Deep Foundation Pit Engineering Management	
Y.C. Zhuang, J.C. Shen, X.D. Pan and J.B. Tong	3019
Research on the Construction Mechanisms for Intelligent Transportation Systems in Foreign Countries	
F.P. Zhan, W. Wang, J. Zhang, H.Y. Gu, Y.K. Hu, S.L. He and L.L. Qiao	3024
Construction of the Influence Relationship Model between the Construction Project Safety System and the City Public Safety System and Analysis of the Influence Types	
X.L. Yan	3029
AHP-Based Research on the Selection of Construction Project Subcontractor	
M. Cheng, G.X. Ma and J.K. Sun	3035

The Research of Enterprise Work Safety early Warning Index Based on Risk Management Q. Hou and Z.Z. Wu	3040
Study on Scenario Analysis Method Based Safety Pre-Warming of Large Construction Engineering C.G. Chang, Z.N. Jia, Y.C. Liu and L. Luan	3045
Business Intelligence in Construction: A Review H. Shi, C. Peng and M.Z. Xu	3049
Research on the Theory and Application of River Course Regulation Projects' Post-Economic Evaluation X.Y. Li, M. Chu and F. Ge	3058
Quantitative Relationship Model and Case Study on Technological Progress and Industrial Structural Optimization of China's Construction Industry H.F. Guo, P.W. Li, T. Wang and Y. Yang	3062
Alternative Selection of Expressway in the National Nature Reserve J.P. Gao, X.G. Zhang, Z. Zhang and G.X. Wu	3066
Geotechnical Engineering Control on the Scenic Area — Research on the Method for Geological Disasters-Rockfall, Landslide and Debris Flow in Laoshan District of Qingdao Y.W. Zhang, S.C. Li, X.G. Chen and W. Xu	3072
Operation Performance Comprehensive Evaluation of Execution Control System in Freeway Construction Project Z.Y. Tu, N. Qu, L.X. Li and Y. Lu	3080
