Preface and Organizing Committee

Chapter 1: Material Engineering and Technology

Influences of Solution Treatment, Deformation Strain, and Nanometric Al₂O₃ Particulate on Dry Wear Properties for Nanometric Al₂O₃ Particulate Reinforced Al Alloy Matrix Composites Manufactured by Casting Y.B. Yang, Z.M. Zhang and X. Zhang	3
The Flow Stress Behavior and Constitutive Equation of Nanometric Al₂O₃ Particulate Reinforced Al Alloy Matrix Composites Z.M. Zhang, Y.B. Yang and X. Zhang	7
Metal Nanoparticle Production by Anode Jet of Argon-Hydrogen DC Arc T. Watanabe, M. Tanaka, T. Shimizu and F. Liang	11
Development of Natural Fiber Reinforced Laminated Hybrid Composites M. Bakkal and M. Savas	15
Characterization of Chemically Synthesized Ag₂Se Nanowires via Anodic Alumina Membrane as Template R. Singh, S.K. Sharma and S.K. Chakarvarti	21
Ultrafine Glass Fibers Produced by Centrifugal-Spinneret-Blow Process Z. Chen, X.Y. Cheng, Z.F. Chen, J. Zhang, Y. Yang and J. Wang	27
Influence of Density on the Thermal Conductivity of Fiberglass Felt Y. Yang, X.Y. Cheng, Z.F. Chen, R.L. Fu, Z. Chen, J.L. Qiu and D. Su	33
Cemented Carbides for Machining of Heat-Resistant Materials A.M. Adaskina, S.N. Grigoriev, A.A. Vereschaka, A.S. Vereschaka and V.V. Kashirtsev	37
Controlled Patterning and Dimensional Control of Suspended Carbon Nanofibers G. Canton, G. Bisht, L. Kulinsky and M. Madou	43
Research on Mechanical Properties of Nano-Concrete Y.Z. Yan, Z.M. Su and L. Wu	50

Chapter 2: Industrial Manufacturing Technology, Analysis and Modelling

Modern Office Furniture Design Based on Ergonomics J.F. Xu and H.N. Zhang	57
Multi-Role-Based Employee Performance Appraisal Method for Manufacturing Enterprise L. Zhou, H.F. Wang and L.Y. Liu	63
Study on the Reliability Problem of MEMS Fuze Mechanism J.K. Liu, X.L. Qi, J. Jia and B. Fu	72
Two-Component Injection Molding of Molded Interconnect Devices J.Y. Chen and W.B. Young	78
Research on Laser Micro Machining Polystyrene Material C.J. Hou, L.J. Yang, Y. Wang and Z.X. Song	83
Dynamic Model for Product Innovation Alliance Oriented to Competitive Advantage Y.Y. Yao and L.P. Zhao	90
Dynamic Stochastic Modeling in Single Unit Job Lot Fabrication of Vehicle Components Assembly Test Q.T. Wang	95
Performance of Ultrasonic Electro-Discharge Machining on Electrically Conductive PCD M. Iwai, Z.R. Zhou, T. Ueda, S. Ninomiya and K. Suzuki	101
The Optimization Design for Protection Plate Structure of Honing Measuring Head Y.P. Liu, J.P. Nie and J. Gong	107
SLP-Based Layout Design for a Reclaimed Rubber Factory X. Wang, H.F. Wang and J.S. Kong	111

Chapter 3: Metal, Steel Manufacturing Technology and Engineering

Stress Analysis on a Weld Seam between Spiral Case and Penstock X.L. Bai, Y.W. Zhao and Y.F. Zhang	119
FEM Simulation of Metal Drawing Parts Forming Based on the ABAQUS Software Z.G. Luo, J.L. Zhao, X.D. Li, J.J. Zhang and Y.Q. Shao	123
Modeling Milling Process Using Artificial Neural Network A. Iqbal	128
Characterization of Al-Zn-Sn as Sacrificial Anodes to Protect Underground Oil Pipelines in Al-Hilla Regional K.F. Al-Sultani and J.N. Nabat	135
A Study of Cutting Parameters Optimization in High-Speed Milling GH4169 with TiAlN Coated Carbide Tool W.W. Liu, Y. Yu, F. Li, C.F. Yao and B. Liu	144
Effect of Applying Air Pressure on Gas Porosity in Lost Foam Casting of Al-Si Alloy A.A. Niakan, M.H. Idris, A. Ourdjini and M. Karimian	150
Study on the Data-Bases for Fire Engineering Design of Structural Steels Members I.K. Kwon, H.J. Kim, H.Y. Kim, B.Y. Cho and K.S. Cho	156
Perpendicular Axis Magnetorheological Finishing of Spherical Optics Y. Zhang, J.S. Zhao and Y.Y. Wang	161
The New Effective Methodology for Prediction and Optimization of Distortion of Large Welded Structures L. Junek, V. Divis, M. Jary and P. Klaska	166
Research on Welding Repair for Tee Joint Crack of Subcritical Power Station Boiler Platen Superheater Header Q. Wang, X.F. Zheng, Y.T. Feng, X.G. Niu, X.J. Hao, W.B. Li, J.F. Zhao and G.Z. Dong	173
Thermal Behavior of Cast Steel Industrially Produced A. Ramírez-López, D. Muñoz-Negron, S. Romero-Hernandez, V. Cruz-Morales and R. Escarela-Perez	179
Advancement of Laser Micro-Welding H.S. Rizwan Ul, W. Jiang, J.X. Wen and A.H. Mussie	183
Effect of Doped Cobalt on Performance of Tungsten Filament S.Z. Wu and T.H. Wang	187
Hybrid Welding of AA5754-H111 Alloy Using a Fiber Laser G. Casalino, S. Campanelli and A.D. Ludovico	193
Parameter Optimization in Al6061/HIF GA Steel Friction Stir Lap Welds H. Das, S. Basak, G. Das and T.K. Pal	199
A Friction Stir Welding Platform of Thin Plates J.L. Zhang, B.Z. Li, X.C. Zhang and Q.X. Wang	206
Research on Laser Induced Thermal-Crack Propagation Cutting Silicon Wafer C.Y. Zhao, H.Z. Zhang and Y. Wang	211
Sensitivity Study on Parameters for Fatigue-Creep Modeling of Stainless Steel Materials X.C. He	217

Chapter 4: Technology of Production Management, Design, Automation and Information Technology in Manufacturing

Research on Box Drawing Coefficient of Friction Based on Dynaform Z.G. Luo, X.D. Li, J.J. Zhang and J.L. Zhao	223
Application and Research of the Design Process of Concept A-Surface X.Y. Wang, Y.J. Li, X.W. Xu and J.C. Han	229
Improving the Performance of the Cluster Identification Algorithm for Grouping in Advanced Manufacturing C.H. Cheng, P.N. Chu and T.D. Ng	240
Computer Aided Design Based on Visual FORTRAN and AutoCAD Y.H. Li, P. Xu and X.L. Bai	245

Application of Markov Chain in Organizations S.M. Hossein Hojjati and E. Kardan	249
Integrated RFID and Barcode Identification for Information Acquisition X.X. Song	253
Self-Adapting Intelligent Measurement and Control Processing System Based on 3D Scanning Technology X.Q. Wen, K. Ren and X.J. Ding	260
An Analysis of Agricultural Risk and Intelligent Monitoring Technology F.T. Kong, S.W. Xu, S.W. Wang and H.P. Yu	265
Time Synchronization of Laser Scanner and Robot H.S. Kang, S.J. Kwak and J. Suh	270
Collaborative-Based Framework for Business Workflows Development and Management on the Web Site A. Bargelis, R. Mankute and D. Cikotiene	276
Designing of Intelligent Manufacturing Assembly Cell by Moduls of System Catia and E-Learning Module Creation N. Danišová, R. Ružarovský and K. Velíšek	283
Sensory System Design as an Implement for the Development of the Intelligent Assembly Cell R. Ružarovský, N. Danišová and K. Velíšek	287
Developing an Imaging Software for Automated Recycling Processes (Phase 1) E.O. Simolowo and A. Mousavi	292
The Development of CAD Software for Manufacturing Flat-Face and Roller Cam Systems E.O. Simolowo	298
An Improved Ant Colony Algorithm Based Dynamic Scheduling Method in Job Shop with Parallel Machines J. Zhang, J.G. Yang, W. Qin, H. Li and Z.G. Xu	304
Researching on Virtual Human's Motion Retargeting Techniques Towards Heterogeneous Topological Structure Y.Q. Qi, S.S. Wang and J.P. Hao	310
Active Vibration Control of a CMOS-MEMS Nano-Newton Capacitive Force Sensor for Bio Application Using PZT R.J. Mozhdehi, A.S. Ghafari, A. Zabihollah and A. Meghdari	317
Estimating the Uncertainty of a Multilayer Perceptron Using the Monte Carlo Method F. García Fernández, L. García Esteban, P. de Palacios, A. García-Iruela and R. Cabedo Gallén	324
Augmented Reality - An Improvement for Computer Integrated Manufacturing I. Bondrea and R.E. Petruse	330
Smartphone Affordance: Achieving Better Business through Innovation: Cross Industry: Cross Border E.G. Carayannis, S.C. Clark, D.E. Valvi, S. Stone and F. Sharifrazi	337
Improvement on Development of CAD Software for Shaft under Various Loading Conditions A.A. Adekunle, S.B. Adejuyigbe and L.O. Mudashiru	343
The Short-Term Forecast Model of Pork Price Based on CNN-GA Z.M. Li, S.W. Xu, L.G. Cui, G.Q. Li, X.X. Dong and J.Z. Wu	350
Design and Implementation of Portable Agricultural Product Holographic Market Information Collection Terminal S.W. Xu, F.T. Kong, Z.M. Li, Z.Q. Li, Y.E. Zhang, Y. Lv, Z.W. Tian, D.J. Wang and H.P. Yu	359
Overall Performance Merit of Implementation Control System in Expressway Construction Project K.L. Liu	367
Research on the Comprehensive Reliability Assessment Process for Products W.J. Zhang and N. Lan	372
Risk Analysis for Utilizing Cloud Computing - In Perspectives of Legality, Hardware and Non-Hardware C.K. Fan, C.M.F. Chiang and Y.H. Lee	380
Computer Simulation of Steel Industrial Casting A. Ramírez-López, D. Muñoz-Negron, M. Palomar-Pardeve, M.A. Romero-Romo and V. Cruz-Morales	386

A Study on Impact Strength of CFRP Using Infrared Thermography H.J. Shin, L.K. Kwac, S.H. Ko, T.H. Kim and H.G. Kim	390
A Survey on Similarities and Differences between Systematic Analysis and Decision Analysis M. Cheng, L. Cheng, W.J. Tu and L. Fang	396
The Review of Algorithms to Correct Barrel Distortion Image M. Qi, X.X. Zhang, D.J. Li and Y.Y. Fan	403
Control of a Permanent Magnet Synchronous Machine Using Neural Network Backstepping Approach M. Mokhtari and N. Golea	410
Investigation & Simulation of an Intelligent Lateral Flight Controller for a Blimp System S.M. Rizi, A.K. Mobarakeh, M. Mirsafoie, S. Nazari and M.R.B. Arshad	420
Finger Vein Recognition Using Local Mean Based K-Nearest Centroid Neighbor Classifier A.K. Mobarakeh, S.M. Rizi, S. Nazari, J.P. Gou and B.A. Rosdi	427
Applying Fuzzy Logic for Optimal Placement of XBOX Kinect Sensors for Industrial Applications N. Rafibakhsh, H.F. Lee, J. Gong, H.S. Ko and A. Mohammadi	433
The Particle Filter Algorithm Research for Target Tracking Based on Information Fusion J. Li, H.J. Hao and M.L. Wang	440
Cutting-Edge Engineering - An Innovative Approach to Better Support the Engineering and the Life Cycle of Automated Production Systems J. Merhof and J. Franke	445
A Non-Dominated Sorting Particle Swarm Optimization Algorithm For Mixed-Model Assembly Line Sequencing Problem Z. Li, Z.L. Jiang, W.P. Liu and Y.M. Liu	451

Chapter 5: Mechanical, Equipment and Instrument Industry

A Study on the Development of Tool Planning for REF SILL OTR-R/L Auto-Body Panel by Using Forming Analysis D.W. Jung, D.H. Kim and B.C. Kim	461
New CNC Machining Method for Sculptured Surface Using Non-Ball-End Tools K.H. Zhou and D.T. Liu	469
Different Methods of Cutting Fluid Application on Turning of a Difficult-to-Machine Steel L.E.A. Sanchez, G.L. Palma, L.J. Nalon, A.E. Santos and D.L. Modolo	476
Production of Forged Rolls High-Quality Instrument from Adamite Steel Y.A. Lukina, A.V. Stepanov and E.N. Bobrov	482
Design Method for Modular Machine Tool Based on MC33C Y.Y. Yao, L.P. Zhao and P. Yan	486
Prototyping as a Tool for Rapid Development of Components for Sporting Equipment C. Stadler, S. Krotak, J. Neuman and B. Masek	491
A Design of New-Type Pipe Thread Forming Machine Based on Pro/E M.L. An and Y.G. Du	497
Robust Design of Quadratic Electromagnetic Linear Actuator J.H. Kim, J.H. Kim and J.H. Kim	500
Rotary Shock-Absorber with Magnetorheological Valves P. Martynowicz, S. Kciuk and A. Mężyk	505
An Investigation of the Behaviour of Magnetorheological Fluids in the Rotary Shock-Absorber S. Kciuk, M. Kciuk, R. Turczyn and P. Martynowicz	512
Application of Servo-Motors for Cold Rolling Tube Mills Z.V. Zatcepilova, E.A. Kachalov and A.V. Esakov	518
Flow Field Analysis of Valve Plate for Hot Blast Valve L.L. Li, G.P. Xu, Z.D. Su and Y.L. Kang	523
Finite Element Dynamics Analysis of Vibrating Feeder X.D. Ma, D.B. Sun, Z.D. Su and J. Teng	528
Kitchen Vehicle Water Treatment Equipment X.H. Zhang, H. Yang, X.D. Xie and Y.Z. Wang	532
