Preface

Chapter 1: Advances in Engineering Design

Biomimetic Design of Lightweight Vehicle Structures Based on Animal Bone Properties Y. Rui, A. Subic, M. Takla, C.H. Wang, A. Niehoff, N. Hamann and G.P. Brueggemann	3
Comparative Evaluation of Engineering Design Concepts Based on Non-Linear Substructuring Analysis M. Kajtaz, A. Subic and M. Takla	15
Design of Exotic Materials Machining System J. Mo, S.L. Ding, A. Mackie, M. Brandt, S.J. Sun, R. Hosseinneshad and R. Webb	36
Advances in Design and Materials for Indoor Sports Surfaces A. Walker and A. Subic	47
Design Optimisation of Passenger Car Hood Panels for Improved Pedestrian Protection R. Krishnamoorthy, M. Takla, A. Subic and D. Scott	62
Analysis of Deep Groove Ball Bearing Design for Assembly R. Mitrovic, A. Subic and I. Atanasovska	77
Explicit Parametric Method for Optimal Spur Gear Tooth Profile Definition I. Atanasovska, R. Mitrovic and D. Momcilovic	87
Investigation of the Effect of Rolling Bearing Construction on Internal Load Distribution and the Number of Active Rolling Elements R. Tomovic	103
HCR Gearing and Optimization of its Geometry M. Rackov, M. Veres, Ž. Kanovic and S. Kuzmanovic	117

Chapter 2: Advances in Engineering Materials and Manufacturing

High-Value SLM Aerospace Components: From Design to Manufacture M. Brandt, S.J. Sun, M. Leary, S. Feih, J. Elambasseril and Q.C. Liu	135
Feasible Build Orientations for Self-Supporting Fused Deposition Manufacture: A Novel Approach to Space-Filling Tesselated Geometries M. Leary, M. Babaei, M. Brandt and A. Subic	148
Materials and Engineering Design for Human Performance and Protection in Extreme Hot Conditions O. Troynikov, N. Nawaz and I. Yermakova	169
Investigation of Dental Biomaterials under Load Using a Digital Image Correlation System A.M. Lemic, L.T. Sojic, I. Tanasic, A. Subic and D. Grubor	181
Assessment of the Effect of Pitting Corrosion on Fatigue Crack Initiation in Hydro Turbine Shaft R. Mitrovic, D. Momcilovic and I. Atanasovska	186
Crossed Helical Gears with Wheels Manufactured from Sintered Steel with Pyrohydrolysis A. Miltenovic, R. Mitrovic and M. Banic	197
Nanoscale Material Characterization under the Influence of Aggressive Agents by Magnetic Force Microscopy and Opto-Magnetic Spectroscopy A. Debeljkovic, I. Mileusnic, I. Djuricic, A. Dragicevic, I. Hut and S. Nijemcevic	209
Fullerene Based Nanomaterials for Biomedical Applications: Engineering, Functionalization and Characterization L. Matija, R. Tsenkova, J. Munćan, M. Miyazaki, K. Banba, M. Tomić and B. Jeftić	224
Nanophotonic Rigid Contact Lenses: Engineering and Characterization Đ. Koruga, D. Stamenković, I. Djuricic, I. Mileusnic, J. Šakota, B. Bojović and Z. Golubovoć	239

Chapter 3: Engineering Applications

Finite Element Analysis of Vertically Loaded Cylindrical Ti Implants L.T. Sojic, A.M. Lemic, A. Subic, J. Yang and D. Grubor	255
Integration of the Technical Product Risk Assessment within the ISO 31000 Enterprise Risk Management Concept M. Djapic, P. Popovic and L. Lukic	263
Data Acquisition and Automatisation of a Conveyor Idler Test Stand R. Mitrovic, M. Tasic, Z. Miskovic, Z. Stamenic and D. Jovanovic	277
Experimental Investigation of Characteristics of Passive Safety Elements J. Tanaskovic, Z. Miskovic, V. Lucanin and R. Mitrovic	290
Reliability Distribution in Mechanical Systems for Given Reliability and Cost M. Ivanović	301
Reliability of Transportation Belt Rollers Used in Surface Coal Digging G. Ivanović, R. Mitrovic and D. Jovanovic	312
Improvement of Auxiliary Mechanization Operations Management at an Open-Pit Coal Mine Based on a Process Approach with ICT Support S.D. Pantelić, G. Ivanović, R. Mitrovic, D. Jovanovic, D. Stošić and S. Dimitrijević	322
