

# Table of Contents

## Preface and Committees

## Chapter 1: Near Zero Energy Buildings

<b>Airtightness of Buildings in Slovakia</b> D. Katunský, M. Nemec and M. Kamenský	3
<b>Energy Concept Design of Zero Energy Buildings</b> M. Budiaková	7
<b>Impact of Internal Thermal Insulation Systems on Static Behaviour of Exterior Walls</b> J. Pašek	11
<b>The Evaluation of Nearly Zero Energy Buildings in the Czech Republic</b> M. Kraus and F. Konečný	15
<b>The Specifics of the Real Estate Market of the Low- and Passive Energy Buildings</b> P. Ort and J. Pašek	19

## Chapter 2: Quality of Indoor Environment

<b>A New Building System Made of Glass Fiber Reinforced Mineral Matrix Composites</b> G. Taranu, M. Budescu, R. Plesu and I.O. Toma	25
<b>Aerodynamic Mode of Double-Skin Transparent Façade with Narrow Physical Cavity and its Influence on Indoor Environment in the Summer Season</b> B. Bielek, M. Bielek, S. Mikle and J. Szabo	29
<b>Effect of Air Heating System Distribution on Temperature Stratification in a Room</b> D. Katunský, A. Vaskova and M. Lopušniak	33
<b>Analysis of an Indoor Environment in Year-Round Operation</b> D. Katunský, M. Bagoňa, M. Vertaľ, A. Vaskova, M. Kamenský and M. Nemec	37
<b>Analysis of the Behavior of Glass Claddings</b> E. Rykalová and R. Fabian	41
<b>Analysis of the Influence of Geometrical Thermal Bridges and their Elimination by Using a Composite Material Based on Secondary Raw Materials</b> L. Matějka, L. Matějka and J. Pěňčík	45
<b>Comparing Methods for Calculating Thermal Stability of Rooms</b> R. Slávik and M. Kalousek	49
<b>Comparison of Temperatures in the Corner of Wall Footing through 2D and 3D Views</b> T. Pospíšil and J. Pěňčík	53
<b>Computer Simulations of Room Acoustics in Sporting Facilities</b> Z. Kolářová, L. Šteffek and F. Vajkay	57
<b>Differences <math>U_g</math> - Values of Glazing Measured <i>In Situ</i> with the Influence Factors of the Internal Environment</b> M. Flimel	61
<b>Effect of the Geometric Solution of Cladding on the Quality of the Indoor Microclimate</b> R. Fabian, M. Kozakova, F. Čmiel and E. Rykalová	65
<b>Envelope Structures of Low Energy Wooden Houses Considering Indoor Climate</b> J. Štefko, D. Bebej and J. Bednár	69
<b>Experimental Timber Frames House EXDR1</b> T. Kalábová, M. Horácková and F. Vajkay	73
<b>Indoor Environment State of Classrooms Situated in the Loft Spaces of Civil Engineering Faculty TU in Kosice – Dynamic Analysis Using Design Builder</b> M. Kovac and K. Knizova	77
<b>Assessing the Risk Relative to Indoor Environment Quality in Education Buildings</b> M.E.P. Codreanu, T. Hapurne, I. Baran and I. Bliuc	81

<b>Measuring Methodology and Results of Heat-Air-Moisture Performances at Building Envelope Levels</b>	
D. Katunský, M. Zozulák, M. Vertaľ, K. Kondáš and R. Balaz	85
<b>Microscopic Filamentous Fungi in Buildings, Preventing their Occurrence and their Remediation Using Nanofibers</b>	
Z. Rácová, R. Wasserbauer and P. Ryparová	89
<b>New Materials and Assessment of Ventilation Efficiency Floors</b>	
J. Jurka and J. Škramlík	93
<b>Optimisation of the Design of Daylight Guidance Systems Including Measurement Methodology</b>	
L. Janečková and D. Bošová	97
<b>Perceived Loudness of Sound Transmitted through Light Weight and Heavy Weight Walls</b>	
M. Rychtáriková, B. Roozen, H. Müllner, M. Stani, V. Chmelík and C. Glorieux	101
<b>Problematic of Humidity Degradation of Plaster with Indoor Fresco Decoration in Romanesque Rotunda in Znojmo</b>	
O. Hnilica and J. Plášek	105
<b>Quasistationary and Dynamic Simulation of Summer Overheating of Passive Timber House</b>	
M. Němeček and M. Kalousek	109
<b>Regeneration of Precast Panel Buildings in Terms of its Effect on Daylight</b>	
D. Bošová and L. Janečková	113
<b>Selected Problems of Renovated Apartment Buildings Entrances in Slovakia</b>	
K. Minarovičová and D. Dlhý	117
<b>Simulation of Indoor Climate and Energy Consumption of Primary School</b>	
K. Košútová	121
<b>The Importance of a Fan Location in the Front Door in Measuring of the Air Permeability by the Blower Door Test</b>	
B. Hrubá, M. Černíková, L. Kucerova and L. Martiník	125
<b>Thermal Comfort Evaluation with Fireplace in Occupied Space</b>	
R. Ponechal and S. Baďurová	129
<b>Thermal Performance of Capillary Micro Tubes Integrated into the Sandwich Element Made of Concrete</b>	
T. Mikeska and S. Svendsen	133

### **Chapter 3: Heat Storage and Energy Savings**

<b>Comparison of the Possibility of Using the Accumulation Underground Storage under Buildings</b>	
R. Partika and M. Kalousek	139
<b>Defects of Insulation Systems and their Negative Effect on the Accumulation and Energy Saving</b>	
P. Vlček, K. Kubečka, D. Kubečková and H. Vaculíková	143
<b>Development of Building Elements with Thermal Insulation Filler Based on Secondary Raw Materials</b>	
J. Zach, M. Sedlmajer and J. Hroudová	147
<b>Embodied Energy of Stabilized Rammed Earth</b>	
C. Stone, D. Katunský and M. Bagoňa	151
<b>Energy Solar Wall in Low-Energy Apartment House</b>	
J. Labudek and P. Oravec	155
<b>Including Sustainability Criteria in Architectural Completion: A Critical Case Study of Current Practices</b>	
K. Kiesel, U. Pont and A. Mahdavi	159
<b>Linear Thermal Transmittance of Holding Unit of Balcony Slab to External Wall</b>	
A. Rybakova and M. Kalousek	163
<b>Study of Behaviour of Advanced Silicate Materials for Thermal and Moisture Rehabilitation of Buildings</b>	
J. Zach, A. Korjenic and J. Hroudová	167
<b>Thermal Responses of Stabilized Rammed Earth for Colder Climatic Regions</b>	
C. Stone and M. Bagoňa	171

<b>Thermal Stability of Attic Spaces with Integrated PCMs during the Climatic Year</b> D. Bečkovský, M. Ostrý, T. Kalábová and V. Tichomirov	175
<b>Thermodynamic Properties of Reflective Coatings</b> M. Čekon	179
<b>Using Wind Farms as Green Energy Sources</b> D.M. Pohrib	183

## **Chapter 4: Effective Ventilation**

<b>Effective Ventilation and Heating Systems in Office Buildings</b> M. Budiaková	189
--------------------------------------------------------------------------------------	-----

## **Chapter 5: Integration of Renewable Energy Sources**

<b>Greywater and Rainwater Management in Buildings</b> J. Raclavský, R. Biela, J. Vrána, P. Hlušík, J. Raček and A. Bartoník	195
<b>Problems with Formation of Caverns in the Wells for Heat</b> O. Galas, R. Kořínek, L. Michnová and L. Martiník	199
<b>Six Points of Resistance for a Renewable Energy Based Architecture – A Case Study</b> S.C. Petrea	203
<b>Technology in Architecture – Low Energy Building versus Green and Sustainable Building</b> M. Bielek, B. Bielek and J. Híreš	207
<b>Two-Stage System for Utilization of Renewable Energy Sources with Application of Natural Physical Cavities</b> M. Bielek, B. Bielek, J. Híreš and J. Szabo	211

## **Chapter 6: Natural and Environmental Friendly Building Materials**

<b>Analysis of a New Expansive Soils Stabilization Method Made from Eco-Cement and Fiber Reinforcement</b> M. Aniculaesi, A. Stanciu and I. Lungu	217
<b>Analysis of Environmental Impacts on Thermal Conductivity of Insulation Block from Secondary Raw Materials</b> A. Kalužová, J. Pěňčík and L. Matějka	223
<b>Buildings Built by Superadobe Technology and other Possibilities Use of Clay Plaster</b> B. Kovářová	227
<b>Development of New Materials for Construction Sector Obtained from Renewable Resources</b> S.T. Aradoaei, M. Mosneagu, R. Darie and G. Constantinescu	231
<b>Environmental Assessment of Structural Elements from Secondary Raw Materials</b> K. Struhala, Z. Stránská and L. Matějka	236
<b>Featuring Reclaimed Asphalt Pavement Integration in Warm Mix Asphalt towards Roads Sustainable Development</b> A.M. Nicuță	242
<b>Greening of Concrete Industry by Incorporating Gypsum-Based Industrial Wastes as Supplementary Cementitious Materials</b> I.O. Toma, D. Covatariu, A.M. Toma, G. Taranu and M. Budescu	246
<b>Mechanical and Physical Properties of Straw Bales</b> P. Konečný, J. Teslík and M. Hamala	250
<b>Modeling of Airport Rigid Pavement Structure Made of RCC and Recycled Cement Concrete for Complex Configuration of Landing Gears</b> R. Cojocar, J.C. Pais, A. Radu and M. Budescu	254
<b>The Comparative Analysis of External Walls in a Passive House with Respect to Environment and Energy</b> S. Baďurová and R. Ponechal	258

<b>Use of Recycled Materials in the Construction of Roller Compacted Concrete (RCC) Pavements</b>	
M.T. Muscalu, A. Radu, M. Budescu, N. Țăranu and E. Florescu	262

## **Chapter 7: Noise Protection**

<b>Acoustic Properties of Timber Joist Ceilings with Respects to their Response onto the Effects of Dynamic Loads</b>	
D. Donatřáková, J. Krupicová, Z. Kolářová and B. Straka	269
<b>Acoustic Qualities of a Composite Timber - Concrete Ceiling Construction</b>	
P. Oravec and M. Hamala	273
<b>Ceiling Construction Low-Frequency Noise Issues</b>	
P. Berková and P. Berka	277
<b>Noise Perception in Residential Building Environment</b>	
A. Vargová and M. Pavčeková	281

## **Chapter 8: Building Simulation**

<b>2D Model of Capillary Transport of Water in Aerated Concrete</b>	
O. Sikula and M. Mohapl	287
<b>Analysis of Local Moisture Increase of Timber Constructions on Ice Arena Roof</b>	
A. Žák, O. Sikula and M. Trcala	291
<b>Mathematical Model of Multi-Layer Wall with Phase Change Material and its Use in Optimal Design</b>	
L. Klimes, P. Charvát and J. Stetina	295
<b>Passive Infra Reflectors and its Simulation in Radiance Software</b>	
D. Kopkáně and F. Vajkay	299
<b>TRNSYS Software Model of Solar System with Long-Term Storage</b>	
M. Kny and M. Urban	303
<b>Utilization of Indirect Adiabatic Cooling in Heat Recovery Device</b>	
O. Nehasil and D. Adamovský	307
