

Table of Contents

Preface and Organizing Committee

Chapter 1: Manufacturing and Mechanical Engineering, Equipment, Design and Simulation, Analysis of Dynamic Systems

Analysis for Wedge Falling-Proof Brake Assembly of Lifter with Converter Oxygen Lance J.L. Shi, C.L. Xu and K.B. Jiang	3
An Improved Model Reduction Method and its Application in Similar Simulation of Complex Systems A.L. Wang and Q.J. Wang	8
Simulation and Experiment Research of Working Process of Exhaust Turbocharged and Intercooled Diesel Engine M.X. Liu, P. Wang and F. Yuan	13
The Effects of the Manufacturing Errors of a Group of Sprags on the Engagement Properties of Sprag Clutch M.H. Qing, H.Z. Yan and W.Z. Tan	18
Optimization Design and Simulation Research of Hydraulic Test Bench F.H. Meng and J.H. Zhang	23
Electro-Mechanical Coupled Characteristics of Piezostack Actuator under the Combined Loads P. Xue	27
Research on Performance of Stern Shaft Mechanical Seal Based on FLUENT P. Liu, Z.L. Liu, S.D. Zhang, B. Qin and L. Zhao	31
Analysis and Research of the Combustion Process of YN4100QB Diesel Engine L.M. Shi, G.H. Jia, Z.F. Zhang and Z.M. Xu	35
The Simulation of Vibration Mechanism and Dynamics Analysis of Eccentric Shaft of Billet Caster J.L. Shi, G.Y. Meng, X.G. Ma and D.D. Ma	40
Study on Structure and Performance Optimization for Spherical Stern Bearing Based on ANSYS W.J. Chen, Z.L. Liu, S.D. Zhang, L. Zhao and P. Liu	44
Optimization Design Research on Descaling Bit of Water Pipeline Wall H.W. Ren	49
Development of Premium Threaded Connections for Casing and Tubing L.X. Gao, K.Z. Sun and Y. Zhang	53
Experimental Investigation on Power Consumption in Reactor Coolant Pumps with the Function of the Flywheel C.M. Gong, Z.Q. Yao, Y.Z. Hou, Y.B. Xue and D. Cheng	58
Modeling and Simulation of Chinese SONG Telescope L. Gao and G.M. Wang	63
Mechanism Configuration of Super-Redundant Robot Y. Chen, W.Z. Chen, K. Chen, J.Y. Shao and W.M. Zhang	68
Mechanism Design and Kinematics Positive Solution of the Exoskeleton Upper Limb Rehabilitation Robot with 6-DOF H. Zhang, Y.X. Wang and S.Z. Wang	74
Lightweight Design for a New Tracked Triangular Wheel Structure J.W. Xing, H.W. Pu, X.Z. Meng and L.Q. Bao	78
Value of Cepstrum Analysis and its Application in Gearbox Fault Diagnosis Y.J. Guo and J. Han	83
The Influence of Gearbox Oil-Leak to the Bolt Joint in Wind Turbine Tower Y.Y. Gao, W.Z. Zhang and H. Wang	87
Research on Fixturing Method of Marine Crankshaft Finish Machining S.Q. Cao, Y. Zhao and L.Z. Zhang	91

The Research of Lubricating and Colling System of the Low-Speed and Heavy-Load Sliding Bearing	
P.M. Sun, X.B. Wei and S.Q. Chen	95
The Research on Heat Transfer Coefficient of Wheel Rims of Large Capacity Steam Turbines	
W.M. Han, Y. Zhou, H.L. Zhang and D.M. Xie	100
The Analytical Research and Development of On-Line Monitoring Models of Thermal State for Turbine Rotor	
S. Liu, H.L. Zhang, Y. Zhou and D.M. Xie	105
A Lifting Device for the Maintenance of Great Mining Height Supports	
C.Y. Qiu, Y. Zhang, H.F. Yang and W.M. Huang	110
Leakage Simulation of the Impactor of Hydraulic Rock Drill	
Z.J. Yin, G.T. Xia and T. Han	113
Structure Design of the Hydraulic Support Sprag Units for Great Mining Height	
L.P. Wang, X.W. Shao, C.Y. Qiu and W.M. Huang	118
Study on Large Inclined Angle Integrated Caving Hydraulic Support Stability Control	
Y.Q. Yue, C.X. Sun, P.F. Liu and X.H. Meng	121
Study on Fully-Mechanized Face Quick Withdrawal Suite of Hydraulic Support Design and Application	
L.B. Zhang, Z.Z. Wu and X.H. Meng	124
Design Application of LQS20000 Column Strength Test Bench	
P.F. Lui, X.W. Shao and X.H. Meng	128
The Influence of Different Resistance on Stability of Curve Jointless Line	
J.B. Yang, F. Dai and X.Y. Liu	132
Experimental Modal Analysis of the Industrial Flat Sewing Machine Based on PolyMax Algorithm	
L. Zhang, S. Bin, F. Tao, Y. Tian and J.Y. Peng	137
Conceptual Design and Optimization of Submarine Escape Capsule	
X.B. Huang and X.L. Huang	143
Application and Study of Fuzzy Neural Network Theory Based on Takagi-Sugeno Model to Thermal Error Modeling on NC Machine Tool	
Z.J. Liu, Z.M. Yu, S.M. Li and Y.D. Ai	147
Self-Moving Tail Prototyping and Structural Improvements	
J. Cheng and Y.C. Guo	153
Modal Finite Element Analysis of Double Rollers Plastic Calender Equipment	
Y. Li, P. Zhang and H.Y. Qin	157
Study on the Constitutive Behavior and Damage Evolution in the FPZ of WST Specimens Using the Vic-2D and Strain Gauges	
D.Y. Liu, K.P. Su and A.M. Deng	161
Dynamics Analysis in Rigid-Flexible Coupling of Reinforced Steel Length Bodies with Friction Wheel	
J. Sun, J.Q. Chen, L. Lu and P. Huang	165
A Novel Approach for MEMS Vacuum Packaging	
C.G. Wang, Z.Y. Gan, X.F. Wang, D. Lin, S. Liu and H.H. Zhang	169
Research on Design and Optimization on Balance System of Large Floating Crane	
H.R. Shen and Y.S. Yang	174
Exact Solution of High-Speed Couplings for Interference Fits	
P. Shang, Y. Zhan, S. Feng, J. Zhou and L. Yu	180
Numerical Extrapolate Analysis of Joint Wear in Plan Multibody Systems	
L.J. Wu, A.P. Li and X.M. Liu	185
Theoretical and Finite Element Analysis on Connecting Rod of Quintuple Cylinders Fracturing Pump	
X.H. Ma	190
Lubrication Model and Dynamic Characteristics of Distributed Liquid Film for Hydrodynamic Bearing	
O.Y. Wu, J. Qian, Z. Fan, X.Y. Yuan and Q.F. Meng	194
The Techniques in Developing Finite Element Software for Creep Damage Analysis	
D.Z. Liu, Q. Xu, Z.Y. Lu, D.L. Xu and Q.H. Xu	199

The Validation of Computational FE Software for Creep Damage Mechanics D.Z. Liu, Q. Xu, Z.Y. Lu, D.L. Xu and F. Tan	205
Three-Dimensional Simulation of the Intake Port Combination Effect on Intake Flow Characteristic in a Highly Intensified Diesel Engine H.M. Li, G.X. Li, Y.J. Hou and Y.S. Yu	211
Research on NO_x Emission Characteristics of Medium Speed Diesel Engine Z.M. Liu, J.L. Yan and J.F. Li	215
Study on Influence of Insulating Clapboard in the Process of Electrolytic Cleaning for Cold-Rolled Strip J.G. Wu, S.F. Li and X.K. Liu	219
Study on the Working Principle of a New Type of Power Transmission Mechanism for Gasoline Engine X.Q. Guan, Q.P. Lu and W.D. Liu	223
Analysis of the Mechanical Interlock Sliding in Self-Pierce Riveting Joints K. Zeng, X.C. He, C.J. Deng, H.Y. Yang, S. Zhou and E. Liu	227
An Ellipse Fitting Algorithm Applied to the Construction of the Elliptic Arc-Shaped Leading Edge X.Q. Yu, T. Ning, Y.L. Hou and Z.T. Chen	232
Concept Exploration on the Design Requirements and Design Scheme of Laser Shock Processing Equipment H.B. Deng, C. Zou and W.J. Liu	239
Reasons of Great Mining Height Coal Side Fall and Study of Supports Preventing Technology L.P. Wang, C.Y. Zhai and W.M. Huang	244
Analysis of Combustion and Emission Characteristics of Diesel, Natural Gas Dual Fuel Engine X.L. Guan and W.G. Zheng	248
Research on Micro-Stepping Driving System of Three-Phase Hybrid Stepping Motor N. Yang, Y.M. Wei and J.Y. Liu	253
Develop Radiator Core Shape Parametric Modeling Software Based on Fluent Secondary Development Using VC++ H.J. Li, H. Wang, C. Yao, W.J. Gao, D.H. Piao, X.L. Chen, M. Chang and Y.W. Cheng	258
Non-Contacting Carbon Seal for High-Temperature and Large-Diameter Turbomachinery Applications X.Q. Zheng, B. la Pointe and S. Sciutto	262

Chapter 2: Advanced Materials and Material Science, Materials Processing and Machining

Improvement in Mechanical Property of SiO₂ Films Prepared by Sol-Gel P.T. Guo	269
Updated Research Result on Transverse Corner Crack of Slab L. Li, J.S. Jiao, S.M. Fei, H.T. Lin and Q.F. Cui	273
Research Development on Performance of Industrial Insulation Coating L. Li, R.Y. Zang, Y.Q. Li, J.H. Dai and X.Y. Wang	278
Process Design on Baogang 2250mm Hot Rolling Project L. Li, F.M. Zhang, H.W. Liu, R.Y. Zang and F. Wang	283
Effects on the Structures and Properties of APMOC Fiber from Hydrothermal Aging F. Chen, Y.J. Yue, W.X. Sun and H.X. Du	288
Dispersive Behavior of Carbon Nanotubes in Aqueous Solution Z. Yue and M.Y. Yu	293
Influence of Composite Modifier on the Modification of Calcium Carbonate Powder Z. Yue, M.Y. Yu and L.C. Li	297
Mixing Short Fiber-Rubber Composite by New Rotor with Variable Clearance X.Z. Han and C.J. Liu	301
Influence of Ag Micro-Addition on the Glass Forming Ability, Thermal Stability and Compression Performance of Cu-Based Metallic Glasses L. Zhang, D.C. Luo, W.C. Chang and X.Z. Xu	306

The Silver-Loaded Diatomite Prepared by Ion Exchange and its Antibacterial Effect C.P. Wang, S.P. Chen and J.C. Chen	311
Structural and Magnetic Properties of CoFe₂O₄ / Si (001) Thin Films via Sol-Gel Method W. Rao, D.G. Li and H.C. Yan	315
Effect of Solvent to Fingerprint Detection by Photoluminescent CdSe/PAMAM Nanocomposites Y.J. Jin, Y.J. Luo, Y.F. Wang, H. Sun, H.N. Zhang and D. Jin	319
Broadband Dielectric Spectroscopy Analysis of Dielectric Properties of Barium Titanate Ceramics J. Yang, X.Y. Deng, J.B. Li, Q. Cai, H.T. Zhang, L.M. Wang, K.F. Su, G.Q. Zhang and C.P. Wang	323
Study of Direct Quenching and Tempering Process of a Low Carbon Equivalent 960 MPa Grade Steel F. Lu, C. Wang, Y.Y. Li, L. Lu, Z.D. Wang and G.D. Wang	329
Influence of Powder Preparation Technology on <i>In Situ</i> Reactive Synthesized Ti (C,N)-TiB₂ Composite Ceramics H.W. Liu	334
The Influence of the Al-Ti-B/Al-Sr Modification on the Microstructure and Properties of the Hypereutectic Al-Si Alloy in Automotive Piston M.X. Liu and J.M. Chen	339
Ferromagnetism Switched by Hydrogenation in Layered MoS₂ E.J. Kan and M. Li	345
Microstructure and Mechanical Properties of Austempered High Boron Cast Iron with Modification and its Mechanism Discussion X. Hu, X. Chen and Y.X. Li	349
Synthesis of New Luminescent Materials and Application as Sensitive Chemosensors J. Wang, X.Y. Qiu and L.T. Liu	353
Effect of Rare Earths and Vanadium on Microstructure and Mechanical Properties of High Chromium Cast Iron Y.L. Ai, Q. Long, W.H. Chen and B.L. Liang	357
Bending Performance of Carbonized Bamboo Scrimber and Fracture Morphology Analysis after Different Ageing Treatments X.M. Chang, J. Wei and M.J. Guan	362
Research on the Bending Properties of the Bamboo-Wood Container Flooring J. Wei, D. Zeng and M.J. Guan	366
The Preparation of Honeycomb Cordierite Mn-Ce/TiO₂ Catalyst and Denitration Performance R.H. Li and S. Zhou	370
Influence of Thermo-Electropulsing Rolling Process on Microstructure and Mechanical Properties of AZ31 Magnesium Alloy Strip S.D. Sun and G.Y. Tang	375
Development of 60Si2CrVNb High Tensile Strength Spring Steel X.D. Wu, R.L. Chen, B. Xiao and Z.Y. Wang	379
The Analysis and Tests of Composite Leaf Spring for Trailer Truck J.S. Wang, Z.K. Li, Q.B. Jiang and W.L. Lv	383
Microstructure and Hot Corrosion Properties of Surface Plasma Alloyed Ti₂AlNb-Based Alloys Y.C. Hang, H.Y. Wu and S.J. Li	388
Overview of Axial Compression Technology for Direct Capture of CO₂ H.X.M. Chan, E.H. Yap and J.H. Ho	392
Research on Preparation of Nanocrystalline Titanium Oxide Film and its Super-Hydrophilic Property Z.Y. Yang, S.C. Qu and X.N. Lu	396
The Mechanical Properties of Low Cis-Butadiene Modified HIPS H.M. Yao, Y.L. Yuan, X.Y. Liu, S.Q. Qian, J.L. Wang and Q.X. Zhuang	400
Fluorinated MWCNT Used for Cathode of Primary Lithium Battery J.C. Lu, Z.C. Liu, P. Huang, Q. Fang and M.H. Zhu	403
Review of Creep Cavitation and Rupture of Low Cr Alloy and its Weldment Q.H. Xu, Q. Xu, Y.X. Pan and M. Short	407

Analyzing the Characteristics of the Cavity Nucleation, Growth and Coalescence Mechanism of 9Cr-1Mo-VNb Steel (P91) Steel	412
L.L. An, Q. Xu, Z.Y. Lu and D.L. Xu	
Research of the Halogen Phosphate Green Luminescent Materials Prepared by Sol-Gel Microwave-Assisted	417
T. Jiang, Z. Wu, C. Guo, J. Li and Y.Q. Cui	
The Preparation and Luminescence Properties of Stannate Red Phosphors for WLED	422
C. Guo, L.M. Dong, T. Jiang, F. Lv and X.Y. Zhang	
Effect of Additive on Aluminum Nitride Nano-Wire Synthesis by Double Decomposition Method	428
Y.L. Sun, L.M. Dong, T. Jiang, C. Guo and X.Q. Zhang	
Experimental Research on the Mechanical Behavior of the Cracked Aluminum Plate Bonded by the Graphite/Epoxy Composite Patch	432
Y.S. Zhang, Z. Wang and Z. Wang	
Experimental Research on the Stiffness of CFRP Reinforced Concrete Beam	436
X. Xu, Z. Liu, X. Han and C. Ge	
Influence of Process Parameters on the Quality of Bionic Non-Smooth Coatings by Laser Cladding	440
J. Liu, X.L. Gao, Y. Xu and G. Ling	
The Influence of Aging on the Flexural and Physical Performance of Restructured Bamboo Lumber	445
D. Zeng, X.M. Chang and M.J. Guan	
The Validation of Computational Software System for Creep Damage Analysis	449
F. Tan, Q. Xu, Z.Y. Lu, D.L. Xu and D.Z. Liu	
Study of Stiffness Calculation Method on Reinforced Concrete Beam Strengthened with CFRP	455
X. Han, Z. Liu, X. Xu and C. Ge	

Chapter 3: Devices Design

Optimizing Design of the Guide-Vane Attached to the New Bidirectional Flowmeter	461
H.Z. Li, Q.C. Liang and H.G. Cui	
The Design of a New Biaxial Decoupled Resonant Micro-Accelerometer	466
B. Yang, H. Zhao and B. Dai	
Design and Application for Heller System Radiator Built-In Automatic Cleaning Device	470
F. Liu, Q. Zhao and H.F. Ma	
Non-Uniform Dose Measurement Based on Two-Stage Bleaching Integrated with Thermo-Luminescence and Optically Stimulated Luminescence Dosimeter	474
C.W. Hsieh and Y.H. Lin	
The Design and Simulation of a New Z-Axis Resonant Micro-Accelerometer Based on Electrostatic Stiffness	478
B. Yang, B. Dai and H. Zhao	

Chapter 4: Automation and Control Technologies, Sensors

Design of Hall Vehicle Speed Sensor Comprehensive System	487
Z.K. Qin, S.Y. Li, C.W. Wang and G.F. Wang	
Design of Tools Flow Based on Reusable Scheduling in FMS	491
P.Y. Bian	
Analysis of the Sensory Perception Factor in Product Design of Infant	495
X.L. Sun and C.D. Ma	
Robot Soft Grabbing with New Piezoresistive Tactile Sensor	501
J.J. Chen and T. Xiang	
Long Range Inspection of Rail-Break Using Ultrasonic Guided Wave Excited by Pulse String	505
K. Zhang, Z.D. Han and K.Y. Yuan	

Research on Application of High Precision Angle Encoder in Antarctic Telescope B. Xu, B.Z. Gu, F.J. Du and S.H. Yang	511
Design and Implementation of a Control System for Manipulator Based on PLC and the Kingview D.G. Wang, Y.Q. Wei and X.M. Qi	517
A Study on Control Strategy under Tip-In Condition Based on AMT Vehicle Y. Gao, Y. Chen, D.G. Luo, W.Z. Liu, M.Q. Gu and F.Q. Zhao	522
Study on Active Vibration Control F. Xing, J.G. Cao, J. Wang and C.Y. Deng	528
Design of Wireless Monitoring Environment System Based on AVR SCM C.W. Wang, C.L. Liu and Z.K. Qin	532
Mathematical Models for VLSI Placement with Rectilinear Embedding L.Y. Pan and Y.P. Liu	536
Speed Measuring Experiment System Based on LabVIEW Z.S. Shao and H. Min	540

Chapter 5: Electrical, Energy and Power Systems Engineering

Design of Power Supply System for 10kV Smart Switch Based on PV Technologies S.Z. Xie, J.S. Yuan and Z.Y. Xie	547
A New PDM Power Control Technology for the Resonant Inverter Z.B. Lu, Y.L. Peng and Y.B. Li	552
A Research on the Application and Calculation of Wind Energy S. Zhou, C.L. Li and Y. Han	556
Research on the Influence of Wind Energy on New Energy Utilization Coefficient of EEDI C.L. Li, S. Zhou and Y. Han	561
Exergetic Cost Analysis of Marine Diesel Engine Waste Heat Recovery System Based on Matrix Model Thermo-Economics Z.Y. Wang, S. Zhou, R.H. Li, C.L. Li and H.F. Zhang	566
Challenges of Battery Pack to the Industrialization of Battery Electric Vehicles and the Corresponding Solutions in China P. He	571

Chapter 6: Related Themes

Research on the Customer Requirement Processing for Mass Customization Y.H. Zhang and Y.J. He	579
Adaptive Algorithm Designed for Enterprise's Agile-Transformation J.L. Su	585
The Research on Product Quality Competitiveness Based on Innovation J. Cao, L.L. Wang and X.P. Mu	591
Enterprise Logistics Network Optimization Based on Genetic Algorithm D.P. Liu, C.J. Zhu and W. Zhou	595
Improving Design of Household Self-Traction Treatment Bed L.A. Pan and Q.L. Du	601
A New Method of Building an Evaluation Model for User Interface T. Jin, C.Q. Xue, H.Y. Wang and Y.F. Niu	605
