Preface

The continued interest in applied physics, materials science and applications initiated the 2013 International Conference on Applied Physics and Material Applications (ICAPMA2013), held during 20-22 February 2013 in Golden Beach Cha-Am, Petchaburi, Thailand. ICAPMA 2013 is organized by Center of Excellence in Glass Technology and Materials Science (CEGM), Nakhon Pathom Rajabhat University (NPRU). The co-organizers are Burapha University and Rajamangala University of Technology Isan.

The Organizing Committee invited researchers, academicians, practitioners and interested professionals to submit scientific papers related to applied physics, materials science and applications. The response to the call for papers was overwhelming with submission of more than 114 abstracts. The submitted papers were critically reviewed by the experts in the respective research areas from different parts. About 99 papers were selected after the screening process which included two keynote lectures.

We are confident that the materials include in this proceedings published by Trans Tech Publications as part of Advanced Materials Research (AMR) where each article is available through http://www.ttp.net/ will be highly beneficial to the professional and scientific communities for the physicists and scientists.

The ICAPMA 2013 is another step forward in promoting collaboration, exchanging ideas, and sharing new knowledge. We are confident that this proceeding will be a valuable resource for them in the years ahead. We look forward for the next ICAPMA
