

Table of Contents

Preface, Sponsors and Committee

Chapter 1: Abrasive Jet Machining

Optimization of Hybrid Laser-Waterjet Micromachining of Silicon V. Tangwarodomnukun and J. Wang	3
A Visualization Study of the Radial-Mode Abrasive Waterjet Turning Process for Alumina Ceramics M.A. Ali, J.M. Fan, H.T. Zhu and J. Wang	9
An Experimental Research on Abrasive Water Jet Polishing of the Hard Brittle Ceramics Z. Lv, C.Z. Huang, J. Wang, H.T. Zhu, P. Yao and Z.W. Liu	15
Study on the Effect of Standoff Distance on Processing Performance of Alumina Ceramics in Two Modes of Abrasive Waterjet Turning Patterns D. Liu, C.Z. Huang, J. Wang, H.T. Zhu, P. Yao and Z.W. Liu	21
An Experimental Study on Radial-Mode Abrasive Waterjet Turning of Alumina Ceramics Z.B. Yue, C.Z. Huang, H.T. Zhu, J. Wang, P. Yao and Z.W. Liu	27
Kerf Profile Characteristics in Abrasive Air Jet Micromachining J.M. Fan and J. Wang	33
A Study on Erosion Performance of Monocrystalline Silicon in Ultrasonic Vibration-Assisted Abrasive Water Jet Machining Z.W. Zhang, H.T. Zhu, C.Z. Huang, J. Wang, P. Yao and Z.W. Liu	39
Impact Erosion of Quartz Crystals by Micro-Particles in Abrasive Waterjet Micro-Machining H. Qi, J.M. Fan and J. Wang	46

Chapter 2: Abrasive Machining

Optimization Design for Gun-Receiver Materials Belt Grinding Based on Orthogonal Experimental Method and Grey Relational Analysis Y.H. Chen, Y. Huang and Y. Huang	55
Research on Cutter-Contact Point Data Calculation of Robotic Abrasive Belt Polishing for Gun-Receiver Surface Y. Huang, Y. Huang and R.K. Cheng	61
Research on the Technology of Nc Abrasive Belt Grinding for the Leading and Trailing Edges of Aero-Engine Blades Z.Y. Liu, Y. Huang, H.P. Wei and C. Sun	67
Feasibility Study on Grinding of Titanium Alloys with Electroplated CBN Wheels Z.D. Shi and H. Attia	73
Research of Micro-Abrasive Suspension Jet Erosion Morphology and Material Removal Mechanism Z. Luo, C.Y. Wang and R.J. Wang	79
Machining Characteristics of Multilayered Thin Film Solar Panels in Diamond Wire Sawing and Grinding H. Huang, A.S. He, C.W. Kang, Y.X. Zhang, F.J. Chen, H. Huang, S.H. Yin, X.P. Xu and Y.H. He	85
Influence of a Grinding Atmosphere in the Combination Grinding of Steel and WC with a Diamond Wheel S. Ninomiya, M. Iwai and K. Suzuki	90
Experimental Investigation of Material Removal Mechanism in Grinding of Alumina by Single Grain Scratch Test T. Tawakoli, H. Kitzig and R.D. Lohner	96
Compensation and Experiment Research of Machining Error for Optical Aspheric Precision Grinding X.L. Ke, Y.B. Guo and C.J. Wang	103

Dynamics Modeling of Cavitation Bubble in the Grinding Area of Power Ultrasonic Honing X.J. Zhu, C. Guo, J.Q. Wang and G.D. Liu	108
Experimental Studies on Forces and Specific Energy in High Speed Grinding of Titanium Alloy Ti6Al4V H.Y. Li, L. Tian, Y.C. Fu and G.Q. Liu	112
Study on the Effect of Coarse Grinding Area Slope Angle on Surface Quality in Point Grinding Y.D. Gong, G.Q. Yin, C. Wang, X.L. Wen and J. Cheng	118
Grinding Force Model for Low-Speed Grinding Based on Impact Principle M.H. Liu, X.M. Zhang and S.C. Xiu	123
Ultraprecision Lapping for the Zirconia Ceramic Plane H.B. Ji, Y. Peng, F.F. Zhou, W.G. Guo, B.H. Lv and P. Zhao	129
Experimental Study on the Ultra-Precision Polishing for the Quartz Substrates L. Sun, W.G. Guo, J.L. Yuan, Q.F. Deng, M. Feng and W.H. Zhou	135
High-Accuracy Calibration of the Wheel Spindle Tilt Angle for Grinding Hydrostatic Seal Rings Used in Reactor Coolant Pumps G. Feng, F.W. Huo, Z.J. Jin, R.K. Kang and D.M. Guo	140

Chapter 3: Advanced Cutting Technology

Experimental Study on the Thread Turning Performance of Two TiAlN Coated Thread Inserts with Different Features K. Li, P.N. Li and M. Chen	149
Experimental Investigation on Drilling Force and Hole Quality when Drilling of T800S/250F CFRP Laminate Q.L. An, J. Xu, X.J. Cai and M. Chen	155
FEM Analyzing Effect of Tool Body Materials on Security Reliability for Face-Milling Cutter L.N. Liu, Z.Y. Shi and Z.Q. Liu	161
Effects of Cutting Conditions on the Machinability of Stainless Steel Formed by Laser Cladding B. Wang, Z.Q. Liu, L.C. Su and L.Q. Zhang	166
Microstructure and Mechanical Properties of Al_2O_3-TaC_w Ceramic Cutting Tool Materials G.L. Zhao, C.Z. Huang, H.L. Liu, B. Zou, H.T. Zhu and J. Wang	172
An Indicative End-Milling Condition Decision Support System Using Data-Mining for Difficult-to-Cut Materials Based on Comparison with Irregular Pitch and Lead End-Mill and General Purpose End-Mill H. Kodama, T. Hirogaki, E. Aoyama and K. Ogawa	177
Cutting Edge Preparation of PCBN Inserts B. Denkena, J. Köhler and C.E.H. Ventura	183
Comparison of Material Removal Characteristics in Single and Multiple Cutting Edge Scratches X. Chen and T.T. Öpöz	189
Effect of Fiber Directions on the Surface Quality of Milling C/SiC Composites Y.J. Bao, M.Z. Bi, H. Gao and B. Cao	196
Numerical Investigation on Effect of Rounded Cutting Edge Radius in Milling of Ultra-High-Strength Steel 30Cr3SiNiMoVA C.Y. Wang, J.J. Tian, Q.L. An and M. Chen	202
Experimental Investigation on the Cutting Mechanism of Oxygen Free Copper in Cutting Speeds Ranging from 1 m/s to 210 m/s J. Shinozuka	208
Experimental Study on Fractal Laws of Cutting Force for Machining Irregular Surface of Granite J.S. Zhang, Z.M. Zhang, M.W. Ding, H.C. Wang and Z. Wang	214

Chapter 4: Brittle Material Machining

Experimental Investigations of Grinding Forces in Elliptical Ultrasonic Assisted Grinding (EUAG) of Monocrystal Sapphire Z.Q. Liang, T.F. Zhou, X.B. Wang, Y.B. Wu and W.X. Zhao	223
Study on Numerical Simulation and Experimental of Cutting Force in Turning Machinable Glasses Ceramics L.J. Ma, X.J. Zhang and Y.D. Gong	229
Grinding Force and Surface Roughness in Ultrasonic Assisted Grinding of SiC Ceramics with Diamond Grinding Wheel L.F. Liu, F.H. Zhang, C.H. Li, J. Chen and M.H. Liu	234
Development of High-Efficiency and Crack-Free Grinding Process for Chamfering of LCD Glass Edge Y.B. Tian and H. Xu	240
Predicted Model of Cutting Force for Single Diamond Fast Milling Hard-Brittle Materials S.S. Hu, C.G. Chen, Y.N. Hu and D.R. Zheng	246
Study on Thermal Influence of Grinding Process on LiTaO₃ W. Hang, L.B. Zhou, J. Shimizu and J.L. Yuan	252

Chapter 5: CMP and Silicon Wafer Processing

Study on Chemical Mechanical Polishing Parameters of 6H-SiC Crystal Substrate Based on Diamond Abrasive J.X. Su, Z.Q. Zhang, J.G. Yao, L.J. Ma and Q.G. Feng	261
Optimization of Process Parameters Based on Multi-Process and Multi-Evaluation Index for Function Ceramics in CMP Z.H. Hu, J. Peng and M.K. Gao	266
Investigation of Surface Roughness for Grinding Silicon Wafer of the Micro Pellet Diamond Tool S.Y. Luo and T.H. Yu	273
Investigation of Dressing Characteristics of Single Crystal Diamond in CMP W.K. Chen, M.Y. Tsai and Y.L. Pai	279
Study of Cluster Magnetorheological-Chemical Mechanical Polishing Technology for the Atomic Scale Ultra-Smooth Surface Planarization of SiC J.T. Zhu, J.B. Lu, J.S. Pan, Q.S. Yan and X.P. Xu	284

Chapter 6: Coolants and Cooling

Development of an Innovative Water Machining System Employing the Electric Rust Preventive Method - Precise Evaluation of Purity of the Refined Water with a Laser Turbidity Meter N. Nishikawa, T. Sawa, Y. Hagihara, N. Yoshihara, H. Okawai, T. Iyama, M. Mizuno and S. Tsukamoto	293
A Model of the Fluid Convective Cooling in Grinding Process L. Zhang and M.N. Morgan	299

Chapter 7: Design, Fabrication and Analysis of Devices for the Applications of Abrasive Technologies

Development of Non-Destructive Inspection System for Grinding Burn - An Application of the Grinding Burn Detecting Technique to Evaluate Residual Stress R. Ito, T. Azuma, T. Kasuga, S. Soma, S. Murakami and T. Kuriyagawa	307
--	-----

Chapter 8: EDM, Ultrasonic Machining, and Laser Machining

Research on the Ultrasonic Assisted WEDM of Ti-6Al-4V G.C. Han, S.L. Soo, D.K. Aspinwall and D. Bhaduri	315
Study on Ultrasonic Generator for Ultrasonically Assisted Machining Y.S. Xu, P. Zou, X.L. Yang and Y. He	320

Surface Textures Fabrication on Zirconia Ceramics by 3D Ultrasonic Vibration Assisted Slant Feed Grinding	
S.L. Xu, C. Nishikawa, K. Shimada, M. Mizutani and T. Kuriyagawa	326
Effect of Ultrasonic Vibration Parameters on Machining Performance Based on Tool-Workpiece Contact Ratio	
D. Lu, Q. Wang, Y.B. Wu and H.A. Huang	332
Surface Quality of Textured Surface on Cylindrical Inner Surface Using Whirling Electrical Discharge Texturing	
V. Lertphokanont, T. Sato, M. Ota, K. Yamaguchi and K. Egashira	338
Fundamental Machining Characteristics of Ultrasonic Assisted Turning of Titanium Alloy Ti-6Al-4V	
Y.B. Wu, J.T. Niu, M. Fujimoto and M. Nomura	344
Effectiveness of Ultrasonic Vibration on Press Forming	
Y. Ashida and H. Aoyama	350
A Study on Ultrasonic Assisted Grinding of Nickel-Based Superalloys	
W.Q. Song, Y.B. Wu, J.G. Cao and J.T. Niu	356
Effect of Ultrasonic EDM on Machinability of Coarse PCD	
M. Iwai, S. Ninomiya, Z.R. Zhou and K. Suzuki	362
Micro-Grooving of Glass Using Small-Diameter Diamond Grindstone with Ultrasonic Vibration	
S. Koshimizu and S. Aoki	368
A Study on Grinding Tungsten Carbide with Ultrasonic Assisted	
P.L. Tso and C.C. Tseng	374

Chapter 9: Finishing, Lapping and Polishing

Research on Ultra Precision Mirror Machining Technology for Aluminum Alloy Mobile Phone Shell	
J.L. Guan, X.H. Zhang, X.Q. Ma, Z.W. Wang and L.L. Zhu	385
Research on Process Parameters Influencing on Cutting Force in Abrasive Flow Machining (AFM)	
K.H. Zhang, J.F. Ding and Y.C. Xu	390
Effects of Magnetic Fluid on Machining Characteristics in Magnetic Field Assisted Polishing Process	
S.H. Yin, Z.Q. Xu, H.J. Duan and F.J. Chen	396
Effects of Permanent Magnet Excitation on Material Removal Rate in Area Taking Magnetorheological Finishing	
S.H. Yin, Y.Q. Wang, G.J. Deng, H. Luo, F.J. Chen and Z.C. Lu	401
Research on Grain Impacting Load in Abrasive Flow Machining	
J.F. Ding, K.H. Zhang and Y.C. Xu	405
Study of Process Characteristics of Abrasive Flow Machining (AFM) for Ti-6Al-4V and Validation with Process Model	
T. Sato, S. Wan and Y.J. Ang	411
Study on the Characteristics of New Abrasive Medium for Abrasive Flow Machining	
H. Gao, Y.Z. Fu, J.H. Zhu, M.Y. Wu and Y.W. Sun	417
Experimental Study on Micro-Deliquescence Ultra-Precision Polishing with Fine Water Mist for KDP Crystal	
X. Wang, H. Gao, D.M. Guo, Y.C. Chen and C.P. Song	423
Research on Distribution of Magnetic Particles Based on Magnetic Field Control Grinding Wheel	
S.H. Yin, S. Gong, F.J. Chen and M. Wang	428
Experimental Research on Rolling Bearing Raceway Finishing	
P.Q. Ge and J.L. Zhang	432
A Study on the Analysis of Influential Factors for 300mm Wafer Final Polishing	
W.K. Choi, E.S. Lee, H.J. Choi and N.K. Kim	438
Study on Dual-Plane Ball Polishing Method for Finishing Ceramics Ball	
K.P. Feng, Z.Z. Zhou, B.H. Lv and J.L. Yuan	444

Polishing Characteristics of a Low Frequency Vibration Assisted Polishing Method W.M. Lin, S.K. Chee, H. Suzuki and T. Higuchi	450
Polishing Technology and Phenomena of the Inner/Outer Surfaces of Small Cup-Type Nickel Tube-Study of Ultraviolet-Ray Aided Machining T. Tanaka	455
Friction Force Analysis on Diaomond Lapping of Sapphire Wafers C.C.A. Chen, C.H. Tseng and W.K. Tu	461
Study on Impinging Stream Flow Channel in Abrasive Flow Polishing Complex Cavity of Precision Mold D.F. Zhou and D.Y. Liu	469
Proposal of Finishing Method of MLA Mold Applied Sphere Indentation Y. Kobayashi, R. Ishida and H. Sakamoto	475

Chapter 10: Glass Molding and Related Topics

Experiment on Glass Microgroove Molding by Using Polycrystalline Nickel Phosphorus Mold T.F. Zhou, Z.Q. Liang, X.B. Wang and T. Kuriyagawa	483
--	-----

Chapter 11: Grinding Wheel and Abrasive Grain Technologies

Experimental Study on a New Combination Processing Technology of Polycrystalline Diamond Z.M. Cui, Y.G. Han, J.P. Kong and Q.Q. Chen	491
CVD Micron Diamond Powders T. Zhang, F.H. Sun, B. Shen and Z.M. Zhang	495
Study on Radial Deformation of CBN Grinding Wheel Considering Centrifugal Force and Grinding Heat X.Z. Wang, W.S. Wang, T.B. Yu, N. Yuan and X. Sun	500
Progress of Researches on the Surface Topography Detection Techniques for Grinding Wheel W. Liu, Z.H. Deng, L.L. Wan, Q.P. Wu and H. Tang	505
Creep Feed Grinding of Ni-Based Superalloy with Micro-Crystalline Ceramic Alumina Wheels Z.C. Zhao, J.H. Xu, Y.C. Fu and Z.W. Zhang	511
Grinding Characteristics of Porous Composite-Bonded CBN Wheels Z.Z. Chen, J.H. Xu, W.F. Ding and C.Y. Ma	516
Effect of Contact Stiffness of Grinding Wheel on Ground Surface Roughness and Residual Stock Removal of Workpiece T. Yamada, H.S. Lee and K. Miura	522
Analysis on Wear of Self-Sharpening Fine Super-Hard Abrasive Tool Z.Z. Zhou, K.P. Feng, B.H. Lv, H.W. Fan and J.L. Yuan	528
Heat Pipe Grinding Wheel in Grinding Titanium Alloy Ti-6Al-4V Q.S. He, Y.C. Fu, J.J. Chen and W. Zhang	534

Chapter 12: In-Process Measurement and Monitoring, Metrology

Development of CMM Auxiliary Equipment for Tiny Hole Measuring F. Chen, Z.G. Bing, S.H. Li, L. Cheng, Z.Q. Zhang, J. Chen and Y. Yang	543
A Thin Silicon Wafer Thickness Measurement System by Optical Reflectmetry Scheme Using Fourier Transform Near-Infrared Spectrometer T. Onuki, R. Ono, A. Suzuki, H. Ojima, J. Shimizu and L.B. Zhou	549
Review on Multi-Point Method for Roundness Error Separation F.F. Zhou, H.Z. Lu, J.L. Yuan and F. Li	555
Development of a Measuring Equipment for Silicon Wafer Warp H.J. Liu, R.K. Kang, S. Gao, P. Zhou, Y. Tong and D.M. Guo	561

Chapter 13: Machine Tools and Systems, Tooling Processing

Research on Iso-Scallop Method for NC Grinding of the Special Rotating Workpiece L.J. Li, W. Sun, T. Zhang, H.J. Dong and W.T. Bai	569
Mathematical Modeling and Parametric Design of Taper End Mills L.L. He, X.B. Wang, Z.B. Liu, M. Chen and Z.W. Xu	574
Adaptability Comprehensive Evaluation of Auto Assembly Machine Product Platform for Small Shaft and Sleeve Subassemblies Z.F. Deng, Z.Q. Zhang, R.D. Li and H.H. Xu	579
Development of Electronic Impact Hammer and its Application to Face Milling Cutter Modal Analysis L.N. Liu, Y.G. Zhang, Z.Y. Shi and Z.Q. Liu	585
Research on Hole-Making Tools for CFRP H.Z. Zhang, Y.Y. Wei, Y.C. Yuan and H.Y. Jiang	592
Experimental Investigation on Grinding Performance of Microcrystalline Alumina Abrasive Grinding Wheel for Superalloys Z.G. Dong, X.W. Zhao, X.L. Zhu, R.K. Kang and B.J. Hao	597
Study on the Restraint Method of Thermal Deformation in the Machine Tools K. Umezū, K. Ohashi and S. Tsukamoto	603
Grinding System Reducing the Influence of Thermal Deformation of Workpiece in Cylindrical Grinding T. Onishi, M. Sakakura, N. Sato, T. Kodani, K. Ohashi and S. Tsukamoto	609

Chapter 14: Micro/Nano-Machining

Experiment Research on Grinding Temperature of Micro-Grinding H62 Y.D. Gong, X.L. Wen, G.Q. Yin, C. Wang, J. Cheng and B.P. Li	615
Finite Element Simulation of Minimum Uncut Chip Thickness in Micro Mill-Grinding Ti6Al4V Based on Single-Edge Single-Grit Model Y.D. Gong, C. Wang, G.Q. Yin, H. Xu and X.L. Wen	622
The Dynamic Analysis of Micro-Scale Edge in the Process of Micromilling Y.D. Gong, J.F. Zhang, J. Cheng, X.L. Wen, C. Wang and G.Q. Yin	628
Fabrication of Surface Microtexture by Vibration Assisted Cutting J. Shimizu, T. Yamamoto, L.B. Zhou, H. Ojima, T. Onuki and S.I. Nagaoka	638
Bending of Drill and Radial Forces in Micro Drilling O. Horiuchi, M. Masuda and T. Shibata	642
An Approach to Improve Machined Surface Finish in Micro Milling Y.S. Liao and C.L. Huang	649

Chapter 15: Surface Integrity and Materials Characterization

Experimental Research on Surface Residual Stress of Quenched GCr15 Steel in Ultrasonic Aided Turning F. Jiao, X. Liu, C.Y. Zhao and X. Zhang	657
Effect of Low-Frequency Pulsed Magnetic Treatment on Micro-Hardness of High Speed Steel L.P. Ma, Z.Q. Liang, X.B. Wang, W.X. Zhao, T.F. Zhou and H.M. Yao	663
Indentation Crack Initiation and Ductile to Brittle Transition Behavior of Fused Silica P. Yao, W. Wang, C.Z. Huang, J. Wang, H.T. Zhu and T. Kuriyagawa	667
Research on Subsurface Damage Layer Detection during Substrate Processing H. Zhou, X.M. Xu, X. Gao and H. Feng	673
Surface Integrity - an Inherent Load Sensor B. Denkena, J. Köhler, B. Breidenstein and T. Mörke	679
Surface Layer Damage of Silicon Wafers Sliced by Wire Saw Process R.K. Kang, Y.F. Zeng, S. Gao, Z.G. Dong and D.M. Guo	685

Study on the Subsurface Damages of Glass Fiber Reinforced Composites F.J. Ma, X.L. Zhu, R.K. Kang, Z.G. Dong and S.Q. Zou	691
A Modified Surface on Titanium Alloy by Micro-Blasting Process Y. Lin, C.F. Huang, H.C. Cheng and Y.K. Shen	696
Crack Filling of Cover Glasses by Sol-Gel Coatings K.J. Ma, H.H. Chien, S.W. Huang, S.C. Chen and C.L. Chao	700
A Study of Mechanical Properties and Material Removal of Polycrystalline Tungsten via Nanoindentation and Nanoscratch C.W. Kang and H. Huang	706

Chapter 16: Tribology in Manufacturing

Friction Evolution in Running-In of Sliding Wear of Cast Iron Processed in Gleeble Q. Zhang, Z.Y. Jiang, D.B. Wei, G.L. Xie and J.T. Han	713
Frictional and Wear Behavior of Micro-Crystalline and Nano-Crystalline Diamond Films X.C. Wang, S.L. Chen, B. Shen and F.H. Sun	719
Dry Sliding Wear of As-Cast and Thermomechanically Processed Low Chromium White Cast Iron X.J. Gao, Q. Zhang, D.B. Wei, S.H. Jiao and Z.Y. Jiang	725

Chapter 17: Truing, Dressing and ELID

Study of Grinding Force for Internal Cylinder of Ultrasonic ELID Composite Grinding B. Zhao, Y.M. Li and P.Y. Bian	733
Research on ELID Grinding Performance of GCr15 Steel J.L. Guan, X.Q. Ma, X.H. Zhang, L.L. Zhu and Z.W. Wang	740
Experimental Study on Dry Electrical Contact Discharge (ECD) Dressing Parameters of Coarse Diamond Grinding Wheel Y.J. Lu, J. Xie, K.K. Wu, J. Cheng and L.Z. Cheng	746
Visualization of 3D Topography of Grinding Wheel Surface Dressed by Rotary Diamond Dresser A. Kubo, M.A.K. Chowdhury, S. Noda, J. Tamaki and A.M.M. Sharif Ullah	751
