## Preface

|                                                                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Effect of Ecological Oils on the Quality of Materials of Hydraulic Pump Components</b><br>R. Majdan, Z. Tkáč, R. Abrahám, B. Stančík, M. Kureková and R. Paulenka | 1   |
| <b>Study of the Impact of Synthetic Fluid on the Lifetime of Hydraulic Pump</b><br>J. Kosiba, Ľ. Hujo, J. Tulík and M. Rašo                                          | 7   |
| <b>Comparison of Two Designs of Differential Planetary Gear with Differential in Output</b><br>J. Jablonický, Ľ. Hujo, Z. Tkáč, J. Kosiba and A. Žikla               | 13  |
| <b>Effect of Chemical Degreasing on Corrosion Stability of Components in Automobile Industry</b><br>Š. Álló, V. Kročko, M. Korenko, Z. Andrássová and D. Földešiová  | 19  |
| <b>Seven New Quality Management Tools</b><br>Z. Andrássová, J. Žarnovský, Š. Álló and J. Hrubec                                                                      | 25  |
| <b>Impact of Insufficient Cleaning on the Quality of Molybdenum Layer Applied by Thermal Spraying</b><br>M. Bujna, M. Prístavka and P. Kaplík                        | 35  |
| <b>Determining the Capability of Production Equipment</b><br>M. Ferancová, J. Hrubec, P. Krchnák and D. Földešiová                                                   | 41  |
| <b>Analysis of Physical Effects in Cutting Machining</b><br>J. Žitňanský, J. Žarnovský and J. Ružbarský                                                              | 51  |
| <b>Optimization of Parameters in the Compression Moulding Process of Thermoset Products</b><br>J. Ružbarský and J. Žarnovský                                         | 61  |
| <b>Thermoset Composite on Basis of Recycled Rubber</b><br>P. Valášek, J. Žarnovský and M. Müller                                                                     | 67  |
| <b>Comparison of Cooling Variants by Simulation Software</b><br>J. Dobránsky, R. Mikuš and J. Ružbarský                                                              | 75  |
| <b>Analysis of Risk Using FMEA</b><br>D. Földešiová, M. Korenko, M. Ferancová and P. Kaplík                                                                          | 81  |
| <b>Application of Six Sigma Methodology in Production Organization</b><br>M. Korenko, P. Uhrin, P. Kaplík and D. Földešiová                                          | 87  |
| <b>Use of 8D Method to Solve Problems</b><br>P. Kaplík, M. Prístavka, M. Bujna and J. Viderňan                                                                       | 95  |
| <b>Quality and Reliability of Manufacturing Process in Automation of Die-Casting</b><br>M. Kotus, T. Holota, T. Pauliček, M. Petrík and M. Sklenár                   | 103 |
| <b>Effectiveness of Hard Turning</b><br>M. Adamik, R. Drlička, M. Matúš and J. Žitňanský                                                                             | 109 |
| <b>Resistance of Hard-Facing Deposit Created by Laser Surfacing Technology</b><br>T. Pauliček, M. Kotus, M. Daňko and P. Žúbor                                       | 117 |
| <b>Boron Effect on Mechanical Properties and Structure of Steel STN 41 5230 Surface Layer</b><br>I. Kováč, R. Mikuš, R. Drlička and J. Žitňanský                     | 123 |
| <b>Use of Alternative Fuels at Selected Types of Vehicles</b><br>Z. Záležák, R. Bernát and N. Kecskés                                                                | 131 |
| <b>Design of Laboratory Test Device for Evaluating the Lifetime of Hydraulic Components of Tractor Three-Point Hitch</b><br>Ľ. Hujo, Z. Tkáč, J. Tulík and V. Hajdák | 137 |
| <b>Impact of Technological Factors on Dosing of Metal at Die-Casting</b><br>M. Kotus, D. Matisková and L. Mura                                                       | 143 |
