

Table of Contents

Preface and Organizing Committee

Chapter 1: Polymer Materials and Composite Materials

Effect of Polymeric Combinations on Mucoadhesive and Swelling Properties of Orabase Gel Formulations

A. Priprem, C. Nukulkit, N.P. Johns, T. Damrongrungruang, N. Wongsangta and E.O. Benjavongkulchai 3

Power Law and Stretched Exponential Responses in Composite Solids

R. Suárez-Antola 9

Facile Synthesis and Optical Properties of TiN/Al Composite Powders with Nano/Microstructure by Ball-Milling Method

D.P. Zhang, D. Xu, C.H. Lu, Y.R. Ni and Z.Z. Xu 17

A Study of Reaction Viscosity Changes in Electronic Packaging with Different Nanoparticle Strengthened Epoxy Matrices

H.L. Chang, C.M. Chen and C.H. Chen 23

The Effects of Chemical Resistance for Nanocomposite Materials via Nano-Silica Addition into Glass Fiber/Epoxy

H.L. Chang, C.M. Chen, K.L. Lin and B.K. Chang 28

Influences of Nano-Silica Addition on Diluent/Epoxy Mechanical Properties

H.L. Chang, C.M. Chen and C.H. Chen 34

Effects of Nano-Silica Addition on Water Absorption of Glass Fiber/Epoxy Composite

H.L. Chang, C.M. Chen and C.H. Chen 40

Effects of Nano-Silica Addition and Reactive Diluent Addition on Dynamic Mechanical Properties of Epoxy Nanocomposites

H.L. Chang and C.M. Chen 46

Structural Reorganization in Thin Films of High Molecular Weight Block Copolymer Self-Assembly

S.M. Park, H.J. Ahn, S.W. Kim, J.S. Gong and D.Y. Ryu 53

The Research of AlN-Mo Nano Composite Ceram

C.Y. Xin 57

Formation of Thermally Induced Defects in Silica Optical Material

Z.Y. Xiao, J.X. Wen, W.Y. Luo, W.K. Wu, R.X. Gong, J.C. Yin and T.Y. Wang 62

Properties and Application of Alumina Reinforced Aluminum Composite

Y.N. Li, W.Z. Zhang, Y.F. Cao and T.E. Zhang 68

Preparation and Characterization of Diatomite Supported Cu-Doped TiO₂ Photocatalysts

Y.X. Deng, C.C. Liu and G. Yang 73

Fabrication of Nano-branched Coaxial Polyaniline / Polyvinylidene Fluoride Fibers via Electrospinning for Strain Sensor

R. Huang, Y.Z. Long, C.C. Tang and H.D. Zhang 79

Excellent Electrochemical Performance and Thermal Stability of LiNi_{0.5}Mn_{1.5}O₄ Thin-Film Cathode Prepared by Pulsed Laser Deposition

Y. Wang, G. Yang, Q. Peng and P.X. Lu 83

Investigation on Soldering High Volume Fraction SiC Particle Reinforced Aluminum Metal Matrix Composites

P. Wang, Q. Li and J.T. Niu 90

The Preparation and Properties of the Conductive and Magnetic Tin-Coated Polyester Fibers for Clothing

Y.M. Sun, Y. Cheng and J. Li 96

Preparation and Characterization of Porous Carbon/Nickle Nanofibers by Electrospinning

D.W. Gao, Q.F. Wei, C.X. Wang, G.L. Liu, X.M. He, L.L. Wang, T.C. Zhou, B.B. Yuan and X. Zou 101

Devitrification and Recrystallization of Aqueous Glycerol and PEG-600 Solutions with Nanoparticles F.K. Lv, B.L. Liu and W.J. Li	105
Coupling {001} Facets Dominated Anatase TiO₂ Nanosheets with CNTs for Efficient Photocatalyst W. Wang, Y.R. Ni, C.H. Lu and Z.Z. Xu	111
Comparison of Ni_{0.8}Cu_{0.2}O_x Anode Material Prepared with Sol-Gel Method and Ni_{0.8}-Cu_{0.2}-Coated YSZ Composite Anode Material Prepared with Polyol Method H.X. You, B. Qu and L. Cao	116

Chapter 2: Metals Materials and Building Materials

Thermo-Mechanical Behavior Analysis of Pressure Infiltration Casting Process for Manufacturing Open-Cell Metal Foam J.F. Wang, Y.S. Su and X.L. Gong	125
DC Magnetron Sputtering of B2 Phase FeAl(111) Single-Crystal-Like Films and Hydrogen Damage Behavior T. Tang, Y. Liu, Q. Li, J.L. Cao, Y.Z. Liu, H.W.L. Chan and Y. Wang	131
Investigations on Residual Stress Distribution for 2A02 Aluminum Forgings J. Cao, C.F. Li, Y. Wang, X. Sun, S.Y. Wang and M.C. Zhang	135
Effect of Pile-Up on Nanoindentation Measurements of Polycrystalline Bulk Metals R.A. Mirshams and A.K. Srivastava	143
The Experiment Study on Adherence Capability between New and Old Concrete of Pavement X.H. Wang, Y. Zhang and J.H. Luo	151
Corrosion Behaviors and Mechanical Properties of CrN Film P. Wongpanya, S. Tunmee, C. Euaruksakul, P. Songsiririthigul and N. Witit-Anun	155
Effect of Process Parameters on Porosity of Intermetallic NbCr₂ Porous Materials X.L. Liu, C. Fang, X. Wang and H.Z. Zheng	164
Numerical Simulation Study on the Cement-Based Absorbing Material R.J. Chen, Y. Zhang and B. Wang	169
Underground Engineering Avoid Incision and Reinforced Technology and Engineering Application R.J. Chen, Y. Zhang and H.W. Liu	174
Experimental Research on Aluminum Foam Dynamics Performance B. Wang, Y. Zhang and R.J. Chen	178
Bulk Permanent Magnet with Enhanced Anisotropy Fabricated by Magnetic Annealing from Fe-B-Nd-Nb Bulk Metallic Glass Precursor Y. Cao and G. Chen	182
Mixed-Mode I/III Fracture Characterization of Aluminum Alloy R. Ravichandaran and G. Thanigaiyarasu	187
The Oxidation Mechanism of FeCrAl Alloy Added with Rare Earth Y from First-Principle Study G.Y. Zhang, R. Chu, H. Zhang and C.M. Liu	192
Development of Integrated Experiment Program for Marine Concrete Durability I.S. Yoon	198
A Study on Chemical Foaming Geopolymer Building Materials T.Y. Yang and C.C. Chien	202
Research on Absorbing Property of Cement-Based Material Blending with Nano-TiO₂ and Steel Fibers Y. Zhang, X.H. Wang and J.H. Luo	207
Research on Absorbing Property of Three Kinds of Cement-Based Material Blending Compositions Y. Zhang, J.H. Luo and X.H. Wang	212
Increasing Tool Life by AlCrTiSiN Film P. Wongpanya, S. Surinphong and J. Rujisomnapa	217
Study of Oil Displacement Performance of Hydroxyl Sulfobetaine Surfactant P. Yue, F. Zhang and H.L. Fan	223

Long Term Monitoring of Performance Characteristics of the Pavement Test Track D. Čygas, A. Laurinavičius, A. Vaitkus and Z. Perveneckas	229
--	-----

Chapter 3: Biochemistry Materials and Engineering

Efficacy Comparison of On-Site Preparation of 5% Lidocaine Niosome Dispersion and Benzocaine/Tetracaine Gel A. Priprem, J. Paphangkorakit, S. Limsitthichaikoon, S.R. Sermswatsri, W. Pitiphat, P. Thaiprasong and P. Patchadee	237
Tripod-Like β-NaYF₄: Ln³⁺ (Ln = Yb, Er, Tm, Ho) Nanocrystals with Multicolor Upconversion Luminescence M.Y. Ding, C.H. Lu, L.H. Cao, Y.R. Ni and Z.Z. Xu	243
Culture Conditions of a Mycorrhizal Fungus and its Post-Inoculation Microbial Effect N. Gong, Z. Yang, T. Yang, J. Xiao, N. Wang, X. Chen and Y. Ma	249
Studies on Lignocellulose Degradation by Rumen Microorganism G.R. Wang and Y.L. Duan	253
New-Type Biosensor Based on Multiple Total-Internal Reflections in Heterodyne Interferometry S.F. Wang, C.H. Hsieh, Y. Chu, Y.P. Liao, S.R. Lay, F.H. Kao and A.L. Liu	260
Heat Treated and As-Plated Electroless Duplex Ni-P/Ni-B Coatings: Evaluation of Hardness and Wear Resistance G. Dil, A. Göksenli, C. Calli, F. Muhaffel, A.I. Aydeniz, A. Yildiz and B. Yüksel	264
Development of Novel Bio-Degradable Electrolyte Based on Polylactide (PLA) for Lithium Rechargeable Battery K.W. Chew	270
Improvement of Acid Clay Using Calcium-Rich By-Product Recovered from Petroleum De-Sulfur Operation C.C. Chien, S.W. Chang-Chien, M.C. Wang, Y.C. Liao, Y.S. Lu and T.Y. Yang	276
Ecotoxicity of Nanomaterials on the Basis of Clay Minerals B. Pjurova, H. Raclavska and H. Skrobankova	282

Chapter 4: Energy Science and Environmental Engineering

Design and Test of a Lab-Scale Vanadium Redox Flow Battery Cell Considering Electrolyte Feeding Structure for Solar Energy A.K.Y. Yoon, H. Choe and Y.S. Yoon	291
Solid-State Dye-Sensitized Solar Cells Using Mesoporous TiO₂ Films Fabricated with Amphiphilic Rubbery Random Copolymer D.J. Kim, S.H. Ahn, D.K. Roh and J.H. Kim	297
Research on Anti-Interference of Measurement-Control Device in Substation Automation System Q. Gao, J.J. Du and Q.Y. Li	302
Stand-Alone Photovoltaic Based on In-Phase Voltage Injection for Electroplating Industry Factory N. Watanakul	306
Performance of Bi-Facial PV Modules in Urban Settlements in Tropical Regions C. Pisigan and F. Jiang	312
Thermo-Hydraulic Performance Evaluation of Inclined Vortex Generators A. Akcayoglu, H. Cebeci and C. Nazli	317
Garbage Incineration and Intelligent Fusion Strategy of Secondary Pollution Control Y.M. Ni and L. Li	323
Parameters Influencing the Utilization of Composts for Energy Production K. Raclavsky, O. Zajonc, L. Kovalova and R. Kovarik	329
The Composition of Humic Acids Separated from Compost Prepared from Biologically Degradable Waste J. Kucharova, K. Raclavsky, R. Kovarik and S. Bielešzova	335

Silicon Nanowires Based Solar Cell Using Native Oxide and Silicon Nitride Bi-Layer Passivation X.X. Lin	341
On Optimal Functioning of the Aeolian Electro-Power Systems C. Chioreanu and M. Babescu	345
Upon Power Loses due to Current Harmonics in a Fotovoltaic System, Operating at Maximum Power Point C. Chioreanu	352
Dump Load Shedding and Slope Angle of Optimization Design S.G. Sun, Y.Y. He and X.P. Xin	358
Water Status and Prospects for Remote Sensing Y. Hu	363
Housing Development, Energy Consumption and Energy Prices G.L. Zou and K.W. Chau	367
Noise Source in Automobile and Control Method for Environmental Protection J.X. Yuan and H.M. Fu	373
Numerical Simulation on Flow Field inside the Drainage Valve of the Natural Gas Pipeline Z. Deng, H.Y. Deng and M. Xie	377
Improved Variety Populus Alba×Populus Bolleana and its Parents Growth Characteristic P.J. Li, A.A. Bula, W.Y. Wang and R.Q. Jia	384
Study on the Charging Characteristics of Lithium-Ion Batteries for Electric Vehicles Regenerative Braking S.G. Song, X.P. Li and Z.C. Sun	389
Theoretical Calculation of the Detonation Parameters of Nitropyrazoles Explosives Y.J. Li, Y.X. Li, Y.H. Wang, D.L. Cao, Z.M. Jiang, X.J. Wang and Q. Su	395

Chapter 5: Manufacturing Science and Engineering

Effective Use of CA System for Control of Water-Jet Cutting Technology J. Novak-Marcincin and L. Novakova-Marcincinova	403
Calculation of the Size of the Sand Resistance Machine X.H. Wang, J.H. Luo and Y. Zhang	409
Simulation of Generated Heat by Friction of Explosion-Proof Elevator Ropes Q.P. Zhang and J.R. Wan	413
Numerical Simulation and Analysis of Thermal Energy Generated by Friction on Explosion-Proof Elevator Q.P. Zhang and J.R. Wan	421
Control of Hybrid Stepping Motor Drive Using Computational Verb PID Controllers X.Q. Zheng	428
The Design of the Footrest for the Auto Seat Based on Theergonomics L. Zhan, J.G. Sun and J.G. He	435
Discussion the Re-Use Precision Locknut of the Machine Tools Spindle in the Vertical Assembly Characteristics C.M. Chen and C.H. Chen	441
Friction Characteristics of Clasp Locked Precision Locknuts under Different Conditions C.M. Chen and C.H. Chen	447
Effects of Parameters on Flutter of a Wing with an External Store J. Xu and X.P. Ma	453
Effect of Tool Shape on Galling Behavior in Plate Shearing T. Yamada, Z.G. Wang and T. Fukao	460
A Combined Physiotherapy Ultrasound and Electrical Shock Device (COMPO) Design A. Faraji and T. Rezvani	466
Interactive Body Balance System (IBAS) Design A. Faraji, N. Alam and N. Fatourae	472
Structures Analysis and Optimum Design of the Large Stroke Two-Axis Fast Tool Servo J.Q. Wu, Q. Zou, T. Wang, Q.C. Zhang, Y.L. Zhang and J.N. Yao	477

Study of Spindle Current Signals for Tool Breakage Detection in Milling L.N. Lian, B. Li and H.Q. Liu	482
Interference-Fit Joining of Aluminium Tubes by Electromagnetic Forming M. Geier, M.M. José, R. Rossi, P.A.R. Rosa and P.A.F. Martins	488
The Discussion of Rotor Guide Channel Length of Vertical Shaft Impact Crushing Test Machine W. Guo, F. Zhao and S.J. Li	494
Research on the Core Method of Lean Construction Management Mode and its Implementation J. Wang and R.Q. Ma	500
A Study on the Applicability of Direct Evaporative Cooling Air Conditioner Used in Lanzhou J. Zhang and Z.D. Zheng	506
The Research of the Plane Receiving Array in Offset Parabolic Reflector Antenna with Multi-Beam at Millimeter-Wave Band Q. Hu, R. Gao, H. Chen and Z.H. Luo	510
Production Capacity Allocation for Multi-Generational Products Based on Decision Tree Method L. Chen, H. Yang and H.M. Song	514
An Improved Design Method for Automotive Powertrain Rubber Mounts M. Lu	520
Computational and Mathematical Modelling during Calculation of Margin of Safety as the Way of Decrease in Expenses of Energy during the Operation of Combined Designs M.S. Yakhnenko, N.V. Snetkova and A.V. Mironov	526
Development of Temperature Control System of Multi-Function and All-Electric Rheometer X.G. Li, Y.J. Liu, W.Y. Liu, H. Tan, X.Y. Zhou and Y. Zeng	531
Size Design of Capillary and Barrel of Multi-Function and All-Electric Rheometer X.G. Li, Y.J. Liu, Y. Chen, X.Y. Zhou, H. Tan and L. Mao	536
A Convenient Method for Calculating Internal Force of Rod for Tower Crane Y. Xue, D.Q. Wu, B. Kou and N.L. Lu	541
Analysis of China PV Application Market Development Support Policy Based on NPV Model Y.H. Zhang and H.M. He	547
Analysis on Kinematic of Rod on Rotor with Sine Curve Revolving Speed in Twin-Rotor Cylinder-Embedded Piston Engine H. Chen, C.Y. Pan and T.A. Zou	553
Vibration Fatigue Analysis of the Structure under Thermal Loading M. Zheng, F. Shen and P. Luo	559
Research of a New Theoretical Model of Innovative Design Methodology H.B. Zhang, X. Xiong, P.L. Zhu and F.R. Kong	565
A New Approach to Characterize Moisture Management Properties of Diaper P.C.L. Hui, N. Liu, Y. Yu, T.M. Choi and S.F. Ng	571
Numerical Simulation of Aerodynamic Performance of Film Cooling on a Flat Plate with Surface Roughness J.F. Wang, Y.B. Ji and S.S. Zang	576
Analysis on Induced Stress Field by Pore Pressure Change of Sandstone Reservoir J. Jin, J.D. Liu and G.M. Zhang	582
The Theoretical and Experimental Research on Accelerated Life Test of Collapsible Fabric Tank Storage Life Based on Reliability S.F. Zhang, T.M. Liu, Q.X. Zhang, X.M. Shu, S.Q. Song and Z. Han	590
Analysis on Avoid Incision in Underground Engineering Reinforcement Technique against Cutting Resistance B. Wang, Y. Zhang and H.W. Liu	596
Applying Support Vector Machines in Rebound Hammer Test Y.R. Wang, W.T. Kuo, S.S. Lu, Y.F. Shih and S.S. Wei	600
Effect of Blank Shape and Size on the Forming Quality of Thread Shaft Rolling in Cross Wedge Rolling H.J. Yan, H.E. Mao, G.C. Li, X.X. He, J.P. Liu and Z.H. Hu	605

Chapter 6: Mechatronics and Microelectronics

Design and Realization of Robot Workplaces with Virtual and Augmented Reality Application

J. Novak-Marcincin and M. Janak 613

Algorithms for Dynamic Hardness Measurements by Scratch Testing in the Submicron and Nanometer Scale

N. Lvova, K. Kravchuk and I. Shirokov 619

Design of Automatic Scraping System

H.F. Tong, W. Liu, Y. Chi and W. Wang 625

The Spectral Element Method for the Steklov Eigenvalue Problem

Y.J. Li, Y.D. Yang and H. Bi 631

Linear Matrix Inequality and its Application in Control Theory

H.Y. Wang 636

Study of Fault Arc Protection Based on UV Pulse Method in High Voltage Switchgear

C. Xu, J.X. Sun, J.G. Wang and Y. Luo 641

Intelligent Aquaculture Monitoring System Based on Fieldbus

L. Zhou and Y. Xing 646

A Survey on Randomized Sampling-Based Path Optimization Methods

F.Y. Yan, F. Wu, F. Peng and Z.J. Zhu 652

Chapter 7: Computer and Internet Application

Three-Dimensional Structure Modeling of Lishui Depression, East China Sea Basin

F. Xu, X. Li, J.L. Zhang and G.X. Zhang 663

A Review on the Bin Packing Capacitated Vehicle Routing Problem

Q. Zhang, L.R. Wei, R. Hu, R. Yan, L.H. Li and X.N. Zhu 668

A Novel Model for Multi-Parametric Load Balance in Grid Computing

Q.S. Liu 674

Research on Piano Music Signal Recognition Based on Short-Time Fourier Analysis

X. Chen and J. Tang 680

Application of Operator Libraries on Laminate Strength Optimization of Composites

G.D. Wang, J. Wang and H. Chen 686

Virtual Learning Technology and Materials in Malaysian Higher Education

J.M.S. Lam, Y.S. Fern, V.S.W. Chong, T.S. Huat and O.Y. Leng 693
