

Table of Contents

Preface, Committees and Sponsors

Chapter 1: Degradation of Building Materials

Degradation of PVC-P Membranes in Flat Roof Compositions S. Šutliak	3
Progressive Ways of the Waterproofing of Buildings M. Držka	7
Analysis of Effects Influencing Protruding Building Components M. Držka	11
Facade Rendering Disorders of Building Envelopes and the Classification the Underlying Factors of Creation Failures A. Pernišová	15
Damage of the Wood by Biological Factors, Fire and Methods of its Protection T. Miklósová	19

Chapter 2: Energy Saving and Ecological Buildings

Classification and Basic Economic Quantification of Renewable Energy Sources for the Sustainable Architecture Design B. Bielek, M. Bielek and J. Hřeš	25
Common Characteristics of Zero Energy Buildings in Relation to the Energy Distribution Networks B. Bielek and M. Bielek	31
New Physical-Energy Quantification of Buildings in the Development of the Technology in Architecture for a Sustainable Society M. Bielek, B. Bielek and J. Hřeš	35
Energy Efficiency of Building Envelopes R. Jedinák	39
Analysis of Energy Balance in Elementary School Building M. Kamenský, D. Katunský and M. Bagoňa	43
Development of a Mathematical Model for the Three-Dimensional Accounting of Economic Feasibility of Energy-Efficient Buildings R. Leuck and A. Puškár	47
The Impact of the Dynamic Facade Elements on the Energy Balance of the Reference Building in Winter Z. Nagy, A. Moravčík and M. Palko	52
Influence of Facade Colour on Yearly Energy Need D. Jurík and I. Chmurný	57
Aesthetic and Technical Problems of Renovated Residential Buildings Facade - Prevention of Defects K. Minarovičová and N. Antošová	62
The Results of Experimental Chamber Temperature Measurements for a Light-Weight Wooden Envelope M. Labovský, M. Lopušniak and J. Šimiček	67
Renewal of Panel Residential Houses from the Point of View of Energy Criterion V. Gašparovičová and R. Mend'an	71

Chapter 3: Thermal Performance of Building Materials and Constructions

Long Time Testing of Temperature Parameters of Wooden Lightweight External Walls P. Durica, M. Štůňová, R. Ponechal and M. Cangár	77
---	----

Long Time Testing of Temperature Parameters in Selected Windows P. Ďurica, M. Ďuriníková, J. Rybárik and D. Štaffenová	81
Dynamic Thermal Properties of Uninsulated Rammed Earth Building Envelopes M. Bagoňa, C. Stone and J. Šimiček	85
Renewal of Envelope Constructions of Panel Residential Houses as a Tool for Elimination of Hygienic Problems of Thermal Bridges R. Mend'an and B. Vavrovič	89
Physical Assessment of a Window Using a Computer Simulation M. Palko	93
Importance of Envelope Construction Renewal in Panel Apartment Buildings in Terms of Basic Thermal Properties B. Vavrovič	97
Program for Quantification Temperature and Aerodynamic Mode of Double-Skin Facade M. Palko	102
Influence of Exact Values of Increase of Thermal Transmittance because of Thermal Bridges on Energy Need for Heating of Panel Residential Houses in Original State and after Renewal R. Mend'an	108
Valuable Architectural Refurbishment of Prefabricated Houses as a Part of their Complex Renovation K. Minarovičová and R. Mend'an	112
Material Properties of Windows in the Building Energy Concept A. Palková and M. Palko	116
Condensation of Water Vapor in the Functional Gap of Wooden Window A. Palková and M. Palko	120
Comparison of Thermal Bridges Calculate Method through Typical Details in Low Energy Designing P. Buday, R. Ingeli and B. Vavrovič	126
Comparison of Thermal Bridges Calculate Method through Window Jamb R. Ingeli	130
Diffuse Characteristics of Window Frame Gasket System Ľ. Kamenický, M. Palko and A. Puškár	134

Chapter 4: Aerodynamic Characteristics of Buildings and Construction

Development of the Boundary Layer in the Rear Section in BLWT STU - Trnavka M. Magát, I. Olekšáková and J. Žilinský	141
The Measurement of Pressures on the Cube Model in VZLU in Prague and BLWT Bratislava P. Lobotka, M. Magát and J. Žilinský	145
Comparison of HAM Simulation with Different Reference Years for Bratislava P. Juráš and J. Žilinský	149
Double-Skin Facade in Flotran CFD M. Palko	154
Theoretical Model Verification by an Experimental Aerodynamics A. Puškár and M. Vanc	160
Applied Aerodynamics in Building J. Žilinský and M. Vanc	164

Chapter 5: Indoor Air Quality and Air Exchange

Influence of Renewal of Panel Residential Houses on Air Change Rate of a Building M. Pavčeková and R. Mend'an	171
The Impact of the Installed Inlet Vent Flaps in the Window Structure on the Overall Acoustic Properties of the Window V. Majsniar, B. Bielek and D. Szabó	175

Simulation of Natural Ventilation Taking into Account the CO₂ Concentration and Room Temperature D. Čehel'ová, M. Janák and B. Bielek	181
--	-----

Chapter 6: Fire Safety Materials, Spaces and Construction

Fire Dynamic Simulation and Impact of Water Sprinkler Systems to Heat Flow M. Juričková	187
Timber Buildings Height and Number of Floors in Slovakia J. Olbřímek, D. Jankovič and S. Leitnerová	191
Glass as a Fire Construction I. Mikolai	195
Fire Safety of Sacral Buildings I. Mikolai	199
Opening Constructions in a Relation to Fire Safety of Building I. Mikolai	202
Fire Stations and Firehouses Deployment Modeling J. Jurdík and I. Mikolai	206
Divide of Cavity in Timber Frame Construction S. Leitnerová, J. Olbřímek and D. Jankovič	211
Air Exchange across Staircase Windows in Protected Escape Route in Time of Fire M. Reháková and I. Mikolai	215
Requirements for Surface of Countervailing Skid Resistance Staircases M. Gieciová and T. Kittová	219

Chapter 7: Noise Protection

Types of Doors and its Impact on Airborne Sound Insulation D. Dlhý	225
Verification of Calculating Sound Insulation of Building Structures According to EN 12354 with the Results of Measurements in Site D. Dlhý	229
The Effect of Free Joints on Sound Insulation of Constructions D. Dlhý	233
The Influence of the Shape Space on the Scattering of the Sound Energy A. Pernišová and D. Dlhý	237
Comparison Measuring Methods of Sound Insulation of Double Transparent Facade - NBS Bratislava D. Urbán, P. Zaťko, D. Dlhý and P. Tomašovič	241
Impact Sound Insulation Concept for Lightweight Timber Floor J. Medved', B. Ingeleare and L. de Geetere	245

Chapter 8: Daylight Conditions

Building Information Modeling with Static and Dynamic Daylight Analysis M. Jamnický	255
Occurrences of Standard Skies and Luminuos Turbidity Factor in Bratislava M. Fabian and S. Darula	259
