

# Preface

2020 International Conference on Materials, Computer Engineering and Education Technology (MCEET 2020) was held in Sanya, China, during Dec. 19-20, 2020. MCEET 2020 was sponsored by Modern International Green Culture Communication Association (MIGCCA), and the conference proceeding published by Trans Tech Publications Ltd. MCEET 2020 provided an excellent international forum for sharing knowledge and results in materials science, machinery design, robotics and mechatronics, computer engineering, information technologies, and education. The aim of the conference was to provide a platform to the global researchers and practitioners from both academia as well as industry to meet and share cutting-edge development in the fields.

All the accepted papers were subjected to strict peer-reviewing by 2–6 expert reviewers. We hope this book will provide the readers not only a broad overview of the latest research results, and give the readers a valuable summary and reference in these fields.

MCEET 2020 Organizing Committees would like to express our sincere appreciation to all authors, speakers, and participants of this conference for their contributions to this book. We would like to extend our thanks to all the reviewers for their constructive comments. Especially, we would like to thank the organizing committee for their hard work.
