## Preface

## Chapter 1: Materials and Materials Processing Technologies

|                                                                                                                                                                                                                                 |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Taguchi Analysis of MRR and PC for Sustainable Machining of Ti6Al4V Alloy Using WEDM Process</b><br>D. Devarasiddappa, M. Chandrasekaran and K. Palanikumar                                                                  | 3  |
| <b>Wear Characteristics Optimization of Al6061-Sugarcane Bagasse Ash Metal Matrix Composite Using Taguchi Method</b><br>A.K. Virkunwar, S. Ghosh and R. Basak                                                                   | 10 |
| <b>Fabrication and Mechanical Properties of Hybrid Aluminum Metal Matrix Composite by Using Stir Casting Process</b><br>S. Srikanth, C. Venkatarao and T. Raviteja                                                              | 17 |
| <b>Effect of Silicon Carbide Boron Carbide and Fly-Ash Particles on Aluminium Metal Matrix Composite</b><br>C. Thirupathaiah and S.R.K. Hudgikar                                                                                | 26 |
| <b>A Brief Review of Experimental Investigations and Analytical Development of Powder Mixed Electric Discharge Machining (PMEDM)</b><br>S. Bhowmick, G. Majumdar and A. Bandyopadhyay                                           | 31 |
| <b>Experimental Determination of Anisotropic Properties and Evaluation of FLD for Sheet Metal Operations</b><br>A.C.S. Reddy, B. Sandeep, J.S. Kumar and B. Sanjanna                                                            | 39 |
| <b>A Review - Black Oxide Coating on Metal Substrates of Steels, Aluminium, Magnesium and Copper</b><br>A. Manoj, M.M. Basha, S.M. Basha and M.R. Sankar                                                                        | 46 |
| <b>Structural and Dielectric Properties of Calcium Bismuth Titanate (CaBi<sub>4</sub>Ti<sub>4</sub>O<sub>15</sub>) Ceramics</b><br>H. Basireddy, G.R. Thukkaraju, R.K. Borra and S.R. Thota                                     | 54 |
| <b>Response Surface Modeling and Optimization of Cutting Temperature in Turning of AISI 52100 Hardened Alloy Steel under Minimal Cutting Fluid Application</b><br>S. Mane and S. Kumar                                          | 60 |
| <b>Effect of Fiber Length and Content on the Mechanical Properties of Pineapple Leaf Fiber Reinforced-Epoxy Composites</b><br>M. Mittal and R. Chaudhary                                                                        | 68 |
| <b>An Experimental Study on the Effect of Reverse Two-Step Sintering on Aluminium-Silicon Carbide Metal Matrix Composite</b><br>R. Raj Mohan, R. Venkatraman, S. Raghuraman, B.G. Chidambaram, S. Balakrishnan and S. Vishnuram | 78 |
| <b>Manufacturing, Microstructural and Mechanical Characterization of Stir Cast Aluminium 7075/SiC Metal Matrix Composite</b><br>M.S. Surya, G. Prasanthi and I. Chidwilas                                                       | 84 |
| <b>Optimization of Process Parameters for Plasma Sprayed Lanthanum Zirconate TBCs on Nickel Based Superalloy</b><br>R. Keshavamurthy, B.E. Naveena, T. Ramesh and N.K. Shashikumara                                             | 90 |

## Chapter 2: Engineering Design and Simulation

|                                                                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Simulation Modelling and Analysis of Due Date Assignment Methods and Scheduling Decision Rules in a Flexible Manufacturing System</b><br>V.V.M. Anees, K.P.A. Nazar and R. Sridharan | 99  |
| <b>Modeling and Analysis of Surface Roughness with Statistical and Soft Computing Approach</b><br>L.B. Abhang and M. Hameedullah                                                        | 109 |
| <b>Experimental Investigation on a PCM Based Thermal Energy Storage System for a VCR System</b><br>S.R. Basha                                                                           | 116 |

|                                                                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Review on Energy Enhancement Techniques of Wind Turbine System</b><br>K.R. Kumar and M. Selvaraj                                                                                                | 121 |
| <b>Damping Performance of Polychloroprene Rubber for Unconstrained Damping Applications</b><br>P.K. Mallipudi, P. Jyothi, N. Ramanaiah and V.V.S. Bhaskara Raju                                    | 131 |
| <b>A Gaussian Process Based Model for Air-Jet Cooling of Mild Steel Plate in Run Out Table</b><br>P. Bachhar, A. Kundu and P. Mandal                                                               | 137 |
| <b>Real Time Remote Monitoring, Control and Reporting Dashboard System to Avoid Industrial Disasters Using Industrial IOT</b><br>L.G. Kumar, G.H. Reddy, P. Venkata Sai, S. Irfan and K.P. Pujitha | 143 |
