

Table of Contents

Preface

Chapter 1: Waste Treatment and Degradation

Utilisation of Acidithiobacillus Ferrooxidans Bacteria for Bioleaching of Waste Materials from Silver-Bearing Ore Mining I. Janakova, B. Fejfarova, O. Sigut and V. Cablik	3
Geopolymer-Based Solidification/Stabilization of Radioactive Wastes P. Sekely, M. Valica, S. Sekely and M. Hornik	13
Plastics Degradation Process within a Controlled Aqueous Laboratory Setting K. Brožová, J. Halfar, K. Placová and S. Drabinová	27

Chapter 2: Applications of Waste and Natural Materials in Construction

Dependencies between Durability Properties of Concrete with Surface-Treated Recycled Brick Aggregate in Long-Term Monitoring A. Sicakova and S. Kusnir	37
Changes in the Strength Characteristics of Sediment-Based Concrete as a Binder Substitute over Time N. Junáková, M. Bálintová and J. Junak	45
Use of Construction and Demolition Waste in Concrete Production V. Václavík, J. Foltýn, J. Šafrata and T. Dvorský	51
Corrosion of the Cement Mortars Based on Non-Traditional Waste M. Čambál Hološová, A. Eštoková and A. Sicakova	61
Possibilities of Using Concrete and Brick Recyclate as a Substitute for Natural Aggregates R. Hela and K. Křížová	69
Joint Application of Stone Dust and Construction Demolition Waste in the Construction Industry V. Vachuška, D. Vološinová, V. Panov and R. Zapletalová	77
The Potential Reuse of the Material Generated during Tunnelling V. Krenžel, J. Šancer, T. Široký and A. Střasáková	85
Study of Pozzolanic Activity of Selected Waste Materials A. Eštoková and M. Holosova	93
Differences in Characteristic Properties of Silica Sands from Neighbouring Deposits M. Basistova and P. Lichy	101
