

# Preface

The presented proceedings book comprised the selected peer-reviewed full text papers from the 11th Asia Conference on Mechanical and Materials Engineering (ACMME 2023). After three years of virtual conferences, ACMME 2023 returned to an in-person format, which was successfully held in Sapporo, Japan, during June 8-11, 2023. Over three tough years, all of us could only meet and communicate online, and thus it was pleasant and exciting to switch back to the normal order of things. There are no words to express my gratitude to all of the ACMME 2023 participants, committees and organizers.

An online platform for ACMME 2023 was also available so that some of the attendees could attend it virtually. It is indeed a pleasant change after the epidemic that scholars have a choice about the participation mode.

The program included keynote and invited lectures, oral and poster presentations. On behalf of the conference committees and organizers, I would like to thank all speakers for their excellent presentations, and all presenters for the wonderful displays. After a rigorous peer review, papers from different countries were selected for these proceedings. We hope that it will be helpful and beneficial for all readers.

We would like to thank all the review committee members for their hard work in reviewing the papers, thank you for taking your precious time to do that. Thanks are extended to all participants and all committee members for their generous support. We look forward to meeting you again next year!
