Preface

Chapter 1: Green Building Materials

Performance Evaluation of Ultra High Performance Concrete Manufactured with Recycled Steel Fiber A.E. Elrefaei, M. Alsaadawi, M.M. Elshafiey, M. Abdolwahab and A.F. Oan	3
Performance Evaluation of Sustainable High-Strength Lightweight Concrete Incorporating Wastes as Aggregates at Elevated Temperatures A.M. Tahwia, M. Amin, N. Abdelaziz and A.M. Heniegal	15
Sustainable Disposal of Different Solid Wastes as Aggregate for Fabricating Lightweight Concrete: Physio-Mechanical Performance and Durability A.M. Heniegal, M. Amin, N. Abdelaziz and A.M. Tahwia	33
Production of Green Mortar Using Plastic Waste as a Thermal Efficient Building Material M.M. Abd El-Razik, H.M. Shaker, M.M. Kamil and N.A. Taha	51
A Review on the Effect of Marble Powder on Properties of Self-Compacting Concrete M. Amin, M. Hadzima-Nyarko, I.S. Agwa, A.M. Zeyad, B.A. Tayeh, A. Adesina and A.R.G. de Azevedo	61
Geochemical and Experimental Investigations of some Egyptian Volcanic Tuffaceous Rocks as Natural Supplementary Cementitious Materials R.E. El-Shafey, M. Heikal, H. El-Dsoky, G.M. Saleh and A.A. Omar	73

Chapter 2: Design of Energy-Efficient and Environmentally Friendly Buildings

An Innovative Design for Environmentally Friendly Housing Model in Egypt H.A. Helal and R. Fouad	89
Treatment for Facade Building (Opaque Part) due to Climate Change in Various Regions of Egypt: Environmental Assessment of Office Spaces M.M. Abd El-Razik, A. Al-Desouqi, N.K. Bahgat, T.A. Imam and T.M. El-Shazly	97
