## Preface, Committees, Sponsors,

## Chapter 1: Hydrogen Production in Africa

|                                                                                                                                                                                            |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Development and Evaluation of an Alkaline Electrolyzer for Production of Hydrogen and Electrical Energy in a Fuel Cell</b><br>C.I. Igwe, C.H. Achebe, A.E. Chinweze and J.L. Chukwuneke | 3  |
| <b>Design and Analysis of a Supercritical Metal-Water Reactor for Hydrogen Gas Production</b><br>C.I. Igwe, P.C. Eze and M.I. Eze                                                          | 19 |
| <b>A Two-Parameter Computational Thermodynamic Analysis of Hydrogen-Impurity Mixtures in a Repurposed Pipeline</b><br>Y.K. Abubakar, B. Bongfa, E.B. Bongfa, M. Shaibu and A.M. Zumami     | 33 |

## Chapter 2: Solar Energy Conversion

|                                                                                                                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Applications of Natural Rocks as Heat-Storage Materials for Food Drying in Sub-Saharan Africa</b><br>A.B. Tchicaya Loemba, B. Kichonge and T. Kivevele                                                                                             | 43  |
| <b>Performance Analysis of a Photovoltaic System with Thermoelectric Generator and Phase Change Material: An Experimental Approach</b><br>T. Okamkpa, J. Okechukwu, D. Mbachu and C. Mgbemene                                                         | 53  |
| <b>Simulation and Experimental Performance Analysis of Portable Locally-Made Solar-Powered Cooler for Vaccine Storage</b><br>V. Marwa, B. Kichonge, J.R. Selemani and T. Kivevele                                                                     | 65  |
| <b>Design and Assessing the Effectiveness of Solar Disinfection Systems in Treating Rooftop Harvested Rainwater for Sanitation and Hygiene Purposes in Rural Maternal Health Facilities</b><br>D.C. Mussa, P.B. Mbewe, K.G. McGuigan and C.Y. Kambala | 85  |
| <b>The Impact of Protective Devices on Photovoltaic (PV) System Performance and Installation</b><br>C.F. Praise, R.O. Adesina and A. Sall                                                                                                             | 121 |

## Chapter 3: Development of Renewable and Sustainable Energy Production

|                                                                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Mini-Grid Sustainability Framework and its Application to Selected Mini-Grids in Kenya</b><br>M.W. Kausya, R. Nyumba, E.K. Onsongo, D. Kerr and S. Bhattacharyya                                        | 141 |
| <b>Predictive Modelling for Optimizing Wind Turbine Performance and Structural Health Monitoring: Adapting Turkish SCADA Data for Sub-Saharan Africa</b><br>S.A. Siyanbola, O.M. Oluwatade and E.E. Okafor | 155 |
| <b>Modelling and Optimization of Hybrid Photovoltaic-Wind Turbine with Energy Storage System for Autonomous Electricity Generation</b><br>C.P. Iwundu, O.E. Diemuodeke and J.C. Ofodu                      | 165 |
| <b>A Framework for Sizing Solar PV Systems Adaptable to Off Grid Areas</b><br>N.I. Kerina and V. Omwenga                                                                                                   | 175 |

## Chapter 4: Energy Efficiency Solutions in Africa

|                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Off-Grid Renewable Energy Solutions for Agro-Rural Community Development in Nigeria</b><br>N.O. Nwazor, J.N. Aguni and R.O. Okeke | 195 |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|

|                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------|-----|
| <b>Energy Efficiency, Cost-Saving Opportunities and Nearly Zero Emissions Analysis in the Residential Sector</b>     |     |
| O.D. Omakoji, O. Richard and Z. Gil-Christ                                                                           | 205 |
| <b>Energy Auditing for University Energy Management: A Tool for Enhancing Sustainability</b>                         |     |
| J.J. John, A.P. Azodo, E.U. Bawa-Boyi and F.C. Mezue                                                                 | 227 |
| <b>Energy Optimization of Wireless Body Area Network(WBAN) Using TDMA Duty Cycling and Thermal Energy Harvesting</b> |     |
| N.O. Nwazor, J.C. Erowele, R.O. Okeke, E.S. Mbonu and O.M. Horsfall                                                  | 245 |

## **Chapter 5: Materials and Technologies for Environmental Protection**

|                                                                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Decarbonisation in the Transport Sector of Ghana Using Autogas</b>                                                                                                      |     |
| J.A. Osei, R. Adamou, A.T. Kabo-Bah and S. Narra                                                                                                                           | 267 |
| <b>Enhancing Carbon (iv) Oxide Adsorption from Flue Gas Mixture at Elevated Temperature Using Composite of Nanoparticles</b>                                               |     |
| O.E. Ojong, P.D. Benibo, F.I. Abam and S.S. Samuel                                                                                                                         | 279 |
| <b>Harnessing Geothermal Energy for Decarbonization and Sustainable Agricultural Development Using Geotto</b>                                                              |     |
| D. Kata, J. Gatune and I. Kanana                                                                                                                                           | 291 |
| <b>Assessing the Impact of Generator-Related Air Pollution on Stress Levels among Printing Press Workers in Abuja, Nigeria: A Generalized Linear Model (GzLM) Analysis</b> |     |
| S.J. Panwal, N. Wambebe and A.C. Kingsley                                                                                                                                  | 309 |
| <b>Clay-Based Microbial Fuel Cell System for Petroleum Contaminated Wastewater Treatment and Green Energy Generation</b>                                                   |     |
| K.B. Jongman, G. Ayalneh and G. Dagnew                                                                                                                                     | 321 |
