

# Preface

We feel honoured and elated to release the Proceedings of 2024, the 13th International Conference on Engineering and Innovative Materials (ICEIM 2024) and 2024 6th International Conference on Advances in Materials, Mechanical and Manufacturing (AMMM 2024), sponsored by Tokyo Denki University and co-sponsored by Osaka Institute of Technology. These proceedings pertain to the latest R&D efforts of the peers from different corners of this planet. All articles were accepted after double blind reviewing and registered subsequently for presentations at ICEIM2024 and AMMM2024.

The theme of this edition encompassed a broad range of topics within the field of:

1. Additive Manufacturing
2. Machines Research and Design
3. Computational Mechanics

The conference was a unique platform for us to delve into the depths of these subjects, engage in meaningful discussions, exchange innovative ideas, and explore collaborative opportunities across various disciplines. The conference spanned three days, featuring keynote speeches, session keynote lectures, oral and poster presentations by renowned experts, and esteemed scholars showcasing the latest research.

We are confident that your insights and perspectives will contribute significantly to advancing our understanding of these critical areas and fostering international cooperation in innovative materials, mechanical and manufacturing. We hope you found ample opportunities throughout this conference to network, learn, and engage with professionals worldwide. Our aim was to create an environment conducive to intellectual stimulation and personal growth, where every participant feels valued and inspired.

Warmest regards,  
ICEIM 2024 & AMMM 2024
