

Table of Contents

Preface

Chapter 1: Bridges

Static Analysis of Reinforced Concrete Arch Overpasses M. Neradilek	3
Medium Span Footbridge System Using UHPC J. Prchal, M. Holý, J. Prchlík, D. Čítek and J. Marek	17
Simulations and Measurement of Temperatures in Bridge Structures V. Němčic, J.L. Vítek and J. Lukeš	29
Composite Structure of UHPFRC and Normal Strength Concrete with Innovative Shear Connector A. Čítek, J. Prchal, J. Mourek, D. Čítek, J. Marek and J. Kolísko	39

Chapter 2: Concrete Slabs

Comparative Evaluation of Punching Shear Resistance of Flat Slabs Using Experimental Results and the Second Generation of Eurocode 2 with Nonlinear Analysis Ľ. Kormošová, T. Fecko and J. Halvonik	49
GFRP - Reinforced Prestressed Concrete Slabs: Experimental Analysis V. Benko, A. Valášik and A. Kováčová	57

Chapter 3: Beam Structures

Numerical Modelling of Deep Beams with Various Concrete Strength H. Kamal and I. Holly	67
Experimental Verification of the Influence of Axial Force on the Shear Resistance of Prestressed Beams with Shear Reinforcement V. Borzovič and J. Baran	75
Shear Resistance of Beams Reinforced with GFRP Reinforcement D. Bálint and R. Sonnenschein	83
Perspectives of High-Strength Prestressing Steel in Modern Concrete Engineering Z. Haššová and V. Borzovič	89

Chapter 4: Panels and Columns

Increasing the Load-Bearing Capacity of Reinforced Concrete Panels by Replacing the Compressed Part of the Cross-Section with UHPFRC K. Toman and I. Broukalová	101
Examination of Defects in Joints of Large Panel System Buildings and Their Impact on Load-Bearing Capacity and Stiffness of Connections J. Kozmon, K. Laco and V. Benko	107
Effect of Recycled Aggregate in Concrete on Column Resistance M. Bobek and R. Sonnenschein	125
3D Printed Portal: Concrete, Digital Geometry and the Redefinition of the Building Element M. Gabriel, A. Hvízdal, O. Melter and Z. Auská	133

Chapter 5: Parameters Identification and Design

Sustainable Design of Reinforced Concrete Structures: A Multi-Criteria Software-Based Optimization Approach	
A. Horáková, A. Kohoutková and I. Broukalová	143
Reliability Assessment of Design Formulas for Shear Capacity of Glass Fibre Reinforced Polymers Concrete Elements	
J. Večeře, D. Novák, M. Šomodíková and R. Kotynia	155
Design Characteristics of GFRP Reinforcements at Extreme Temperatures	
J. Ježek, F. Girgle, D. Vašátko, Đ. Čairović, M. Zlámál and P. Štěpánek	167
Analysis of a Dam Embankment in Terms of Hydration Heat and Shrinkage	
M. Holý, S. Potůčková, P. Kněž and J. Kolísko	175
