

Table of Contents

Preface

Chapter 1: Materials for Sustainable Infrastructure

Study on the Setting Characteristics, Mechanical Properties, and Volumetric Stability of Alkali-Activated Metakaolin-Based Composite Materials A. Cheng, P.C. Cheng, Q.Z. Huang, Y.H. Cheng, K.E. Lan and H.M. Hsu	3
A Damage Mechanics–Based Analysis of CNT-Modified Self-Sensing Cementitious Composites S. Oh, H. Kwon and S. Hong	9
Feasibility of AMPS Hydrogel for Surface Cleaning in Art Conservation P. Chuangjaroen and S. Girdthep	15

Chapter 2: Food Chemistry

Polyvinyl Alcohol/ Cinnamon Essential Oils-Loaded Porous Rice Starch Composite Film for Active Food Packaging with Slow Release E.P. Maharani, P. Triwitono, Y. Pranoto and D.W. Marseno	23
Encapsulation of Cold-Pressed Avocado Oil Using Beta-Cyclodextrin: Study of Physical and Chemical Properties V. Simmasood, R. Assawarachan and T. Chimsook	31

Chapter 3: Environmental Remediation

Asymmetric Titanium Dioxide-Polylactic Acid Membranes for Microfiltration and Photocatalytic Dye Removal K.Y. Chow, A.M. Nasib, E.A.R. Siti Kartini, M.S.M. Rasidi, M.F. Abu Hashim and P.Y. Hoo	41
Production and Application of Microalgae Residue-Based Biochar for Soil Amendment F.A. Abdullah, U.F. Md Ali, N.A. Ahmad, M.I.H.M. Dzahir and N.H. Azmi	47

Chapter 4: Thermal Engineering, Energy Conversion and Storage

The Application of Magnesium Nitrate Hexahydrate/Carrot Nanocellulose/ Graphene-Based Phase Change Aerogel in Solar Thermal Energy Storage Y.F. Shih, W.Y. Lin, T.M. Wu and T.H. Hsu	55
Material and Geometric Design of Helical and Finned Tube Heat Exchangers for Ice Thermal Energy Storage in Infrastructure Cooling S. Laohachote and J. Priyadumkol	63
Thermal Mechanical Performance Mapping of Insulation Material under Extreme Desert Conditions: A Modeling-Based Comparative Study A.A. Al Anazi	69
Investigation of Membrane Thickness Effects on PEM Fuel Cell Performance Using OpenFOAM C. Seanglumert, A. Boekfah, M. Promtong, Y. Kanokmedhakul, W. Punurai and C. Suvanjumrat	77
Effects of Electrolyte Salt on the 15°C Performance of a SiOx–C Negative Electrode for Lithium-Ion Batteries Y. Cho and S.K. Jeong	85
