

Table of Contents

Preface

Chapter 1: Applied Mechanics

Effect of Magnetic Field on Aeroelastic Stability of High Aspect Ratio Plate M.A. Mikilyan	3
Note on the Calculation of Hierarchical Rotational Shell Finite Elements I. Páczelt and A. Baksa	17
Connection of Mechanics and Fractional Derivatives P.B. Béda and G. Béda	29
Articulated Vehicle Systems with Inerter T. Görögh and P. Béda	39
Characterization of Pressure Drop in Pipe Flow of Shear Thickening Fluids J. Polyák, B. Boglárka and P. Nagy-György	51

Chapter 2: Machine and Equipment Design

Optimizing Spur Gears for Robotic Transmissions: Surface Finish Analysis S.K.A. Abdelfattah, S. Bodzás and G. Szanyi	61
The Actual Influence of Gear Ratio Size on the Service Life of Rolling Bearings in Universal Helical Gear Reducers with External Gearing M. Rackov and S. Kuzmanovic	69
Comparison of AC Powered Hedge Cutters Based on the Properties of the Eccentric Mechanism B. Siktár, J. Kakuk and G. Hegedűs	75
Geometric Design and FEM Analysis of Connecting Spur Gear Pair for Mechanical Wire Bending Machine I. Ennamouss and S. Bodzás	83
Finite Element Investigation of Axisymmetric Rubber Bumper K. Lima Gascoigne and T. Mankovits	95
Application of Topological Optimization Methods on an Automatic Tool Changer Mechanism K. Szabó	107
Development of a Bike Component by Topological Optimization Methods K. Szabó	117
Static Analysis of the Hydraulically Actuated Reversing Mechanism of a Reversible Agricultural Plough D. Late, P. Tripon, E. Marin, D. Manea and L.C. Vlăduoiu	127

Chapter 3: Engineering Analysis of Machining and Forming Processes

Influence of Fiber and CO Laser Cutting Parameters on the Material Properties of Wear-Resistant Hardox 450 Steel I. Čáčková, V. Čáčko and B. Ferenczi	137
Cylindricity Error by Least Square and Minimum Zone Fitting V.G. Rácz and B. Mikó	149
Theoretical Foundations of Mechanical Design for Improving Machine Productivity during the Cutting Process M. Alsigar, M. Alhafadhi, A. Lafta, O. Mayoof and H. Al-Murshidi	161
Tool Life Estimation and Optimization Using a Stacking Regressor and Whale Optimization Algorithm (WOA) in Micromilling O.I. Elly and M. Takács	169

Research on the Wear of Cutting Inserts during the Processing of Waste Construction Glass V. Čačko, I. Čačková, Ľ. Šooš and B. Ferenczi	181
Failure Analysis of Thin-Walled Extruded Aluminum Tubes Using MSFLD-Based Criteria A. Baksa, M. Habbachi and E.B. Varga	193
Evaluation of Friction Coefficient During Single Point Incremental Forming of Commercial Purity Aluminium Alloy M. Habbachi and A. Baksa	205
Manufacturing Working Analysis of a Mechanical Wire Bending Machine I.M. Mokaya and S. Bodzás	215

Chapter 4: Mechatronics

Development of a Time-Synchronised Micro-PMU System for Low-Voltage Grid Fault Prediction J. Bencsik and Z. Conka	229
Design and Development of a Modular Automated Pallet Changing System for CNC Machining Centres B. Ferenczi, I. Čačková and V. Čačko	237
Measurement of Vehicle Parameters for Vehicle Dynamics Model Validation I.L. Csajbók and D. Nemes	243
SWOT Analysis of Vehicle-to-Grid Integration: Opportunities and Challenges in Hungary and the European Union J. Menyhárt	253
Possibilities for Representing the Shape and Size of Polytopes when Applying the Tp Transition D. Nemes and S. Hajdu	259

Chapter 5: Condition Monitoring

A Dual-Scheme Cointegration Framework for Condition Monitoring and Fault Detection Using Non-Joint and Mixed-Order Time Series N.H.R. Syed, D.A. Teklemariyem, W.J. Staszewski and P.B. Dao	269
Vibration-Based Condition Monitoring of Induction Motors in Industrial Applications of Uzbekistan D. Akbarov, I. Bendiák and S. Semperger	279
Multi-Class Anomaly Detection in an Industrial Robot Arm D. Bodnar and K. Jármai	287
Transforming CMM Inspection Reports into NVH-Relevant Feature Sets K. Horvath and A. Zelei	293
Non-Destructive Watermelon Ripeness Assessment Using Deep Learning and Field-Based RGB Imagin I. Domokos and P. Szilágyi	303

Chapter 6: Hydrogen Transition

Comparative Study of Microstructural Characteristics of P355NH Transporting Pipelines Exposed to Hydrogen N. Bencs-Nagy and J. Lukács	317
Digital Twin Technology for Safety Enhancement of Hydrogen Refuelling Stations G. Hasulyo and M. Vadászi	329
Hydrogen Embrittlement in Austenitic Stainless Steels: A Review of Testing Methods and Standardization Challenges J. Fajger and R.P.S. Sisodia	339

Chapter 7: Engineering Management

The Municipal Environmental Protection Programme of the Municipality of Dunaújváros I. Angerer-Petrovickijne	355
Assessing Hydrodynamic and Operational Efficiency of a Solar-Driven Pumped Hydropower System under Changing Weather Conditions: A Case Study in Lake Velence Catchment, Hungary A. Kálmán and K. Bene	365
Developing an EnergyPlus-Based Simulation Model for Energy and Comfort Analysis of an Office Building in Debrecen E. Sarvajcz-Bánóczy and I. Kocsis	379
Modeling the Breakage of Agricultural Particulate Materials: Review J. Huang	385
Impact of Machined Surface Quality Level on Electrical Energy Consumption in WEDM L. Straka and A. Zalyvchyi	399
History and Manufacturing Analysis of Single – Purpose Gear Manufacturing Working Machines S. Bodzás and G. Szanyi	411
Comparative Analysis of Manufacturing Technologies for Cycloidal Drive Production: FDM 3D Printing vs CNC Laser-Cut Aluminum A. Sarajlić, M. Čabaravdić, T. Mankovits and S. Mano	419

Chapter 8: Industrial Engineering

Quantitative Evaluation of Process Discovery Enhancement Using Clustering-Based Techniques E.B. Varga and A. Baksa	435
Applying AI to Predict High-Cost Rental Prices: A Comparative Modelling Approach M.A. Parvez and S. Dadvandipour	451
AI Powered KPI Optimization: Bridging the Gap between Industry Data and Operational Excellence P. Madarasi and J. Menyhárt	459
Process Simulation Using Parametrized Models G. Ruzicska, L. Czégé and T. Mankovits	465
