Preface and Committees

Chapter 1: Adaptive/Active Textiles

Smart Textiles: A Strategic Perspective of Textile Industry L. Affatato and C. Carfagna	1
Development of Piezoresistive Fiber Sensors, Based on Carbon Black Filled Thermoplastic Elastomer Compounds, for Textile Application F.J. Clemens, B. Koll, T. Graule, T. Watras, M. Binkowski, C. Mattmann and I. Silveira	7
Integration of OLEDs in Textiles S. Janietz, B. Gruber, S. Schattauer and K. Schulze	14
The Concept of Mood Changing Garments Made from Luminescent Woven Fabrics and Flexible Photovoltaics “MoodWear” G.K. Stylios and D.Y. Yang	22
Shape Memory Polymers in Textiles J.L. Hu and J. Lu	30
Cosmeto-Textiles: State of the Art and Future Perspectives P. Persico and C. Carfagna	39
Halochromic Textile Materials as Innovative pH-Sensors L. Van der Schueren and K. de Clerck	47
Integration of Small Diameter Wire Form SMA for the Creation of Dynamic Shape Memory Textiles P. Dyer	53
Development of Paper Transistor Using Carbon-Nanotube-Composite Paper Y. Kawamura, S. Hayashi, Y. Shinde and T. Oya	59

Chapter 2: E-Textiles

Textile Sensor Applications with Composite Monofilaments of Polymer / Carbon Nanotubes A. Ferreira, F.B.N. Ferreira and M.C. Paiva	65
The Power Conversion Characteristics of Woven Organic Photovoltaic Wire Fabrics A. Agrawal, Y.K. Kim, P.D. Calvert and M. Lee	71
Feasibility of Printing Woven Humidity and Temperature Sensors for the Integration into Electronic Textiles T. Kinkeldei, G. Mattana, D. Leuenberger, C. Ataman, F.M. Lopez, A.V. Quintero, D. Briand, G. Nisato, N.F. de Rooij and G. Tröster	77
Essential Building Blocks of Fibrous Transistors, Part I: Gate Layer L. Rambašek, B. Van Genabet, A. Schwarz, E. Bruneel, I. Van Driessche and L. Van Langenhove	83
Improvements of Smart Garment Electronic Contact System I. Parkova, A. Vališevskis, I. Ziemeles, U. Briedis and A. Vilumsone	90

Chapter 3: Manufacturing and Applications

Design and Optimization of an Injection-Moldable Force-Fit Interconnection Module for Smart Textile Applications E.P. Simon, M. Fröhlich, C. Kallmayer and K.D. Lang	96
Thigmo-Morphogenetic Fiber Composites Embedded with Shape Memory Alloys M. Mingallon and S. Ramaswamy	102
Research through Design: A Way to Drive Innovative Solutions in the Field of Smart Textiles M. Toeters, M. ten Bhömer, E. Bottenberg, O. Tomico and G. Brinks	112
Washable Screen Printed Textile Antennas I. Kazani, M.L. Scarpello, C. Hertleer, H. Rogier, G. de Mey, G. Guxho and L. Van Langenhove	118
Two Novel Techniques of Fabric Sensing Using Carbon Nanofibers A. Santos, P. Arquer, M. Prado, M.P. Merino and B. Ruiz	123

Smart Textiles with Biosensing Capabilities	
S. Pasche, B. Schyrr, B. Wenger, E. Scolan, R. Ischer and G. Voirin	129
Respiratory Volume Estimation by a Stretchable Textile Sensor	
Y. Enokibori, Y. Ito, K. Ikeda, A. Suzuki, Y. Shimakami, T. Kawabe and K. Mase	136
Classified Catalogue for Textile Based Sensors	
P. Bosowski, C. Husemann, T. Quadflieg, S. Jockenhövel and T. Gries	142
Durable Self-Healing Super-Liquid-Repellent Fabrics	
H.X. Wang, H. Zhou and T. Lin	152
Prosys-Laser: Smart Laser Protective Textile Systems	
G. Dammacco, D. Wenzel and C. Hennigs	156
Structural Conformability and Fluid Uptake Properties of Smart Wound Dressings	
M. Uzun, S. Anand and T. Shah	163
