

# Preface

This edition is a compilation of research papers presented at the 1st International Conference on Research in Engineering and Science Technology (IC-REST), held on October 10, 2023, at the Faculty of Engineering Campus, Universitas Hasanuddin, Gowa, Indonesia.

The conference is an annual event hosted by the Faculty of Engineering, Universitas Hasanuddin. This meeting focused on "Advanced Technologies to Fulfill SDGs for Sustainable Life" and served as a platform for exchanging knowledge, experiences, and best practices that transcend borders and disciplines of many scientific fields.

The publication showcases the latest research results and innovative solutions in the area of construction and architecture, highlighting their potential to address global challenges and contribute to a sustainable future. This edition is a valuable resource for researchers, academics, and industry professionals interested in exploring the intersection of engineering practice, science, and sustainable development.
