

Preface

The book includes articles based on the research results presented at the 2nd International Conference on Civil Engineering and Materials (ICCEM'2024), held on 13-14 December 2024 in Al-Hoceima, Morocco. The conference provided a vital platform for professionals from Morocco and around the world to convene, share research findings, and discuss the latest advancements in civil engineering and materials science.

The presented edition is dedicated to advanced building materials, computational research and modelling in civil engineering, and issues in soil stabilisation.

The collected articles will be beneficial to many researchers and engineers in the construction industry.
