

Table of Contents

Preface

Chapter 1: Building Materials

Recycling of Sugarcane Bagasse Ash as a Cement Mortar Additive F. Boukabous, O. Dadah, K. Naciri, I. Aalil and A. Chaaba	3
Rheological Optimization of Rubberized Self-Compacting Concrete Using Multi-Criteria Decision Making: A Hybrid CRITIC-Taguchi-TOPSIS Approach S. Hamdouni, M. Benaicha and A.H. Alaoui	13
Self-Compacting Earth Concrete (SCEC): A Bibliometric Analysis of Sustainable Approaches in Construction I. Gharbi, M. Benaicha and H. Mouloudi	33
Exploring the Viability of Seawater in Concrete Mixing: A Sustainable Approach to Water Management in Morocco's Construction Industry O. Bindar, A. Zian and I. Hanafi	47

Chapter 2: Computational Research and Modelling in Civil Engineering

Analysis of Beam Transverse Vibration with Elastic Cubic Nonlinearity M. Janati, L. Ikharrazne and M. Lamine	65
The HAp's Contribution to Optimising an Administrative Building's Thermal Loads and Energy Efficiency I. Taleb, B. El Fathi, S. Naamane, N. Es-Sallak and A. Taleb	79
Optimizing CFRP Reinforcement in Concrete Beams: A Comparative Analysis of Internal Embedment vs. External Bonding on Mechanical Behavior Y. Riyad, T. Hachimi, H. El Assad, H. Bagar, F. Ait Hmazi, M. El Khoudri and I. Mrani	85
Improved Analysis of Nonlinear Vibrations in Orthotropic Laminated Composite Beams Using Homogenization Techniques K.H. Vowogbe and M. El Bekkaye	97
An Efficient Modal Reanalysis Method for Structural Dynamic Modification Using Residual Flexibility Without Additional Degrees of Freedom O. Dadah, A. Issam, H. Ait Rimouch and M. Hakim	105

Chapter 3: Soil Stabilisation

Comparative Analysis of International Design Protocols for Lime-Based Soil Stabilization M.A. Fakhr Eddine, B.A. Somaya and A. Issam	121
Dynamic Mesh-Based Modeling of Turbulent Flow Effects on Concentrated Leak Erosion during HET H. El Assad, Y. Riyad, T. Hachimi and F. Ait Hmaz	137
