

Preface

The 23rd International Conference on Rehabilitation and Reconstruction of Building -CRRB was held in Prague, Czech Republic on November 11 and November 12, 2021. The conference was organized by the Scientific Society for the Restoration of Buildings and Care of Monuments WTA CZ together with the Klokner Institute of the Czech Technical University in Prague.

Almost thirty participants took part in the 23rd CRRB conference. They were mainly from the Czech Republic and the Slovak Republic.

It is positive that there is straight continuity on the previous 22nd International Conference on Rehabilitation and Reconstruction of Building – CRRB 2020, which was held in Brno, respectively.

The objective of the conference was to discuss current results of research and practical developments in the protection and restoration of wood, timber frame and concrete structures and in the restoration of stone. The attention was focused on surface treatment, physical-chemical properties and static and dynamics of structures as well.

The organizing committee of the 23rd International Conference on Rehabilitation and Reconstruction of Building would like to thank all speakers, session chairs and all participants that they made the conference fruitful and successful.
