

Table of Contents

Preface

Introduction

E. Muñoz Merino 1

Theoretical Models for DX Deep Donor States Based on Ab Initio Total Energy Calculations

H. Overhof 11

DX Microstructure and Nature in $\text{Al}_x\text{Ga}_{1-x}\text{As}$: Contributions from Structure Sensitive Experiments

J.M. Spaeth and M. Linde 35

Impact of the DX Centers on the Electrical Properties of AlGaAs

D. Maude and J.C. Portal 55

Deep Level Transient Spectroscopy of DX Centers

E. Calleja and I. Izpura 75

Photoluminescence Properties of (Al,Ga)As Alloys and GaAs under Pressure in the Framework of DX Center Studies

M. Leroux 97

DX Centers in Other III-V Alloys

P. Gibart 123

Minimizing DX Center Effects in AlGaAs Based Devices

E. Muñoz Merino and E. Calleja 135

The DX Centers: A Comparison of Theoretical Predictions and Experimental Results

H.J. von Bardeleben 159
