

Table of Contents

Materials Section: Metals and Alloys; Ag, Au, and Cu: Vaceancy Formation - Fe-18Cr-10Ni-0.6Ti and Al: Interdiffusion	1
Fe-24Cr-27Ni Steel: Quenching Defects - ZrH_x: H Vacancies	57
Halides and other Ionic Substances	108
Oxide Systems	127
Semiconductors	157
Borides, Carbon and Carbides, Hydrogen and Inert Gas Solids, Nitrides, Organic Crystals, Liquid Metals and Alloys, Liquid Halides, Liquid Nitrates, Liquid Oxides and Liquid Helium	202
Reference Section: Atomic Ordering Effects, Boundaries, Color Centers and Defects	227
Diffusion Processes and Dislocations	251
Electrical Conduction, Electrotransport, Electron Irradiation, Internal Friction, Ion Bombardment, Ion Implantation, Irradiation Effects, Laser Irradiation, Liquid State Properties and Neutron Irradiation	294
Point Defects, Proton Irradiation, Surfaces, Thermomigration, Thin Films, Voids and Whiskers	319
New Books	333
