

Table of Contents

Materials: Metals and Alloys; Ag: Kr and Xe Diffusion - Ni: Positron Annihilation	1
Ni Sputter Deposits: Twin Faults - Zircaloy-2: Fission Product Transport	75
Oxides	107
Semiconductors	144
Halides and other Ionic Substances	190
Borides, Carbon and Carbides, Hydrides, Inert Gas Solids, Organic Crystals, Nitrides and Phosphides	217
Silicides, Liquid Metals and Alloys, Liquid Halides, Liquid Oxides, Liquid Nitrates and Liquid Chalcogenides	230
General References: Boundaries, Color Centers/Defect Centers, Defect Structures, Stacking Faults, Twins, Diffusion Processes, Dislocations, Electrical Conduction, Electrotransport, Electron Irradiation and Irradiation Effects	249
Laser Irradiation, Liquid State Properties, Neutron Irradiation, Point Defects, Surfaces, Thermomigration and Voids	271
Book Reviews	279
