

Table of Contents

Preface

Application of Electron Spin Resonance in Biophysics: from Rapid Mixing Stopped-Flow to High-Hydrostatic Pressure ESR

A. Sienkiewicz, M. Jaworski, S. Garaj, L. Forró and C.P. Scholes 1

Intermolecular Interactions of Proteins under Pressure. Aggregation, Dissociation, Chaperoning

L. Smeller, F. Meersman, J. Fidy and K. Heremans 19

Potentialities in High Pressure Bioscience

J. Torrent and C. Balny 25

Pressure Effects on the Structure and Phase Behaviour of Phospholipid-Gramicidin Bilayers

J. Eisenblätter and R. Winter 35

Pressure-Temperature Effects on Proteins: Unfolding, Aggregation and Fibrillogenesis

F. Meersman, H. Pfeiffer, L. Smeller and K. Heremans 47

Pharmaceutical Perspectives of High Pressure: A Soft Tool for Sterilization of Fragile Drugs

Y. Rigaldie, G. Lemagnen, A. Largeteau, D. Larrouture, M. Abba, R. Haller, L. Grislain and G. Demazeau 55

Change of Activity of Blood Serum Transferases after High Hydrostatic Pressure Treatment

L. Donchenko, N. Shishkova and V. Barbashov 59

Effect of High Hydrostatic Pressure on the Ability of Neutrophils to Phagocytosis

N. Shishkova, L. Donchenko and V. Barbashov 63

Inactivation of Bacteria at High Pressure

P. Grzesiowski, I. Łętowska, S. Porowski, P. Sałański, J. Jurczak, M. Giel-Pietraszuk, W. Hryniewicz and J. Barciszewski 67

Influence of UHP Treatment on Quality of Ham

K. Karłowski, B. Windyga, M. Fonberg-Broczek, H. Ścieżyńska, A. Grochowska, K. Górecka, J. Mroczek, D. Grochalska, A. Barabasz, J. Arabas, J. Szczepek and S. Porowski 73

The Apple Juices Preserved by High Pressure Treatment at Moderate Temperature and Pasteurisation. Comparative Quality Assessment

E. Kostrzewa, M. Fonberg-Broczek, A. Jakubowski, S. Skapska, B. Sieliwanowicz, A. Witkowska-Gwiazdowska, D. Zdziennicka, J. Arabas and J. Szczepek 77

How High Pressures can be Involved in Chemical Bonding

G. Demazeau 85

Pressure Effects in Organic Chemistry

J. Jurczak and D.T. Gryko 95

Thermodynamics of the Metal-Hydrogen Systems in DAC

M. Tkacz 107

High Pressure EPR Studies of Nickel Complexes

A. Krupska and M. Krupski 117

Polymerization at High Pressure of Dimethyl Acetylene: Raman Microscopy, Vibrational Analysis, Calculation of Force Constants and Internal Coordinates

F.J. Pérez Tejedor, O.R. Montoro, O. Rodríguez-Jiménez, V.G. Baonza and J. Núñez Delgado 121

Pressure as a Tool to Investigate Vibrational Fermi Resonance in Molecular Liquids: Study of Liquid Methanol up to 20 kbar by Raman Microscopy

A. Arencibia, V.G. Baonza, F.J. Pérez Tejedor and M. Taravillo 125

Pressure-Induced Transformations of Low-Energy Excitations in a Polymer Glass Studied by Spectral Hole Burning

A. Laisaar, V. Hizhnyakov, J. Kikas, A. Kuznetsov and A. Suisalu 129

Pressure Solvation of Photosynthetic Pigments

A. Ellervee and A. Freiberg 135

Bulk Nanostructured Materials Produced by Severe Plastic Deformation under High Pressure

R. Valiev and I.V. Alexandrov 141

Intermetallic Growth under High Hydrostatic Pressures L.N. Paritskaya, Y.S. Kaganovsky, V.V. Bogdanov and W. Łojkowski	151
Novel Carbon Materials: Possibility of Shock-Wave Synthesis V.V. Milyavskiy, A.Z. Zhuk and K.V. Khishchenko	161
Phase Transformation in Nanocrystals under Pressure J.Z. Jiang	175
X-Ray Characterization of Nanostructured Materials R. Pielaszek, S. Gierlotka, S. Stelmakh, E. Grzanka and B.F. Palosz	187
Influence of High Pressure on the Polytype Structure of Nanocrystalline GaN R. Pielaszek, S. Gierlotka, S. Stelmakh, E. Grzanka and B.F. Palosz	201
On the Relation between Interface Energy and Free Volume W. Łojkowski, A. Otsuki and A. Morawski	209
Computer Study of the Severe Shear Deformations of Solids under High Pressure A. Spuskanyuk, Y. Beygelzimer and V. Varyukhin	213
High Pressure Dependence of the Discontinuous Ordering (DO) Reaction in the Fe – 50% at. Co Alloy V. Semenov, D. Kolesnikov, M. Zenotchkin, J. Jun, W. Łojkowski, E. Rabkin and W. Gust	217
Influence of Long-Ordering Parameter and Boron Microalloying on Mechanical Properties of Nanocrystalline Intermetallic Compound Ni₃Al A.V. Korznikov, S.R. Idrisova, Z. Pakiel and K.J. Kurzydłowski	223
Nanostructure Formation in Copper Subjected to High Pressure Torsion I.V. Alexandrov, A. Dubravina and H.S. Kim	229
Pressure Influence on Solid Phase Transformation in Metals and Alloys after Severe Plastic Deformation B. Efros, V.P. Pilyugin, A.M. Patselov and S.V. Gladkovskii	233
Formation of Submicrocrystalline Structure in Titanium and its Alloy under Severe Plastic Deformation S.V. Zherebtsov, G.A. Salishchev and R.M. Galejev	237
A First-Order Phase Transformation between Amorphous Phases in a Zn-Sb Alloy under High Pressures A.I. Harkunov, V.E. Antonov, O.I. Barkalov, M. Calvo-Dahlborg, U. Dahlborg, V.K. Fedotov, E.G. Ponyatovsky and M. Winzenick	241
Low Dimensionality Magnetism in New Layered Oxides: the Phyllosiloxides K.P. Hong, G. Goglio, G. Demazeau and D.-. Jung	251
High Pressure Treatment of Semiconductor-Metal Heterophase Structures S. Ovsyannikov, V.V. Shchennikov, A.Y. Derevskov and V.V. Osotov	255
Nanostructured Metals Transformation Study by Means of Electroactive Polymer A.N. Lachinov, T.G. Zagurenko, V.M. Kornilov, I.V. Alexandrov and R. Valiev	261
Comparative Studies of Conductivity of Graphite and Fullerene at High Pressure G. Tikhomirova and A.N. Babushkin	267
Conductivity of Ammonium Halides NH₄Cl and NH₄F at Pressures up to 50 GPa G. Tikhomirova and A.N. Babushkin	271
Magnetoresistance and Thermoelectric Power of Semiconductors at Pressures up to 30 GPa V.V. Shchennikov	275
High-Pressure NMR Spectroscopy: Some General Aspects and Applications J.W. Sprengers, A.M. Kluwer, S. Gaemers and C.J. Elsevier	283
Application of the AC Impedance Spectroscopy at High Pressures: Electrophysical Properties of Sulfur Y.A. Kandrina, A.N. Babushkin, S.N. Shkerin and Y. Volkova	295
A Standard Diamond-Anvil Cell Adapted for Work on Biological Molecules and Soft Solids N.W.A. van Uden and D.J. Dunstan	299
Electrical Characteristics of NaCl at Frequencies of 1-100 kHz at Superhigh Pressures. Application of an Impedance Spectroscopy Y. Volkova and A.N. Babushkin	303
Influence of High Hydrostatic Pressure up to 2.5 GPa on the Resistance of Lanthanum-Manganese Samples P.I. Polyakov, V.P. Pashchenko and S.S. Kucherenko	307

Metal Plasticity during the Twist Extrusion Y. Beygelzimer and D. Orlov	311
Solid State Transitions Investigations in DAC by Spectroscopy Methods A.M. Prudnikov, A. Misiuk, B. Efros, I.E. Tyschenko, L.V. Loladze and N. Shishkova	315
Structural Refinements on Restricted Intensity Data Collected in High-Pressure Diffraction Experiments K. Dziubek and A. Katrusiak	319
