

Table of Contents

Analytical Solution of Fick's Equations in the Case of Foreign Atom Diffusion in a Metallic Sample A. Benmakhlouf	1
Analytical Studies of Diffusion by the Dissociative Mechanism in the Case of a Foreign Atom Source A. Benmakhlouf	15
Metal Lattice Atomic Structure Characterization Using Mirage Effect Technique K. Boubaker	29
Microstructure and Texture Evolution during Cold Rolling and Recrystallization of Ni₃Al Single Crystals K. Kishida, M. Demura, S. Kobayashi, Y. Xu and T. Hirano	37
Breaking Atomic Bonds through Vibrational Mode Localization S.V. Dmitriev, J. Li, N. Yoshikawa, Y. Tanaka, Y. Kagawa, T. Kitamura and S. Yip	49
The Kirkendall Plane in Binary Interdiffusion Systems A.A. Kodentsov, A. Paul and F.J.J. van Loo	61
Recent Advances in Point Defect Studies Driven by Density Functional Theory A. Legris	77
An Ab Initio Study of the Effects and Stability of Vacancies, Antisites and Small Radius Atoms (B, C, N and O) in the B2-FeAl Structure A. Kellou, T. Grosdidier and H. Aourag	87
Diffusion Process Simulations - An Overview of Different Approaches H. Strandlund and H. Larsson	97
Enhanced Diffusion in γ-Fe and Au by Vacancies Induced under Elevated Hydrogen Pressure Y. Yamazaki and Y. Iijima	115
Modelling Creep Controlled by the Glide of Jogged Screw Dislocations in TiAl and Ti-Based Alloys S. Karthikeyan, J.H. Moon, G.B. Viswanathan and M.J. Mills	127
Effect of Increase of Dihedral Angle on Thermal Grain Boundary Grooving W. Zhang, P. Sachenko and J.H. Schneibel	149
Abstracts	1
