Preface

Section 1 - Diffusion and Reactions

Silicide Formation Reactions in α -Si/Co Multilayered Samples

Z. Balogh, C. Cserháti, Z. Erdélyi, A. Csik, G.A. Langer, I. Zizak, N. Darowski, E. Dudzik, R. Feyerherm and D.L. Beke 3

Lateral Diffusion Spreading of Two Competitive Intermetallic Phases over Free Surface

Y.S. Kaganovsky, L.N. Paritskaya and V.V. Bogdanov 9

Theoretical Analysis and Atomistic Modelling of Diffusion and Stability of Pure Element Hollow Nanospheres and Nanotubes

A.V. Evteev, E.V. Levchenko, I.V. Belova and G.E. Murch 21

Effect of Substrate Temperature on the Different Diffuseness of Subsequent Interfaces in Binary Multilayers

M. Kis-Varga, G.A. Langer, A. Csik, Z. Erdélyi and D.L. Beke 27

Modeling of Diffusion Saturation of ($\alpha + \beta$) Titanium Alloys by Nitrogen in the Rarefied Medium

Y. Matychak, V. Fedirko, I. Pohreljuk, O. Yaskiv and O. Tkachuk 33

Suppression Criterion of the Phase Growth Based on Extremal Principles of Nonequilibrium Thermodynamics

Y.A. Lyashenko 39

Model of Lateral Growth Stage during Reactive Phase Formation

M. Pasichnyy and A. Gusak 47

Coupling of Electromigration and Non-Equilibrium Vacancies in Reactive Phase Growth

S. Kornienko 53

Section 2 - Driven Systems

Mechano-Chemistry; Interdiffusion in Solid Solutions

M. Danielewski and B. Wierzba 61

Models of Mutual Solubility Increasing under the Pulse Loading

A.O. Koval'chuk, D.S. Gertsriken, A. Gusak and V.F. Mazanko 69

Cluster Dynamics Simulation of Reactor Pressure Vessel Steels under Irradiation

A.R. Gokhman, F. Bergner, A. Ulbricht and U. Birkenheuer 75

The Ageing of Beryllium Bronze in the Pulse Magnetic Field

J.V. Osinskaya and A.V. Pokoev 81

The Influence of Ti and Zr on the Diffusion of Isotope ^{63}Ni in the Iron Surface Layer at Electric-Spark Alloying in Carbon Containing Environment

S.I. Sidorenko, E.V. Ivashchenko, G.G. Lobachova and V.F. Mazanko 87

Effect of an Impulse Loading on Localization of Diffusing Atoms in Metals

D.S. Gertsriken 91

Section 3 - General Problems of Diffusion

Atomic Mechanism of Carbon Diffusion in Cementite

A.V. Evteev, E.V. Levchenko, I.V. Belova and G.E. Murch 101

Extended 'Five-Stream' Model for Diffusion of Implanted Dopants in Silicon during Ultra-Shallow Junction Formation in VLSI Circuits

B.B. Khina 107

Atomic-Migration-Controlled Processes in Intermetallics R. Abdank-Kozubski, A. Biborski, M. Kozłowski, C. Goyhenex, V. Pierron-Bohnes, M. Alouani, M. Rennhofer and S. Malinov	113
Dependence of Diffusion Paths on Thermodynamic Factors in Ternary Systems Ü. Ugaste, J. Priimets and T. Laas	119
Simulation of Pressure Effects on Self-Diffusion in BCC Metals I. Valikova and A.V. Nazarov	125
The Effect of Point Defects Interaction on Hydrogen Atom Diffusion in FCC- and BCC- Metals L.V. Selezneva and A.V. Nazarov	133

Section 4 - Structural & Phase Transformations

Numerical Simulation of Precipitates Evolution in Iron-Based Alloys V.V. Popov	141
The Analysis of the Selective Oxidation of Multicomponent Alloy B. Wierzba and M. Danielewski	149
Complex Phase Behavior of Systems with Negative Curvature Potentials Y.D. Fomin, N.V. Gribova and V.N. Ryzhov	155
3D Monte Carlo Simulation of Phase Separation Kinetics in a Binary Metallic Alloy with Vacancy Mediated Diffusion: Effect of Initial Supersaturation A.S. Shirinyan and Y.S. Bilogorodskyy	161
Size-Induced Freezing Effect in Monte-Carlo Simulations of Phase Separation Kinetics in Nanoparticles A.S. Shirinyan and D.V. Lubyanskyy	167
Diffusion during Powder Metallurgy Synthesis of Titanium Alloys O.M. Ivasishin, D. Eylon, V.I. Bondarchuk and D.G. Savvakina	177
Composition Fluctuations in the Ostwald Ripening G.V. Lutsenko and A. Gusak	187
Kinetic and Thermodynamic Precipitation Parameters of the Pb-Sn Solid Solutions Y.O. Bondarenko, N.F. Voronina and O.A. Shmatko	193

Section 5 - Surface and Grain Boundary Diffusion

Surface Diffusion in Coadsorbed Layers with Different Mobilities of Adsorbates: (Li +Dy) on Mo(112) and (Li+Sr) on W(112) A.T. Loburets, N.B. Senenko, M.A. Mukhtarov, Y.S. Vedula and A.G. Naumovets	201
Modelling of the Formation of Pd-Ni Alloy Nanoparticles by Interdiffusion A.V. Evteev, E.V. Levchenko, I.V. Belova and G.E. Murch	207
Generalization of Fisher Model for Periodically Non-Uniform Grain Boundary V.L. Gapontsev, V.M. Koloskov and M.G. Gapontseva	213
Reactionary Interaction as the Basis of Occurrence Heterogeneity Diffusion Properties Grain Boundaries in Polycrystalline Silver V.M. Koloskov and V.L. Gapontsev	221
