

Table of Contents

Preface, Committees and Participants

1. Grain Boundary Diffusion, Segregation and Stresses

Recent Advances and Unsolved Problems of Grain Boundary Diffusion

S.V. Divinski and B.S. Bokstein 1

The Harrison Diffusion Kinetics Regimes in Grain Boundary Diffusion: Lattice Monte Carlo Modelling of the Effect of Segregation

I.V. Belova, G.E. Murch and T. Fiedler 9

Stress Generation during Grain Boundary Interdiffusion

L. Klinger and E. Rabkin 19

Concentration Profiles for Grain Boundary Diffusion in B-Regime with Regard to the Formation of Atomic Complexes in Grain Boundary

V. Esin, B.S. Bokstein and A. Rodin 29

Recent Developments in the Study of Grain Boundary Segregation by Wavelength Dispersive X-Ray Spectroscopy (WDS)

P. Nowakowski, F. Christien, M. Allart and R. Le Gall 39

Self-Diffusion Parameters of Grain Boundaries and Triple Junctions in Nanocrystalline Materials

A. Lipnitskii, I.V. Nelasov and Y.R. Kolobov 45

Grain Boundary Segregation and Amount of Bulk Carbides in Severely Deformed Fe–C Alloys

B. Straumal, A. Rodin, A.L. Petelin, B. Baretzky, S. Protasova, S.V. Dobatkin, J. Dutta Majumdar and I. Manna 51

Numerical Simulation Support for Diffusion Coefficient Measurements in Polycrystalline Thin Films

A. Portavoce, I. Blum, L. Chow, J. Bernardini and D. Mangelinck 63

Cu GB Diffusion in Al. Effect of Alloying by Cu and Ce

A. Rodin, N. Dolgoplov, A. Simanov and A. Zaytseva 73

Round Table Discussion “Grain Boundary Diffusion: Experiments and Modeling” DSS 2010, 1-4 June, Moscow

79

2. Bulk Diffusion and Phase Formation

Diffusion in Solids under Pressure

H. Mehrer 91

Effect of Diffusion Induced Driving Forces on Interdiffusion - Stress Development/Relaxation and Kinetics of Diffusion Processes

D.L. Beke, Z. Erdélyi and B. Parditka 113

Segregation in Single-Crystal Nickel-Base Superalloys

A.I. Epishin, I.L. Svetlov, N.V. Petrushin, Y.V. Loshchinin and T. Link 121

Reactive Diffusion upon Planar Dissolving Copper in Solder Melts

J. Drápala, P. Jopek, D. Petlák, P. Hrcuba and P. Kubíček 127

Models of Interdiffusion in a Polycrystalline Alloy: Kirkendall Effect versus Non-Equilibrium Vacancies and Backstress

A. Gusak, N. Storozhuk and K.N. Tu 135

Diffusion in Point Contact Reaction

A. Gusak, A.O. Kovalchuk and K.N. Tu 143

Pre-Stressed Sub-Surface Contribution on Bulk Diffusion in Metallic Solids

L. Raceanu, V. Optasanu, T. Montesin and N. Creton 149

The Effect of Plastic Deformation on Nitrogen Diffusion in α -Fe

L. Demchenko and S.I. Sidorenko 155

Redistribution of Alloy Elements during Nickel Silicide Formation: Benefit of Atom Probe Tomography

C. Perrin, K. Hoummada, I. Blum, A. Portavoce, M. Descoins and D. Mangelinck 161

Diffusion Phase Formation in the Cu-Sn Nanofilms System A.R. Rennie, S.I. Sidorenko, I.E. Kotenko, S.M. Voloshko and A.I. Oleshkevych	167
3. Diffusion Controlled Processes	
Unprecedented Wealth of Information on Guest Dynamics in Nanoporous Materials from Transient Concentration Profiles C. Chmelik and J. Kärger	177
Diffusion-Induced Recrystallization in Nickel/Palladium Multilayers G. Schmitz, M. Kasprzak and D. Baither	195
Segregation and Selective Surface Oxidation at the Intermediate Steps of Recrystallization Annealing S. Swaminathan and M. Rohwerder	203
Thermally Activated Relaxation and Hysteretic Internal Friction in Ultrafine Grained Copper I.S. Golovin and V.Y. Zadorozhnyy	209
Role of Finite Vacancy Relaxation Rate at SHS Reactions in Nanosized Multilayers T.V. Zaporozhets and A. Gusak	215
Computer Simulation of Fe Diffusion in Liquid Al and along Al Grain Boundaries M. Mendelev, A. Rodin and B.S. Bokstein	223
Diffusion Controlled Grain Triple Junctions Wetting in Metals B.S. Bokstein, S.A. Gulevsky, A.L. Petelin and A. Rodin	231
Diffusion Spreading of the Emitted Metallurgical Gas K.V. Vishnyakova, A.L. Petelin and Y.S. Yusphin	239
Critical Embrittlement Temperature for Tube Steels Used at Atomic Power Stations A.A. Petelina, V.A. Youkhanov and A.D. Shur	243
Fabrication and Microstructure of Al-Based Hybrid Composite Reinforced by B₄C and Ultra-Dispersed Tungsten M.V. Gorshenkov, S.D. Kaloshkin, V.V. Tcherdyntsev, V.D. Danilov and V.N. Gulbin	249
Gallium Distribution in Gallium-Coated Aluminum for Brazing Application E. Ferchaud, F. Christien, P. Paillard, V. Barnier, K. Wolski, H. Mourton, P. Azaïs and C. Rossignol	255
Thermodynamic and Kinetic Study of Leaching Magnesite from Natural Magnesites by Carbon Dioxide S. Klochkovskii, A. Smirnov and U. Shabalina	261
The Liquid Bismuth Penetration from Solid Bi₂Te₃: Grain Boundary Embrittlement and Effect of Impurities S. Zhevnenko, D.V. Vaganov and E. Gershman	265
Low-Temperature Synthesis of Perovskites PbTiO₃ and PbZrO₃ A. Myatiev and I. Krechetov	271
Thermodynamically Consistent Formulation of the Sedimentation in Solids and Liquids B. Wierzba and M. Danielewski	275
