

Table of Contents

Investigating the Pitting Resistance of 316 Stainless Steel in Ringer's Solution Using the Cyclic Polarization Technique M. Kamran, F. Hussain, R. Ahmad, T. Ahmad and F. Riaz	1
Effect of Different Modifiers on Microstructure and Strength of Locally Developed A356 Al-Si Alloy R. Ahmad, R. Raza, S. Mumtaz and T. Ahmad	9
The Site Preference of Alloying Element Zr in NiAl Dislocation Core and its Effects on Bond Characters L.Q. Chen and Z.C. Qiu	19
Studying the Effect of Different Combinations of Salt Modifier on the Mechanical Properties and Microstructure of A356 Al-Si Alloy R. Ahmad, S. Mumtaz and T. Ahmad	27
Quasicrystalline Phase Formation in High Frequency Induction Melted Al₈₀Cu₁₄Fe₆ Alloy H. Boularas and M.Y. Debili	37
Numerical Investigation of the Effect of Sprue Base Design on the Flow Pattern of Aluminum Gravity Casting A. Baghani, A. Bahmani, P. Davami, N. Varahram and M.O. Shabani	43
Evaluation of Surface Preparation Techniques for Steel Substrates Prior to Coating Application F. Riaz, R.K. Shahzad, M. Kamran, F. Hussain, R. Ahmad and T. Ahmad	55
Thermal Desorption of Hydrogen from AISI 316L Stainless Steel and Pure Nickel O. Todoshchenko, Y. Yagodzinsky and H. Hänninen	71
Structural and Concentration Heterogeneities during Formation of Silicide Phases in the Thin Film System Ti(5nm)/Ni(24nm)/Si(001) S.I. Sidorenko, S.M. Voloshko, Y.M. Makogon, O.P. Pavlov, I.E. Kotenko, S.O. Zamulko and S.I. Konorev	79
Studies on the g Factor and Hyperfine Structure Constant for Ir⁴⁺ in CdO X.F. Hu, S.Y. Wu and C.C. Ding	85
Theoretical Studies of the Local Structures and Spin Hamiltonian Parameters for the Cu²⁺ Centers in Alkali Barium Borate Glasses W.H. Wei, M. Lu and C.J. Hou	89
Study of the Properties of CR-39 Polymer Irradiated with Alpha Particles with Different Energies at Different Etching Times M.F. Eissa	95
A Review of Diffusion and Interfacial Reactions in Sandwich Thin-Film Couples A. Ghorai and D. Roy	107
Correlation Coefficient between Vickers Hardness and Nuclear Technique E.A. Badawi, M.A. Abdel-Rahman and A.E.A. El-Nahhas	129
Abstracts	137
