

Table of Contents

Preface

Condition of Carbides in High-Speed Steels after Multidirectional Forging A. Kříž and V. Průcha	1
Corrosion Resistance of Vanadis 6 Steel after Conventional Heat Treatment and Sub-Zero Treatment in Cold Nitrogen Gas Followed by Tempering A. Bartkowska and P. Jurčí	16
Distortion in Induction-Hardened Cylindrical Part J. Hájek, D. Rot and J. Jiřinec	30
Fracture Micromechanism of Cryogenically Processed Vanadis 6 Tool Steel J. Durica, J. Ptačinová and P. Jurčí	45
Identification of Carbides in Tool Steel by Selective Etching P. Novák, K. Nová, L. Jaworska and A. Shishkin	55
Influence of Operation Temperature on Rolling Bearings E. Kantoriková and P. Fabian	64
Microstructure and Microhardness of Powder Boronized Vanadis 6 Steel M. Hudáková and P. Jurčí	73
Microstructure and Properties of Advanced Tool Steels J. Šerák, V. Pečinka and D. Vojtěch	85
Relationships between the Microstructure, Hardness and Fracture Toughness of Differently Sub-Zero Treated Tool Steel P. Jurčí, I. Dlouhý, J. Horník, P. Priknerová and Z. Mrštný	95
Study of Differences between Results from Raboratory Tests and Tests of Real Tools for Selected Cold Work Tool Steels M. Kuřík, J. Sobotová and N. Moravcová	113
Verification on Possibility of Nitrogen Diffusion into Steel by High Temperature N-Quench A. Nakamura, K. Nambu and M. Okumiya	124
