

## Preface

We proudly present this special issue. The papers discuss the latest research results, innovative ideas, and experiences in the fields of experimental and computational mechanics in mechanical and industrial engineering. The book provides the information regarding research activities in various countries, since the authors of the papers came from United Kingdom, Japan, India, Taiwan, Malaysia, and Indonesia. A high appreciation is expressed to all of the authors for their contribution and participation. The book could be a literature forum that lead to collaborative research and publication in the future.

The editor would like to extend a gratitude to Prof. Dr. Ing Yulfian Aminanda from Universiti Teknologi Brunei, for sharing his knowledge and insights in the keynote address. A special thank is awarded to the reviewers and editorial team and for their effort in review and editing of the papers. The editor would also like to express their appreciation to the staff of Scientific Net for their full cooperation during the preparation of this special issue.
