

Table of Contents

Preface

Invited Lectures

Boronizing of AISI 316L Stainless Steel Using Spark Plasma Sintering Technique A. Nishimoto and T. Kubo	3
Novel Cost-Efficient Method of Producing Ausferritic Steels Displaying Excellent Combination of Mechanical Properties P. Rubin, R. Larker, E. Navara and M.L. Antti	11
The Copper-Arsenic Eutectic and the Cu₃As Phase R. Haubner and S. Strobl	19
Metallographic Documentation of the Degradation of Iron and Nickel Based Alloys in HCl and H₂S Containing Environments, between 480 – 680 °C A. Schmid, G. Mori and R. Haubner	26
Characterisation of Chemical Vapour Deposited AlHfN Coatings E. Rauchenwald, M. Lessiak, R. Weissenbacher, S. Schwarz and R. Haubner	33

Chapter 1: Process Simulation and Metallographic Methods

The Influence of Surface Dipping and Bulk Filling Agents on Properties of High-Speed Grinding Wheels: Materialographic-Based Numerical Modelling L. Čelko, P. Skalka, K. Slámečka, D. Jech, L. Klakurková, I. Ročňáková, J. Švejcar, D. Holemý and J. Kaiser	43
A Thermomechanical Model of Retention of a Diamond Particle in Matrices Based on Fe J. Borowiecka-Jamrozek and J. Lachowski	48
Investigation of the Diffusion Couple Ductile Cast Iron / Iron S. Strobl and R. Haubner	54
SEM Imaging of <i>In Situ</i> Tensile Testing of 27CrNiMoV Steel M. Bystrianský, L. Kučerová and Z. Bunda	60
Nanomechanical Characterization of Iron Borides in Fe-Mn-B Ternary Alloys I. Kirkovska, V. Homolová, L. Čiripová and I. Petryshynets	66

Chapter 2: Solidification and Solid State Transformation

Simultaneous Fabrication of Multiple Castings Using Frozen Mold Casting Method Y. Hoshiyama, K. Nakashima and H. Matsumoto	75
The Effect of Heat-Treatment on the Phase Stability of Fe-28Al-15Si-2Mo Alloy V. Vodičková, M. Švec, P. Hanus and P. Pazourková Prokopčáková	80
The Microstructure Evolution of Fe-28Al-15Si-0.2Zr Alloy during Different Heat-Treatment M. Švec, V. Vodičková, P. Hanus and V. Keller	86
Structural Nature of ZnAl₄Cu₁ Alloy Plasticity Affected by Various Technological Treatments M. Longauerová, M. Hodur, M. Vojtko, P. Zubko, M. Glogovský, M. Demčáková, M. Matvija and T. Kvačkaj	92
Microstructural and Fractographic Analysis of CuAlNi Shape Memory Alloy before and after Heat Treatment I. Ivanić, M. Gojić, S. Kožuh and B. Kosec	100

Chapter 3: Interrelationship between Microstructure and Material Properties

Inclusion Engineering in Structural Steels with Enhanced Machinability S. Pytel	109
Texture Evolution during Cold Drawing of Steel Tube with Respect to the Stress - Strain State L. Parilák, P. Burik, P. Bella and P. Kejzlar	115
Microstructure Influenced by Controlled Rolling, Cooling and Thermal Processing of Seamless Tubes Made of Steel 25CrMo4 P. Kawulok, I. Schindler, S. Rusz, R. Kawulok, P. Opěla, H. Navrátil, R. Turoň and R. Jurča	121
Microstructure, Substructure and Mechanical Properties of 9CrNB Steel after Tempering P. Bekeč, L. Parilák, P. Beraxa, M. Fajda and M. Matvija	127
Comparison of Microstructure and Mechanical Properties of Additively Manufactured and Conventional Maraging Steel L. Kučerová, A. Jandová and I. Zetková	133
Structure and Properties of Bakelite Bonded Grinding Wheels V. Bednaříková, D. Jech, L. Klakurková, L. Čelko and D. Holemý	139
The Influence of Secondary Phase on Impact Toughness of Alloyed Iron Aluminides M. Švec, A. Hotař, V. Vodičková and V. Keller	145
Biodegradable Iron-Based Foams for Potential Bone Replacement Material M. Hrubovčáková, M. Džupon, M. Kupková and R. Oriňáková	151

Chapter 4: Welding

On the Surface Welding of Pearlitic Rails: The Control of Dilution and Microstructure P. Suwanpinij, M. Hübner, P. Choeychom, T. Thonondaeng, B. Suksawat, P. Kumma and G. Lothongkum	159
Analysis of the Cause of Damage to the Steam Generator Cold Collector's Dissimilar Weld Joint at Slovak Nuclear Power Plant M. Kapusňák, M. Hajas and M. Adamech	165
Possibilities for Using New Types of Additive Materials for Hardfacing J. Brezina, J. Brezinová and J. Víňáš	171
Analysis of Causes of Baby Stroller Construction Damage L. Klakurková, M. Juliš and P. Gejdoš	179

Chapter 5: Fractures, Defects and Material Degradation

Fractography of Additively Manufactured Titanium Alloy: Influence of Post-Processing Treatment M. Roudnická and D. Vojtech	187
Influence of Boric Acid Solution and Gamma Irradiation on Selective Sorbents D. Marušáková, P. Kůs, L. Szatmary and I.A. Prokúpková	193
Surface Chemistry-Based Surface Defects Situated on Steel Strips Edges M. Gabániová	199
The Failure of Carbon Fiber Reinforced Composite Analyzed by Acoustic Emission V. Mára, J. Krčil, L. Michalcová and E. Čižmarová	205
Size Effect in Plastic Deformation and Failure of Metallic Glasses J. Miškuf, K. Csach, A. Juríková, M. Demčáková, M. Demčáková and V. Ocelík	212
Analysis of Causes of Defects Appearance in Wire Drawing J. Švejcar, M. Juliš, L. Klakurková, P. Gejdoš and T. Zikmund	217
Metallographic Analysis of Stainless Steel Inner Shaft of Centrifugal Pump P. Gejdoš, L. Klakurková and M. Juliš	223
Investigation of Screw Failed During Installation M. Demčáková, A. Mašlejová, L. Hrabčáková, P. Zubko, S. Hockicková, P. Vranec, P. Kalmár, A. Drotár and P. Prislupčák	229
Rarely Occurring Defects on Tinplates P. Vranec, S. Hockicková, A. Mašlejová, M. Demčáková, L. Hrabčáková, P. Zubko, P. Kalmár and A. Drotár	234

Defects of Steel Sheets Joined by Laser Welding A. Drotár, P. Zubko, A. Mašlejová, P. Kalmár, P. Vranec, S. Hockicková, M. Demčáková and L. Hrabčáková	240
Analysis of Corrosion Resistance of Heat Exchanger Plates Made of AISI 316L Steel M. Juliš, L. Klakurková and P. Gejdoš	245
Microstructural and Chemical Analysis of Military Steel from World War II as Part of Sculpture M. Machciník, P. Hornák, M. Halama, J. Bartusz and K. Koval	251

Chapter 6: Fatigue and Creep

3D Textural Analysis of Fatigue Fracture Surfaces H. Lauschmann, K. Tesař and T. Vronková	259
Character of Fatigue Damage under Axial, Torsional and Biaxial Loading of 316L Stainless Steel A. Chlupová, L. Poczkán, J. Man, V. Mazánová, M. Heczko and T. Kruml	264
The Effect of Prior Surface Roughness on Fatigue Life of Nitrided Specimens M. Kianicova, P. Šandera, J. Horníková, D. Kottfer and J. Pokluda	271
Detection of Early Stage of Fatigue Changes in Non-Alloy Steel Using Residual Magnetic Field Method P. Antonik-Popiolek, J. Głód, Z. Jurasz and J. Juraszek	277
Estimating of the Size of the Maximum Non-Metallic Inclusions in Martensitic Steels and their Influence on Fatigue Properties J. Kasl, M. Matějová and Z. Špirit	282
The SEM and TEM Analysis of IN718 Alloy after Fatigue Push-Pull Loading at 700°C J. Belan, L. Kuchariková, A. Vaško, E. Tillová, M. Chalupová and M. Matvija	288
Characterization of Microstructure of Crept Samples of Dissimilar Weld Joint Using Standard and Advanced Electron Microscopy Techniques J. Kasl, D. Jandová, Š. Mikmeková and O. Ambrož	294
Evaluation of Cavitation Damage in a Pipe Bend Made of 0.5Cr-0.5Mo-0.3V Steel by Optical Metallography and Replica Method Z. Kuboň, J. Kosňovská and G. Rožnovská	300
Near-Surface Structure and Fatigue Crack Initiation Mechanisms of As-Built SLM Inconel 718 R. Konečná and G. Nicoletto	306
Fatigue Behavior of Titanium Endoprosthesis P. Hanusová, P. Palček, M. Chalupová and M. Uhríček	312
Influence of Cyclic Loading on the Internal Friction Measured on Magnesium Alloys AZ31, AZ61 and AZ91 M. Uhríček, Z. Dresslerová, P. Palček, T. Oršulová and P. Hanusová	318
SnO₂ Nano/Microfibers for Gas Sensors E. Mudra, I. Shepa, A. Kovalcikova, O. Milkovič and J. Dusza	324

Chapter 7: Nonferrous Alloys

Effects on Microstructure and Corrosion Behavior of a Heat Treated CuZn36Pb2 Brass R. Haubner, S. Strobl and P. Linhardt	333
Small Scale Plastic Yielding of Mg Alloys Assessed with Nanoindentation J. Němeček, J. Maňák and J. Němeček	339
Magnesium Alloy WE43 Produced by 3D Printing (SLM) P. Křištofová, M. Roudnická, J. Kubásek, A. Michalcová, D. Vojtech, J. Suchý, D. Paloušek and E. Alzubi	345
Experimental Verification of Phase Diagram Calculations of Zr-Based Alloys after High-Temperature Oxidation P. Gávelová, P. Halodová, O. Libera, I.A. Prokúpková, V. Vrtílková and J. Krejčí	351
Consequences of Inappropriate Temperatures of the Solution Heat Treatment in Al-Si-Cu Cast Alloys L. Kuchariková, E. Tillová and I. Švecová	357

Characterization of High-Speed Alumina Abrasive Grinding Wheel Z. Pavloušková, D. Jech, P. Komarov, I. Ročňáková, L. Dyčková, M. Remešová, L. Čelko and D. Holémý	365
---	-----

Chapter 8: Powder Metallurgy

Step-Sintering of Fe-(1-3)%Mn-0.8%C Steels M. Tenerowicz-Żaba and M. Sulowski	373
Microstructure and Mechanical Properties of Fe-Cu-Ni Sinters Prepared by Ball Milling and Hot Pressing J. Borowiecka-Jamrozek and J. Lachowski	379
Characterization of Mg-Zn Layered Bulk Materials Prepared by Powder Metallurgy Method P. Doležal, M. Krystýnová, T. Marada and H. Doležalová Weissmannová	385
Influence of Oxide Dispersoids on the Structure Development of Copper Nanocomposite Prepared by Spark Plasma Sintering Technology J. Szabo, K. Ďurišinová, O. Milkovič and J. Ďurišin	391
Preparation of Cerium Stabilized Zirconia Bulk Ceramics by Spark Plasma Sintering M. Vojtko, A. Kovalcikova, V. Puchý and O. Milkovič	396
Sintering of High Mn Cemented Carbides in Mn-Rich Environment M. Tarraste, J. Kübarsepp, K. Juhani, M. Kolnes, M. Viljus and A. Mere	402

Chapter 9: Surface Engineering and Coatings

Microstructure, Stiffness and Corrosion of Bare and Phosphated Specimens Made by Sintering of Structured Iron-Iron Oxide Spheres M. Kupková, M. Kupka, R. Oriňáková and R. Gorejová	411
Thermal Cyclic Behaviour of Conventional YSZ and Mullite-YSZ Thermal Barrier Coatings D. Jech, P. Komarov, M. Remešová, L. Dyčková, K. Slámečka, S. Ravaszová, K. Dvořák and L. Čelko	417
Influence of RF Plasma Jet Surface Treatment on Wetting Behavior of Yttria Stabilized Zirconia SPS Coatings P. Komarov, D. Jech, L. Čelko, B. Pijáková, D. Zhou and R. Vaßen	423
Microstructure Characteristics, Tribology and Nano-Hardness of Plasma Sprayed NiCrRe Coating D. Medved, M. Ivor, T. Chmielewski, D. Golański, K. Pietrzak, D. Kottfer and J. Dusza	430
Microstructure Characteristics, Tribology and Nano-Hardness of HVOF Sprayed NiCrRe Coating M. Ivor, D. Medved, T. Chmielewski, K. Tobota, K. Pietrzak, M. Chmielewski, M. Halama, D. Kottfer and J. Dusza	435
Anodizing of Pure Magnesium in Sodium Hydroxide Electrolyte Solution M. Páleníček, M. Papula, M. Remešová, D. Jech, I. Ročňáková and L. Čelko	440
