

Table of Contents

Preface

Chapter 1: Analytical and Numerical Approaches in Diffusion Processes

On the Analytical Inversion of Solver Matrices Used in Numerical Approximations for the Diffusion Equation T. Glage, A. von der Weth, F. Arbeiter and D.P. Koch	3
The Effect of Flux Dysconnectivity Functions on Concentration Gradients Changes in a Multicomponent Model of Convective Reaction-Diffusion by the Example of a Neurovascular Unit Y.R. Nartsissov	19
Numerical Solution Strategies in Permeation Processes A. von der Weth, D.P. Koch, F. Arbeiter, T. Glage, D. Klimenko, G. Schlindwein, V. Pasler, N. Prothmann and K. Zinn	29
Intrinsic Diffusivities Ratio Analysis in Double Multiphase Systems M.V. Yarmolenko	47
Prediction of Structural and Magnetic Properties of Nanocrystalline Mechanically Alloyed Fe-Ni Powders Using Multi-Gene Genetic Programming Approach B. Mamar, B. Said and R. Rachid	65

Chapter 2: Diffusion Involving Porosity

Dynamics and Geometry Effects on the Capillary Flows in Porous Media for Enhanced Oil Recovery H. Soleimani, H. Ali, N. Yahya, L. Khodapanah, M. Sabet, B.M.R. Demira and G. Kozlowski	77
Influence of Diffusion through a Porous Film under Electrode Surface in Chronoamperometry Problems D. Bogachev	84
Movement and Diffusion of the Helium Atom in Nanostructures (in Pores) with Water E. Kalashnikov and I. Tolstikhin	91
Membrane Covered Probes for O₂ and H₂ Determination - Diffusion through Liquid Films and Solid Membrane in Practice T. Moucha, V. Linek, A. Bouřa and T. Kracík	98

Chapter 3: Analysis of Diffusion Processes

Diffusion in Metallic Glasses and in Oxide Glasses - An Overview H. Mehrer	109
Lithium Tracer Diffusion in Sub-Stoichiometric Layered Lithium-Metal-Oxide Compounds D. Uxa, H.J. Holmes, K. Meyer, L. Dörrer and H. Schmidt	125
The Diffusion Isotope Effect and Diffusion Mechanism in Liquid Cu-Ag and Cu-Ni Alloys U. Sarder, T.R. Paul, I.V. Belova and G.E. Murch	136
The Impact of Matrix Cross-Linking Degree on Chemo-Resistive Properties of Natural Rubber-Carbon Nanostructure Composite S. Stepina, I. Klemenoks, G. Sakale and M. Knite	146

Chapter 4: Materials Processing and Treatment

Analysis of the Influence of the Degree of Reduction of Iron Ore Materials on the Shape and Location of the Cohesion Zone in a Blast Furnace A.N. Dmitriev, G.Y. Vitkina and R.V. Alektorov	157
---	-----

Characterisation of the Microstructure of Plain Carbon Steel Formed during Isothermal and Continuous Cooling Following Austenitisation A.S. Chaus, R. Sobota and V. Tittel	167
Effect of Rolling Orientation on the Microstructure and Mechanical Properties of AZ31B Mg Alloy S. Alzoabi, S.G. Zhou, X.D. Sun, N. Schaal, N. Santos, J. Manganiello, F. Lynch, M. Soriano, S. Es-Said, Y.J. Li, N. Fuhr, B. Avchen, K. Ghandi and O.S. Es-Said	174
Study on the Wear of Cutting-Tools Used in Dry Machining of Cu-10wt%Al-5wt%Ni-5wt%Fe Alloy M.d.A. Guimarães, G.A. dos Santos, M.S. Nascimento, R. Teram, V.T. dos Santos, M.R. da Silva, A.A. Couto and I.F. Machado	194
The Role of Basicity in the Formation of the Structure and Properties of Iron Ore Agglomerates A.N. Dmitriev, E.A. Vyaznikova, G.Y. Vitkina, R.V. Alektorov and A.B. Shubin	201
Microwave Absorption Properties of Fe₄₀Co₆₀ Based Nanocomposites R. Boumagouda, F. Otmane, Z. Hamlati, S. Bellal, S. Zeghdoud and M. Azzaz	209
Precipitation Effects in Cast, Heat-Treated and Cold-Rolled Aluminium AA7075 Alloy with Sc,Zr-Addition M. Vlach, V. Kodetová, H. Kudrnová, M. Leibner, S. Zikmund, V. Šíma, I. Procházka, M. Cieslar, L. Bajtošová, J. Čížek, V. Mára and V. Očenášek	217
