

Table of Contents

Preface

Chapter 1: Theoretical Investigations

Diffusion Laws and Modified Pascal's Triangles M.V. Yarmolenko	3
Increasing the Certainty to Estimate 1-Gravity (1-g) Separation Time Based on any-g Force (N) and g- Equivalent Concepts F.E. Carvajal-Larenas	19
Hawking Radiation: Image of the Invisible R.L.C. Bustamante and B.E.O. Rivera	26

Chapter 2: Investigations of Structural Properties of Materials

Optimisation of Thermochemical Treatment of M2 High-Speed Steel A.S. Chaus, M. Sahul, M.V. Sitkevich and M. Kusý	43
Influence of Cold Working on Hydrogen Diffusion Behaviour in an Austenitic Steel with Transformation-Induced Plasticity C. Hempel, M. Mandel, C. Quitzke, C. Schröder, M. Wendler, O. Volkova and L. Krüger	53
Study of the Strength Characteristics of Agglomerate Depending on its Structure and Phase Composition A.N. Dmitriev, E.A. Vyaznikova, G.Y. Vitkina and R.V. Alektorov	63
Diffusional Relaxation of Quadrupole Interactions of ¹¹¹In/ Cd Probes in IrIn₃ and Related Phases Having FeGa₃ Structure R.L. Newhouse, P. Singh, M.O. Zacate and G.S. Collins	73
Transmission Electron Microscopy Observation of the Fuel Cell Catalyst Degradation during the Oxygen Reduction Reaction M. Pawlyta, S. Smykała, B. Liszka and A. Blacha-Grzechnik	91
Effects of Niobium Microaddition on Carbon Steels P.R. Mei	101
Precipitation Kinetic Analysis in a Maraging 350 Steel Using KJMA and Austin-Rickett Equations L.G. de Carvalho, R.L. Plaut and A.F. Padilha	118
Atomic Force Microscopy Applied to the Study of Metallic Glasses Alloys Based on CuZrAlEr and CuZrAl C.J.R. Lustosa, P.W.B. Marques and O. Florêncio	129

Chapter 3: Nano-Scale Investigations

Synthesis of Pseudoboehmite Nanoparticles and Use in Simvastatin Drug Delivery M.A.A.H. Vicente, L.G.A. Silva, N.B. Lima, R.R. Oliveira, A. Bernussi, B. Sarmiento, I. Barbosa and A.H. Munhoz Jr.	141
Impact of Graphene Nanofluid on Ionic Polarization in Reservoir Sandstone under Electric Double Layer H. Soleimani, S. Sikiru, H. Soleimani, L. Khodapanah and M. Sabet	152
Movement of a Hydrogen Atom through Interstices in a Diamond-Like Lattice V. Askerova and E. Kalashnikov	162
Investigation into the Size Distribution of Al₂O₃- ZnO Nanoparticles Dispersed in DI Water and Following the Impact of CNTs on the Stability, Heat Transfer, and Electricity Transfer of Al₂O₃- ZnO-CNT Hybrid Nanofluid S. Javadipour, A. Shokuhfar, K. Homayouni, Z. Heidary and F. Rezaei	172

Chapter 4: Investigations in the Liquid Phase

Diffusion: Isotope Effect and Manning Factor in Liquids

I.V. Belova, U. Sarder, T.R. Paul and G.E. Murch

195

Stokes-Einstein Relation in Pure Alkali Metals and their Alloys

J.F. Wax, N. Harchaoui and H. Xu

205

Pulsatile Bypass Flow by Means of Power Law and Newtonian Model: A Comparison Guided by Numerical Investigation

A.N. Impiombato, F. Orlandi, G. La Civita, F.S.F. Zinani, L.A.O. Rocha, C. Biserni and E.R. di Schio

215

Chapter 5: Renewable Energy Investigations

Numerical Modeling of Pure and Metal-Foam Loaded PCMs

C. Naldi, M. Dongellini, C. Biserni and G.L. Morini

231

Constructal Design of a Two Ramps Overtopping Wave Energy Converter Integrated into a Breakwater: Effect of the Vertical Distance between the Ramps over its Performance

J.C. Martins, M.M. Goulart, E.D. dos Santos, L.A. Isoldi, M.d.N. Gomes and L.A.O. Rocha

242
