

Table of Contents

Preface

Chapter 1: Numerical Investigations and Theoretical Approaches

Optimizing Diffusion Time and other Resources by Using the Diffusion Rate and Number of Stages Concepts

F.E. Carvajal-Larenas 3

Numerical Analysis of the Unsteady Mixed Convection of a Nanofluid in a Concentric Tube Heat Exchanger

E.R. di Schio, A. Mokhefi, A.N. Impiombato and C. Biserni 13

Statistical Model of Hydrogen Diffusion in BCC Metals

S. Bobyr and J. Odqvist 33

Astrophysics of X-Ray Binary Spectra

R.L. Corral-Bustamante 45

A Simulation Model for the Analysis of Laser Cutting of Stainless Steel Sheets

E. Babalová and M. Behúlová 71

CFD Analysis of Perforated Plates and Open-Cell Materials Aerodynamics

A.F. Miguel 81

Chapter 2: Investigation of Structure and Properties of Materials

Copper, Iron and Aluminium Electrochemical Corrosion Investigation during Electrolysis and Temperature Increasing

M.V. Yarmolenko and S.O. Mogilei 93

Development of Multi-Component B-C-N Diffusion Coating on Wrought AISI M2 High-Speed Steel Substrate

A.S. Chaus, M. Sahul, M. Behúlová, M. Kusý and M.V. Sitkevich 107

Phase Transformations and Martensite Stabilization in $\text{Ni}_{2.36}\text{Mn}_{0.64}\text{Ga}$ High-Temperature Shape Memory Alloy

A.A. Shcherbakov, R.A. Vasin, A.M. Balagurov, V.V. Khovaylo and I.S. Golovin 117

Contribution to the Improvement of the Wear Resistance of the AISI 1010 Material by the Tribofinishing Process Using the Box-Behnken Experimental Designs

D. Saidi, M.A. Djema, K. Hamouda, S. Abdi and M. Bouaziz 127

Experiments on Hydrogen Uptake and Diffusion in $\text{LiNb}_{0.15}\text{Ta}_{0.85}\text{O}_3$ Single Crystals by Infra-Red Spectroscopy

C. Kofahl, S. Ganschow and H. Schmidt 136

Study of Softening Temperature Range of Agglomerate Depending on its Structure and Phase Composition

A.N. Dmitriev, E.A. Vyaznikova, G.Y. Vitkina and R.V. Alektorov 144

Drying of Industrial Sanitary Ware at Low Temperature: A Theoretical and Experimental Investigation

R. Soares Gomez, K.C. Gomes, J.M. Alves de Matos Gurgel, F.E. França da Silva, L. Belizário Alves, H. Luma Fernandes Magalhães and A.G.B. de Lima 152

Mechanical Properties of Indentation in Plasma Nitrided and Nitrocarburized Austenitic Stainless Steel AISI 321

M.D. Manfrinato, L. Sgarbi Rossino, A.M. Kliauga and O. Florêncio 162

Effect of Fe-Cr Coating on the Fe-Ga Alloy Functional Properties

V.V. Palacheva, V.V. Cheverikin, D.G. Chubov, M.Y. Zadorozhnyy, Y.S. Zhukova, A.N. Sheveyko, A.N. Solonin, P.V. Kiryukhantsev-Korneev and I.S. Golovin 171

Impact of Anisotropy and Electromagnetic Modified Effect on Fluid Mobility in Reservoir Sandstone

H. Soleimani, S. Sikiru, H. Soleimani, L. Khodapanah and M. Sabet 179

Chapter 3: Nanoscale Investigations

The Impact of Carbon Nanotube on the Thermal Properties of Polypropylene M. Sabet and H. Soleimani	191
Cooling Effect on Nano Eutectoid Phase Formation of Hypereutectic Zn-Al Alloy A. Hu, H. Hu, X. Wei and X. Nie	209
Structure of Ta/TaN Nanolayered Systems Investigated by Transmission Electron Microscopy B. Sobel, K. Lukaszewicz and M. Pawlyta	219

Chapter 4: Liquid Phase Investigations

Study on Two-Phase Pressure Drop of Methane during Flow Boiling in Mini Channel J. Song, Q.L. Li, J. Sun, X.L. Liu and L.W. Chen	229
Experimental Investigation on Boiling Heat Transfer Characteristics of Liquid Methane in Mini Channel J. Song, Q.L. Li, J. Sun, X.L. Liu and L.W. Chen	239
